Bureau of Biological Survey

Washington, D.C.

Gentlemen:-

Enclosed please find my report on bird migration for Ogden, Iowa and vicinity for the year 1924. In this report I have also included the birds observed, studied and photographed on a two weeks trip last June up to the islands of Stump Lake and Chase Lake, N.Dak. I realize that these should not be listed in my Iowa report but I have inserted them in red ink so that they may be distinguished from the others more readily. I have also added a list of birds previously observed here which may be of some value to you.

Some time ago I wrote you asking for some more blanks as I wanted to make a separate list of the 80 varieties of birds listed and studied in N.Dak. but I have never received the blanks as yet. Please send me two blanks for that purpose and I will gladly prepare this N.Dak. list for you. Also send me eight blanks for the 1925 records as I want to retain copies of all my reports for my files here.

Any comments or criticisms on this report will be gratefully received.

Yours respectfully,

Box 22.
