Jim -

On 29 July 2005, Larry Reis and I visited Cardinal Marsh and found the birds listed below:

- ✓ Least Bittern - 5 at the north end of the main pond.
- ✓ Common Moorhen - 1 Ad. at the main pond.
- ✓ Dickcissel - adults feeding fledged young.
- ✓ Bobolink - flock of 40+, undoubtedly migrants as very few were here earlier.
- ✓ Orchard Oriole - 5 (adults and immatures) feeding on cherries.
