Iowa Birdline (319)338-9881 for 7/12/93

With all the water in the state, who is thinking about birding? It is not surprising that there were only a few reports the past week. The best bird was a SNOWY EGRET in Fremont County.

In the southwest in Fremont County on the 6th, a SNOWY EGRET was seen east of Nebraska City and north of the abandoned truck stop along old hiway 2, along a gravel road to Percival. There was also a LEAST BITTERN on the south side of old hiway 2 about a quarter mile east of some farm buildings, 262 CATLE EGRETS, and five adult LITTLE BLUE HERONS were flyovers there.

In the north-central, three LEAST BITTERNS and VIRGINIA RAILS were at Zirbel Slough in Cerro Gordo County on the 7th. Look in the second channel on the north side of the road and close to the road.

In the southeast in Van Buren County, a SUMMER TANAGER was in the campground at Lacey-Keosauqua State Park on the 5th. Jim Fuller (319)338-3561

THE BUTTER (378)338-3287  
IN THE COMBINATION OF FASCAL-KROGANDRA STATE BANK ON THE 25th
