September 14, 2001

Dear Dr. Dinsmore:

The Wildlife Care Clinic admitted an immature female Mississippi Kite on August 18, 2000. The kite had sustained a fractured humerus and was later euthanized on March 26, 2001. She was found by Jane Clark at 7118 Madison in Urbandale, Iowa.

I hope this information is helpful. If you are interested in a more complete medical history or would like to contact Jane Clark please let me know.

Sincerely,

A handwritten signature in cursive script that reads "Emily E. Sullivan".

Emily Sullivan
