

list 4, vireos-house sparrow

Blue-winged Warbler: Up to 3 were found in Allamakee, Johnson, Lee, Lucas, and Winneshiek counties (DK, ^{CEd}CEd, JJD, MCD, AB, MPr, DeC). One at Yellow River F. on 15 Jun was a "Lawrence's" hybrid form (DK).

Tennessee Warbler: All: 1 at Algona from 1-4 Jun (MCK).

Northern Parula: Up to 4 were found in Black Hawk, Boone, Des Moines, Hardin, Lee, Polk, Warren, Washington, and Wayne counties (MPr, BPr, JJD, ^{Van Buren}CEd, MCD, BE, AB), all at sites where the species is expected..

Chestnut-sided Warbler: 1 at Algona on 2, 5 Jun (MCK) and also 1 at Grammer Grove P. in Hardin Co. on 6, 8, 17 Jun (MPr) and 1 at Mathers Woods in Floyd Co. on 7 Jun (Rgo) were probably late migrants. Two males and a female at Coon Creek W.A. in Winneshiek Co. on 14 Jun (DK) and 1 at Highlandville in Winneshiek Co. on 4 Jul (DeC) were likely nesting birds.

Magnolia Warbler: All: a male at Algona on 2, 3 Jun (MCK).

Black-throated Green Warbler: All: a female at Algona on 4 Jun (MCK).

Blackburnian Warbler: All: at male at Algona from 1-5 Jun (MCK) and a female there on 4 Jun (MCK).

Yellow-throated Warbler: 1 or 2 were found in Des Moines, Johnson, Lee, Polk, and Van Buren counties (MPr, CEd, MCD, PHe, BE), all known sites for the species.

Prairie Warbler: A male at Kent P. in Johnson Co. on 23 Jun (CC*) - ^{1st} ^{report} was the only report the first for summer since 1998.

Cerulean Warbler: 1 or 2 were found Appanoose, Boone, Fremont, Johnson, Lee, and Warren counties (RLC, PHA, RIA, MPr, BPr, TSt, MCD, PHe) where this species is expected. None were at Wanata S.P. where it has been regular in recent years (LAS).

Black-and-white Warbler: A newly fledged young at L. Ahquabi S.P. in Warren Co. on 4 Jul (JSi) suggests it came from a nearby nest while an adult was found at Woodland Mounds S. Preserve in Warren Co. on 12 Jun (MPr). The nesting status of this species in Iowa is still an enigma although it apparently nests at least occasionally.

Prothonotary Warbler: From 1 to 5 were found in Allamakee, Appanoose, Boone, Clayton, Des Moines, Johnson, Linn, Lucas, Warren, and Wayne counties (MPr, BPr, JJD, RLC, DAK, MCD, CEd, AB, PHA, RIA).

Worm-eating Warbler: All of the reports were from the Croton or Donnellson units of ^{Shimick} Stephens S.F. in Lee Co. (CEd, MCD, PHe, MPr, BPr).

When the spec is regular

Ovenbird: Most: 18 in Stephens S.F. in Lucas Co. on 3 Jul (AB). From 1 to 8 were found in Fremont, Kossuth, Lee, Marshall, Polk, Van Buren, Warren, Winneshiek, Woodbury, and Worth counties (MPr, BPr, MCK, BE, DeC, BFH, RGo). A nest found in Winneshiek Co. on 1 Jun contained 2 ^{Ovenbird} and 3 cowbird eggs (Larry Reis fide DeC).

Louisiana Waterthrush: From 1 to 4 were found in Jackson, Lee, Van Buren, Warren, Washington, and Woodbury counties (MCD, JLF, Ced, MPr, BPr, BFH), all at known sites for this species.

Kentucky Warbler: There were more than usual reports for this species with ca 10 ^{at} Cairo Woods in Louisa Co. the most (PHe). Elsewhere from 1 to 6 were found in Appanoose, Fremont, Lee, Lucas, Muscatine, Warren, Washington, and Winneshiek counties (RLC, MPr, BPr, MCD, Ced, AB, TSt), all within its normal nesting range in Iowa.

Mourning Warbler: All: a male at Dickson Timber in Carroll Co. on 5 Jun (MPr).

Hooded Warbler: All of the reports were from L. Ahquabi S.P. in Warren Co. (PHA, RIA, MPr, JSi, TSt) or the Donnellson Unit of Stephens S.F. (MCD, Ced, PHe).

Canada Warbler: All: a female at Little Sioux R. Access in Clay Co. on 3 Jun (LAS).

Yellow-breasted Chat: From 1 to 3 were found in Appanoose, Johnson, Lee, Linn, Louisa, and Marshall counties (RLC, Ced, MCD, PHe, MPr, BPr).

Summer Tanager: Singles were found at the usual sites in Fremont, Lee, and Van Buren counties (MPr, BPr, MCD, Ced). One at Ledges S.P. on 16 Jun (PHA, RIA) was a local first.

Scarlet Tanager: From 1 to 4 were found in Carroll, Cerro Gordo, Clayton, Dubuque, Floyd, Johnson, Kossuth, Lee, Linn, Polk, Poweshiek, Van Buren, Warren, Washington, Winneshiek, and Woodbury counties (MPr, RGo, TSt, MCD, MCK, BE, CV, RV, BPr, DeC, GLV).

Eastern Towhee: Up to 4 were found in Clay, Kossuth, Polk, Winneshiek, and Woodbury counties (LAS, MCK, BE, DeC, FL, GLV).

Spotted Towhee: Orsag saw a towhee at Hitchcock N.A. that had some characteristics of this species. ^{On 11 Jun} Eastern x Spotted Towhee. See Siskin (IBL)

Lark Sparrow: Up to 10 were found in Appanoose, Black Hawk, Cerro Gordo (brood), Davis, Fremont, Marion (brood), Polk, Tama, and Warren counties (RLC, TSt, RGo, PHe, MPr, BPr, JGi).

Grasshopper Sparrow: Most observers found at least a few although Zaletel noted that he saw none. Two nests were found in Poweshiek Co. (CV, RV).

Henslow's Sparrow: Most: 14 at Medicine Creek W.A. in Wayne Co. on 8 Jul (AB). Elsewhere, from 1 to 8 were found in Appanoose, Davis, Iowa, Lee, Polk, Ringgold, Van Buren, and Wayne counties, about typical of recent years (RLC, MPr, MCD, KN, RIC, CEd, BE). This species has been either more abundant or much easier to locate in the last 5 years. (AB)

Swamp Sparrow: Up to 2 were found at Muskrat Sl. in Jones Co. (MCD, CEd) near the edge of this species range in Iowa. (R6)

Blue Grosbeak:

Dickcissel: Several observers noted that this species was quite common this summer. Nests were noted in Poweshiek Co. (CV, RV).

Bobolink: Several people noted that this species was abundant this year (PHe, JJD). *1/2 Dickcissel. Bobolink were fully early to find*

Eastern Meadowlark: 1 along the Floyd R. in Woodbury Co. on 7 Jun (BFH) was out of its usual range.

Yellow-headed Blackbird: Most reports were from known colonies. At least 10 were at a restored wetland near Glidden in Carroll Co. (MPr). *for Hawatta*

Great-tailed Grackle: From 1 to 3 were found in Clay, Clinton, Hancock, Poweshiek, Story, Tama, and Warren counties (LAS, PVN, Phe, MPr, BKP, LJP, WO, HZ, AB). A bird reported last summer as at Teal Basin was actually at Blue Wing M. in Cerro Gordo Co. } check

Orchard Oriole: From 1 to 3 were found in Allamakee, Black Hawk, Boone, Davis, Fremont, Iowa, Johnson, Lee, Linn, Louisa, Warren, and Winneshiek counties (MPr, KN, TSt, JJD, BPr, CEd, MCD, JGi, DeC). (R6)

Eurasian Tree Sparrow: All reports were from Des Moines and Louisa counties where this species is entrenched (MCD, PHe, PL, MPr). Lowther found ~~one~~ pair near Burlington with a third clutch in early July. *or*
