Blue Birds	Pair	April 1	7th summer nesting on property (Banded 5 young 1st nesting 1981 all fledged)
✓ Summer Tanager	Male	May 5-6	1st year male - other Obsvrs. Karl + Ruth Goellner, Berle + Pat Layton - Carefully observed on suet both May 6 + 7, approx 30-35' w/ 7X35 B&L. No dark wings or tail Red Pink Head, Back, upper breast, lower breast to tail yellow, balance olive tan.
✓ Summer Tanager	Female	May-16	Hickory tree 40' from house olive green above yellow below - carefully observed 7X35 B&L
✓ Pine Warbler	1	4-27	Carefully observed for approx. 30 min. All identifying features seen

Tom - Will try and be regular from here on -
 Too busy, I guess plus a day late when thinking about it. Our place is 33 acres with approx. 20 more adjoining habitat. Sending over spring banding from 1981 as a point of interest to you. Layton missed this spring, first time since 1977. Find \$1.00 for materials & instructions for future reports - Hope there is some value here - Pete W. is coming out in near future to hopefully list nesting birds on home place -
 Sincerely Weir Nelson
