

Jan. 22, 1982

Dear Sir
Articles in Living Bird by
W. M. Peck, Jr. published Jan
& Dec. 1981. Peck's number
in Living Bird Jan. 15-1982
states that the year 14 (about)
is common that day at my place
Common that day on Jan. 26, 1982
Peck. There on Jan. 26, 1982
There were 14 (at some time)
at the birds and ground pecking
beneath it. I had had a pair
that had been into ground the
a few birds with them on the
I had had many of them
have had many of them
wasteful.

Muriel

almost constantly at my feeders.
I have 2 sunflower seed feeders
1 thistle feeder and 1 suet feeder.
I really think my heated bird
bath is more of an attraction
than the feeders. Have had it
heated since 1957 and keep it
filled all the time.

Bird bath was the attraction
for 2 Mocking Birds which came
several days in Nov. 1966 - verified
by Dr. Martin Grant U. N. I. College
and resulted in an article in
Adas Talk. Record 11-8-1966.

~~I~~ ^{some days} have as many as 17
varieties of birds at feeders or
bird bath this time of year.
Very truly yours.
Marcel C. Orwick
