V, no information -- observer reputation suspect.

Common Eider

50. (160). *Somateria dresseri* Sharpe. American Eider.

The American Eider is only an accidental visitor in Iowa. G. H. Berry reports it as a "rare winter visitant" in Linn county.

Dr. G. C. Rich writes: "Rare transient. I have a mounted specimen, male, shot in Woodbury county, Nov. 1, 1901."

Kumlien and Hollister report it as rare on Lake Michigan in winter, Racine, 1875 (Hoy); two at Milwaukee; one at Lake Koshkonong, Nov. 1891 (Bds. of Wis., 25-26).
