Sandhill Cranes May 6, 1984

Indianola

We heard and saw two Sandhill Cranes flying at an altitude of about 500 feet southwest across Lake Aquabi towards Camp Wesley Woods.

The birds were very large (about great blue heron size), uniformly gray with long extended necks and legs.

They called about six times.

5/6/84 - 10:35 a.m. we heard
sandhill cranes calling. Looked
up and saw two cranes
flying about about 500 ft
above us over the entrance
of Aquabi St. Park. They
were flying south west towards
Camp Wesley Woods.

They were very large,
about great blue heron size,
necks were fully extended
straight out; legs extended
beyond tail.

The birds called about
6 times.
