

Dear Mrs. Peterson,

Enclosed are three photographs of a possible Tundra Swan (Cygnus columbianus) that I observed on March 13, 1984 at Schnyder Bend near Sioux City, Iowa.

I was not able to make a positive identification of the swan and I refer to it as the Tundra and not the Trumpeter because I first heard of a "Tundra" Swan sighted at Schnyder Bend over the Iowa Bird Line.

I submitted my field notes to Thomas Kent if you wish look them over.

Sincerely,
Jack A. Holloway III
