When? date(s): January 22, 1984 time: 8:30 to 8:35
Who?your name and address: Francis L. Moore, 336 Fairfield St., Waterloo, 1A 50703
others with you: Bob Myers
others before or after you: None
Describe the bird(s) including only what you observed. Include size, shape, details of all parts (bill, eye, head, neck, back, wing, tail, throat, breast, belly, under tail, legs, feet). Also mention voice and behavior.
A large hawk, size of a Red-tailed Hawk, when it flew I knew it was
a large accipiter by characteristic flight pattern; flap, flap, soar, etc.
with a very long tail. As the bird flew and after it had landed the
undertail coverts were clearly visible and looked as though they
undertail coverts were clearly visible and looked as though they were hanging. The large white eyestripe was clearly visible.
Similar species and how eliminated: Coopers Hawk does not have wide, bold, white eyestripe or flufty undertail coverts. Sharp-shinned Hawk is a lot smaller than this birdwas.
Did any one disagree or have reservations about identification?
If yes, explain:
Viewing conditions: give lighting, distance (how measured), and optical equipment: Excellent viewing conditions, sunny, bright at approx. 50 yards at closest with Bushnell 20x 60 Spacemaster Scope.
Previous experience with species and similar ones: Have seen many N. Goshauk in last
References and persons consulted before writing description: None
How long before field notes made? 2 hrs. this form completed? 10 hrs.
