

SEASON: Winter
YEAR: 1980-81

Betty Walter, Don Priebe

SPECIES	NO.	DATE	LOCATION - COMMENT - OTHER OBSERVERS
<u>White-winged Crossbill</u>	<u>1</u>	<u>12-21-80</u>	<u>An immature male appeared in my backyard and has been feeding there every day since. Many people have seen him, including Wayne, my husband, Betty Walter, Marie Spear, Marcelle Shouck. This probably is some bird Marie Spear had at her feeder.</u>
<u>Sandhill Crane</u>		<u>12-21-80</u>	<u>Wayne and I saw this bird at the Princeton Refuge. We located this large grey bird with a scope from a hill overlooking the north end of the refuge. Then we drove down on to the flat when we could see him with the scope. Loss Selcoch, Jane Getzler & Barbara Wilson saw him 12-21-80. Don Priebe saw him several times. Last date I have is 1-7-81.</u>
<u>Mourning Dove</u>		<u>12-26-80</u>	<u>Betty Walter, Marie Spear, and I saw him while watching a Marsh Hawk. He flew low over the ground in front of us & we saw his jointed wings, barred tail, & his facial pattern. Don Priebe saw him in same area.</u>
