

12/1/84

Dear Mike -

I waited until the last minute to mail our fall reports, but even so I have another addition:

☞ Northern Shrike - 1 - Nov 30 - n. Marshall Co.

Phyllis Harris & I

- such a good one I wanted to get it in.

Good luck with compiling all the reports! It sounds like a formidable job -

Good birding!

Beth Praeschedt

Dear Mike -

After my "Northern Shrike letter" was mailed, I realized I hadn't noted any details about it - We couldn't see any streaking on its breast, but it did a lot of tail-pumping, and the mask did not extend across the top of its bill - it was white there - so we knew it was a Northern & not a Loggerhead.
