

Chukar
1966
Pleasantville, Marion Co., IA
unknown
IBL 36:82

Record Number: 81-IK
Classification: NA

REFERENCE

Field Reports: IBL 36:82.

VOTE (1981): on record 1-III, 1-IV, 5-VI (on ID 2-III, 2-V, 1-VI)

Did not become established on their own, VI (V).

It does not appear to me that the chukar is a viable species in Iowa. Most records are from areas of game farms or clandestine releases. In time the Davenport area may prove to be an exception. The species is very common and widespread in captive exhibits throughout the state, VI(III).

IV, no details.

VI (VI), no data.

81-IK

Brown, W. H., 1966, Field reports. Iowa Bird Life ~~36~~:81-84. p. 2.

"Chukars have been released near Pleasantville but
it is not known how well they will succeed."
