118. (266). *Numenius borealis* (Forst.). Eskimo Curlew.

The Eskimo Curlew is also a rare migrant in Iowa. It was listed by Allen (White's Geol. of Iowa, ii, 1870, 426), and John Krider says: "I found it in Iowa in May, migrating westward" (Forty Years' Notes, 1879, 68).

County records: Des Moines—Mus. No. 16803, taken at Burlington, April 5, 1893, by Paul Bartsch. Jackson—"rare transient" (Giddings). Johnson—specimens in University museum taken by Frank Bond (Nutting, Proc. Iowa Acad. Sci., 1892). Van Buren—"spring migrant, very rare" (W. G. Savage).]
