

Red Phalarope

< 1870

none, IA

Record Number: 81-AM

Classification: NA

on list, no specific record; Allen 1870

REFERENCE

Allen 1870: "221. Phalaropus fulicarius, Bonap. -- Red Phalarope."

VOTE (1981): 3-V, 4-VI

VI, Allen's list unreliable.

V, no details.

VI, Insuf. data -- not seen by Allen himself. Ck History of Fremont County Iowa 1881 by Todd, J. E. p 346. Was in SUI lib 977.746

VI, no data.

V, possible but no evidence presented.

Allen 1870

- 221. *Phalaropus fulicarius*, Bonap—Red Phalarope. ] 188. (222). *Crymophilus fulicarius* (Linn.). Red Phalarope.

The Red Phalarope "breeds in the far north, coming south in winter to the northern half of the Mississippi Valley. Has been recorded from Illinois (Nelson) and from Minnesota (Hatch)"

Anderson 1907  
pp 211-212

(Cooke, Bird Migr. in Miss. Val., 1884-85, p. 89). The species is listed by J. A. Allen (White's Geol. of Iowa, 1870, 426). G. H. Berry reports it as a "rare migrant" at Hawarden, Sioux county. ] 1  
2

Kumlien and Hollister state: "Small flocks may be met on Lake Michigan and Lake Superior in autumn, and occasionally straggling individuals wander to the inland lakes . . . four on Lake Koshkonong, September 3, 1891, one June 4, 1877" (Bds. of Wis., 1903, 41).

*Phalaropus fulicarius* (Linnaeus). Red PhalaropeDuMont 1934  
p 156

This species was listed by J. A. Allen (White's Geol. of Iowa, 1870). Anderson (1907) listed a report by George H. Berry from Sioux County. There are no Iowa specimens. T. C. Stephens recorded (Wilson Bull., XXVIII, p. 92) a specimen taken in Union County, South Dakota, November 28, 1912. It was secured but a few miles west of Sioux City, Iowa. ]
