IBL citations are for Field Reports, Christmas Bird Counts, Bird Banding Summaries, and Records Committee Reports in Iowa Bird Life; doc = documentation on file with Records Committee; no detail = no description of the bird; RC() = Records Committee (record number); Clark = William S. Clark; + = accepted record; - = record not accepted.

Reports since 1970 were all from fall and winter (September through February). Most were from October (5), December (5), and February (4), months when this species is expected. Of course, other hawks, including Krider's Red-tailed Hawk (*Buteo jamacensis krideri*), also migrate through and winter in Iowa during these months and may be confused with Ferruginous Hawk.
