

7 Jun 80 SPEARS

CONTRIBUTOR: Marie Spears

OTHER OBSERVERS: Lisa Spears

SEASON: fall 103 Southview Circle

YEAR: 1980 Shenandoah 51601

SPECIES	NO.	DATE	LOCATION - COMMENT - OTHER OBSERVERS
white-winged crossbill	1	12-18-80	location I saw it at my home 103 Southview Circle Shenandoah, Iowa.
			Comments
			First saw crossbill at 4:10pm setting on tray at base of goldfinch feeder eating the niger seed. My daughter and I viewed him from kitchen window which is no more than 10 feet from the feeder. We saw the crossed bill plus one white wing bar. It's coloring was yellow with an orange tinge. The crossbill arrived again the next morning at 7:45am. It was seen daily at the feeder through Dec. 22nd. Since that date this same specie has been seen daily at Ruth Phipps' feeder. When it is at her feeder no crossbill is at my feeder.. We feel it is the same bird.
