Dear Dr. Kent,

Enclosed is a photo graph of a Mountain Bluebird taken March 16, 1980 in north Iowa. Thelma Frossman of Route 4 Mason City discovered the bird in the yard of her farm home 5 mi north east of Mason City. She called various other members of the north Iowa Nature Club who confirmed the sighting. I took the photograph with an Olympus OM1 using a 400 mm. telephoto lens and Kodacolor 400 film. The day was over cast and the bird was difficult to approach closely. It was seen for only one day. If you have any questions you may contact me.

Yours truly,
Curt Nelson
