87. *Cryptoglaux funerea richardsoni*—Richardson's Owl. I found one specimen of this owl north of Floyd, July 14th, 1915. The body had been crushed by an auto, but served for identification, though worthless as a specimen. A specimen was taken near Osage in 1914, and Mrs. F. May Tuttle saw a specimen in Osage March 25th, 1916.] 6,7,8

10. *Cryptoglaux funerea richardsoni*.—Richardson's Owl.

This species was placed in the hypothetical list by Anderson, as no actual specimens had been taken in the State. On the face of the statements in the present paper this owl would be added to the State list. Dr. Bailey examined the specimen and found it to be a Screech Owl (*Otus asio*) in the gray phase.] 7?
