

Rock Wren  
30 Jun 1902  
Des Moines, Polk Co., IA  
Lester Fagan  
DuMont 1931

Record Number: 93-FW  
Classification: NA

REFERENCE

DuMont, P.A. 1931. Birds of Polk County Iowa. Des Moines  
Audubon Society, Des Moines.

VOTE: 5 NA

NA, DuMont did not include this record in his later  
publication on Iowa birds. No details are available, and nesting  
seems somewhat unlikely, but possible. /thk

Rock Wren

DuMont, P. A. 1931. Birds of Polk County Iowa. Des Moines, Des Moines Audubon Society

[COMMON ROCK WREN, *Salpinctes obsoletus obsoletus* (Say).

Keyes and Williams, 1889, p. 157: Not common. Lester P. Fagen reported finding this western specie nesting at Des Moines, June 30, 1902.

This specie has been reported in the western part of the state, but a specimen would be desirable to establish it as a breeding bird this far east.]
