

Gull-billed Tern  
< 1870  
none, IA

Record Number: 81-IA  
Classification: NA

on list, no specific record; Allen 1870

REFERENCE

Allen 1870: "273. *Gelochelidon anglica*, Bonap -- Marsh Tern."

Anderson 1907

VOTE (1981): 3-V, 4-VI

VI, not based on data.

VI, most unlikely away from salt water.

VI, insufficient data.

V, no records given.

V, no details.

Anderson 1907  
p 386

3. (63). *Gelochelidon nilotica* (Hasselq.): 'Gull-billed Tern.

The Gull-billed Tern was included by J. A. Allen in his list (1870). Thomas Say reported the "Marsh Tern" (*Sterna aranea* Wilson) at Engineers' Cantonment in 1819-20, but perhaps referred to the Black Tern (Long's Exp.). The species is of southern distribution, but has been recorded from Illinois and Michigan.
