

Black-throated Blue Warbler

Sept. 7, 1992 ~ 9:30 a.m.

Drab warbler at mid to low canopy level,
near trunk. Seen only 2-3 seconds from
~10 meters with Zeiss 10x40 binoculars.

Olive-brown dorsum and buffy underparts.

Pale superciliary line on dark face. White
"pocket handkerchief" seen well. No wingbars.

Overcast skies.
