July 12	2	Pair feeding juvenile ^{sp} Cowbird	FLM, RCe
July 16	1-2	Bird(s) feeding juvenile ^{sp} Cowbird (6 feedings observed)	RCe

Observers: Robert Cecil, James P. Sandrock, Charles Fuller, Jane Fuller, Francis L. Moore

* * *

Jim,

I had intended to use this as part of ~~My~~ my GENERAL NOTES, but Jim Sandrock deleted it, which is OK. Anyway, it summarizes breeding evidence.

Intrestingly, I made probably two dozen trips to this exact area this spring and early summer and found not a trace of Worm-eating Warblers although I was always looking and listening for them. Then, on June 20, 6. This was like last summer, when I found them only from mid-summer on.

Bob Cecil
