From other species, copies of

ACTY

ruby-crowned kinglet (Jim Sandrock)

8:15 AM seen in conifer grove near Solon.
small bird, warbler sized -- approx 4 inches(?)
5 ft up in sapling on limb
about 5-10 feet away
black winged
2 bright white wingbars
plain greenish breast
greenish back and cap
white eyering
fairly active
black legs
small black bill

Cooper's hawk (Peter Petersen)

obs. at 40 yards, three times, in flight
had good opportunity to judge size
all observers saw rounded tail, as bird flew directly over car
female, adult

sharp-shinned hawk (Peter Petersen)
adult; small size, notched tail observed.

sharp-shinned hawk (Tom Kent)
accipiter with long tail -- tip very square
almost size of kestrel
adult
seen twice, once in air and once on ground; range 50 feet

double-crested cormorant (Tom Kent)
large size, dark body, long neck, long bill.
orange gular pouch.
some white on belly -- imm.
seen in flight and perched on edge of ice.

(Observer thoroughly familiar with this species--compiler)
