Dear Tom,  
Mar. 12, 1983

Visited Wexford today & met Darwin Koenig by chance. Saw a Fox Sparrow, but little else. Saw a Tree Swallow further north in Minnesota, probably a record arrival.

The only winter season record of possible interest is 12 Lapland Longspurs seen & heard with Horned Larks in Allamakee Co. near Upper Iowa River on February 5.

Great your father for me. Sincerely,  
Fred

6-3-83

Dear Tom,

Few Iowa reports:

- 1 Am. Coot Wexford 3-12
- 1 Killdeer New Albin 3-12
- 4 Winter Wren Wexford 3-12
- 1 Fox Sparrow " 3-12
- 3 Bald Eagle Allamakee Co. 3-12

- 1 Osprey Lansing 4-17
- 8 Turkey Vulture Lansing 4-17

That's it.

I have 12 people, 6 each of two weeks June 12-17 and June 26-July 1 for birding workshops in Bayfield Co. Have 6-7 from Iowa. Should be an education and fun. Scouted the area last weekend. Saw Gray Jays, Piping Plover, Olive-sided Flycatcher.
