General Notes: Summer in northwest Iowa wetter than normal in June,  
with relatively cool temperatures early in June. July generally  
a little warmer than normal, with about normal rainfall.

Species	No.	Date	Location--comments--other observers
✓ Black-crowned Night Heron	5 (+)	6-9	Jemmerson Slough, Dickinson Co.
✓ American Bittern	1	6-9	Grover's Lake, Dickinson Co.
✓ Forster's Terns	26	6-9	Jemmerson Slough, Dickinson Co.

Tom--Sorry I don't have anything else to report for the summer. I left on assignment to Cape Churchill, Manitoba, Canada in early June and didn't arrive home until late July, so I didn't get in much local birding this summer (and since getting back I've been so busy with paperwork as to not be afield much!) Saw some great stuff up at Cape Churchill, though--wish they'd been Iowa sightings so I could report them here!!
