PADELFORD  
Nov. 30, 1983

Dear Tom,

We haven't banded much in Iowa this fall, therefore, not much to report. Waterfowl numbers have been quite low.

Loren & I saw a swan, Nov. 25, flying over Manawa. I'm only assuming it's a Tundra, as we could identify it only as Swan species.

All sightings except for Nov. 22 (T.B. & B.P.) were made by Loren & I.

Sincerely,

Babs Padelford
