July 6  
Visited Folsom Lake Heronry this morning — 36 Little Blues, (all adults except for 1); 1 Yell-crowned Night Heron (Ad) + 200+ Cattle Egrets. All seen in flight away from colony at 5<sup>55</sup>:6<sup>15</sup> am. (Yell-crowned NH may not be nesting in colony). Canned in July 1 with Paddocks — 135+ nests, ~~50~~ ranging from under construction to 5 eggs. LBH in colony, but not seen incubating, although seen carrying sticks. (Almost certainly nesting). Spectacular!

Prediction here that water will stay high all summer, so herons should be successful.

10 Less yellowlegs also nearby.
