Fall Field Reports

12/2

sorry I am a little late, too, but I didn't have anything to report myself and intended to see our group last night.

I had a male wood duck at Dulugue retention basin yesterday, and a pair came in to Swiss Valley Nature Preserve this A.M. also five scaps, two herring and 5 ring-bill gulls at Dulugue 12/1.

Lots of ~~red~~ rough leg hawks coming thru - 7 seen at 61-151 interchange south of Dulugue this week by R. Walton. also numerous eagles are moving south - north of Dulugue at Sherrill Nov. 23 and at Green Island Nov. 18 - by R. Walton. Turkeys are doing real well at and near Swiss Valley, maybe 40 to 50, per R. Walton.

Bill Herrmann had two red-shouldered hawks at Massey Station south of Dulugue Nov. 20. + three evening grosbeaks 12/1.

Sincerely,

Geo. Crossley
