N. S. Halmi
Rt. 6
Iowa City, Iowa 52240

Dear Mr. Halmi:

I offer the following observations from northeastern Iowa. Some from last summer are very late, but I report them because of their importance, and because evidently neither Darwin Koenig nor Joe Schaufenbuhl reported them to IBL. For years I was a regular contributor to IBL, but recently have contributed only irregularly. If you would like what contributions I can offer, please send report forms.

1978, June 5: Cooper's Hawk, Yellow River Forest, seen near start of backpacking trail. This long-tailed accipiter flew across a meadow and was seen by several observers.

Broad-winged Hawk - 2, Y.R.F.

Ruffed Grouse - 1, "

Black-billed Cuckoo - 1, "

Veery - 1, Cain's

Siding, Hwy 26, Allamakee Co.

Cerulean Warbler - 2, Y.R.F.

Yellow-breasted Chat - 1, "

All above except Veery were seen during 2nd. Annual Iowa Foray.
