

27 Nov 85

The only thing I have to report beyond what I've already sent in is this documentation on a ♀ Greater Scaup seen 20, 23, 27 November at Hickory Grove Lake. (+ White Winged Teal at Saylorsville.)

There have been a lot of Taysland Longspurs in Story County for the past several weeks. For the most part they seem to be well spread out in flocks of 25-100 rarely to 200-600. The biggest flock was 2,500 on 23 November just South of Hickory Grove Lake.
