

July 23, 1986

Dear Jim -

Thank you for your note,  
comments, and arrangements  
for my receiving "Iowa Bird life".

First sighted the House Finches  
about April 25 - not more than  
two pair and mostly one pair  
at a time at our window

feeder - later saw immature  
with female at bird bath -

Saw pair ~~female~~ males - or one  
female + immature at my  
Aunts Finch Feeder in her

backyard - July 19 - Since  
+ during your visit - sighted

No House Finches at feeder  
at my house - Thought I  
saw male Fly into our  
crabapple tree - red fruit

now rippening -

Hope this is helpful -

Thanks again - Dorely Clayton Pohl
