Dear Jim,

Thanks for sending the Iowa summer report. Receiving such a well prepared report before the deadline makes my job a lot easier. I did not have any problems reading your computer printout or any questions concerning the information in it.

I would appreciate receiving photos of the White-faced Ibis and Rufous Hummingbird if possible. Both would be quite suitable to accompany my article, especially for the nesting season when relatively few photographs are submitted.

Sounds like it was a relatively interesting summer season in Iowa. Hope the good birding continues into the fall migration. Thanks again for all of your assistance.

Sincerely,

Bruce Peterjohn
