Westerville, OH

Dear Bruce,

Thanks for your letter and feedback on the field reports material. I'm glad the printout was legible. I changed ribbons after I printed that out and found out that it makes a world of difference. Hope that this letter shows it.

Enclosed are photos of ibis in flight and ibis nest. Both were taken by Erik Munson of Ames on 13 July at Jemmerson Slough, Dickinson County (just west of Spirit Lake), Iowa. Tom Kent is also going to look at them but I hope that they might be useful for American Birds. I haven't seen anything more of the hummingbird photos.

I sent my report early because I left on vacation on 6 August. When I returned, I had a few late reports waiting for me. The only things of consequence were:

Snowy Egret--an immature at DeSoto NWR on 26 Jul and 2 immatures in Fremont Co. on 27 Jul (both Babs and Loren Padelford, Bellevue, NE)

Cooper's Hawk--a nest near Saylorville fledged 2 young (Bery Engebretsen, Johnston, IA)

Best,
