3/9/86

DEAR Tom -

Today at about 1:00 pm while in
our woods (3 mi. west of Princeton, Ia.)
I saw an estimated 20 Sandhill
cranes in a V pattern fly overhead ^{(south to}
_{North)}
Quite low - About 100 yds high. The lead
crane was "singing". Interestingly,
Kelly McKay called to say he saw 56
Sandhill cranes this afternoon at Rapids
City, Ia - which was probably the same
flock.

Sincerely,

Bill Barker
