Similar species and how eliminated:

DON'T KNOW OF A SIMILAR SUMMER SPECIES

Did anyone have reservations about identification? If so, explain:

No

Viewing conditions: lighting, distance and how measured, optical equipment used. SUN TO THE RIGHT STILL WELL ABOVE HORIZON

Birds 20-35 FEET AHEAD OF CAR

7X35 BINOCULARS, 7X50 BINOCULARS

Previous experience with this species and other similar ones: HAVE SEEN PROBABLY SEVERAL THOUSAND HORNED LARKS OVER THE PAST TEN YEARS IN NUMBERS FROM SINGLE INDIVIDUALS TO LARGE FLOCKS.

BREEDING BEHAVIOR: Give all details observed that indicate that the species breeds on the block. If nest, eggs, young, or courtship display were observed, describe in detail.

JUVENILES STAYED CLOSE TO ADULT FOLLOWING IT AS IT RAN ABOUT THE ROAD, THEN INTO THE GRASS AT THE SIDE OF THE ROAD WHEN A CAR APPROACHED

If books or other birders were consulted before writing up the documentation, please list them here:

NATIONAL GEOGRAPHIC FIELD GUIDE - TO VERIFY JUVENILE PLUMAGE  
MENTION OF BRIEF JUVENILE PLUMAGE INDICATES THAT THE JUVENILES WERE HATCHED ON THE BLOCK.

How long after observation were field notes made? AT THE TIME

How long after observation was this form completed? 2 HOURS
