Perry, IA 50220

Dear Bob:

Below are corrections/additions left over from my fall 1986 report. You can rewrite or use as is.

Double-crested Cormorant: The peak of 900 at Red Rock (Iowa Bird Life 57:14) was on 26 Oct, not 14 Oct 1986.

Cattle Egret: Peak of 71 on 2 Aug 1986, at Forney L. (Iowa Bird Life 57:14) was actually 45 near Forney L. and 26 at Council Bluffs.

Piping Plover: 3 at IBL Ponds on 3 Aug 1986 (Iowa Bird Life 57:16) were actually seen on 2 Aug.

Red Knot: Report from Saylorville Res. (Iowa Bird Life 57:16) was actually of 2 birds on 5 Aug and 1 on 5-6 Aug.

Sanderling: Peak of 49 on 11 Sep 1986 (Iowa Bird Life 57:16) was at Saylorville Res., not Big Creek L.

Bonaparte's Gull: An immature on 11 Aug 1986 at Saylorville Res. (SD, MPr, MDx) was extremely early.

Ring-billed Gull: Peak at Saylorville Res. (Iowa Bird Life 57:17) was actually 8,000, not 6,000.

Forster's Tern: Peak of 82 at Saylorville Res (Iowa Bird Life 57:18) was on 24 Aug, not 22 Aug.

Water Pipit: Peak at Big Wall L. on 25 Oct 1986 (Iowa Bird Life 57:19) was actually 71 birds, not 17.

Solitary Vireo: Peak of 26 in Ames (Iowa Bird Life 57:20) was on 30 Sep, not 30 Aug.

Pine Warbler: One found dead at Alleman on 4 Oct 1986, is now a specimen at ISU (SD).

Blackpoll Warbler: Report of 1 on 21 Aug in Des Moines (Iowa Bird Life 57:21) was submitted by (SD).

Fox Sparrow: 2 at Saylorville Res. (Iowa Bird Life 57:22) were on 27 Sep 1986, not 29 Sep.
