SUMMER REPORT 1989

EASTERN BLUEBIRD: Good year with 70 nests and over 200 fledged by July 31 on my trail.

PURPLE MARTIN: Best year ever in my colony with 93 nests and 345 fledged. I had reports from 7 other colonies that had good years also. I found a roost in late July near Elkhart that was in a corn field that had over a 1000 birds in it on July 31st.
