FIELD REPORT SUMMER 1991

Purple Martin: 10 percent less nesting pairs at my colony with a total of 90. But nest success was best ever with a 20 percent increase over last year to 374 fledged.

Coralina Wren: amale was heard and seen 2 or 3 times a week from 5-7 to 7-6. First one seen here.

Blue-Gray Gnatchatcher: 1 seen here on 7-9 only second sighting ever here.

Eastern Bluebird: This looks like it will be one of the best year ever with over 170 fledged from my trail at this time with 2 Or 3 weeks left in nesting season.

Northern Mockingbird: one was seen 2 miles n.e. of Elkhart on 7-18.

Good birding;

Darwin (Dean) Mosman
RR1 Box 112A Elkhart
