entw

Summer started with good numbers of shorebirds remaining in some of the wet areas left after the wet spring. Dry weather, however, changed the habitat considerably and few of these puddles were still in existence by July's return time. Breeding birds seemed to be doing fairly well, however, as a July 8th trip to the Red Rock area produced an impressive list of 92 species - not bad for a tough time of year to bird!

AMERICAN WHITE PELICAN Red Rock Refuge	07/08/92	No.= 300 Marion	IA
BLACK-CROWNED NIGHT-HERON Wall Lake	06/06/92	No.= 4 Wright	IA
