

Bernstein

17 August 1993

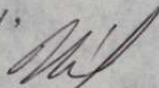

Dear Mr. Kent,

I sent the following report to Jim Dinsmore before I realized that you are to receive the August records. Perhaps he will forward it to you, but I will go ahead and send another report to you.

On 15 August, I was leading a field trip for Iowa Lakeside Lab. With me were Dale and Helen Fye and two novice birders. On Grover's Lake, Dickinson Co, we saw a Western Grebe. It was the dark phase where the eye is obscured by the black on the head.

I hope that this will be of interest to you.

Sincerely,

Neil Bernstein
