DATE: 24 November, 1993
SUBJECT: Fremont County Snowy Owl sightings

I have received three reports of Snowy Owls recently in Fremont County. The first one that I was aware of was in Locust Grove Township in the southeast part of Fremont County (I did not receive dates of that sighting). I received another report of an owl at Forney Lake on November 16. On the 17th I thought I observed it but the light was very poor so I could not verify it with all certainty. Then, on Monday November 22 I received a report of a dead one 3 miles north of Farragut. It appeared to have been hit by a vehicle. ✓
