

Gillaspey

8-9-93

Dear Sir,

I wish to report that in forenoon of Aug. 7 while doing some work in the barns on my farm 3 mi. NW I heard the Sedge Wren singing long & loud. (short-billed marsh wren) Several years ago, they nested on the farm. As there are rather limited reports of this species in IBL and this is toward the Southern part of their summer range I am sending this report. I will be alert for it when I make more trapps to the farm.

Yours,

J. Donald Gillaspey
