

Memo from aj.....

November 28, 1994

To: Tom Kent
From: Ann Johnson
Subject: Fall Field Reports

Don't have a lot for you, but what it lacks in quantity I tried to make up for with quality! Actually it seems like lately the birds are wherever I'm not! Hope that's out of my system now. Leave Thursday for the "pelagic from hell" off the New Jersey coast. Probably not the wisest choice for a first pelagic. Jim Bangma's meeting us Friday morning to show us the coastal species. He came on with a note last night about Barrow's Goldeneye at Sandy Hook. Had to let him know we have them here -- no big deal! I need to find some time to get out there tomorrow. It got pretty dark by time I hit Johnston tonight. Not a satisfactory look. There was a young bird that looked intriguing in the fading light -- juvenile Barrow's perhaps?

Fall 1994
Field Reports
