Dear Jim,

Thanks for the spring report. It appears Iowa once again
had some great birds.

In keeping with my philosophy of not publishing any record
that might be rejected by a state rarities committee, I will
ignore all the sightings you designated as R...referred to the
rarities committee.S There are five reports of excellent
birds that you did not so designate; I need documentations
for these reports. They are: ClarkUs Grebe, Purple Gallinule,
Mountain Bluebird, Western Tanager, and Black-headed
Grosbeak.

If well documented all of these should be included in the
Regional report. Without documentation, however, I cannot
use the records. Please get them to me as soon as possible.
Everything else in your report looks great.

Thanks again for the report. Let me also congratulate you
on the RossU Gull you discovered last year. Fantastic bird!
I too, hope to see on someday.
