winter Season Dec 1970 - March 1971

Red Rock Refuge and Lake area, Pleasantville, Iowa

Weather was highlighted by two "wars", the ice storm Dec 10, 1970 judged one of worst of the century, severe damage to trees and all utility lines, and a blizzard with 15 inches of snow Jan 3, 1971. The snow remained on the ground past mid March, 1 thaw in Feb. flooded the Refuge, and lake and ponds remained frozen till near end of March.

1500 Canada geese in Refuge Dec 29, 1970; 6 on 1/14/71;
40 Canadas moved in on Feb 20 along with mallards
and 20 Common mergansers.

6000 mallards in Refuge and 2000 below dam 12/29/70;
1200 below dam 1/14/71 and began moving in again 2/20/71

4 Bald Eagles on 12/29/71; 1 i. Bald below dam 1/14/71
and 1 A. Bald Eagle moved in 2/20/71 with 5 Cis by end of March.

12 Goldeneye and 1 Bufflehead on 1/14/71

1 Old Squaw on 1/1/71 seen by Paul Kline @ dam

A high of 24 Red Tailed Hawks in Refuge Dec 29, 1970

Also 5 Marsh Hawks on 12/29/71. 3 were observed
catching fleeing mice at edge of advancing flood
waters on 2/20/71

The 36 white crowned sparrows on Dec 29, 1970
was an unusually high count.

No winter finches. Only 1 Redpoll seen in late
Jan 1971 in Refuge.

Enclosed is Xmas count Dec 29, 1971. This was not
sent to Aud. Field Notes.

about, never at hunting)

1791 - 1991 Oct. nose & review

By the end of March we had thousands of geese and all species of ducks in Refuge but should this be included later in Spring migration?
