Dear Mr. Kent!

Just wanted to let you know about an ovenbird that I had at my place from Sept. 11th every day until it left on Oct. 18th. I have had an ovenbird or two every year for many years around May 12th or 13th and again in Sept. about the 8th or 9th. This year I was gone so didn't think I would get to see it, but, lo, and behold, when I came home on Sept. 11th it was here and every day until Oct. 18th. Very unusual for me.

Also I had a Fox Sparrow on Oct. 9, 1996 which I do not see very often. Also a Female Rufous Sided Towhee on Sept. 24th, 1996.

I know this is probably of no importance to you professional birdwatchers, but just thought I would tell you.

I enjoy the Iowa Bird Life and the new sightings

Sincerely,
An IOU member.

Eva B. Wiedemeyer
