ADDS MORE TO THE VALUE AND BEAUTY OF A PLACE THAN ANY OTHER ADORNMENT.

"Thank God for Grass! No other Glory vies With the refreshing glory of the grass; Not e'en the blue of the o'er bending skies, Nor fading splendors when daylight dies, Can this sweet smile of living green surpass."

A nice velvety lawn adds more to the beauty of a place than any other adornment, and even the humblest home may be made attractive with such surroundings, while without a good lawn even the finest flowering plants and elegantly arranged beds seem insignifiarranged beds seem insignifi-cant. How important it is then to plan for the best lawn obtainable! Considerable time may be saved by making your lawn in the fall, the ground at this season usually work-ing up loose and mellow, and by sowing the seed in Sentem by sowing the seed in September or October, it will be well established before winter begins and make a beautiful green carpet over your ground very early in spring. Ask for circular, "How to Make a Lawn.

Nature Sows Grass Seed in the Fall.

EVERGREEN MIXED LAWN GRASS SEED.—This is a mixture of the best varieties of grass seed suited for growing together and will make a beautiful, soft, velvety lawn of as handsome green as an emerald, and is formed of grasses which keep green from early spring all through the hot, dry summer weather until late in the fall. It comes up quickly (about two weeks) after seed is sown, and after once up it spreads to cover the ground and is ready for the lawn mower in six to eight weeks. It roots deeply on any soil and forms a dense, thick turf. This mixture is made only by us from new crop, recleaned, pure seeds of the best varieties, well suited for even and permanent growth, as good as money can buy. Price per pound (will sow 400 square feet) 45c; 3 lbs., \$1.25, postpaid. By freight, per bushel of 15 lbs., \$3.50; 50 lbs. \$11.00; 100 lbs. (will sow one acre), \$20.00.

CENTRAL PARK LAWN GRASS SEED.—Nice for lawns, but is of special value for parks and around country homes where it is not convenient to mow the lawns frequently. Sow about 50 lbs. per acre. Per lb. 40c; 3 lbs. \$1.00, postpaid. By freight, bushel of 15 lbs. \$3.00: 100 lbs.. \$18.00. EVERGREEN MIXED LAWN GRASS SEED .- This is a mixture of the best varieties of

LAWN ORNAMENT COLLECTION.

An assortment of very spring bulbs which can be simply stuck in the sod on the lawn, and blossom when the grass grows green in spring. Offered in many shades of color and will brighten the grounds with beauty and bring the spirit of spring before the snows

have ceased.

12 yellow, 12 white, 12 blue, 12 variegated Crocus; 24 single and double Snowdrops; 24 blue Scillas; 12 sweet scented Jonquils—a total of 108 fine bulbs post-paid for only \$1.08.

TERRACE LAWN MIXTURE.—This is a mixture of such grasses as have strong, spreading roots, making a close turf which the heavy rains cannot easily wash out. Per 1b. 50c; 3 lbs. \$1.35, postpaid. By freight, bu. (15 lbs.) \$1.35.

KENTUCKY BLUE GRASS.—Our stock of this is the best grade of fancy cleaned, new crop, tested seed. Much trouble was experienced this year in harvesting the blue grass in Kentucky because of wet weather and prices therefore rule higher than usual. Per lb. 35c; 3 lbs. \$1.00, postpaid. By freight, per bu. of 14 lbs. \$3.00.

WHITE CLOVER.—Makes a close turf and looks nice mixed with lawn grass. Per lb. 45c; 3 lbs. \$1.25, postpaid. PEERLESS LAWN FERTILIZER.—You cannot expect your lawn to look fresh always when you are cutting a crop of grass from it every week. Lawn grass is a voracious feeder and requires fertilizer. Our Peerless Lawn Fertilizer is of the best quality, dry, finely pulverized and easy crop of grass from it every week. Lawn grass is a volactions feeder and requires fertilizer. Our Peerless Lawn Fertilizer is of the best quality, dry, finely pulverized and easy to apply. Use 10 lbs. for 1,000 square feet of lawn or 400 lbs. per acre, early in spring. Price per 10 lb. pkg. 60c; 25 lb. pkg. \$1.00; 50 lb. pkg. \$1.85; 100 lbs. \$3.50; 400 lbs. for \$12.00.

The real secret of successful bulb culture lies in buying the very best bulbs. Months of daily care may be lavished upon an ordinary Hyacinth, and may be lavished upon an ordinary Hyacinti, and the result will be disappointing; and again there is no comparison between the pleasure one gets out of a bulb that bears one Daffodil and a bulb

out of a bulb that bears one Daffodil and a bulb that produces three to five golden trumpets.

The other secret of bulb culture is to get a wonderful root growth before the stem begins to shoot up; light soil, plenty of water and a cool, dark place will accomplish this. Our bulbs are imported direct by us; are solid, heavy and possess the hardiness to resist wet and cold. We handle only the best varieties of each kind.

In the garden no single class of plants affords the pleasure that the hardy, spring-flowering

the pleasure that the hardy, spring-flowering bulbs do, but during the fall, as we see our sum-mer favorites one by one failing and fading, we are liable to forget that this is the time to plant our bulbs in the garden for early spring blooming, and also to prepare our window gardens in the house for flowers during the winter months.

and many other equally handsome kinds. Most of these bulbs are grown in Hol-land, although some are from France, Italy, China, Japan and the Bermudas. There is nothing prettier or more desirable than a window nicely arranged with these, and a very small assortment will fill the house with fragrance. HYACINTHS.

The Hyacinth is undoubtedly the "Queen of Bulbous Flow-The Hyacinth is undoubtedly the "Queen of Bulbous Flowers." It has been improved for centuries and there are thousands of varieties, but after personal inspection of the fields in Holland we offer the following named varieties as being suited for general culture and believe they will give satisfaction. Personally, we prefer the single flowered sorts.

FOR INDOOR PLANTING—In Glasses.—Fill glass with pure soft water until the water touches bottom of the bulb, drop in a piece of charcoal to keep water from fouling, and place glass in a cool, dark place until the roots nearly fill the glass. Change the water if necessary to keep it pure. When

ROMAN HYACINTHS.

The florists' favorite. Slender and graceful about one-half the diameter of ordinary Hyacinths. Romans are the earliest bloomers of all fall bulbs and may be readily grown by the most inexperienced in pots of soil or in water and pebbles. Planted in September they flower from Thanksgiving to Christmas time and a succession may be had by potting the bulbs at intervals. Bulbs throw up from two to seven spikes of bloom which follow each other in flowering. Three bulbs may be placed in a five-inch pot. Very fragrant. Do not for-Hyacinths. EARLY TULIPS.

A most gorgeous and satisfactory spring flower, and nothing is more showy on the lawn than a nice bed of Tulips, blooming, as they do, so early in the spring. They are unsurpassed in brilliancy of color. Their ease of culture, combined with beauty of form and gorgeous coloring, makes them the most popular bulbs for spring blooming, and for winter flowering in the greenhouse and window garden they are incomparable. For distance and depth of planting see diagram, page 2. Many planters use Snowdrops. Scilpage 2. Many planters use Snowdrops, Scil-las or Crocus to plant between the Tulips in fall-planted beds, so that they may have earlier flowers than furnished by the Tulips and a longer display of blossoms in one bed. and a longer display of blossoms in one bed. It is suggested also that early and late flowering Tulips planted alternately in a bed will furnish Tulips in bloom for fully thirty days in spring. Others set pansy plants between the Tulip bulbs and after frost cover the beds so that the pansies survive and come into bloom in spring just as the tulips are fading

Many prefer to destroy the Tulip bed as soon as the blooms have passed and set the bed to Geraniums or other summer bedding plants. No matter in what manner you choose to use the Tulip it will certainly give you abundant returns in flowers for the

# POLYANTHUS NARCISSUS.

PAPER WHITE GRANDIFLORA. — These beautiful, graceful Narcissus can be made to bloom in December. There is no more satisbloom in December. There is no more satisfactory bulb for house cultivation; its clusters of snow-white flowers are deliciously fragrant. This variety is perhaps more largely forced for cutting than any other, tons of them being used for the large flower markets of the world. Grows readily in water, if treated same as Chinese Sacred Lily.

Mammoth Bulbs.—Larger than hyacinths, exceptionally solid and heavy. Sure to give satisfaction. Each 6c; dozen 60c; 100 for \$4.

First Size Bulbs.—Such as are usually grown by florists and amateurs; of satisfactory size and quality. Each 5c; dozen 40c; 100 for \$3.00.

# CHINESE SACRED LILY.

This is now the most popular of all bulbs for winter blooming; always satisfactory and of the easiest culture. It is a variety of Polyanthus Narcissus grown by the Chinese to decorate their sacred temples or Joss Houses on their New Year's Day, which occurs in February. They produce a profusion of bloom in a short time results. of bloom in a short time, usually not more than four to six weeks from time of planting. The foliage is luxuriant and of a dark green color, surmounted by a wealth of large, satiny white, fragrant flowers with golden yellow cup.

CULTURE.—Being partly aquatic, this plant must have plenty of water. If grown in soil, make it light and sandy, but they are usually grown in vases or dishes of water. Put an inch of gravel in the dish, set the bulbs on this and put gravel around them to keep from falling over; fill dish with water and set in a dark closet for several days until the roots start freely; then bring to light and keep in any ordinary living room. A dozen bulbs started in this way at intervals will give a succession of bloom all winter. The bulbs offered by us are large, solid, and well matured. They can be relied upon to be the true Chinese, and not inferior Bermuda grown stock. Price 15 cents each; \$1.40 per dozen, postpaid; not postpaid, each 10 cents, dozen \$1.00.

# FLOWER PLANT DEPARTMENT

We make a great specialty of this department and claim to fill more orders for flower we make a great specialty of this department and claim to fill more orders for flower plants than any concern in the west. We now have thirty-two large greenhouses besides a large number of steam heated hot-beds and cold frames, thus giving us the largest amount of glass of any concern in central Iowa. We employ experienced florists to look after this branch of our business and all their time and attention is devoted to growing flower plants and bulbs exclusively for the mail order trade, as for this purpose they require special culture in greenhousts kept at a low temperature so that they will be hardy, healthy and vigorous. The plants thus grown are much better prepared for setting out in the open ground than those grown in the ordinary greenhouses which are kept at a high temperature. We are filling orders constantly from every state and also from various parts of Canada, Mexico, etc.

We Guarantee—That plants ordered from this list will reach purchasers in any part of

the United States in good order if sent by mail or express.

Terms and Discounts.—At prices named we send plants postpaid except where noted.

Orders must amount to at least 25c, for if of less amount they are filled at a loss. With each order of 50 cent or over we add valuable plants without charge.

# BEGONIAS.

COUNTESS LOUISE ERDODY.—This variety is sometimes called "Snail Begonia" on account of the peculiar formation of the leaves. The form is exceedingly odd and unique. The striking peculiarity which distinguishes it from all other Begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full-grown leaf there are four of these twists lying on top of the leaf nearly 2 inches high. The leaf has a metallic lustre, dark silvery in the center, shading into coppery rose toward the margin, which is broadly and evenly edged with the same hue, but darker and more brilliant. Very curious. Each 20c. Large specimen plant 50c.
