

... OFFICE OF .

Iowa Seed Company,

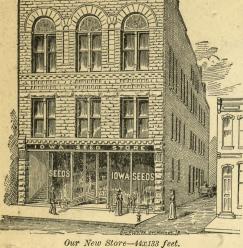

613-615 LOCUST STREET.

Des Moines, Iowa, January 1, 1896.

TEARTY greetings and good wishes are hereby extended to our many friends and customers, and we thank you for your orders during the past year which was the most prosperous season that we have ever had. The number of orders and total cash receipts were more than 40 per cent larger than the previous year. The demand for our CHOICE IOWA SEEDS is becoming more extended, and orders are now being received not only from all parts of the United States, but also from many foreign countries. We are not, however, catering to the trade of foreign countries, as it is our aim to offer nothing which is not fully adapted to culture here. In examining foreign catalogues it is interesting to note how much value and importance they attach to being "Seedsmen to Her Majesty, Queen Victoria," or to "His Royal Highness, the Prince of Wales," or to "His Most August Majesty, Emperor William of Germany." With us, our highest ambition is to be known throughout the country as the

"Seedsmen to the American People."

By this we mean not only the native born Americans, but all residents of this country. Many of our most valued customers came from other lands, and, in fact, one of the proprietors of this company is of foreign birth, but he is now just as loyal as anyone to our beloved country.

We claim that the soil and climate of Iowa are especially adapted to the perfect growth and maturing of seed crops, and for a quarter of a century we have been located here and devoted much time and labor to testing, experimenting, selecting and improving our various choice strains of seed. If you think that our years of practical study of varieties suited to culture in this locality would be of benefit to you, we solicit your orders and will do our best to please you. With few exceptions all of our crops are good this year.

Our new store is as conveniently arranged a building as there is America for the seed business and orders can be filled with great rapidity, our mail during the busy season averaging 1,000 to 1,800 letters and postals per day. About five blocks away, located beside the railroad tracks is our warehouses, where large quantities of seed are stored and hauled to our city store as needed, no orders being filled from the warehouse except carload lots.

FARMERS.—It will pay every farmer to thoroughly examine our field seed department. This is a specialty with us and we believe that there is no seed firm in the country which gives more close attention to growing and handling farm seeds. We have many desirable new sorts, and it will pay you well to renew your seed corn, oats, etc., with better and more profitable varieties. Iowa grown seeds are the best.

Again thanking you for past favors, and respectfully soliciting a continuance of your patronage, we remain,

Your friends.

Medal awarded to us at the Iowa State Fair, 1895.

IOWA SEED COMPANY.

SUGGESTIONS T₀ CUSTOMERS.

ORDER EARLY.—The best time to order is just as soon as you receive this catalogue, as we can always give your orders more of our personal attention if they come in before the rush of the spring trade. Please use the order sheet, as it makes it more convenient for us in filling orders. Terms are invariably cash with order, as we keep no book accounts in our mail order department, and the expense of sending goods C. O. D. is quite large. Postage stamps received as cash.

SHIPPING.—There are five express companies and fifteen railroads centering at Des Moines, so that quick shipments can be made to any town in the United States.

CHARGES PREPAID.—All Vegetable and Flower Seeds, Bulbs and Plants, except those noted are sent prequid by mail or express by the quickest and most direct route, unless ordered otherwise, and we guarantee their safe arrival. Seeds sold by the peck or bushel, field seeds, potatoes, implements, and other heavy goods are sent by freight or express, purchaser paying charges. or express, purchaser paying charges.

TESTING.—All seeds are carefully tested, and nothing sent out which we do not believe to be good in every respect.

OUR PRICES.—Our constant aim is to make the highest quality the first consideration, and next to put our prices as low as good reliable seeds can be sold.

DISCOUNTS.—ON ALL ORDERS FOR SEEDS IN PACKETS the purchaser may select twenty-five cents' worth extra for each one dollar sent us. This refers only to seeds in packets, not in bulk. For other discounts see heading of the respective classes of goods. Each year we put up thousands of packets of seeds for free distribution among our customers, by adding liberally of them to orders. We will allow you a discount of ten cents per pound on vegetable seeds, such as are listed as prepaid, if you are willing to have them sent by express or freight at your expense. your expense.

SMALL ORDERS.—If you only want a single packet, do not hesitate to send for it. We take as much pains to fill small orders promptly and correctly as we do large ones. Orders for Flower Plants and Nursery Stock, however, must amount to at least fifty cents.

NEWSPAPERS.—Your choice of a year's subscription to either the Western Garden, Rural Northwest, Farm Journal (Phila.) or American Corn Journal to anyone ordering seeds to the amount of \$1.00 or more and asking for it in place of other premium.

WHAT WE GUARANTEE.—That all money sent us for seed shall reach us if sent by registered letter, P. O. or express money order or bank draft, made payable to our order. That your order will be filled promptly and well. That goods ordered will reach you safely. KEEP A COPY of your order. Sometimes persons think that they have ordered articles which they have omitted, and blame us for not sending them

MOTICE.—The importance of GOOD SEEDS cannot be overestimated, and we are certain that after a trial all our customers will agree that our seeds are the purest and best to be had. Still, when if is considered how many are the contingencies on which the success of any crop depends, our customers will readily see that it would be sheer folly for any one to warrant them to produce a perfect crop and we want it distinctly understood that while we exercise the greatest care to have all seeds pure and reliable, and also true to name, we do not give any warranty, express or implied, If the purchase does not accept the seeds on these terms and conditions, they are to be returned at once, and money that has been paid for same will be refunded. No officer, agent or employee of this company is authorized to make any warranty whatsoever. However, we have so much confidence in our seeds that we hereby agree to refill any retail order for vegetable or flower seeds free of charge should they prove otherwise than as we represent them. We know of no responsible seed firm in the world who guarantees seeds any further than this, Compare with other seed catalogues and you will find that we are right.

OUR RESPONSIBILITY.—As this book will probably go into the hands of many who are unacquainted with us, this question will naturally arise, and in answer to the same we refer you by permission to the Valley National Bank of this city, to the postmaster, or to any of the various express companies.

MARKET GARDENERS and others who buy VEGETABLE SEEDS IN BULK to the amount of \$5.00 or more, are requested to send for our Market Gardeners' Price List. This list for market gardeners is intended only for large buyers, and is exclusively for those who order vegetable seeds alone by weight or measure amounting to \$5.00 or over. Club orders which call for this amount of bulk seeds altogether are entitled to these prices

WE ARE ALWAYS PLEASED TO RECEIVE SAMPLES OF ANY NEW, RARE OR SUPERIOR SEEDS YOU MAY SEND US FOR TRIAL.

Novelties and Specialties for 1896.

WHAT have you that is especially new and desirable this year?" is the first question asked us by many of our patrons. In the following pages on pink paper we give special prominence to some of our most important novelties and specialties for this year. Each is faithfully described from careful observation. All are worthy and recommended by us. Aside from these many desirable novelties will be found listed in various parts of the catalogue as well as the standard sorts which everyone wants for stand-bys.

NOVELTIES ON COVER OF CATALOGUE.

The following seven excellent varieties will be found illustrated in colors on the back cover of this catalogue. We want every one to try them this year and therefore offer one packet of each for only TWENTY-FIVE CENTS.

NEW ROSE TURNIP RADISH.

WONDERFUL SUGAR WATERMELON.

When making a tour among our seed growers during the past summer, we were greatly pleased with this variety, which we found growing in Nebraska. The gentleman on whose place they were growing in Nebraska. The gentleman on whose place they were growing is an enthusiast on melons, and after testing quite a number of varieties, all persons present united in pronouncing the Wonderful Sugar by far the best. It is a large melon, averaging about 35 pounds each. They are long, rather light-colored, mottled, and irregularly striped with dark green; rind rather thin but tough. Flesh a delicate red, and the most tender, juicy and luscious that can be imagined. Everyone who has a place to grow melons should try this splendid new variety. Per pkt. 10c, oz, 20c, ½ lb. 60c, lb. \$1.75.

EARLY SUNRISE SWEET CORN.

This splendid new variety which we introduced originated with a market gardener in the western part of the state, and for eight years he has been carefully selecting it to an ileal size and shape, and also the earliest maturing. In this way he has finally obtained this variety, which is distinct from all others. The ears are about six inches long and well filled out at the end, the husk covering so completely and being so tight as to prevent the work of worms, which are so bad on the Cory. The grains are fairly deep and are set in straight rows on small white cobs; very uniform and handsome. It is quite productive and of as good flavor as any corn we ever tasted. Don't fail to try it. Market gardeners will find the Early Sunrise a most profitable and satisfactory variety. For price on large lots see page 47. Per pkt. 5c, 17 pt. 15c, qt. 50c, postpaid.

NEW MIGNONETTE LETTUCE.

A most unique and attractive new sort. The entire plant measures only seven inches in diameter, and is more solid and compact than any other existing variety. The outer leaves are few, and these cling so closely to the head that it is almost true to say it is all head. The small surface of the leaves which are separated from the head is deeply crumpled as in a Savoy cabbage, and richly colored with russet red and bronze green of varying shades. The cut shown in plate exhibits very truly the character of the plant, which is distinct, not only in its solidity, but also in color. The heart is a charming combination of creamy yellow waved with pale greenish white. It is very hardy, resisting drouth and excessive moisture with equal success—a most valuable feature in our climate. It is fit for use early, which, combined with its long standing character, constitutes it an all-seasons variety in the superlative degree. Per pkt. 5c.

NEW ROSE TURNIP RADISH.

There is a greater variety of color in radishes than in any other root crop grown, but a rose-colored variety is, indeed, an acquisition. This is one of the best radishes we have ever seen, and is novel, eminently useful and beautiful. It is similar to the round, forcing varieties in shape and size, and has every feature of good selection, such as a small, compact top and a miniature root. It is very early, requiring only twenty-three days to mature it, and remains in good condition for ten days, even in a trying season. But, undoubtedly, its chief charm is in its color, which is a soft, rosy pink. A most attractive radish in the bunch, and its appearance is incomparable when prepared for the table. Per pkt. 10c. oz. 20c,

WASHINGTON WAKEFIELD CABBAGE.

Last year we furnished seed of this grand new variety to fully ten thousand (10,000) gardeners in almost every state in the Union, and everywhere it has given the best of satisfaction, and is admitted to be the best early cabbage now on the market. See description on page 25. Per pkt. 10c, oz. 30c, 1/4 lb. \$1.00, lb. \$3.25.

MARKET GARDENERS' BEET.

Without question the best beet for family gardens, both for early and main crop. Description and illustration will be found on page 22.

Per pkt. 5c. oz. 10c. 14 lb. 35c. lb. \$1.00.

EARLY SUNRISE SWEET CORN.

NEW IDEAL MAMMOTH RHUBARB.

IOWA MASTODON MELON.

The most extraordinary new variety which has been offered for many years, will create a sensation wherever seen—and we control the entire stock, so that you cannot purchase it elsewhere this year. It is from Japan, and just a few seeds were sent to a friend over in this country. This friend knew of our interest in novelties and brought in specimens of the melon. One weighed 23½ pounds and the other 25 pounds. We at once secured the entire 2rop, although but a few vines. The melons are of monstrous size, and greatly resemble the common Yankee Field pumpkin; so nearly in fact, as to even deceive us at first sight. The flesh is a clear, creamy white, fully 3½ inches thick and of excellent flavor; it is tender and sweet up to the rind, which is thin and tough. In packets only of 25 seeds in each. Per pkt. 10c, 3 pkts. 25c, 7 for 50c, 16 for \$1.00,

LEMON BLUSH TOMATO.

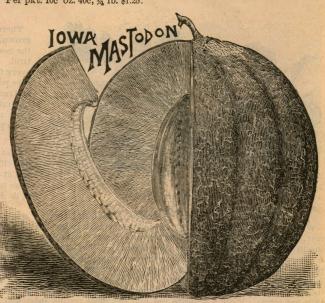

It was with little confidence that we gave this variety a place in our trial grounds, but we admit that we were greatly and agreeably surprised, and our farm superintendent pronounces it the nearest approach to a perfect tomato that has been produced up to this time. The skin and flesh are a bright lemon yellow, with a faint rose blush or light crimson tint diffused over part of the surface opposite the stem. The plant is a vigorous grower, ripening its fruit abundantly in mid-season. It may never become a popular market sort, but anyone desiring a choice table variety for home consumption should not fail to have it. Per pkt. 10c, oz. 50c

The rhubarb (or pieplant) is a vegetable which it is difficult to improve and it takes many years to fully establish a new variety. About twenty-live years ago Dr. Kennicott, of Illinois, in growing roots from seed found one which was so far superior to and different from all others that he saved it carefully, and the root has been divided and propagated from year to year until finally we purchased the stock Like all other highly improved sorts it seeds very sparingly, and comes more nearly true to name when grown from seed than most other sorts. The stalks are fully as large, if not larger, than the Victoria, and are produced in greater abundance. We have no hesitancy in calling it the most vigorous and productive variety known. Quality is unsurpassed. Per pkt. 10c, 3 pkts. for 25c.

AMERICAN MAMMOTH BRUSSELLS SPROUTS.

This rich but long neglected vegetable is becoming more and more popular. We are able to offer to our customers this season seed of a new and greatly superior variety, of American-grown seed which has the great merit of forming heads ready for picking about three weeks earlier than other varieties which are raised from imported stocks. It has the additional merit of making stronger plants and making more heads. A friend picked this year from a single plant more than two quarts of heads A profitable crop for market gardeners. One gardener near New York City last year made \$500.00 on a crop of two acres of this improved variety. We want everyone to try them this year. Per pkt. 10c oz. 40c, ½ 1b. \$1.25.

TIGZAG EVERGREEN SWEET CORN

NEW ZIGZAG EVERGREEN SWEET CORN.

The illustration (taken from a photograph of a dried ear) gives a good idea of the character of this corn, which all unite in pronouncing the grandest and most distinct late corn ever sent out. Stowell's Evergreen has heretofore been the standard and favorite variety, but it must now take second place, as the Zigzag excels it in all important points. It is sweeter. It is much more productive (yielding two to four ears to the stalk), and it remains fit for use longer than the Stowell's or any other variety. The Michigan Agricultural Experiment station writes: "Ears of good size and well filled out. It reaches maturity with the Stowell's Evergreen and continues to furnish edible corn longer than any corn we have ever tested. Its season this year extended over a period of three weeks, when it was cut by frost. At that time it looked as green and vigorous as ever." Private planters and market gardeners who try this corn will use no other late variety. For canning it is unequaled. Per pkt. 5c, ½ pt.15c, qt. 50c.

NEW ICEBERG LETTUCE.

There is no handsomer or more solid cabbage lettuce in cultivation—in fact, it is strikingly beautiful. The large, curly leaves which cover the outside of the solid heads are of a bright, light green with a very slight reddish tinge at the edges; they have small indents with are constantly filled with dewdrops. They are thus kept fresh, and show a remarkable crystalline appearance, which well warrants the name of Iceberg. The unusual solidity of the heads is insured by the large, white main ribs of leaves, each of which, curving strongly towards the center, acts like a truss, making it impossible for the leaves to open outward and expose the center which is consequently thoroughly blanched. Whether in early spring or the hottest days in stuffence, the quality is simply perfect. Surpassingly fine for the home garden and equally valuable for market. Per pkt. 5c, oz. 20c, ½ 1b, 65c.

IMPROVED DANISH BALL-HEAD CABBAGE.

This variety has been selected and perfect-This variety has been selected and perfected for more than fifty years by the Danish gardeners. They prize it so highly that they grow it almost exclusively for winter cabbage, and annually export large quantities to London, Paris and other ports. It will stand long journeys and keep far into the spring, and is of most rich and mild taste. Heads round as a ball, of good size, solid and very fine grained. Has but few outer leaves, thus admitting of close planting. Medium size and hardest of all; tender and crisp with but little waste heart. Flavor unexcelled. Per pkt. 5c, oz. 25c, ½ lb, 85c, lb. \$2.75.

NEW ICEBERG LETTUCE.

JUNO PEAS.

We have no hesitation in saying that it is by far the best wrinkled pea of its class to-day. It has very robust vines, stout, straight pods, and usually borne in pairs. The pods are very thick, broad-backed all the way up and filled from the stem to the tip with seven to nine sweet, delicious, dark green peas of immense size. Its height is two feet, and its season from medium early to main crop. Destined to become a standard variety. Per pkt. 5c, ½ pt. 15c, qt. 50c.

JUNO PEAS.

DELICATA SQUASH.

When we first saw this new variety we were not at all pleased with its appearance,

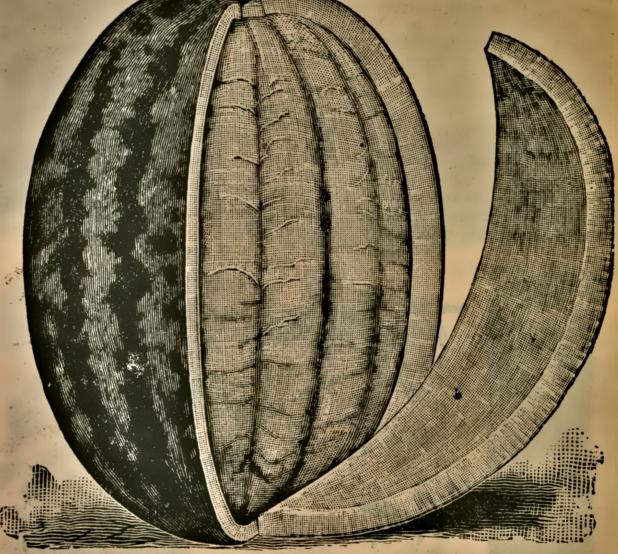

it was very prolific, averaging 14 fruits to the vine, and it was the earliest of any vining squash on our place. When we tried it on the table we were really surprised at its extremely rich flavor, fine quality, dry and excellent. We highly recommend it for private use. It keeps well. Per pkt. 5c, oz. 15c, 1/4 lb. 50c, lb. \$1.50.

ORANGE WATERMELON.

Everyone knows what a bother watermelon rinds are on the table, and were it not for this trouble, the watermelon would be still more popular as a dessert fruit. This difficulty is now overcome, and the Orange will make the handsomest ornament ever set on the festive board, and will attract universal attention. The great peculiarity of this melon is that the rind naturally separates from the flesh when ripe, and with a slight use of a knife between the segments, can be removed like the rind of an orange, leaving a most beautiful fruit for the center of the table. The illustration shown herewith was made from an average size, twelve-pound melon and well shows the shape and peculiar manner of separating. Quality is excellent, tender, juicy and sweet. We want everyone to try it, and have therefore made prices low. Per pkt. 5c, oz. 15c, 1/4 lb. 50c, lb. \$1.50.

SWEET HEART WATERMELON.

An entirely distinct and new watermelon which is early, large, handsome, heavy, good shipper, long keeper, bright color, and of the best quality. Carloads of Sweet Hearts were sold at fancy prices in the market when no other sorts were salable. Its vines are vigorous and productive, ripening its fruit early. The fruit is large, oval, very heavy, uniformly mottled light and dark green. Rind thin but firm. The flesh is bright red, firm, solid but very tender, melting and sweet. Fruit remains in condition for use longer than any other sort. This variety originated as a sport in the field of a prominent melon grower and he has grown it several years and received fancy prices for his melons. It is sure to become one of the most popular sorts in cultivation. No melon grower should be without it. Per pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

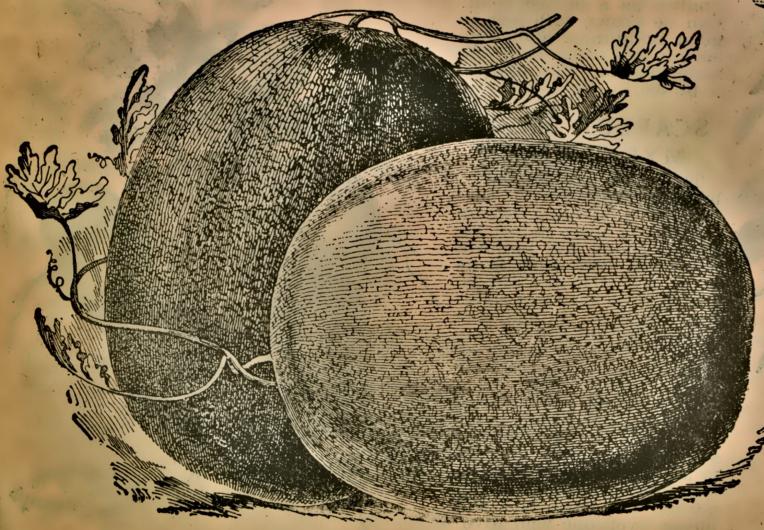

ORANGE WATERMELON.

GRAND RAPIDS MUSK MELON.

One week earlier than any other variety. The main characteristic of this melon is its extreme earlines. Grand Rapids is well known on account of its progressive market gardeners, and in that wide awake city the Grand Rapids melon has been on the market two weeks earlier than any other sort, and sold readily at \$2.50 per dozen to hotels and fancy grocers, while melons grown in the south were practically unsalable. There is no question that it is bound to supersede the Extra Early Hackensack, as it is at least two weeks earlier. The flesh is pure yellow, clear to the rind; skin finely netted. The handsome appearance of this melon is sure to attract attention. To attain the best results, and to show its remarkable earliness and prolificness, we would advise our customers to pinch off the runners; while it has no tendency to run more than other varieties, at the same time by throwing the growth into fruit, it makes the fruit of larger size and earlier. Per pkt. 5c, oz. 15c, 1/4 lb. 50c, lb. \$1.50.

We are glad to introduce this grand new variety to our customers. It is one of the earliest in existence. Matures about the same time as Alaska, is of the same height and stands up better. It is very prolific, even in ripening, about ninety per cent can be taken at the first picking. Pods of good size, containing seven to nine peas each. A good sort for market gardeners. Per pkt. 5c, ½ pt. 15c, qt. 50c.

SWEET HEART WATERMELON.

ASTRO

ASTRO CUCUMBER. A novelty of the highest merit, and one which has greatly pleased our market garden customers, some claiming that they

made more money from a crop of these grown early in the hotbeds than from any other crop, as they sell quickly at \$1.00 per dozen. They do excellently well under glass, yielding a continual daily picking of large, perfect shaped fruits, eight to twelve inches long, almost solid throughout. Excellent for slicing, solid and crisp. With common outdoor culture in the summer, it produces large cucumbers fifteen to eighteen inches in length with very few seeds. Seed will always be expensive, as it produces only eight seeds. Seed will always be expensive, as it produces only eight to twelve pounds per acre, while the White Spine and other common sorts produce two hundred to five hundred pounds. In packets only, containing twenty seeds each. Per pkt. 10c, 6 for 50c.

September 19, 1895.—The Astro Cucumber is all you claim for it. They grew twelve to eighteen inches long and were fine. The Banquet Melons were as fine as I ever ate.

R. V. HENDRIX, Limestone Co., Tex.

The seeds I bought of you were first class and have done well in Texas. As to the Astro Cucumber, it was a wonder to everyone who saw it. I raised several that were

extremely long. T. P. RIUHERSON, Hall Co., Tex.

PERFECTED DELMONICO MUSK MELON.

This improved type of the Delmonico melon is almost a perfect globe in shape; the skin is a peculiar grayish green until ripe, when it changes to a bright yellow. The ribs are wide and covered thickly with a prominent netting. The melons average six inches netting. The melons average six inches netting. The melons average six inches in diameter, have a very small seed cavity, and are exceedingly thick and heavy for their size. The flesh is a deep, rich, orange yellow color, and is of very fine grain, without the slightest stringiness. This variety produces melons of uniformly high quality and is likely to displace all other red or yellow is likely to displace all other red or yellow fleshed sorts. It is a strong, hardy grower and very prolific. We can recommend it either to the market gardener or amateur. Per pkt. 10c, oz. 20c, ½ lb. 50c, lb. \$1.50.

OLD HOMESTEAD POLE BEANS.

This is an improvement on the Kentucky Wonder, and we regard it as far ahead of any other green podded pole variety, and the best as well as ear-liest sort, being fit for the table August 1st. It is enormously productive, the pods hanging in great clusters from top to bottom of the pole. It is entirely stringless, and the pods are a silvery green color. The pods, though large, cook tender and melting, and we can recommend it as the best green pole bean. Pods are often to twelve inches in length, and instead of picking them into a basket, it is customary to pile them up on one arm like

kindling wood when gathering a mess for family use. The dry beans are long, oval, duncolored, and of fair quality as a shelled bean. Can be grown with corn to good advantage, and thus secure two crops from the same ground. Per pkt. 5c, ½ pt. 20c, qt. 65c.

SCARLET KASH-

This new, extra early, bright scarlet colored turnip has a striking resemblance to a large radish, being as round and uniform in shape. The flesh is as white and crisp as a radish, and of most excellent cooking qualities. It matures almost as quickly as the earliest radishes, being far ahead in this respect of any other turnip, and when cooked is of unsurpassed quality. Also a good keeper, and with its beautiful scarlet color, early maturity and fine quality, it is entitled to a place among our garden favorites, and will please everyone who gives it a trial. Per pkt. 5c, 0z. 15c, ½ lb. 50c, lb. \$1.50.

SCARLET KASHMYR TURNIPS.

OLD HOMESTEAD BEANS.

WISCONSIN GOLDEN SALSIFY.

EXTRA CURLED MOS-BACH KALE.

This is the most beautiful variety of kale grown. The leaves are so finely crimped and curled, and of such a nice light green color that it answers admirably for garnishing. We also strongly recommend this as a most showy and attractive market variety, as well as being of excellent quality when cooked for the table. Market gardeners and truckers should by all means sow largely of this new variety, as we feel confident that it will prove one of the most popular and salable sorts wherever introduced. Per pkt. 5c, oz. 15c, ½ lb. 40c, lb. \$1.25.

PEARL WHITE EGG PLANT.

PEAKL WHITE EGG PLANT.

The fruit is pure, creamy white, with slight shading of a very light green near the stem; beautiful in shape, resembling somewhat the purple variety, as large or larger in size, and more prolific. In eating quality it is superior, being more delicate, very fine grain and well flavored. It makes one of the most palatable dishes, either baked or fried. There is not a garden in the land which would not be improved by this vegetable being represented in its collection, and if once tried, it is sure to establish itself as a favorite. Per pkt. 10c, oz. 40c.

October 5, 1895.—The Pearl White Egg Plant is as large as the Purple; they are pure white and better fruit to eat than the Purple. Our home market demands them.

M. H. SMITH & SON, Market Gardeners,
Muscatine, Iowa.

The Mastodon Melon is a splendid variety, sweet, white, juicy and very fine flavored.

MRS. ANNA GREGORY, Reno Co., Kan.

VICTORIA SPINACH

WISCONSIN GOLDEN SALSIFY.

A most distinct and valuable new sort which was sent to us by a customer in Wisconsin in 1892, and has proved highly satisfactory in our tests of the past three years so that we are now confident that it will suit our customers in every respect. It is of strong, vigorous growth; the leaves are dark green in color, finely crimped and curled. The roots are large, smooth, and have a decided yellow cast, which gives it its name. They cut smooth and even throughout, unusually brittle and never stringy. When prepared for the table they are very rich and tender, really delicious in flavor. Per pkt. 15c, 2 pkts. for 25c.

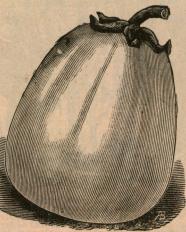

DWARF ARISTOCRAT TOMATO.

DWARF ARISTOCRAT TOMATO.

This new dwarf variety resembles very much the Dwarf Champion in every respect except in color of the fruit, which with the Aristocratis a beautiful rich glossy red, so much admired in some markets and preferred to the flesh or rose-colored sorts. In size, productiveness, smoothness, flavor, etc. it is fully up to our usual standard of perfection. It is especially desirable for greenhouse or forcing under glass, and for first crop outside. It requires little space, as it has been grown successfully when planted 3x3 feet apart. This feature makes it very desirable for the small family garden where every foot of ground is to be utilized. Its beautiful glossy fruit is very attractive. Per pkt. 5c, oz. 35c, ½ lb. \$1.00.

EXTRA CURLED MOSBACH KALE.

MAMMOTH HORTICULTURAL POLE BEANS.

A very great improvement on the old Horticultural Pole. The beans are of enormous size, splashed and spotted with red, and of the highest quality as a shell bean either green ordry. It originated at Worcester, Mass., where it has been grown for several years by one of the leading market gardeners there, and he has always been able to command from twenty-five to fifty cents per bushel more than others for their beans, as his were always of such bright carmine color, and would keep longer than other varieties after being picked. The vine is a very vigorous grower, with large, light colored leaves and purple blossoms. Pods very large, bright carmine, slightly streaked. very handsome and exceedingly productive. It is somewhat earlier than the parent variety, shows no rust, and is considered by some eastern gardeners the best pole bean in the world. Pkt. 10c, ½ pt. 20c, qt. 70c.

LEONARD'S WARTY HUBBARD SOUASH.

This new strain of the Hubbard is a continued improvement upon our selected strain. The wartiness indicates a very hard shell, which is one of the best features of a long keeping squash; it also denotes extra choice quality—the harder and more warty the shell of a Hubbard, the more delicate and sweet the flesh. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

NEW VICTORIA SPINACH.

This new variety is distinguished for its exceedingly dark black-green color, and also for its very long standing qualities, being from two to three weeks later than the ordinary Longstanding. The leaves are thick and spread out flat upon the ground. It is excellent for spring sowing, but not sufficiently hardy to stand the winter in this locality. It outyields every other variety, and stands longer before going to seed than other sorts. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c.

NABOB WATERMELON.

We were so much pleased with our tests of this fine new variety the past season that we want to share the enjoyment of it with our customers. It is decidedly distinct and attractive, having a peculiarly mottled color of shell. Flesh deepest searlet, firm and solid, but melting, juicy, and of luscious flavor. Per pkt. 5c, oz, 15c, ½ lb. 50c, lb. \$1.50.

COLUMBIAN MAMMOTH WHITE ASPARAGUS.

MAMMOTH LUSCIOUS SUGAR PEA.

MAMMOTH LUSCIOUS SUGAR PEA.

This is pronounced one of the greatest novelties in the pea line of recent introduction. Nothing has ever anywhere approached in size or delicacy of flavor, it being far superior to the Melting Sugar or any other varieties of peas, shelled or sugar. Dr. F. M. Hexamer, editor of the American Agriculturist, writes: "We have grown nearly every variety of Sugar Peas listed in seedsmen's catalogues, but have never seen anything to compare with the Mammoth Luscious." This new sugar pea bears pods much larger than any other variety. They are often six to seven inches long, and an inch and one-half broad. The pods are so long and broad that they should be sliced and boiled about ten or fifteen minutes when old, and have a little butter or sauce put over them, when they will be ready to supply the table, and makes an excellent, nutritious dish. They should not be shelled, but the peas and pods eaten together, and as they contain so much sugar, starch and gluten, are very nutritious for family use. We likewise commend them for the rapidity which they can be gathered and prepared for cooking, in comparison with the shell peas. If you have never grown the Sugar Peas you should certainly include Mammoth Luscious in your order. Per pkt. 10c, ½ pt. 25c, qt. 75c.

STRINGLESS GREEN POD BUSH BEAN.

STRINGLESS GREEN POD BUSH BEAN.

The only stringless green pod bush bean in cultivation. Consequently it surpasses all others in crisp, tender flavor the finely shaped, long, green pods are absolutely stringsless, and when we add that the pods are ready to market two weeks earlier than the best stock of improved extra early Red Valentines, we are sure that Burpee's Stringless Green Pod will supply a long felt want. It must prove of immense value, not only to the market gardener who wants to make more money, but also to the amateur who seeks a rare quality early for the home table. Per pkt. 10c.

LUSCIOUS SUGAR PEA.

CALHOUN PUMPKIN

CALHOUN PUMPKIN
A great improvement on
the Large Cheese pumpkin.
Size somewhat larger, color
creamy brown, flesh deep
salmon yellow, wonderfully
thick and fine grained, while
the seed cavity is very small.
It is not unusual to find
specimens with flesh 5½ to
6 inches thick. Rind thin.
When cooked it is very yellow and makes pies of a rich
color, sweet and of the finest
quality. Has this year
then "New Thanksgiving
Pumpkin." Per pkt. 5c. oz.
10c, ½ lb. 30c, lb. \$1,00.

COLUMBIAN MAM-MOTH WHITE ASPARAGUS.

A new and entirely distinct which are white, and stay white, as long as fit for use. In addition to the advantage of its white color, it is more robust and vigorous in habit, and throws up larger shoots and fully as many of them as Con-over's Colossal and requires no earthing up, as in the green sorts, in order to furnish the white shoots so much sought in white shoots so much sought after. This grand result in producing a White Asparagus did not come by chance, but was the outcome of years of patient work and careful selection by the originator. Per pkt. 5c, oz. 15c, ½ 1b, 49c, 1b. \$1.25.

ROOTS OF COLUMBIAN MAMMOTH ASPARAGUS.—
Two years time can be saved by setting out the roots. We can furnish strong two-year old roots. Postpald per doz. 25c, per 100 \$1.50. By freight or express per 100 \$1.00, per 1,000 \$8.75.

MARKET GARDEN-ER'S PARSLEY.

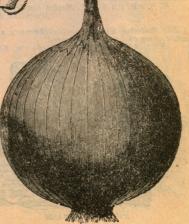

An extra choice stock with dark green, beautifully curled,

mossy leaves; very ornamental in growth and very productive. Most valuable for either garnishing or flavoring. The leaves can be gathered earlier than other varieties, and what is more important, it retains its dark green color very late in the fall, and continues to produce well throughout the winter when transferred to the greenhouse. Is really improved by severe cutting. It stands heat, drouth and cold better, and will yield more than other sorts either in open ground or frames. Per pkt. 5c, oz. 15c, ½ 1b. 50c.

LONG KEEPING RED GLOBE ONION.

Cone of the largest onion growers in this state has been at work for the past seventeen years to obtain a model onion for market. Each year he has selected the most perfect, dark red, globe-shaped onions with the smallest top, and in order to obtain a strain which would keep well, he rejected any which showed signs of starting by spring. From this long continued selection he has obtained a strain which is far superior to any other we have ever seen. The bulbs are very hard, solid, and round as a ball and there are no scullions or thick necks among them. We kept several specimens in a warm steamheated office for several weeks and they remained solid intact, while specimens of other varieties produced sprouts two to six inches long. We have only sufficient seed this year to offer in small quantities, but we hope all onion growers will try them so as to know what to buy another season. Per pkt. 10c, oz. 35c, ½ lb. \$1.60.

LONG KEEPING RED GLOBE ONION.

A SINGLE PLANT OF CUPID SWEET PEAS IN A TWELVE-INCH POT.

NEW DOUBLE SWEET PEAS.

"The Bride of Niagara."

A great novelty for 1896 and one which our customers will take pleasure in cultivating. It originated in the garden of Mrs. O. H. Day, near Niagara Falls, and it is the first double variety ever offered. There are two or three standards or upright parts. These standards are of a clear rose color, while the other parts are white. The duplicate or triplicate banners make it remarkably showy, and render it more durable as a cut flower. Colors pure and beautifully blended, of the sweetest fragrance and altogether a most lovely new variety. Per pkt. 25c. pkt. 25c.

NEW WHITE BRANCHING ASTER.

One of the best floral novelties and one which every flower lover should try. It is easily grown from seed and is of great utility and beauty for bedding purposes coming at a season when there is little else in flower, anticipating as they do the chrysanthemum season by a month or six weeks. The flowers are borne on very long stems and are pure white, of extraordinary size, being four inches or more in diameter. The petals are broad, long, and many of them more or less twisted or curled in such a manner as to give the blooms the appearance of large loose and graceful chrysanthemums. The resemblance is so perfect that nearly everyone would so consider them when seen as cut flowers. The plant is a strong grower and its tendency to form numerous branches is very marked, therefore it should have more room than the ordinary aster. The plant continues to grow later in the season than any other variety with which we are acquainted, and blooms correspondingly late, thus giving its crop of flowers in late autumn, a season when there is always a scarcity of bloom. Per pkt. 10c.

An ornamental foliaged plant of rapid growth, giving immediate effect, and one which would be attractive in any garwould be attractive in any gar-den. It is a native of Japan but appears in many respects like corn. It grows from five to six feet high and has alternate fo-liage, the leaves being very long and two to three inches wide. The variegation does not begin to show until the fourth white. The variegation does not begin to show until the fourth or fifth leaf, when the leaves become striped with broad bands of white, changing soon to narrow stripes or ribbons of alternate clear white and brightest green, occasionally showing faint tinges of pink or rose colorat the edges. The leaves are waxy and gracefully recurved. Our illustration does not do it justice. Desirable for groups on the lawn, or in ribbon beds, or a back border to the lawn. Attracted much attention our seed farm the past season, and as our crop was good we have made price low. Per pkt. 5c, oz. 20c. pkt. 5c, oz. 20c.

STRIPED JAPANESE MAIZE.

CUPID SWEET PEAS.

Most Unique Floral Novelty for 1896 Last spring when we learned of this

Most Unique Floral Novelty for 1896.

Last spring when we learned of this most wonderful new variety, we made up our mind to see it no matter what it cost. The seed could not be purchased at any price and there were only three places in America, where it was being grown. The manager of the Iowa Seed Company therefore traveled a long distance to view them, and was really surprised and felt amply repaid for all the time and expense incurred, by the beautiful sight. They are indeed a superb novelty, and distinct from all other varieties. Fancy a solid area of deep green—just as green as cypress or myrtle—a carpet of plants only five inches high, spreading out from the roots so as to meet, when the seed is planted two feet apart in rows; then fancy this carpet of deep, living green springing into blossom in one week, all a mass of white—clear waxy white—sweet peas on stems four to six inches long and a hundred on a plant; all white—like a mass of snow. Indeed, so strongly contrasting with the deep green foliage that the purity of the whiteness of Cupid's flowers seem even whiter than snow itself! Cupid a Sweet Pea, with all the fragrance of the most favored Eckford's. The flowers are the size of the Emily Henderson, but with more substance in the dards than any other sweet pea.

ve-inch por.

the petals of both wings and standards than any other sweet pea. It bears two or three blossoms on the end of each stem,—all opening about the same time, so that it is unnecessary to pick a stem with a

about the same time, so that it is unnecessary to pick a stem with a bud and an open blossom.

In California last summer it began blooming April 15th and continued in flower until killed by the frost.

Cupid grown in a twelve-inch pot just fills the top; with its blooms of glistening whiteness it is wonderfully attractive in the house, the public hall or the conservatory. In the garden it will be used chiefly as a border plant, for it will bear trimming to just the proper shape. The foliage alone is pretty enough for any border, but this is forgotten when Cupid bursts into a mass of snow white blossoms, not unlike a very dwarf hedge covered with snow. Cupid is a grand flower for floral designs, and only needs to be so used to prove its merit. Nothing could make a prettier wreath, cross or pillow, than a mass of its snow white blossoms wired in with ferns. smilax or other suitable green. The violet, the rose, and the carnation will have to share their popularity for a gentleman's boulonniere with Cupid; it is just the thing,—it has the fragrance and the beauty, and it is a Sweet Pea,—the only sweet pea that looks well in the buttonhole. See illustration on front cover of catalogue and don't fail to try it this year. Per packet of 10 seeds 15c, 2 for 25c, 10 for \$1.00. Larger packets, 20 seeds 25c each, 5 for \$1.00.

GOLDEN BALL ASTER.

GOLDEN BALL ASTER.

The long sought novelty—a yellow aster—has finally been produced and will be warmly welcomed by all flower lovers. The form of the double flower is a perfect ball; the double flower is a perfect ball; the quills are close together and of the brightest sulphur yellow, not a mere indication of the color as in former efforts. The border petals are broad and of a lighter tint, seeming to enclose the flower like an old-fashioned bouquet paper. The flowers are borne upon long, erect stems, excellent for cutting. As shown in the illustration, the plants, twelveto fifteen inches high, are of compact, bushy growth, and most abundant bloomers. Per pkt. 15c, 2 pkts for 25c.

BLUETS, OR "QUAKER LILY."

One of the prettiest little wild flowers in central Pennsylvania, but very little known away from there. As soon as spring sets in to open its bright little flowers and continues blooming profusely until the middle of June, the plants fairly carpeting the ground and presenting a perfect mass of bloom. The flowers are bell-shaped, color light blue with a yellow center. Does better in half shady positions. It grows readily from seed, blooms the first season and is quite hardy, Per pkt. 10c.

FIREBALL DIANTHUS.

An exceedingly dwarf and compact growing pink, only growing ten to fitteen inches high. The flowers are perfectly double, and color a rich, velvety blood red. The plants are symmetrical in form, and begin to flower shortly after seeds are up, and continue to bloom profusely all summer and fall, only ceasing when overtaken by severe frost. Effective for garden bedding or pot culture, and as a cut flower. No flower garden is complete without the China or Indian pinks, and for the handsomest of all the different varieties you must plant the Fireball. Without you must plant the Fireball, without doubt the showiest of all. Per pkt. 10c.

MAMMOTH PERFECTION COSMOS

The glory of the autumn garden. The flowers are double the size of the old large flowering Cosmos, measuring 12 to 15 inches in circumference; the petals are broader and overlapping, forming a perfectly round flower deeply ribbed and of splendid substance. For cutting for bouquets and vases this is one of the finest flowers grown, lasting in water two weeks; the long stems and feathery foliage lend themselves to graceful arrangements. This new mammoth strain of cosmos is the glory of the autumn garden. The plants, 5 to 6 feet high, of symmetrical pyramidal form, are one mass of feathery, emerald-green foliage, studded with mammoth flowers of white, pink or crimson, enlivening the garden long after more tender flowers have succumbed to early frost. If grown in pots and housed by the end of September they will flower all winter. Per pkt. 10c

GLOBE OF GOLD SUNFLOWER.

A dwarf, well branched plant growing only about three feet high, and each of its numerous branches carrying a medium sized densely double, globe shaped flower of rich deep golden yellow color, being veritable globes of gold. The most densely double of any sunflower. Plants are easily grown from seed and produce handsome, symmetrical plants, very effective on lawns or in the flower garden. Per pkt. 10c.

FREESIA GRANDIFLORA.

This new variety grows from 12 to 15 inches high, with very large spikes of flowers which are double the size of the ordinary variety. The bulbs are larger, the growth, more vigorous, and it is altogether a great improvement. The flowers are white with yellow centers, pale yellow with orange centers, cream and white tinted with lavender or brown. Choice mixed, per pkt. 10c.

GAY AND FESTIVE NASTURTIUM.

A new and greatly improved strain of dwarf nasturtiums from California, showing a most charming combination of colors. Flowers unusually large and very beautiful. Every flower lover should plant a bed of them this year. Thirty distinct varieties mixed, Per pkt. 10c.

SALMON QUEEN DIANTHUS.

This new variety represents a beautiful acquisition to the annual pinks. Its flowers are of a very distinct and perfectly new tint in this class, being of the most brilliant salmon color imaginable, changing into a salmony rose when fading. That this variety is distinct from all others is easily proved by the seeds, which are white or yellowish white, while those of all other annual pinks are dark brown or black. The flowers are well formed and nicely fringed; the plants attain a height of 10 to 12 inches. Seventy-five to eighty per cent of the seedlings will come true from seed. Per pkt., 10c.

NEW MAMMOTH HELIO-TROPE.

A few years ago there was very little heliotrope seed sold, but during the past five years our trade on it has nearly doubled every year as our customers learn how easily plants are grown from seed, and from a single packet a large number of strong, healthy plants are produced which would cost ten to twenty-five cents each at the florists. No matter if you have never grown heliotropes before, you should not fail to try this superb new variety. It is a strong grower, the plants covering a space two to three feet square and producing a constant succession of immense heads of flowers, some of the heads containing as high as 8,000 flowers. In color it varies from almost a pure white to the most deep dark blue. Start seed early in the house and they will be unsurpassed as a garden plant all summer, and of great value as a pot plant at all times of the year. Very desirable for cut flower purposes. Per pkt. 15c. pkt. 15c.

GLOBE OF GOLD SUNFLOWER.

LATANIA BORBONICA

LEGION OF HONOR MARIGOLD.

Now don't say, "It's only a marigold," and pass it by, for this is the prettiest of all, and in fact few would take it to belong to that family. It is dwarf, compact and of pyramidal growth, about five inches high, with dark green, fern-like leaves, furnishing a striking background for the bright, golden, star-like flowers. The blooms are of medium size, rich golden yellow with the center of each petal broadly marked with velvety crimson brown. Easily grown from seed, and flowers freely from July until frost. Per pkt. 5e

NEW FANCY FLOWERING GIANT PETUNIAS.

This is the most costly and scarce seed we have, and the cost of production is so great that the crop is actually worth more than the same weight of gold. It is unquestionably the finest and most thorough selection of petunias in existence. They are of enormous size (four to five inches across), and exquisitely ruffled and fringed, but their great merits lie in the varieties of colors, markings, venings, blotchings and stripings in the most grotesque and beautiful combinations; some with charming deep throats of yellow, white, black, green, or marcon, running off into intricate veins. Some of the colors are rich and gorgeous, and others of lovely delicate shades. In order to fully introduce this magnificent class of petunias, we make the price very low. Per pkt. 20c, 3 pkts. 50c, 7 pkts. \$1.00. This is the most costly and scarce seed we have, and

CALIFORNIA YELLOW BELLS.

CALIFORNIA YELLOW BELLS.

One of the lovliest of California annuals, which has escaped attention among lovers of flowers. The Yellow Bells of California, as it is called, forms a broad bush eighteen inches to two feet high. Each of its numerous branches is fairly loaded with bell-shaped, pedulous flowers, a half inch long, and of a delicate cream color. The flowers are almost everlasting, the persistent corolla drying and retaining its shape until the seed has ripened. The pinnatifid foliage has caused the plant occasionally to be taken for a fern before it blossoms. The seeds may be sown in mellow soil early in spring, or as soon as frosts are past, or the plants can be brought into earlier blooming by sowing seeds early in the greenhouse, hotbed or cold frame, and afterwards transplanting to a permanent place in the border. Per plx. 10c.

DIAMOND FLOWER.

A dainty little annual with turts of tiny foliage, and beautiful little white and violet blue flowers that bloom within a month from the time seed is sown. It will grow in the open ground, over rock-work or in pots, never exceeding three inches in height and rarely two. The tiny flowers have a glistening sheen that has given them their name of Diamond Flower, and being surrounded by a wreath of bright green foliage, they show to a wonderful advantage. For pot culture in winter it is just superb. Sprinkle a few seeds in a small pot or saucer, or in pots where other plants are growing, and within a month you will have the most charming mat of foliage and flowers—covering the surface of the soil like moss—that you ever saw. In the fall the self-sown seed will come up and bloom profusely until the ground freezes and begins again early in the spring. Per pkt. 8c.

HIGHLAND PANSIES.

The most exquisite new varieties, grown by a celebrated pansy specialist in Scotland. Their merit consists in uniformly clear, distinct markings, high colors, perfect form and largest size. They are sure to please. Per pkt. 20c.

ELEGANT PALMS.

These have for centuries been considered exclusively for the rich, the plants usually selling at \$3.00 to \$100.00 each, and in some cases tine plants of the rarer sorts have brought as high as \$1.500.00 each. It is now known, however, that they are easily grown from seed, and we have secured a large lot of nice fresh seed for our customers so that we can furnish it at such a low price that everyone could afford to supply themselves with these beautiful and elegant plants. Directions for growing will be printed on the packet.

LATANIA BORBONICA.—This is the typical palm, and is more largely used than any other. Its strong, healthy habit commends it to all, and gives it a fitness for window and room culture not possessed in the same degree perhaps by any other. It is the Chinese Fan Palm. from which the palm leaf fans of commerce are made. Easily grown and tenacious of life. Per pkt. 10c.

CHAMEROPS EXCELSA.—From southern China and Japan. Very hardy, having stood three degrees Fahrenheit with but slight covering. One of the very best palms for house culture in cool climates, forming a fine specimen, standing ill usage remarkably well. Very hardsome palmate leaves. Per pkt. 10c.

remarkably well. Very natosome parmate reaves. Telephone the palm from PHENIX DACTYLIFERA,—A native of northern Africa. This is the palm from which the date of commerce is obtained. It is grown in some parts of California successfully from a commercial point of view. Produces fruit when about ten years old. Exceedingly beautiful for pot culture and very hardy. Per pitch 10c.

WASHINGTONIA FILIFERA.—This is one of the best window palms, needing no petting to succeed. Stands dust and dry air, and lack of sunshine, and is very ornamental with its elegant fan-shaped leaves of a rich, dark, leathery green. Picturesquely fringed with long, thread-like filaments along the segments of the leaves. The plant is a compact grower, well adapted to pot culture, succeeding in any situation, and with any treatment that will keep a geranium alive. Per pkt. 10c.

A GRAND OFFER !-One packet each of the above four varieties for 25 cents; five packets of each for \$1.00.

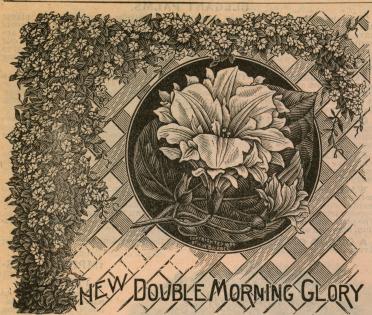

LEGION OF HONOR MARIGOLD.

IMPERIAL NAS-TURTIUMS.

If we were asked to name the six best anname the six best annuals, the nasturtium would be one of them. They are so easy to grow that a six-year-old child could plant old child could plant and care for them, and they have every good quality of a bedding plant—compact habit, attractive foliage, intensely bright and beautiful flowers borne profusely, the whole profusely the whole eason, not troubled by insects, and standing dry weather well. Our Imperial Nasturtiums consist of about 20 of the best dwarf varie-ties, selected from both ties, selected from both American and foreign growers. When plant-ed in beds will produce a most gorgeous dis-play of beautitul flow-ers of all shades of color. Per pkt. 10c, oz.

NEW DOUBLE-FLOWERED MORNING GLORY.

The number of hardy annual climbers is not very great, and we do not doubt a moment but that this first double-flowered convolvulus major or morning glory ever introduced will be greeted as a welcome addition to this class of plants. It is of rapid growth, and produces its double flowers very freely. They are white with a slight spot of red or blue at the base of the larger petals. About 80 per cent of the seedlings will reproduce themselves true from seed; the remainder will flower semi-double or single. As a blue variety has shown itself this season, we presume that all the other colors of the single-flowered morning glory will be produced by hybridizing before long. Seeds should be sown as early as the ground can be worked in the spring, or may be sown in the house and transplanted outside as soon as the weather permits, so that a long season of beautiful flowers may repay you. Truly a lovely addition to the floral kingdom, as one can never forget the beautiful appearance of one of these lovely plants in full bloom, with its light graceful foliage and hundreds of delicate flowers playing peek-a-boo among the leaves. Per cate flowers playing peek-a-boo among the leaves. Per pkt. 10c.

GOLDEN GLORY CALLIOPSIS.

Beautiful yellow flowers are indispensible in all gardens, and for all decorations this new Giant Calliopsis, with its large, graceful, golden flowers, borne on long stems, is alike valuable for gardens, for bouquets and decorations. It is a continuous and persistent bloomer and is desired at once by all who see it. The plants are a perfect glory of large golden blossoms, double the size of the older sort. They are prettily toothed at the edges. It is a fine winter bloomer. In fact is never without flowers all the year. Per pkt. 10c. bloomer. In Per pkt. 10c.

PEERLESS MIXED BALSAMS.

Several European and American specialists have been devoting much of their time during the past few years to improving this popular flower, until now we have a plant which is worthy of a place in any garden, and will prove satisfactory to the most fastidious. The flowers are of the most perfect camelia-flowered and rose-flowered types, intensely double. The plants are of most ideal, symmetrical shape, fairly loaded with flowers and a continuous bloomer, sometimes 500 magnificent large blooms on a plant at one time. Seed may be sown out doors at the usual corn planting time, but we consider it better to start it early under glass or in a box in the house. Plants should have plenty of room when set out, for if crowded they will never prove satisfactory. Per pkt 10c, 3 pkts. for 25c, 7 for 50c.

IMPERIAL JAPANESE MORNING GLORY.

A most elegant new climber, the seeds of which were sent to this country a few years ago by the director of the Imperial Japanese Garden. The vines are of strong and robust growth, attaining a height of from 30 to 50 feet. The foliage is most luxuriant, distinct and varied—some vines have rich vivid green leaves, others have silvery leaves, yellow leaves, or leaves mottled and checkered like rich mossaics of light and dark green, white and gray. The flowers are of gigantic size, measuring from 4 to 6 inches across, remaining open much longer than ordinary morning glories, The flowers are of deep, rich velvety tones, others more daintily tinted and shaded than an artist's brush could portray. Some are striped, starred and spotted; others have magnificent edges and throats. They are of the easiest culture. Sow early in a warm, sunny position in good, rich soil, and give plenty of water in dry weather. Per pkt. 15c.

EARLY DAWN COSMOS.

This new variety is bound to become popular on account of its extreme earliness. It blooms fully two months ahead of any other cosmos, making it of special value. Seeds sown in open ground in May produce blooming plants before the middle of July, or in about two months from the time of sowing, and continuing until destroyed by frost. The flowers are a little smaller than the late kinds, but its earliness and profusion of bloom through a much longer season will more than compensate for any lack of size. The plants have fine, feathery, light green foliage and delicate rose, purple, white and lilac flowers, which are produced on long stems and are very desirable for bouquets, as they will last a week after cutting. Well worthy of a trial by all who wish a free blooming plant of the easiest culture. Mixed colors, per pkt. 10c.

BEGONIA ERFORDIA.

A little beauty as well as a most distinct novelty. It is a most profuse bloomer from early summer until late autumn; even a light frost will not hurt it.

even a light frost will not but it. The color of the flower is a lovely soft pink throughout, which does not fade even in the hottest summer days, when most other flowers seem to wither. The leaves and leaf stalk are of a coppery bronze of a rich shade, affording a most effective background for the flowers. Per pkt. 15c, 2 pkts. for 25c.

WHITE BEAUTY SUNFLOWER.

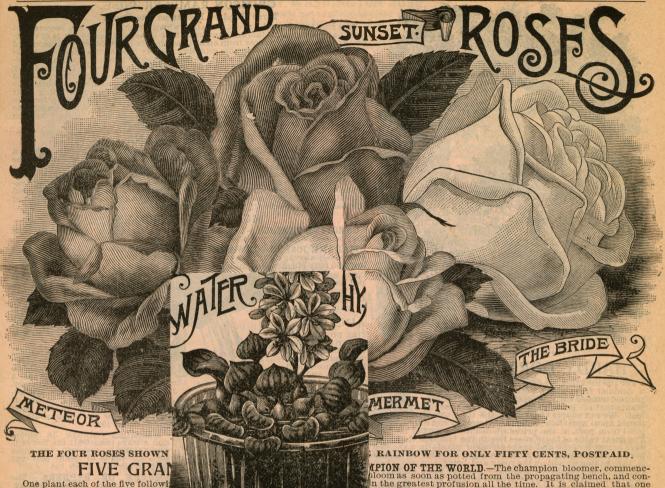

A mammoth single-flowering variety with pure white seeds, which is the result of eight years of careful selection. Desirable for the flower garden and also unexcelled for poultry, outyielding the old sorts almost two to one in quantity of seeds produced to the acre. Per pkt. 5e, oz. 10c, ½ 1b. 25c, lb. 65c, postpaid.

PERENNIAL CHRYSANTHEMUMS.

Everyone likes chrysanthemums, those grand flowers which fill the greenhouses, are the most attractive of window plants and worn almost universally on the streets of all ctiles during October and November. Our seed is carefully saved from a superb collection of the best varieties so cross fertilized that it will produce a wonderful variety of flowers, perhaps no two alike, and possibly some great novelties. They are easily grown from seed. Per pkt. 10c.

PEERLESS MIXED BALSAMS.

METEOR.—A rich, dark, velve bloomer and vigorous grower, sho not run single during summer, a invaluable, and cannot be too high

MERMET.—One of the finest ross grown. The buds are very large and globular, the petals being recurved and showing to advantage the lovely bright pink of the center, shading into light creamy pink, resinding one of La France in its silvery shading. A strong grower and fine bloomer. Each 10c.

THE BRIDE.—This is undoubtedly one of the finest white roses ever offered. The buds are very large and of exquisite form, and the are very large and of exquisite form, and the full flower very double, measuring from 3½ to 4 inches in diameter. The color is a delicate creamy white. The blooms will last in a fresh state, after being cut, longer than any other white variety. Each 10c.

SUNSET, -This exquisite orange yellow va-SUNSET.—This exquisite orange yellow variety is one of the finest Tea Roses grown. The flowers are large and double. The exquisite shades of coloring found in this variety can only be compared to the gorgeous colors of a summer sunset; hence the name. It is deliciously fragrant, a strong growing and free flowering variety. Each l5c.

and free flowering variety. Each lbc.

NEW RAINBOW,—This new rose from California was awarded a silver cup by the State floral society. The color is a lovely shade of deep coral pink, striped and mottled in the most unique manner with intense crimson, and elegantly colored with rich golden amber at center and base of petals. It makes beautiful buds, and the flowers are extra large, very sweet, and of great depth and substance. It is a most charming new variety. Each lbc. Each 15c.

EMPRESS AUGUSTA VICTORIA.—The finest white rose in existence for summer blooming. It is a true Tea Rose, soft pearly white, remarkably fragrant, a strong, healthy grower, with bold, beautiful foliage. It is a continuous bloomer, the buds being of elegant perfect shape, while the full, open flower is unsurpassed and shows no center. Very fragrant. Each 20c.

ETOILE DE LYON

ntion of the work. It is claimed bench, and con-ploom as soon as potted from the propagating bench, and con-in the greatest profusion all the time. It is claimed that one if it will produce more flowers during the year than ten plants lea rose. Blossoms are perfectly double to the center, of good while its color is a degree of loveliness which few roses can being a rich, deep rosy pink. Each 15c.

MALMAISON.—Flower extremely large; quartered and double to the center; color flesh white, clear and fresh. Each 10c.

MADAME HOSTE.—This is an exceedingly MADAME HOSTE.—This is an exceedingly beautiful, new ever-blooming rose, extra large flowers, and superb buds very full and delightfully perfumed; color soft, canary yellow, deepening at center to pure golden yellow, beautifully flushed with pale amber; edges and reverse of petals rich creamy white; has proven excellent for garden culture. Each 10c.

LA FRANCE.—Undoubtedly the most perfect type of a cut-flower rose. No variety surpasses it in delicate coloring—silvery rose, shaded pink, with a satiny sheen over all its petals. Flower large, keeps well, and of distinct pervading fragrance. Each 10c.

MARECHAL NEIL.—Very bright, rich golden yellow; very large, full and perfect form; of vigorous climbing growth and a free bloomer. This is unquestionably the finest of all Tea roses; truly magnificent. We have seen greenhouses devoted to a single plant of this variety, from which it was not unusual to cut five hundred to two thousand flowers per day. Each 15c.

AMERICAN BEAUTY.—One of the best and most valuable roses, both for garden and house culture. Color rosy crimson, exquisitely shaded and very handsome. Extra large full flowers, exceedingly sweet, makes magnificent buds, is a good bushy grower, very hardy and a constant bloomer. Each 20c.

ETOILE DE LYON.—A magnificent Teach 20c.

ETOILE DE LYON.—A magnificent Teach 20c.

rose introduced from France; brilliant chrome yellow, deepening at center to pure golden yellow; flowers very large, double and full, and deliciously fragrant, Each 10c.

PERLE DES JARDINS.—Fine straw yellow, sometimes deep canary yellow; very large and of most perfect form. Each 10c.

CRIMSON RAMBLER ROSE.

HARDY DORMANT ROSES.

rot the first time we offer dormant roses; this is to satisfy a demand from many customers for plants that can be planted outside early in spring, before it is safe to set out plants that are growing in pots and consequently are in full leaf. We can supply these from the time this catalogue is issued up to April libt; after that time they can only be supplied from pots, at the prices quoted at the end of the list. The great value of these roses lies in the fact that they produce better flowers and make stronger plants in a shorter period than those grown from cuttings; and the advantage is, that having no soil on the roots and being dormant, they can be sent cheaply by express Procure them early and store in the cellar until your ground is ready for them.

We can furnish any of the following varieties at 30c each, 33.00 per dozen, by express. Too large for mailing.

BARONESS ROTHSCHILD.—An exquisite shade of sating in a warm

3.00 per dozen, by express. Too large for mailing.

BARONESS ROTHSCHILD.—An exquisite shade of satiny in a warm, sunny posi-

CAPTAIN CHRISTY.—Delicate flesh color, deepening in shade toward the center; one of the most beautiful of roses.

COQUETTE DES BLANCHES.—Of medium size; color snowy white, sometimes delicately flushed with pale rose.

EUGENE VERDIER, -Crimson purple, large and full; a very fine, handsome rose.

GEN. WASHINGTON.—Brilliant crimson, very rich and beautiful; large, perfectly double and a free bloomer.

GENERAL JACQUEMINOT.—One of the grandest roses in existence. A hybrid perpetual sure to delight every lover of the beautiful, as nothing can surpass them in beauty. Our cut vell illustrates the shape of the flower, and the cut flowers are often sold by florists at from \$1.00 to \$3.00 each. Color a rich, dazzling scarlet, shaded with deep, velvety crimson, making a superp glowing color. Flowers large, free bloomer. Each 20c.

MME. GABRIEL LUIZET.-Light satiny pink; an attractive sort.

MAGNA CHARTA.—Dark pink; one of the easiest roses to grow.

MADAME PLANTIER.—As a cemetery rose it is still without a rival. The flowers are borne in the greatest profusion, and are of the purest white. Hardy as an oak and certain to grow as grass.

PERFECTION DES BLANCHES.—Pure white, free blooming.
PERSIAN YELLOW,—Hardy, yellow rose; best of its color.
PRINCE CAMILLE DE ROHAN.—Dark Crimson maroon, almost black.

MOSS ROSES.

COMTESSE DE MURINAIS.—Finest double white moss rose; large, beautifully mossed. HENRY MARTIN.—Fine, rosy carmine.
CRESTED MOSS.—Deep rose-colored, very fine, handsome buds, surrounded with

CAPTAIN INGRAM.—Dark velvety purple; very handsome.

GLORY OF MOSSES.—Pale rose, very heavily mossed; one of the best Moss roses in cultivation. Any of above sorts each 30 cts., doz., \$3.00.

CLIMBING ROSES.

BALTIMORE BELLE.-Pale blush, shading to rose color; very double; flowers in

GREVILLE, OR SEVEN SISTERS.—Blooms in large clusters, with flowers varying from white to crimson. Perfectly hardy.

PRAIRIE QUEEN,—Clear, bright carmine-pink, sometimes with a white stripe; large, compact, and globular; very double and full; the best hardy climber in this climate.

Any of the above large-sized dormant roses, 30 cts. each, \$3.00 per doz., or a grand collection of one plant each af the 20 varieties above named for \$4.50.

CRIMSON RAMBLER ROSE. Three Hundred Blooms on One Branch.

Three Hundred Blooms on One Branch.

This rose has created a great sensation wherever shown. It has received not less than four gold medals and numerous first class certificates. It is of vigorous growth, making shoots from eight to ten feet in height, during a season, and is consequently a most desirable climbing variety. When the shoots are fastened down or it is grown in a bush form, marvelous heads of bloom are the result. As a pot plant it is unequaled for decorative purposes. It is exceedingly hardy. The flowers with which the plant is covered in the spring are produced in large trusses of pyramidal form and of the brightest crimson color. The blooms remain on the plant for a great length of time without losing their brightness. When cut in proper condition, the flowers will remain fresh in water for two weeks. A gentleman in England writes about it thus under date of July 6th: "At this date this is a grand rose. On one shoot alone I counted over three hundred blooms." Strong plants. Each 25c.

ROSA WICHURIANA.

This novelty from Japan is a trailing species of very rapid growth, making a closely matted bed of very dark green foliage. The flowers are produced in the greatest profusion in July, after the June roses are past, and more sparingly throughout the season. They are single, pure white, with golden yellow stamens, from seven to nine inches in circumference, with a strong and sweet fragrance. Appropriate and enduring for cemetery use, not only when covered with its exquisite flowers, but also for its rich carpet effect up to the very last of the season. It is perfectly hardy. Each 20c.

MONTHLY TEA ROSES.

CAROLINE TESTOUT.—Large and double; color bright satiny pink, with rosy center; odorous, free flowering. Each 15c.

MADAME JOSEPH SCHWARTZ.—Extra large globular flowers, very full and deliciously sweet; color pure white, elegantly tinged and shaded with pale yellow and rosy blush: constant bloomer. Each 10c.

inting time, but we con-le house. Plants should ever prove satisfactory

Per pkt. 15c.

MOSS ROSE.

They are prettily tooth:

LA FRANCE.—Sport from La Prance; richness of color difficult to describe—a shade which our artist describes as "Tyrian rose;" which is very rare. May be left in open ground all winter if covered with straw; if potted, will bloom all winter. Each 15c.

SOUVENIR DE WOOTON.—Color a beautiful shade of velvety crim-son, equal to the noted General Jacson, equal to the noted General Jacqueminot, deliciously fragrant, a constant and most prolific bloomer, and the full open flowers are frequently six inches in diameter. It has proved hardy in the open ground as far north as southern Iowa. Each 15c.

HERMOSA.—Always in bloom and always beautiful; the flower is finely formed and full, the most pleasing shade of pink, soft but deep; fragrant. Each 10c.

QUEEN OF BEDDERS.—The flower is large, full and regular; color, bright and glowing crimson; blooms constantly. Each 10c.

MARIE GUILLOT.—Perfection in form; flower is large and double to the center; white. Each 10c.

GENERAL JACQUEMINOT ROSE.

MARY WASHINGTON ROSE.

MAKY WASHING ION KUSE.

It is a historic fact that our revered first president, George Washington, raised in his garden at Mt. Vernon a seedling rose which proved to be a hardy, perpetual blooming climber, producing double snow-white blossoms in great profusion from June until frost. In this lovely rose our first president took special delight, and named it after his mother, Mary Washington. The original bush can yet be seen growing in the grounds where the world-famed master planted it in his garden at Mt. Vernon. No home is complete without one of these roses. Each 15c. Large, strong plants, each 25c. strong plants, each 25c.

BEAUTIFUL FAIRY ROSES.

These Polyantha roses are of marvelous grace and beauty. Something everyone can succeed with; sure to give satisfaction. They bloom in immense clusters, 25 to 50 together on a single stem. They are wonderfully beautiful, bloom constantly and as freely as ageranium, and require as little care. They are quite hardy, requiring but slight protection even in the north. Excellent for cemetary planting. We sell thousands of these, and purchasers are delighted. tary planting. We sell t purchasers are delighted.

MIGNONETTE ROSE.

MIGNONETTE—As the name would denote, this is deliciously scented: the flowers are blush or soft rose, borne in dense heads—we have had trusses with over 200 flowers and buds on at the same time.

MINATURE.—The smallest rose in cultivation: the flowers, which are only about the size of a silver dime, are produced in great profusion and are very double. It is a delicate rose color on opening, changing to pure white as the flowers expand.

LITTLE WHITE PET.—Very handsome; pure white, perfect shaped flower. A strong grower and profuse bloomer. Very hardy. Each 10c.

PERLE D'OR.—Color of the buds beautiful nankeen yellow, with vivid orange center, each petal tipped white, changing to buff tinged rose in the open flower. Each 10c.

CLOTHILDE SOUPERT.—A decided novelty, and one which should be in the collection of every lover of roses. Very profuse bloomer; flowers large, very double; pure white, with rosy pink center; fragrant. Each 10c.

PINK SOUPERT.—A charming novelty, which we offer this year for the first time. Like Clothilde Soupert, only the flowers are a handsome rosy pink color all over, a peculiar shade, different from any other. A great bloomer and every one should try it. Each 20c.

ROYAL PURPLE STROBILANTHE.

A new house and bedding plant; was awarded the Gold medal offered by the King of Belgium at the Ghent exhibition. It forms a compact bush 18 inches wide, and of the most intense metallic purple color, shading into light rose with a light green margin, a combination unapproached by any other plant. The flowers are a lovely violet-blue, very beautiful. It has created a veritable sensation wherever exhibited, and will be grown by the thousand as a bedding plant, while at the same time one of the most brilliant decorative plants in existence; for table ornament, parlor or greenhouse, nothing can equal it. Each 15c.

PANSY GERANIUM.

This variety, though not new, is one of great merit. The flowers are of medium size, and have a white throat. Each petal is shaded toward the center with a rich lavender pink and a dark maroon blotch in the center. Each 25c.

NEW DOUBLE GER-ANIUM.

REMARKABLE.—As will be seen by our illustration, the habit of growth is dwarf and compact,

PANSY GERANIUM

MARY WAS LINGTON ROSE. WATER HYACINTH

WATER HYACINTI

One of the most remarkable, curious and beautiful plants we have ever grown. Instead of growing in soil it floats in the water, which it is enabled to do by means of its curiously inflated leaf stalks, which resemble bladders or balloons, illled with air. A large mass of feathery blue roots grow downward, their ends entering into the soil. It forms a lovely rosette of its curious, shining green leaves, and throws up spikes of the most exquisite flowers imaginable, resembling in form a spike of hyacinth bloom, but as beautiful as many of the choicest and most costly orchids. Each flower is as large or larger than a silver dollar; color, a beautiful, soft lilac rose, sparkling as if covered with diamond dust. The upper petal, which is the largest, has a large metallic blue blotch, and in the center of that a small, deep, golden yellow spot. Each 15c.

REMARKABLE GERANIUM

FIFTY CENTS,

JUPITER FUCHSIA.

A new giant flowered variety from France, which we offer for the first time. The flowers are first time. The flowers are of really mammoth size with very large rich violet-purple double corolla, often two inches or more in diameter. Tube and sepals bright crimson. Plant is a strong, hardy, free grower, which everyene can succeed with, and will attract attention everywhere. Each 15c.

LITTLE BEAUTY FUCHSIA.

This is a charming va-riety and the freest flowriety and the freest flow-ering of all Fuchsias. It begins to bloom when only two or three inches high and continues to flower the year round, often one hundred open blossoms at one time on a single plant in a small pot Flowers of good size. Tube and sepals bright red, corolla deep purple. Every lover of Fuchsias should have this little gem. Each 15c.

SWAINSONIA.

We bring prominently before flower lovers this distinct climbing plant for house culture and is a native of Australia. The habit of growth is extremely graceful, and the vines, trained up at the side of a window or on a trellis, present a lovely sight of light-green, feathery foliage, and a splendid profusion of pure white sprays of fairy-winged flowers, somewhat resembling Sweet Peas in form. Easily grown, and under favorable conditions it is almost a perpetual bloomer. There is certainly no climbing vine for house or conservatory culture to-day that is more desirable than this fine, new plant.

Strong plants, by mail, 15 cents each; 4 for 50 cents.

SOUVENIR DE BONN ARILEU.

This is entirely different for the second of the second of

THE WONDER GERANIUM.

JUPITOR FUCHSIA.

This new geranium, without doubt, is the finest that has ever been offered, came from France in a lot of fine sorts. and is supposed to be a sport from the scarlet geranium, Athlete. It being so intense in color, such a wonderful bloomer and strong grower that it was kept separate and styled the "Wonder." from the fact that everyone who saw it pronounced it wonderful. The flowers are the most intense, dazzling scarlet, and are borne in trusses of enormous size. measuring from 18 to 20 inches in circumference with single florets measuring from the foliage is fine and rich in color, and in strong contrast to the brilliant scarlet flowers. As a pot plant or bedding geranium, it has no equal. Each 15c.

This is entirely different from anything we have had before in the way of variegated Abutilons. It is a strong upright grower with large bright green foliage, distinctly edged with a broad band of creamy white and yellow. Flowers very large on stems 8 to 9 inches in length. Color bright orange red, very effective with its beautifully variegated foliage. It is one of the most distinct and showy ornamental foliage plants that has come to our notice in years, and when better known will be used in large quantities, for decorative purposes. Each 15c.

V. H. HALLOCK CHRYSANTHEMUM.

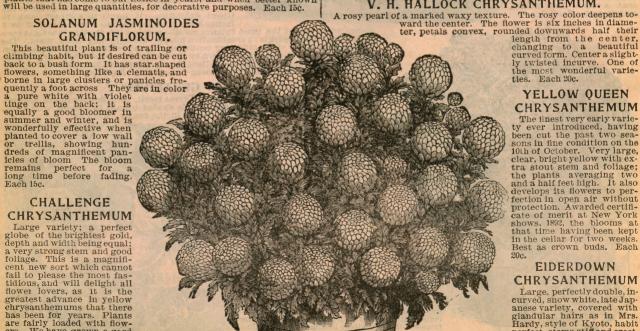

the most wonderful varieties. Each 20c.

YELLOW QUEEN CHRYSANTHEMUM

CHRYSANTHEMUM
The finest very early variety ever introduced, having been cut the past two seasons in fine condition on the 10th of October. Very large, clear, bright yellow with extra stout stem and foliage; the plants averaging two and a half feet high. It also develops its flowers to perfection in open air without protection. Awarded certificate of merit at New York shows. 1892, the blooms at that time having been kept in the cellar for two weeks. Best as crown buds. Each 20c.

EIDERDOWN CHRYSANTHEMUM

Large, perfectly double, in-curved, snow white, late Jap-anese variety, covered with glandular hairs as in Mrs. Hardy, style of Kyoto, habit perfect, stems stiff and erect. Winning notoriety wherever shown. Each 20c.

CHALLENGE **CHRYSANTHEMUM**

wonderfully elective when planted to cover a low wall or trellis, showing hundreds of magnificent panicles of bloom. The bloom remains perfect for a long time before fading.

CHRYSANTHEMUM
Large variety; a perfect globe of the brightest gold, depth and width being equal; a very strong stem and good foliage. This is a magnificent new sort which cannot fail to please the most fastidious, and will delight all flower lovers, as it is the greatest advance in yellow chrysanthemums that there has been for years. Plants are fairly loaded with flowers. We have grown a good stock and offer them at the low price of 10c each. low price of 10c each.

CHALLENGE CHRYSANTHEMUM. PLANT ORDERS MUST AMOUNT TO AT LEAST FIFTY CENTS.

REDFIELD RASPBERRY.

REDFIELD RASPBERRY.

Decidedly the best fruit novelty of 1895, and we doubt if there will be any new variety of raspberries for several years to come which will be equal to it. It originated near the town of Redfield, Iowa, and was introduced and color-plated by us last spring. The berries are unusually large and luscious, somewhat similar to Shaffer's Collosal in color and shape, but there the resemblance ceases. The canes are very vigorous and unusually free from thorns or spines, being, in fact, quite s nooth. The foliage is similar to the Turner, yet it propagates from the tips like the cap varieties. It throws up a great many branches of fruit from the old canes; and in our trial grounds, beside a great many old and new sorts, it yielded three to four times as much fruit as any of them. In fact, the field where they were grown was so red with fruit when viewed from a distance as to suggest the name Redfield, even had it originated in some other locality. But the crowning features of all are the unequaled fiavor, which is superior to all others, and the fact that the berry is of unusually large size and holds together well instead of crumbling like the Shaffers. This holding of its shape is a grand point for market or canning, and will be appreciated by housewives. The canes do not grow as long as Shaffer's, but are lower and heavy and better able to stand hard storms. It is perfectly hardy, having never been injured in the slightest, even when the temperature went to 32° below zero. Don't fail to try it this year. Each 50c, postpaid, or 16 for \$1.00 by express.

FORGET-ME-NOT.

Freew one laves the abstractivity lists for

FORGET-ME-NOT.

THE HARDY CHINESE MAT-RIMONY VINE.

Is a most vigorous hardy climbing plant. It sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright, purple flowers, which are succeeded by brilliant scarlet berries nearly an inch long, every branch being loaded with them; the contrast between the glossy dark green foliage and shining scarlet fruit is extremely beautiful. It continues flowering and new berries are forming from late spring until frost. Nice forming from late spring until frost. Nice plants each 15c.

SANSEVERIA.

ZELANICA.—A singular plant, eminently adapted for decorative purposes in parlors, etc. Dark green, beautifully striped crosswise with white. Flowers white. Each 25c. sized packet each of autifully striped crosswers-white. Each 25c. sized packet each of

Novelty of 1896.

Great \$1,000 Corn.

Iowa Silver Mine Corn.

The acme of perfection. Unsurpassed and unsurpassable. Is our opinion valuable? Why should it have a weight with you? Please consider - we claim to have filled more orders for field corn in 1895 than any three other seed firms in America. The reason that our seed corn trade is increasing so rapidly is that we have never sent out a bushel of corn which would not, under ordinary conditions, prove satisfactory and please the purchaser. If we were sold out of our best stock, we frankly said so and returned the money. Our customers have confidence in us, and when we tell them that in our opinion the NEW IOWA
SILVER MINE CORN is the best
and most profitable variety in the
world for any farmer to grow, they
will all want to test it. Don't fail to
plant a few acres of it this year. It plant a few acres of it this year. It will pay you.

fight and continues to flower the year round, often one hundred open blossoms at one time on a single plant in a small pot Flowers of good size. Tube and sepals bright red, corolla deep purple. Every lover of Fuchsias should have this little gem. Each loc.

Best Corn Ever Introduced. Why Plant White Corn?

Is the question you will ask at once. It yields more. The American Corn and Hog Journal gives a summary of the reports of 1,267 comparative tests of corn in the various State Experiment Stations with 489 varieties of corn, showing that the average yield of the 216 white varieties has been 2½ bushels per acre in excess of the yield of the 273 yellow varieties, and of the 31 varieties giving the best yield 24 were white and 7 were yellow. In feeding qualities a chemical analysis shows no difference between the white and yellow. The coloring matter in yellow corn will not fatten hogs. There is no doubt that white corn is more hardy and a better drouth resister. Millers will pay a higher price for white corn than for yellow.

A LARGE GARDEN. Anyone ordering all of the above seven collections may have them for \$3.00, and they will receive 44 packets of Vegetable Seeds and 93 packets of Flower Seeds, or a total of 137 packets of seed all different.

BLUE-PODDED BUTTER.—This is one of the most remarkable and strikingly odd novelties in beans ever introduced. The compact, bushy plants grow only twelve inches high and bear abundantly. The leaves and stems are of a bright purple color, which becomes more intense as the season advances and form, when covered with the pinkish-purple flowers and rich deep-blue pods, a most showy, blackish-purple bush. The entire pods cook a rich green, are very tender, stringless, and of a rich delicious flavor. Supply of seed very short. Per pkt. 10c.

**SCARLET RUNNER.—This is a pole or climbing variety, but we want to call special attention to it here as its sale should be widely extended. It has highly ornamental foliage, and beautiful blossoms and gods, which are fit for wear as corsage bouquets when small. It is a prime favorite with all who are acquainted with its merits, but it is, comparatively speaking, so little known that we give it prominence, knowing as we do that everyone who tries it will be delighted. It is not only exceedingly ornamental, but of the highest usefulness, as the beans, which are very large are of the very best flavor and quality, and no bean excels the Scarlet Runner for uses as shelled or dried bean. It is richer than the Lima. The vine is so graceful and of such rapid growth as to render it one of the best for arbors, etc. The flowers are in color a brilliant scarlet, and are borne very profusely until frost comes. Per pkt. 5c., ½ pt. 20c. qt. 70c.

**Burpee's Bush Lima bean was a grand success with me this year. They are early and have BLUE-PODDED BUTTER, -This is one of the

BEANS.--Dwarf Bush Varieties.

One quart will plant one hundred feet of drill.

Dwarf or Bush beans require no support, and should be planted in drills an inch and a half deep and drop the beans three inches apart in the drills. Beans are tender annuals, and cannot be planted till danger of frost is past. Keep clean, but do not hill up or hoe when wet. A sandy loam is the best. The half-pint packages will be found very desirable for small families. We furnish pints at one-half the quart price. Crop was almost a failure on many varieties of beans this year. Price includes postage. See special prices by the peck and bushel on page 47,

JACKSON WONDER LIMA,—A dwarf variety growing from 18 to 30 inches high, immensely productive and very early. Pods broad and flat containing three or four beautiful variegated flat beans, similar in shape to the well known Lima, and in the dry state as shell beans can be used the same as the Lima, but when the pods are young they make excellent snap beans. It is not waxy, hence cooks easily and quickly, in fact fills all the requirements for a good garden variety as well as a field sort. Per pkt. 10c, ½ pt. 20c, qt. 60.

BURPEE'S BUSH LIMA.—A dwarf or bush form of the true large Lima which is of great value. There is no reason now why western farmers should not raise all the Lima beans they require for their own use as well as for sale. They are of perfect bush form, growing 18 to 20 inches high, of stout and erect growth, yet branching and vigorous. An immense yielder, each bush bearing 50 to 200 handsome large pods, well filled with very large beans of luscious flavor. Does not always mature dry shelled beans in this latitude, but you are sure of a good crop of green ones. Try it. Per pkt. 10c, ½ pt. 20c, qt. 65c.

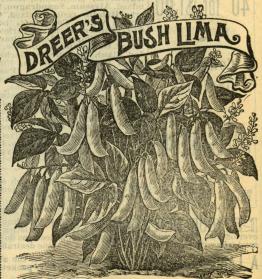

BURPEE'S BUSH LIMA

pkt. 10c, ½pt. 20c, qt. 65c.

DREER'S BUSH LIMA.—A dwarf growing
form of the old Dreer's
Lima or Potato Lima.
which was quite popular a few years ago. It
is also called Kumerle's
Bush Lima. Compared
with the Henderson's,
this bean in its green
state is fully double as
large and yields abundantily. One plant sent in
had 185 pods on. Does
better on dry, sandy
soil. owing to its heavy
foliage. Is of the best
flavor. Per pkt, 10c, ½
pt. 20c, qt. 65c.

HENDERSON'S

HENDERSON'S
BUSHLIMA.—Another
year adds to our high
opinion of this really
remarkable variety. It
grows in compact bush
form and produces on form and produces en-ormous crops of deli-cious Lima beans which can be as easily gath-ered as the common garden bush bean; is at least two weeks earlier than any of the climb-ing Limas, produces a continuous crop from the time it comes into bearing (fit for table in this latitude by about July 15) untilfrost. Enormously productive: a very small patch will supply a family with this splendid vegetable throughout the season. Pkt. 5c. 1/2 pt. 15c, qt. 50c.

EARLY REFUGEE, OR THOUSAND TO ONE. Most prolific green podded sort, thick and fleshy. Per pkt. 5c, ½ pt. 12c, qt. 35c.

LARGE WHITE MARROW.—Excellent as shelled bean; cooks in twenty minutes. Popkt. 5c, ½ pt. 12c, qt. 35c.

DWARF HORTICULTURAL.—Has all the good qualities of the old Horticultural Pole and is much easier to cultivate, because of being a dwarf variety. Per pkt. 5c, ½ pt. 20c. qt. 60c.

WARDWELL'S DWARF KIDNEY WAX.—Earlier, better, more productive, than Golden Wax; rust-proof, vigorous, pods large, showy, tender and stringless, excellent flavor and good either for snap or shell. Per pkt. 5c, ½ pt. 15c, qt. 50c.

IMPROVED GOLDEN WAX.—Possesses all the good points of the old Golden Wax, but is larger in pod and much more prolific. This improved stock is one of the handsomest beans we have ever seen, pods of dark, rich, golden yellow color and of perfect shape. It is of good quality, showing no string or coarseness, but is of tender, melting flavor at all stages of its growth. Per pkt. 5c. ½ pt. 15c, qt. 45c.

CURRIE'S RUST-PROOF WAX.—It is positively rust-proof. While grown side by side for several years with other Wax beans, all of them more or less affected many of them completely ruined by rust, this bean has remained entirely free from it. Exceedingly crisp and tender, and of a most delicious flavor. As early as the Golden Wax, and it is, moreover, amazingly productive. Per pkt. 5c, ½ pt. 20c,

WHITE WAX.—Pods waxy, yellow, very tender. Per pkt. 5c, ½ pt. 15c, qt. 50c.

BLACK WAX.—One of the most popular varieties with all market gardeners. Pods fleshy, waxy yellow, tender. Per pkt. 5c, ½ pt. 15c, qt. 50c.

EARLY MOHAWK.—Very early and will stand more cold weather than most bush varieties. For this reason it is desirable for early planting. It is an old variety of established reputation. Pods five to six inches long. Per pkt. 5c, ½ pt.

YOSEMITE MAMMOTH WAX.—Pods frequently attain a length of ten to four-teen inches, with the thickness of a man's finger, and are nearly all solid pulp, the seeds being very small when the pods are fit for use. The pods are a rich golden color and are absolutely stringless, cooking tender and delicious. This is the Wax bean for family or market purposes. It is enormously productive, as many as 50 of its monster pods having been counted on one bush. Per pkt. 10c, ½ pt. 20c, qt. 70c.

YOSEMITE MAMMOTH

One-half of a pod, showing size and fleshy thickness of this monster Wax beans.

IMPROVED EARLY VALENTINE.—About ten days earlier than the common Early Valentine. In addition to this, it is more robust and vigorous, and produces the true, round, curved pods very abundantly. Unexcelled in quality and uniformity of ripening, nearly the whole crop can be taken at one picking, usually within thirty-five days from time of planting. Per pkt. 5c, ½ pt. 15c. qt. 40c.

CALIFORNIA BRANCH, OR PROLIFIC TREE.—This is quite a valuable variety for field culture; grows about twenty inches high, has stiff, upright branches, and bears immensely, sometimes yields forty-five bushels to the acre. The beans closely resemble the White Navy. Per pkt. 5c, ½ pt. 15c, qt. 40c.

We pay the postage on beans at these prices.

Deduct 15 Cts.

On each quart if to be sent

The Lazy Wife's bean is the best we have ever tried. All other seeds were good. JAMES L. BIRCHARD,

Griggsville, Ill.

One quart will plant 100 to 150 hills.

These succeed best on clay loams, which should be liberally enriched with short manure in the hills, which are formed according to the variety, from three to four feet apart. From five to six seeds are planted in each hill, about two inches deep. After planting all beans be sure and firm the ground, either with feet or roller. with feet or roller.

IMPROVED VALENTINE.

LAZY WIFE'S.—The very best late green-podded pole bean. The pods are of a medium dark green color, broad, thick, very fleshy, and entirely stringless. The pods retain their rich, tender and stringless qualities until nearly ripe, and at all stages are unsurpassed for snap shorts, being peculiarly luscious. Each pod contains from six to eight round, white beans, which make excellent winter shell beans. They have also yielded well planted among corn. Per pkt. 10c, ½ pt. 20c, qt. 70c.

KING OF THE GARDEN LIMA.—While the dried beans are about the same size as the common large Lima; the green beans are of unusual size. The pods are very long, and frequently contain four to six very large beans. Per pkt. 5c, ½ pt. 15c, qt. 55c.

LARGE WHITE LIMA. -- Per pkt. 5c, ½ pt. 15c, qt. 45c.

SCARLET RUNNER.—A favorite snap bean in Europe, valuable for table use or as an ornamental vine. Per pkt. 5c, ½ pt. 20c, qt. 70c.

GUT SHORTS.—The old-fashioned corn-field bean, which is so popular and often so difficult to obtain. Per pkt. 5c, ½ pt. 20c, qt. 65c. WHITE DUTCH CASE KNIFE.—Good green-podded variety. Per pkt. 5c, 1/2 pt. 15c,

YARD LONG.—A great curiosity, and withal a bean of excellent quality. Pods three feet long and highly ornamental. Tender and of asparagus flavor. Pkt. 10c.

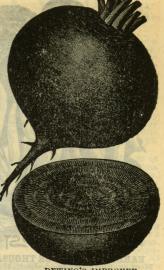

BEETS.

One ounce sous 50 feet of drill; 4 to 6 pounds for one acre.

For early, sow as soon as the ground can be worked, and about the middle of May for general crop, in drills fifteen inches apart and one and a half inches deep. As the plants grow thin to six inches in drills. The young plants make excellent greens. The seed will germinate more freely if soaked in warm water twenty-four hours before sowing; but care should be taken not to plant soaked seed in very dry ground. The soil should be a deep, rich loam.

lowa seed in very dry ground. The son should be a deep, rich loam.

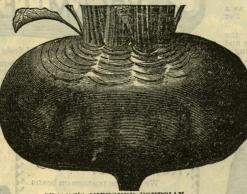

IOWA SEED CO.'S MARKET GARDENERS' BEET,—Undoubty edily one of the best novelties ever introduced, and it receives much praise from our customers each year. Its shape is well shown by the accompanying engraving. It is very symmetrical, with small tap root and but few fibrous roots. Unusually small tops. Although on some soils the Egyptian can be marketed a few days before the Market Gardeners, still within a week it will be found larger than the Egyptian, while it continues to grow until late in the fall, attaining a large size, and making a good eating and selling beet for winter. By the first of October they measure eight inches in diameter and average six pounds each in weight. One sowing only is necessary to produce early beets for market and main crop for winter use, which is not the case with any other variety. Color, deep blood red; fine grained and unsurpassed in quality. Summing it all up, we find in it the best beet for early market, and the best beet for winter use Owing to the small tops, permitting them to be grown close together, and the peculiar shape of the bulb, it is the most profitable beet for the market, and the peculiar shape of the bulb, it is the most profitable beet for the market and quick growth. Wm. Henry Maule says: I consider it the best general purpose beet in cultivation. Per pkt. 5c, oz. 10c, ¼ lb. 35c, lb \$1.00.

DEWING'S IMPROVED.

CROSBY'S IMPROVED EGYPTIAN.—We believe this to be the earliest variety in existence. It was originated by Josian Crosby, a leading market gardener for the Boston market, and is a great improvement on the old Egyptian, being thicker, handsomer, and more regular in shape, smooth, with very small tops and small tap root. It is of perfect shape when small thus making a good beet for bunching, and is very popular with the Des Molnes market gardeners for this purpose. Try it, and we know you will be pleased. Per pkt. 5c, oz. 15c, ¼ lb. 40c, lb. \$1.25.

EXTRA EARLY ECLIPSE.—Remarkable for its wonderfully rapid growth, the smallness of top, and extra fine quality, and is about as early as the Egyptian. Roots smooth, round, intense blood-red skin and fiesh, fine grained and sweet. Per pkt. 5c, oz. 10c, ½ lb. 2cc, lb. 65c.

CROSBY'S IMPROVED EGYPTIAN.

EGYPTIAN TURNIP,—Very deep red, tender and delicious. Per pkt. 5c, oz. 10c. 14 lb. 20c, lb. 50c.

DEWING'S IMPROVED BLOOD TURNIP—An improvement on the old Early Blood Turnip. Shape is well shown by our illustration; deep blood-red color, the form and flavor, desirable for main crop; good keeper. Per pkt, 5c, oz. 10c, ½ 1b. 20c, 1b. 60c.

BASTIAN'S EXTRA EARLY RED.—Per pkt. 5c, oz. 10c, 14 lb, 20c, lb. 60e:

EXTRA LONG DARK BLOOD.—Standard winter; smooth, tender and sweet. Per pkt. 5c, oz. 10c, ½ 1b, 20c, lb, 50c,

SWISS CHARD.—For greens only. Per pkt. 5c, oz. 10c. ¼ lb. 25c, lb 75c.

Your Choice lowa Seeds have proven very satisfactory, especially the Crosby's Egyptian Beet and Snowball Cauliflower. Hope to always patronize you in the juture.
CORNELIUS DONATO, Opelousas, La.

CAULIFLOWER.

One ounce will produce about 3,000 plants

This is acknowledged by all to be one of the most delicious of vegetables. Any soil that will grow cabbage will grow cauliflower, as their requirements are very similar; but as the product is more valuable, extra manuring and preparation of the soil will be well repaid. Culture same as cabbage, except that they need a cool and moist atmosphere and should be watered during dry weather. As the flower heads appear, the large leaves should be broken down over them to shield them from the sun and rain. Out stock of seed is the test obtainable. Don't fall to try it, These are the very best varieties.

HENDERSON'S EARLY SNOWBALL.—Throughout the country this is considered not only the earliest of all cauliflowers, but it is more certain to make a head than any other sort. Its dwarf habit and short outer leaves allow it to be planted as close as eighteen to twenty inches aparteach way, thus making itespecially valuable to market gardeners. Dr. E. L. Sturtevant says that this variety stands at the head in his test of thirty-eight winds forming first head in ninsty-seven days, and this variety stands at the head in finety-seven days, and above the average in size. Our stock is extra choice and cannot te excelled. It is grown in the locality where this variety originated by a grower whom we believe to be the best in the world. Per pkt. 2Cc, ½ oz. 75c, oz. §2.50.

EXTRA EARLY DWARF ERFURT.—Valuable for forcing. A very popular variety in Europe and with eastern gardeners. First quality. Per pkt. 15c, 14 cz. 6Cc, oz. \$2.00.

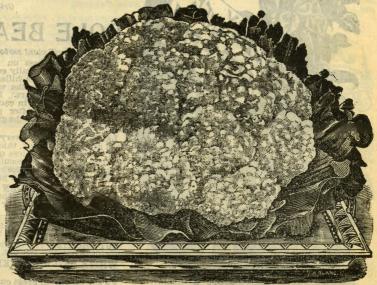

EARLY PARIS.-Well known. Per pkt. 10c, oz. 50c.

LENORMAND'S.—There is considerable call in this market for a late variety of cauliflower, and in the Lenormand's we have just what is wanted. It is of large size and produces well formed heads of excellent quality Per pkt. 10c, oz. 7Ec.

CAULIFLOWER PLANTS.—See list Vegetable Plants.

SIZE OF ORDER.

Order just what you want, even if only a single packet. We telieve, however, that if you look carefully through our list you will find many that you want. You can select either flower or vegetable seeds in packets amounting to \$1.25 for only \$1. BERKERKERKERKERKERKERKERKERKER

HENDERSON'S EARLY SNOWBALL

FXIRA EARLY EXPRESS MARKET GARDENERS' BEET

CABBAGE.

We pride ourselves on having the best, purest and the middle of May for general crop, in truits afteen inches apart and one and a half inches deep. As the plants grow thin to six inches in drills. The young plants make excellent greens. The seed will germinate more freely if soaked in warm water twenty four hours before sowing; but care should be taken not to plant soaked seed in very dry ground. The soil should be a deep, rich loam.

10WA SEED CO.'S MARKET GARDENERS' BEET.—Undoubted edly one of the best novelties ever introduced, and it receives much praise from our customers each year. Its working to insure good solid, full-sized heads. Sow early sorts in hot-beds in February or March, or in open ground as soon as it can be worked Later or winter crops in May or June, in shallow drills six inches apart. When the plants are four inches high transplant into richly manured ground, the early kinds two feet apart, the fall and winter varieties three feet apart. One ounce of seed will produce about 3,000 plants. Set 8,000 to 10,000 plants to the acre of the early sorts and 6,000 of the large late kinds seed in earliness all other. EARLY JERSEY

NEW EXTRA EARLY EXPRESS.—Excels in earliness all other sorts, has the shape and appearance of Etampes, but is smaller and eight to ten days earlier; has but a few outside leaves, and therefore may be planted very close and yield large crops. Per pkt. 5c, oz. 20c, 1b. 60c, lb. \$2.00.

EARLY JERSEY WAKEFIELD.—Considered by many gardeners the very best first early variety. It is of large size for so early a kind, and is certainly deserving of its great popularity Heads hard and solid, and have few outside leaves American grown seed. Per pkt. 52, 02.20c., 14 lb. 65c, lb. \$2.00.

VERY EARLY ETAMPES.—Medium-sized pointed heads, always hard and solid, and of fine quality. Per pkt, 5c, oz. 15c, ½ lb. 50c, lb. \$1.50

EXTRA EARLY YORK, -Per pltb. 52, oz. 102, 14 lb. 35c, lb.

WINNINGSTADT.—Coneshaped summer sort; if sown late, good for fall and even winter; a sure header and good keeper. Per pkt. 52, 62. 15c, 14 lb. 402, lb \$1.25.

HENDERSON'S EARLY SUMMER.—Ten or twelve days later than the Jersey Wakefield, but much larger in size, and will stand on the ground much longer without bursting open. Per pkt 5c. oz. 20c. ½ 10.65c., 1b. \$2.00.

ALL SEASONS.—This most excellent variety is as early as Henderson's Summer, and makes considerably larger and harder heads. It is very reliable for heading and of superior quality. It is called "All Seasons" because it is a very superior variety to plant late as well as early, the thickness of the head making it a capital sort to keep through the winter. All should give this excellent cabbage a trial. Per plct. 5c, oz. 29c, ½ lb, 80c, lb, \$2.50.

CHASE'S EXCELSIOR.—Medium early and not excelled for sure, solid heading, which is the highest recommendation is the highest recommendation for a cabbage which must mature in the trying heat of summer. Another remarkable feature is that it never cracks. Planted the first of July it is an excellent winter variety, Very popular with our southern customers. Per pkt, 5c, oz. 20c, ½ 10 65c, 10, \$2.00.

FINE RED PICKLING.—
oz. 25c, ½ 10, 65c, 10, \$2.25.

SUREHEAD. -- Very reliable in heading, good shape and large size. Per pkt. 5c, oz. 25c, 1/4 lb. 75c, lb. \$2.25

may be planted very close and yield large crops. Per pkt. 5c, oz. 20c. 16 lb. 82.00.

BURPEE'S ALL-HEAD EARLY,—Our test the past season proved this to be the earliest of all large cabbages, being at least a week earlier than any of the various strains of early summer cabbages, and fully one-third larger. Market gardeners to whom we furnished seed of this for testing were greatly pleased with it, and the cabbages took first premium at the State Fair, and attracted much attention for perfect shape and solidity.—Originated with C. L. Allen, who has grown cabbage seed for us for several years, but our competitor, Mr. Burpee, was fortunate in securing the entire stock of it the first year of its introduction, and gave it his name. However, we can most heartily recommend it to our customers. Set plants 18 inches apart in the row, rows 3 feet apart, and 9.680 plants can be set on one acre. Per pkt. 5c, oz. 25c, 26, 1b, 80c. 1b. \$2.50.

CHASE'S EXCELSIOR.—Medium early and not excelled "VANDER GAV"
THE BEST MAIL AND
THE BEST MAIL AND
THE BEST MAIL AND
THE BEST MAIL AND

Deep red color, medium size, solid; unsurpassed for pickling. Per pkt. 5c,

VANDERGAW.—This new cabbage was procured at ten dollars per pound from a famous Long Island market gardener, whose name it bears. Mr. Vandergaw has been selecting this variety for many years and has sold the seed annually to neighboring growers of cabbage as high as \$20 per pound, and never less than \$10 per pound, The Vandergaw forms large, solid heads, much larger than Early Summer, and almost as early, while if planted later it makes excellent heads for winter. The quality is very fine, and it is remarkable for its certainty to head. Per pkt. 5c, oz. 25c, ½ 1b. 80c, lb \$2.50.

STONE MASON DRUMHEAD.—Very reliable compact heading, fall and winter variety Per pkt. 5c, oz. 20c, 1/4 lb. 60c, lb. \$2.00.

FAULTLESS.—This exceptionally fine new variety, which was introduced by us originated with the well known C. L. Allen, who grows more cabbage seed than any other person in America. In writing us about it, Mr. Allen says: "It is of the early summer type, but far more regular and uniform in time of maturing It is a rapid grower: have cut heads for market in 40 days after the setting of plants. Has a vigorous constitution, does not drop its leaves quickly, and is a good keeper. By sowing the seed July 1, perfectly solid heads will be formed by the time of trenching for winter. Per pkt. 5c, oz. 25c, ½ lb. 75c, lb. \$2.25.

CABBAGE PLANTS.—See list of Vegetable Plants. FAULTLESS.—This exceptionally

NEWWASHINGTON WAKEFIELD.—For many years the Jersey Wakefield cabbage has been the most prominent early with market gardeners, and many attempts have been made to improve on it with heretofore but limited success. In this grand variety, which is well shown by our illustration, we have a most superior strain, well worthy of the name it bears. It is a leader, and First in Head! First in Market! First in the Hearts of Gardeners! It is very early, the heads are pyramidal in shape, much larger in size than the Jersey Wakefield and very solid, with few outside leaves. It grows remarkably uniform, the heads being of very even size and shape. Unequaled for either the market or family garden. Don't fail to try it this year. Per pkt. 10c, oz. 30c, \(\frac{1}{2}\) 10. \(\frac{\$3.25}{2}\).

IOWA SEED CO.'S SHORT STEM DRUMHEAD. — Our improved and selected strain of this popular variety has greatly pleased thousands of our customers during the past two or three years, and so greatly has it improved during the seven or eight years we have had it. that in tooking over our large field last summer it was almost impossible to find a head that was not solid and well formed. For sureness in heading and regularity of growth it is certainly the finest cabbage extant. It far surpasses any other strain which we have seen, ripening earlier, with very short stem or stalk, and large, thick, solid heads of silky fine quality, and of best keeping qualities. It is almost all head and always sure to head. Per pkt. 5c., oz 20c. ½ lb. 70c, lb. \$2.25

FOTTLER'S IMPROVED BRUNSWICK. Excellent for summer and fall use. pkt. 5c, oz. 20c, 14 lb. 60c, lb. \$2.00.

PERFECTION DRUMHEAD SAVOY—Heads large and very finely curled. Finest Savoy in cultivation. The Savoys should te more generally grown. They are greatly superior in flavor to the other varieties. Per pkt. £c, oz, 20c, ½ lb. 65c, lo. \$2.00.

PREMIUM FLAT DUTCH.—This old and well known variety is still the standard winter kind. The heads are large and solid; first class keeper and sure header. Per pkt. 5c, oz. 15c, ½ 1b. 5cc, lb. 1.50.

MARBLEHEAD MAMMOTH.—Largest of all; have in some instances grown to a weight of 50 pounds, and the heads of such size that they would not go into a two-bushel basket. It is a good cabbage for exhibition at fairs when grown under a high culture, but as a rule it is too loose headed and uncertain for a main crop. Per pkt. 5c, oz. 2cc, 4 lb. 6cc, lb. \$2.00.

CABBAGE.

MARKET GARDENERS!

Our cabbage seed will please you. Don't fail to try it. By the way, while prices named in this list are very reasonable, and in fact low, quality considered, still we issue a wholesale price list for market gardeners and others who purchase garden seed in bulk to the amount of \$5.00 or over. Send for it if this means you.

CELERY.

One ounce will produce about 6,000 plants.

This we consider one of the luxuries of the garden. No one who has nee used it will be without it, and as it usually is so expensive in the market, the following simple directions are given, by which everyone who has a garden can supply themselves with it.

For first crop sow the seeds early in hotbeds, or in

For first crop sow the seeds early in hotbeds, or in boxes in the house, or later in open ground, in rich, moist soil, covering the seed very lightly. When the plants are about three inches high, transplant to four inches apart each way in a rich pulverized bed.

The tops are shorn off once or twice before planting so as to insure "stocky" plants, which suffer less on being transplanted. After the ground has been well prepared, lines are struck out on the level surface, three feet apart, and the plants set six inches apart in rows. If the weather is dry at the time of planting great care should be taken that the roots are properly "firmed."

Keep clear of weeds until about the middle of Au-

Keep clear of weeds until about the middle of August, when it will be time to begin earthing up. Draw the soil up against the plants with a hoe as closely as possible, firming it enough to keep plants in an upright position.

Later in the season the blanching process must be finished by digging the soil from between the rows and banking it up clear to the tops on each side of the row of celery. Considerable labor is saved by growing the self-bleaching varieties.

NEW PINK AROMATIC.—This splendid variety which was introduced by us, will, we think, eclipse all other sorts of its class in popularity as soon as it becomes known. It was originated by a private gardener in England, and we are sure it will please all of our customers. It is England, and we are sure it will please all of our customers. It is stalk, and makes a better appearance on the table than any other sort; crisp and tender and has the peculiar brittleness so desirable, while its fine, aromatic, nutty flavor, free from the slightest trace of bitterness, all serve to stamp this as the very best celery on the list. It is a very superior keeping sort for winter and early spring use. Summing it all up and we find it unsurpassed for size, solidity, crispness, nutty aroma, attractive color and keeping qualities. Blanches easily. Don't fail to try it. Per pkt. 10c, 0z. 40c, ½ 10. \$1.25, 10. \$4.00.

GOLDEN SELF-BLANCHING.—This variety has fully realized all claimed for it, and is pronounced by all a great acquisition and the most profitable for market and family use. It is of a very handsome form and even growth, reaching a very large size, but very stocky and robust. The stalks grow vigorously, with large ribs, very thickly and closely set. It is entirely self-blanching, without any banking up or covering whatever, even the outer ribs assuming a yellowish-white color of a very fresh and pleasing appearance. The heart is of a beautiful golden yellow color, very large, crisp and solid, and unsurpassed in delicious quality of flavor. It is unequaled in striking appearance on the table, and decidedly the best keeper of all the self-blanching varieties. Per pkt. 5c, oz. 30c, ½ 10. 90c, 1b. \$3.00.

KALAMAZOO.—A new variety most popular in the great celery region of Michigan and one of merit. Of large size, quick growth, alone exigned.

KALAMAZOO.—A new variety most popular in the great celery region of Michigan and one of merit. Of large size, quick growth, close, stiff habit, beautiful creamy-white color, solid, crisp, and of delicious flavor. Per pkt. 5c, oz. 25c, 1/2

ib. 75c, lb. \$2.50.

GIANT PASCAL.—This is, without doubt, the most remarkable novelty in celery obtained since the introduction of the Golden Self-Blanching, from which it is a sport, carefully established by skillful selection. The illustration shows its handsome appearance—surpassing all other varieties, except our Pink Aromatic in this respect. It grows one-fourth taller than its parent, and the stalks are remarkably large, thick, solid and entirely stringless. When fully grown the outer stalks average two inches wide and nearly as thick as a man's finger and are always very risp and brittle. It is a vigaring only five to six days' earthing up, when the outer stalks present a beautiful clear white appearance. It is, without doubt, the celery for January and February use. It is excellent for shipping, does not rust or rot, and retains its crisp, brittle appearance. Per pkt. 5c, oz. 30c, ½ lb. 65c, lb. \$2.50.

WHITE PLUME.—The stalks, portions of inner leaves and heart are naturally white and become fit for use by simply tying it up closely with soft twine. More used than any other variety by market and private garderners. We had a very choice lot of this variety of seed grown for us this year in California. It is of the highest quality and sure to please all. Per pkt. 5c, Oz. 25c, ¼ lb. 75c, lb. \$2.25.

HENDERSON'S HALLE DWARE—Close

HENDERSON'S HALF DWARF.—Close abit, solid, crisp and tender. Per pkt. 5c, habit, solid, crisp and ter oz. 15c. 1/4 lb. 50c, lb. \$1.50.

GOLDEN DWARF,—When blanched, the heart is of rich, golden color, excellent quality, good keeper. Per pkt. 5c, oz. 15c, ½ 1b. 50c, lb. \$1.50.

BOSTON MARKET.—Per pkt. 5c, oz. 15c, ½ 1b. 50c, 1b. \$1.75.

DWARF CRIMSON.—Considered by some superior to white sorts. Per pkt. 5c, oz. 25c, ¼ lb. 75c, lb. \$2.50.

TURNIP-ROOTED, OR CELERIAC.—Grown exclusively for its roots which are excellent cooked and pickled, or used in soups. Per pkt. 5c, oz. 20c, 4 lb. 50c, lb. \$1.70.

OLD CELERY SEED.—For flavoring. Per oz. 5c, ¾ lb. 15c, lb. 40c. CELERY FLANTS.—See list of Vegeta-ble Plants.

GOLDEN SELF-BLANCHING.

GIANT PASCAL

COPYRIGHTE BY W.A.B.&C

SWEET CORN.

One quart will plant 200 hills; one peck will plant an acre in hills.

Plant as soon as the ground becomes warm in the spring, in hills about three feet apart; five or six grains to the hill, and when up thin them out, allowing three or four of the strongest plants to remain. Give thorough cultivation. For a succession plant every two weeks until midsummer. We make the growing of sweet corn for seed a specialty, and are sure our stock will please you.

EARLY SUNRISE.—The best early variety. See description with novelties. Per pkt. 5c, 1/2 pt. 15c, qt. 50c.

Per pkt. 5c, ½ pt. 15c, qt. 50c.

EXTRA EARLY CORY.—For several years past this variety has held its place as the first early, and as yet no other variety exceeds it in earliness, although we consider the Early Sunrise a much better early corn. Per pkt. 5c, ½ pt. 15c, qt. 40c.

NEW CHAMPION EARLY.—Without doubt the earliest large corn ever introduced, being only a few days later than Cory, with ears nearly as large as the Mammoth. Ears were grown ready for table use in sixty-one days from time of planting, and they weighed one and one-half pounds each, and were 12½ inches long by 8½ inches around. To help you realize these figures, get the largest ear of culture. An average size is about nine inches long. It has a medium size white cob and large, pearly white kernels, very sweet, tender and full of milk. No market gardener can afford to be without it, and every family garden should contain at least a few hills. Per pkt. 5c. ½ pt. 15c, qt. 40c.

PERRY'S HYBRID—Large, early.

PERRY'S HYBRID.—Large early, twelve-rowed sweet corn, which was with us only eight days later than the Cory, and the yield was more than double. It does not waste any time making stalks; its object is for ears—large ones and plenty of them in the shortest possible length of time. Per pkt. 5c, ½ pt. 12c, qt. 40c.

EARLY MINNESOTA.—The standard earlier than Crosby's. Eight-towed ears of good size and uniformly sweet and well flavored. The stalks grow about 5 feet high. Per pkt. 5c, 1/2 pt. 10c, qt. 35c.

crosby's EARLY.—A standard, medium early variety. Per pkt. 5c, ½ pt. 10c, qt. 35c.

SHOE PEG.—A very excellent and distinct variety. The stalks are of a medium height, yield as many as five ears well filled out. The kernel is small, very long and white, which gives it its name, exceedingly tender, sweet, and of a rich, acme Evergreen.—(Novelty, 1997)

EGYPTIAN SWEET.—Very prolific, and by many who have tried it believed to be the best late sweet corn in cultivation. Per pkt. 5c, ½ pt. 12c, qt. 40c.

ACME EVERGREEN.

COUNTRY GENTLEMAN.—For many years the Shoe Peg has been considered the sweetest and best for family were, but it was of rather small size. After years of careful selection and growing this weak point has been made strong by a grower in the Connecticut Valley, until in the new Country Gentleman sweet corn we have a variety that produces ears of full size, retaining all the delicious sweetness and high quality of the original sort. Our illustration of a single stalk shows its great productiveness; the crop can be counted on to give three to five ears to a stalk. When this unusual abundance is coupled with the luscious quality, the general superiority of this new variety will be quickly seen. The cob is very small, thereby giving great depth to the kernels, which are of pearly whiteness, and, we cannot say too often—surprisingly sweet and tender. Per pkt. 5c, ½ pt. 15c, qt. 50c.

STOWELL'S EVERGREEN.—This is more largely planted than any other variety, being the general favorite with canners and market gardeners for late use. It is very productive, the ears are of a large size, grains deep, exceptionally tender and surary, and remain for a long time in an edible condition. Per pkt. 5c, ½ pt. 10c, qt. 35c.

BLACK MEXICAN.—A black grained variety; one of the sweetest of all kinds. Per pkt. 5c, ½ pt. 15c, qt. 45c.

MAMMOTH SUGAR.—This produces the largest ear of any sweet corn, a single ear sometimes weighing as much as two or three pounds; quality very sweet and luscious. Per pkt. 5c, ½ pt. 12c, qt. 40c.

EVERGREEN FODDER.-Makes a profitable crop for

We Pay the Postage

on corn at these prices. Deduct ten cents on each quart if to be sent by express. Pints at half quart prices. The half pint packages are very desirable for

Prices by the Peck and Bushel on Page 47.

IMPROVED RUBY.

EXTRA EARLY CORY.

IMPROVED CHICAGO PICKLE.

IMPROVED LONG GREEN.-Old standard sort; crisp, tender and of good flavor. pkt. 5c, oz. 10c, ¼ 10. 25c, lb. 75c.

SNAKE.—A remarkable and very interesting curiosity. Cucumbers grow curled uplike a snake with the head protruding, and sometimes are six feet in length. Although attaining great size, the quality is only fair. Grown chiefly as a curiosity, and to exhibit at fairs. Packets only, 10c, 3 for 25c.

NEW ASTRO. - A rare novelty, sure to excite the curiosity of your neighbors. With common outdoor culture it will grow fifteen to eighteen inches in length, with very few seeds. Excellent for slicing. Flesh white and crisp. More fully described with novelties. Per pkt. 10c, 6 for 50c.

and crisp. More thiny described what he can ties. Per pkt. 10c, 6 for 50c.

NEW JAPANESE CLIMBING.—This may be described as the sensational novelty of Europe. The seed was originally brought from Japan about five years ago, and has proven thoroughly adapted to open air culture throughout Europe and America. The vines are of healthy, vigorous growth, with rich, dark green foliage, and throw out strong, grasping tendrils, which enable it to climb trellis, wire netting, brush or any other suitable support. It clings so tightly that it is not prostrated by heavy storms of wind or rain. It comes into bearing quickly and continues to set fruit abundantly throughout the season, while the climbing habit of growth enables the hanging fruit to grow perfectly straight. Of large size, from 12 to 16 inches in length; cucumbers thick, exceedingly tender, of delicate flavor, cylindrical shape, flesh pure white, skin dark green, turning to brown and netted when ripe; of excellent quality for slicing, and when young make attractive pickles. They made a grand crop on our place this year. Per pkt. 5c, oz. 15c, ½ lb. 50c, lb. 35.50.

July 25, 1895.—The seeds we purchased from you last spring were far ahead of any we ever used. The New Astro cucumber far exceeds all expectations and we now have several specimens over 26 inches in length.

N. W. HICKLIN, Boone Co., lowa.

One ounce will plant 50 hills; two pounds will plant one acre.

One ounce will plant 50 hills; two pounds will plant one acre.

Cucumbers succeed best in a rich, loamy soil. For first early, sow in hotbeds, in berry boxes, or in small flower pots, six weeks before they can be set out in open ground. When danger of frost is over transplant in hills four feet apart each way. For general crop, plant in open ground in May, about twelve seeds in a hill. When danger of bugs is past, thin to four strong plants in a hill. For pickling, plant in June. Sprinkle vines with plaster or air-slaked lime to protect from the bugs, or Slug Shot will kill the bugs. We are the largest growers of cucumber seed in this part of the country. Our sales one year amounted to 9,675 pounds of the three leading varieties, all of our own growing. At two pounds to the acre this quantity would seed 4,637 acres. A very reasonable estimate of the yield would be \$225.00 per acre, making a total cash value of product \$1,088.325.00, grown from our cucumber seed in one year. What firm in America can equal this record?

WESTERFIELD'S IMPROVED CHICAGO PICKLE.—Mr. Westerfield, having

WESTERFIELD'S IMPROVED CHICAGO PICKLE.—Mr. Westerfield, having been engaged in growing pickles for Chicago pickle factories for many years, and also in supplying them with seed for other growers, has watched carefully and selected his seed stock from the most prolific and early maturing vines having the most desirable shaped cucumbers for pickles. Consequently his strain is now considered by all growers in that vicinity to be the best stock to grow. Per pkt. 5c, oz. 10c, ½ 1b. 25c, lb. 75c.

EARLY CLUSTER.—Grows to pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 65c. -Grows in clusters. Productive and of good quality. Per

BOSTON, OR JERSEY PICKLE.—Is used almost exclusively by the market gardeners near Boston for pickling. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 65c.

EARLY FRAME, OR SHORT GREEN.—Per pkt. 5c, oz. 10c, ¼ 1b. 20c, 1b. 65c.

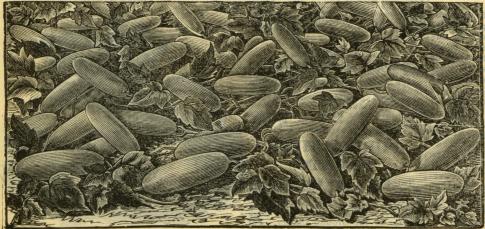

GREEN PROLIFIC,—Splendid pickling sort. Very productive. Per pkt. 5c, oz. 10c, ¼ 1b. 25c, 1b. 75c.

NICHOL'S MEDIUM GREEN.—Fruit of medium length, nearly cylindrical, very uniform in shape, and of good color when young. Per pkt. 5c, oz. 10c, ½ lb. 25c, lb. 70c.

when young. Per pkt. 5c, oz. 10c, ½ 1b. 2cc, 1b. 70c.
WHITE PEARL.—In habit of growth its entirely distinct, setting the cucumbers very close around the stem, and maturing these early, then afterward the vines continue to run and bear freely throughout the season. The cucumbers grow so thickly together that they actually lie piled one upon the other. The skin is very smooth and entirely free from spines. In color they are a beautiful pearly white; even the young fruits are of a very light color, nearly as pure white as when ready for use. Per pkt. 5c, oz. 15c, ½ 1b. 40c, lb. \$1.60.

WEST INDIAN GHERKIN, OR some pickle of first class quality. Be sure and try it. Per pkt. 5c, oz. 15c, ½ 1b. 50c.

NEW

PERFECT WHITE SPINE. (From a photograph taken on our Adair County Seed Farm.)

IOWA SEED CO.'S PERFECT WHITE SPINE.—Prominent horticulturists and experienced mar-WHITE SPINE.—Prominent horticulturists and experienced market gardeners pronounce this variety to be undoubtedly the best strain in existence. For 15 years we have been growing and improving this variety on our seed farm and as a result we offer to our customers this improved strain, pronounced by good judges superior to either Peerless or Arlington. Fruit of even and good size, straight, well formed and symmetrical. When small it is deep green in color, and of uniform shape, making it unexcelled for pickling. When of usual size for slicing it still holds its color, shading to a light green at blossom end. As it matures it turns to a clear white, very showy for market. Immensely productive, and keeps longer solid and crisp than any other variety. Outyields any other for pickles. Crop was large this year and we have made price low. Per pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 65c. By express, 5 lbs. cr more at 45c per lb. or more at 45c per lb.

ASPARAGUS.—Ger. Spargel.

One ounce will sow forty feet of drill.

PALMETTO.

Soak the seed 24 hours in tepid water; sow early in spring, in rows a footapart; keep clean by frequent weeding and hoeing. At one or two years old transplant to permanent beds, in rows 18 in ches apart, and a foot apart in the rows. apart in the rows.
Cover four inches
with light, rich
soil. One or two
years' time can
be saved by buy
ing the roots, of
which we have a
choice stock this
year. See vegetable plant list.

PALMETTO. - Beyond question the largest and finest Asparagus ever sent out. Stalks frequently measure two inches in diameter, frequently measure two inches in diameter, and, even when twelve inches long, are perfectly tender when cooked. Its tenderness is ensured by its remarkably rapid growth and semaining in good condition several days after being ready for cutting. Per pkt. 5c., oz. 10 c., ½ lb. 30c., lb. \$100.

CONOVER'S COLOSSAL.—The standard variety. Per pkt. 5c., oz. 10c., ½ lb. 15c., lb. 45c.

variety.

HUB." OR MOORE'S HYBRID.-Remarkably uniform and very large, very tender and rich in flavor. Per pkt. 5c., oz. 15c., 1/2 lb. 35c.,

ARTICHOKE.—Ger. Artischoke.

Plant early in spring, in drills, two inches deep. When strong transplant to permanent beds, in rich soil, in rows three feet apart and two feet in the row. They mature the second year. Must be protected in winter.

FRENCH GREEN GLOBE.—Per pkt. 5c.,

ARTICHOKE ROOTS.—See miscellaneous

BROCCOLI.—Ger. Broccoli.

One ounce will produce about 3,000 plants.

Growth and habit like the Cauliflower, except that it is more hardy, and the heads are not as compact. Cultivate same as Cauli-

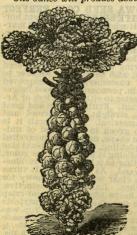

EARLY PURPLE CAPE.—A popular sort; heads well and is very hardy. Per pkt. 5c.,

EARLY LARGE WHITE.-Per pkt. 5c.,

BRUSSELS SPROUTS.

Ger. Spressen-Kohl.

One ounce will produce about 3,000 plants.

Of the cabbage family, producing numerous heads on the stem, of most delicious quality, as well as a cabbage like head at the top. If you have never grown it, try it this year and you will be pleased. Use and cultivation same as winter cabbage. Per pkt. 5c., oz. 20c.

BRUSSELS SPROUTS.

CHERVIL.—Ger. Gartenkeebel.

One ounce will sow 100 feet of drill.

CURLED.—Leaves used in soups and salads. Cultivated like parsley. Per pkt. 5c., oz. 20c.

CHICORY, —Ger. Cichorie.

One ounce will sow about 15 square feet.

LARGE ROOTED.—Used as a substitute for coffee. Cultivate as carrots. Take up the roots in the fall, cut into small pieces and put away to dry. When wanted for use, it is roasted and ground like coffee. Per pkt. 5c., oz. 10c., ½1b. 30c.

COLLARDS.—Ger. Blatter-Kohl.

One ounce will produce about 3,000 plants. GEORGIA.—Sow seed in May; transplant and treat as cabbage. Per pkt. 5c., oz. 15c., 1/4 lb. 40c.

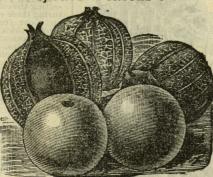

CORN SALAD or Fetticus.

Ger. Lammersalat.

One ounce will sow about 20 square feet. A delicious winter salad. Sow early in September in drills, quarter of an inch deep and six inches apart. Just before cold weather cover with straw or leaves. Per pkt. 5e., oz. 10c., 1/4 lb. 30c.

IOWA SEED CO'S.

IMPROVED GROUND CHERRY.

GROUND CHERRY.

Another year adds only to the popularity of this already very popular little fruit, which we introduced, and it is now listed in the catalogues of the leading seedsmen of the country to whom we supply seed. It is a great improvement on the wild Ground Cherry. They grow well on almost any dry soil; are easier raised than the tomato, and are Prolific bearers, and oh! such lucious fruit. For sauce they are excellent, and for pies nothing can equal them in flavor and taste. They are delicious as preserves, and when dried in sugar are are much better than raisins for cakes and puddings, and they will keep if put in a cool place in the shuck, nearly all winter. No one after raisthem once will ever make a garden again without devoting a small portion at least to the Ground Cherry, Per pkt, 5c., ½ oz. 25c., oz. 40c.

CELERIAC.

OR TURNIP-ROOTED CELERY.— Grown exclusively for its roots, which are turnip-shaped, very smooth, tender and marrow-like. The roots are cooked and sliced; used with vine-gar, they make an excellent salad. They are also used for seasoning meats and to flavor soups. Per pkt. 5c., oz. 20c., ¼ lb.50c., per lb. \$1.70.

PURPLE HUSK TOMATO.

This fruit is quite popular in some places. The plants produce handsome purple fruit in great abundance, which are from one to two inches in diameter and enveloped in a husk similar to the Ground Cherry. Per plat 10c.

EGG PLANT.—Ger. Eierpflanse.

One ounce will produce obout 1,000 plants.

A tender plant, which should be started quite early in a hot-bed or box in the house, which house, which must be kept warm. Late in the spring transplant to open ground 2½ feet apart each way in warm, rich soil. Soon as weather becomes warm they are thrifty and easily grown
They are a decided lux-

IMPROVED N. Y. EGG PLANT.

wry which everyone should grow.

EARLY LONG FURPLE.—Hardy and productive, six to eight inches long. Per pkt. 5c., oz. 25c., ½ lb. 90c.

IMPROVED NEW YORK.—Our strain of

IMPROVED NEW YORK,—Our strain of this leading market variety we believe to be unsurpassed. Very large size, skin deep purple, flesh white and of excellent quality. Very productive. See cut. Per pkt. 10c., oz. 40c., ½ lb. 81.25.

CRESS or Pepper Grass.

Ger. Kresse.

One ounce will sow about 16 square feet.

Come ounce will sow about 16 square feet.

EARLY CURLED.—A well known salad.
Sow thickly and at intervals during the season; cover seeds lightly. Per pkt. 5c., oz., 10c., ½ lb. 25c.

TRUE WATER.—One of the most delicious of small salads. Will only grow where its roots are covered with water. Sow the seeds along the border of running water and cover lightly. Per pkt. 5c., oz. 25c.

UPLAND.—Can be grown on high, dry ground, and has the identical flavor of the Water Cress, In packages only, each 10c.

ENDIVE.—Ger. Endivien.

One ounce will sow 60 square feet.

One of the best and most wholesome salads One of the best and most wholesome salads for fall and winter use. Sow early and thin, cover slightly. Soon as large enough thin to nine inches apart. When leaves are eight inches long tie them together with string near the top to blanch. This must be done when quite cry. Before cold weather, take up for winter, being sareful to leave a small amount of dit around the roots.

EXTRA CURLED .- Per pkt. 5c., oz. 20c, %

Your Washington Wakefield Cabbage is the best cabbage I ever planted. LEON ACHIE, Plaquemine, Ia.

TURNIP-ROOTED CELERY.

IOWA SEED CO'S NEW

Introduced by us and it has been highly praised wherever tried. It resembles the Vine Peach in manner of growth, but is distinct in that the unripe fruit is striped with very dark green, nearly black, while the Vine Peach is plain green, and when ripe is not russeted like the Vine Peach. Fruit is of shape shown in our engraving, and is somewhat smaller than Vine Peach, has thinner flesh, and is most decidedly more acid, thus dispensing with the sliced lemons which are so important in putting up the Vine Peach. Cultivate like musk-melon, in hills three feet apart each way. Full directions Introduced by us and it has been highly hills three feet apartcach way. Full directions for cooking in various manners accompany each packet. Per pkt. 5c, oz 20c.

KOHL RABI_Ger. Kohlrabi.

One ounce will sow a 200 foot drill.

An excellent vegetable, intermediate between the Cabbage and Turnip. Sow in rows in May or June, eighteen inches apart, thinning to eight inches between the plants.

Cook as Turnips.

EARLY WHITE VIENNA—Flesh white and tender; best market sort. Perpkt., 5c, oz, 20c, ½ lb. 65c, lb. \$2.

EARLY PURPLE VIENNA—Per pkt. 5c, oz. 20c, ½ lb. 65c, lb. \$2.

LEEK_Ger. Lauch One ounce will sow one hundred feet of drill. Sow early in spring, and when plants are three or four inches high, thin to eight inches apart. Hoe the earth well up to the stalk to blanch it.

stalk to blanen it.

LONDON FLAG-Very hardy. Per pkt.

5c. oz. 10c, ½ 1b. 35c.

LARGE ROUEN-Largest and most uniform of all. Per pkt. 5c, oz. 20c, ½ 1b. 60c.

The following four varieties will be found quite serviceable in any household. No one would think, without having tried them, of the many uses they can be put to. Cultivate as cucumbers; or they may be trained over lattice work or utilized to cover stumps

JAPANESE NEST-EGG—Grows almost uniformly to the size, color and shape of a hen's egg, although some vary in size from a pigeon's egg up to a goose egg and so exactly like an egg do they appear as to almost deceive any one. The shells are hard and durable, and make the very best nest eggs, as they do not crack. The largest ones, when sawed in two, make excellent pots for starting tomato, strawberry and other plants. The Nest-Egg Gourd is a rapid and desirable climber; quickly covering old sheds or any unsightly object with a mass of green foliage, thickly dotted with beautiful white eggs. Pkt, 5c, oz. 25c, ½ lb. 75c, lb. \$2.25.

DIPPER—Makes a more light and convenient dipper than can be bought. Dippers of various sizes, of a capacity of from a pint to a quart and a half, can be had from a few vines. Per pkt. 5c, oz. 20c.

SUGAR TROUGH—Very convenient for buckets, baskets, nest boxes, etc Sometimes grow so large as to hold ten gallons each. Per pkt, 5c, oz. 20c.

5c, oz. 20c.

LUFFA, or DISH CLOTH—The peculiar lining of this fruit, which is sponge-like, nourous, tough, elastic and durable, makes a natural dish-cloth. The fruit grows about two feet in length, and the vine is very ornamental, producing large clusters of yellow blossoms, in pleasing contrast with the silvery-shaded, dark green foliage. For the bath, and for the toilet in general, the "Dish-Rag Gourd" is taking the place of the sponge. It is, in fact, a sponge, soft brush and a bath glove combined, and is almost indestructible. The seed should be started in a hot-bed or in the house.

in a hot-bed or in the house. Per pkt. 10c, oz. 50c.

MIXED UTILITY GOURDS —Seeds of the four above varieties mixed together. Per pkt. 5c, oz. 25c.

-Ger. Essberra Hibiscus.

One ounce will sow about 80 feet of drill.

Why not try Okra this year? It is extra nice for soups, stews, etc., and also much liked when pickled. Sow at the usual time of tender vegetables, in drills two inches deep, leaving the plants from two to three feet anget. feet apart.

MUSTARD.

-Ger. Sent.

One ounce will sow about 75 feet of drill.

A pungent salad, used sometimes with Cress, also for greens. Sow thickly in rows, and cut when about two inches high.

SOUTHERN GIANT CURLED—This mustard is very highly esteemed in the South, where the seed is sown in the fall, and the plants used very early in spring as salad. Per pkt. 5c, oz. 10c, ¼ 1b. 25c, lb. 75c.

WHITE ENGLISH, or London—Per pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 50c.

NEW CHINESE GOLDEN ALEW CHINESE GULDEN
—An entirely new variety,
quite different from the
rank, over-grown, greenleaved variety called Chinese Mustard in some other nese Mustard in some other seed dealers catalogues. Our New Chinese Golden forms a compact, bushy plant. Leaves very thick, finely curled, and of a bright golden yellow color. very slow to go to seed; has no rank, strong flavor like other kinds, and pronounced by all who have tried it the best of greens. Per pkt. 5c, oz. 15c, ½ 1b. 45c, lb. \$1.25.

-Ger. Blatter-Kohl.

One ounce will produce about 3,000 plants.

This most excellent vegetable deserves to be more generally cultivated, being harder than Cabbage, and furnishing most excellent greens during winter and spring. It is also a splendid winter food for poultry. It is quite hardy and is improved by frost. Cultivate same as Cabbage. For winter, sow in September, and treat as Spinach, giving it a light covering of straw or litter to provering of straw or litter to procovering of straw or litter to pro-tect from severe cold.

DWARF GERMAN GREEN Best for winter greens. Per pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. \$1.

TALL CURLED SCOTCH-Per pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. \$1.

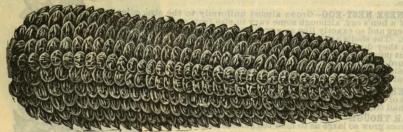

WHITE VELVET OKRA.

POP-CORN.

It pays to raise pop-corn as a general crop. It is a sure crop, and the demand usually exceeds the supply. Some farmers claim that it is as easily grown as field corn and they receive three to four times the amount per acre for the crop. For main crop the Monarch White Rice will bring the best price per pound, as it is better known among the poppers. Let the children try a small patch anyway and for home use don't fail to try the Striped Rice.

PAGE'S NEW STRIPED RICE.—This splendid variety, which is the result of a cross between the best White and Red varieties of Rice pop-corn, we have been at work improving for several years, until now we have undoubtedly the best, nandsomest and most attractive variety of pop-corn in existence. "Beautiful!"

"Splendid!" "It takes the cake!" is what our customers say of it. The color is a clear, translucent white, and each kernel is beautifully striped with bright crimson. Our illustration does not do it justice. The ears are of good size and well filled out; kernels are long and pointed, resembling rice. Early, very productive, and extremely tender when popped, bursting out very large, white as snow and of finest quality. All should try it. Per pkt. 5c., ½ pt. 15c., qt. 50c.

MONARCH WHITE RICE.—The best white variety grown. It bears from three to six ears per stalk, weighs 36 pounds per bushel of ears when dry, and produces 1,500 to 2,500 pounds per acre. It will pay you to try it. Per pkt. 5c., ½ pt. 15c., qt. 40c.

MAPLEDALE PROLIFIC POP-CCRN.—The most productive pop-corn, averaging 8 to 12 good ears to the stalk, as many as 19 ears having been taken from a single stalk. Ears uniformly large. Pops to a large size and very tender. Per pkt. 5c., ½ pt. 15c, qt. 50c.

QUEEN'S GOLDEN.—Color a peculiar lustrous, golden yellow; when popped, of a rich cream color; very prolific. Per pkt. 5c., ½ pt. 15c, qt. 50c.

apart each way, apart eac

RED CROSS PEANUTS.

Peanuts can be grown in Iowa, and everyone should plant a few for themselves and children. This very desirable variety is as early as the earliest, the most hardy, very prolific and of growing peanuts in your own garden and having plenty of them to eat. Plant as soon as the ground becomes warm, from two to three feet apart each way, four or five to the hill, covering two or three inches. The soil should be deep and mellow, and well broken up so as to be ready for planting scon after frost is over. April is a suitable time. They produce 25 to 70 bushels per acre, and are as easily cultivated as corn. Price, per large package, 10c, 1b. 40c, postpaid.

In making up your assortment of seeds for the year don't neglect to order a few varieties of herbs. They should have a place in every vegetable garden. Sow seed in shallow drills one foot apart, and when up thin out and transplant to a few inches apart. The chief point is to harvest them properly, which should be done on a dry day when not quite in full bloom, then dried quickly and packed closely, and entirely excluded from the air. The following are the varieties most cultivated.

ANISE.—Annual. Per pkt. 5c, oz. 10c.
BALM.—Perennial. Per pkt. 5c, oz. 20c.
BASIL, SWEET.—Annual. Per pkt. 5c, oz. 20c.
BORAGE.—Annual. Per pkt. 5c, oz. 10c.

HOLT'S MAMMOTH SAGE.

After having grown and thoroughly tested this valuable variety for many years, we can recommend it most highly. The illustration shows a leaf of average size. The plants are very strong growing, the first season attaining one foot in height, and so spreading that a single plant covers a circular space 3 feet in diameter. The leaves are borne well above the soil, keeping them clean: very large and of unusual substance, strong in flavor, and of superior quality. A single plant of Holt's Mammoth will yield more than a dozen of the common sort. It is perfectly hardy, even in New England, and attains still larger growth the second season. It never runs to seed. The past three years we have not been able to supply the demand but this year we grew a very large number and hope to have sufficient. Price; 3 plants for 25c, 7 for 50c, or 15 plants for \$1.05, postpaid.

\$1.06, postpaid.

ORNAMENTAL POMEGRANATE.

A very interesting and ornamental little fruit, which a century

A very interesting and ornamental little fruit, which a century ago was commonly grown in the gardens but is now rarely seen.

Grows on a pretty vine; fruit is round, of a bright yellow, irregularly striped with orange, red or mahogany; very fragrant: a single specimen will sweetly perfume a room for many days. Prolific and easily grown. It is often called Queen Anne's Pocket Melon. Per pkt. 5c. oz. 25c.

POMEGRANATE.

THYME, BROAD-LEAVED,—Perennial. Per pkt. 5c, oz. 40c.

TANSY.—Perennial. Per pkt. 10c, oz. 50c.

WORMWOOD.—Perennial. Per pkt. 5c, oz. 30c.

MIXED VARIETIES.—A mixture of all the above. Nice garden assortment. Per pkt. 5c, oz. 25c.

LETTUCE—Ger. Lattich.

One ounce will sow 120 feet of drill.

Probably no vegetable is more universally used than Lettuce, and to be fully appreciated it must be brought to the table fresh and unwilted. As it requires but little room, and is of the easiest culture, there are but few families that cannot have it direct from the bed. The quality of Lettuce depends largely upon a rapid and vigorous growth. Sow in hot-beds in March and in open ground as early as it can be worked, thinly in drills one foot anart. For a succession sow every three early as it can be worked, thinly in drills one foot apart. For a succession sow every three weeks during the season. The soil should be rich and mellow, Thin out plants as they grow, so that the plants left to head will stand 10 to 12 inches apart in the rows.

DENVER MARKET.—An early variety of Head Lettuce, either for forcing or open ground. It forms large solid heads, of a good, light green color, and is very slow to go to seed. The leaves are beautifully marked and blistered (like the Savoy Cabbages), and

TOMHANNOCK

very crisp and tender and of excellent flavor. By these blistered leaves it distinguishes itself from any other kind of Lettuce now grown. The shape of the head resembles somewhat the "Hanson," but is more oblong. C. C. Morse & Co., Seed Growers, say: "It is the best novelty ever sent to us, and tried in our trial grounds, together with 96 other varieties of Lettuce, we find it to be the best." Per pkt. 5c. oz. 20c., ½ 1b. 60c.

GRAND RAPIDS.—As many as fifty large greenhouses at Grand Rapids, Michigan, are devoted to forcing this lettuce in winter; the growers have distanced all competitors, and obtained the highest prices in the markets of all the cities to which they have shipped. Of superior quality and beautiful appearance the Granc. Rapids Lettuce is a strong grower, free from rot, and keeps crisp and tender without wilting when exposed for sale, longer than any other forcing lettuce. It is also a desirable variety for early spring sowing in the open ground. The engraving is from a photograph. Per pkt. 5c., oz. 20c., ½ 1b. 65c.,

% lb. 65c.,

CALIFORNIA CREAM BUTTER.—A
new variety of Cabbage Lettuce, with
round solid heads, as shown in the illustration; outside the heads are of a
medium green, slightly marked with
small brown spots; within, the leaves
are of a very rich cream yellow color,
most refreshing in appearance, and
particularly rich and buttery to the
taste. The heads are of good size, compact, very hard and solid. It is medium
early, and one of the very best summer
varieties of head lettuce we have ever
seen. The heads are so solid that generally, they have to be cut before any
seed stalk can make its appearance.
Per pkt. 5c., oz. 15c., ½ lb. 50e.

EARLY CURLED SIMPSON.—An im-

EARLY CURLED SIMPSON.—An improved variety of the Curled Silesia, with large, loose heads and excellent flavor. Per pkt. 5c., oz. 10c., ¼ 1b. 30c., lb. \$1.00.

BLACK SEEDED SIMPSON.—Nearly double the size of the ordinary Curled Simpson; stands the summe: well without becoming tough, or running to seed quickly. Is by far the most popular variety for greenhouse forcing, making large, handsome heads in a very short time, Gardeners claim that our seed is worth far more than any other. Per pkt. 5c. oz., 15c., ½ 1b., 35c., 1b. \$1.20.

IMPROVED HANSON.—For general use, both of market gardeners and in the private garden, we are sure that no variety can surpass our improved carefully selected strains pass our improved carefully selected strains of Hanson Lettuce. It has been so judiciously improved that the heads are so solid that often they do not send up a seed stalk unless cut open with a knife. Heads are very large, green outside and nearly white within, de liciously sweet, crisp and tender. and almost absolutely free from any rank or bitter taste. Resists the summer heat exceptionally well. It cannot be praised too highly. Per pkt. 5c., oz. 15c., ½ 1b, 40c., 1b. \$1.20.

TOMHANNOCK.—Forms a beautiful plant, 10 to 12 inches high by 9 co 10 inches across. The leaves grow upright, the upper part of the outer leaves turn outward gracefully, and are of a glossy, reddish bronze, quite ornamental. The leaves are almost white, very tender and crisp: it does not head. Grows quickly and remains for weeks of the finest quality; slow to run to seed. Per pkt. 5c., oz. 15c., ½ 1b. 45c., 1b. 81.60.

SALAMANDER.—Withstands the heat.

SALAMANDER.—Withstands the heat and drouth admirably, and is very slow in running to seed. Forms immense heads, 12 to 14 inches in diameter. Per pkt. 5c., oz. 10c., ¼ lb. 30c.

Per pkt. 5c., oz. 10e, ½ 1b. 30c.

GREEN FRINGED.—Edges beautifully cut and fringed. A good selling variety. Per pkt. 5c., oz. 15c., ½ 1b. 40c.

PRIZE HEAD.—Very tender leaves of dark reddish brown color, variegated with dark green. Heads large and of good flavor. Per pkt. 5c. oz. 10c., ½ 1b. 35c.

MIXED VARIETIES.—Seed of about twenty early, medium and late sorts mixed together, thus giving lettuce for the table during the entire season and giving an opportunity to examine all the leading varieties with but little expense. Per pkt. 5c., oz. 25c., ½ 1b 50c.,

Per pkt. 5c., oz. 25c., 1/4 lb 50c.,

OAK LEAVED.—Has oak-shaped leaves, the broader part set to stem and pointed at the tip, thus giving it a very unique, handsome and attractive appearance. Per pkt. 5c., oz. 15c., 1/2 lb. 45c. OLD LETTUCE SEED.—For birds. Per

EARLY PRIZE HEAD.

THE BANQUET Our illustration made from a photograph well represents this extra It originated with C. P. Coy, the larg-est melon grower in the world, and

in the world, and he regards it as his greatest pro-duction. The flesh and color, uni-formly thick and of that granulated character, which

character which always indicates a

good melon. It is larger in size than

larger in size than the Emerald Gem and differs from that variety in its outer appearance. Of perfectly round shape, the skin is not ribbed, but is densely netted over its entire surface, making it in appearance one of

appearance one of the handsomest

MUSK MELON.

One onnce will plant about 80 hills; two pounds to the acre.

The soil best adapted to the culture of melons is a warm, rich, sandy loam. Plant in hills five or six feet apart each way, ten or twelve seeds in a hill. When they begin to vine, thin out, leaving only four of the most thrifty. As melons are very sensitive to cold, they should not be planted until the settled warm weather begins—in this latitude about the middle of May. Cultivation should commence as soon as the plants appear above the ground, and be kept up once a week until the vines interfere too much. You will be pleased with our melon seeds.

too much. You will be pleased with our melon seeds.

IOWA SEED CO.'S IMPROVED GREEN NUTMEG.—Everybody is delighted with our improved strain of this most excellent old kind. For twelve years we have been constantly selecting and improving the old Green Nutmeg melon until now it is one of, if not the best variety of musk melon in existence. All lovers of fine luscious melons will admit after giving it a trial that it cannot be surpassed in ricn, delicious flavor. Fruit of a fair size, very rich melting, and of exquisite flavor. Outside dark emerald green; flesh light green; more productive than any variety we know of. Don't fail to try it. Per pkt. 5c, oz. 10c, ½ lb. 3lo. This new candidate for public favor holds its size, rich flavor and other good qualities remarkably well, and withal is a great improvement on the Turk's Cap or Hackensack in that it is fully ten days earlier. All should try it. Per pkt. 5c, oz. 10c. ½ lb. 25c, lb. 75c.

OSAGE.—This variety has created quite a stir in

OS. 10c. ¼ 10. 25c, 10. 75c,

OSAGE.—This variety has created quite a stir in Chicago, where it sells at double the prices of any other. The skin is thin, of dark green color, and slightly netted. The flesh is of a salmon color, remarkably sweet and spicy in flavor, extremely thick, and delicious to the rind. The seed cavity is very small. All lovers of fine melons should try the Osage. Per pkt. 5c, oz. 10c, ¼ 1b. 25c, lb. 75c.

EVERY TIME.

THE BANQUET.

melons we have ever seen. Per pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

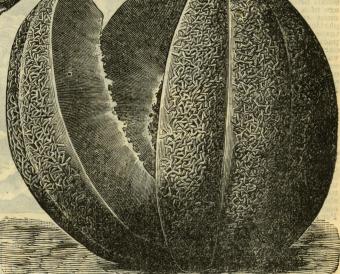

EMERAID GEM.—This is one of the most delicious melons we have ever eaten. The melons are of small size, and of a deep emerald green color. The flesh, which is thicker than that of any other melen of the same size, is of a suffused salmon color, almost red, and ripens thoroughly to the extremely thin, green rind. It is peculiarly crystalline in appearance, and so juicy and rich that it almost drops to pieces (like a rich cake) when dipped out with a spoon. The flavor is sweet and luscious beyond description. Per pkt. 5c, oz. 10c, ½ lb. 25c, lb. 65c

MONTREAL MARKET.—Uniformly of large size, averaging from 15 to 20 pounds in weight. Flesh very thick and of fine flavor. Per pkt. 5c, oz. 10c, ¼ 1b. 25c, lb. 65c.

PERFECTION.—Rich color and luscious flavor. Per pkt. 5c. oz. 10c, ¼ 1b. 25c, 1b. 75c.

EMERALD GEM.

OSAGE.

BANANA.—Attains a length of from eighteen inches to three feet three inches, and is from two to four inches thick. Flesh very thick, of a salmon color; flavor good. It looks almost like an overgrown banana, and smells like one, hence the name. It is not only a curiosity but it sells well on the market. It is entirely distinct from all other melons. Don't fail to try it.

Per pkt. 5c, oz. 10c, ¼ 1b. 20c, lb. \$1.00.

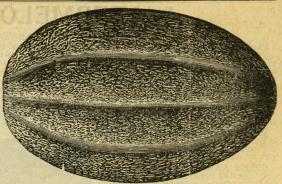

ripe the outside skin is of rich yellow, intermingled with light green. The flesh is of a light green color, unusually spicy, melting and delicious. But the most remarkable and valuable feature of this new melon is its wonderful keeping qualities. They do not ripen on the vines like other musk melons, but have to be picked before hard frost and laid away in a cool, dry cellar, where they will keep sound and sweet for months. When wanted for use they must be

THE PRINCESS.—This splendid variety is nearly round, with heavily netted, dark green skin; the flesh is of a rich salmon color, and in flavor is sweet and luscious beyond description. They ripen early and grow to good size, frequently weighing eight to ten pounds each. This is a most excellent variety which it will pay you to try. Per plt. 5c, oz. 10c, ½ 1b. 25c, 1b. 75c.

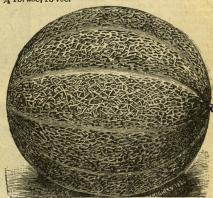

TOWA MASTODON.— The most extraordinary new variety ever offered and will create a sensation wherever seen. See de-scription with novelties. Per pkt. of 25 seeds 10c.

BAY VIEW.

BAY VIEW.—This variety is one of the largest, most prolific, best flavored and finest melons in cultivation. In flavor it is luscious, sweet and deliciously rich. It has been grown to weigh from fifteen to twenty pounds and from fifteen to eighteen inches long. It is hardy, vigorous, and continues a long time in bearing. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

CHAMPION MARKET.—A superb variety destined to become very popular. Almost a perfect globe in shape, and densely netted, making it one of the handsomest cantaloupes known. Flesh is thick, light green color, and rich, sweet flavor. Very productive. Per pkt. 5c, oz. 10c, 12 lb. 25c, lb 70c.

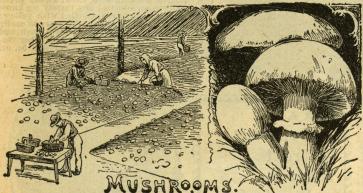

CHAMPION MARKET.

wanted for use they must be brought into a warm room, where they will ripen up in a few days. They are hardy and very prolific. Per pkt 5c, oz. 10c, ½ 1b. 30c, lb. \$1.00. SHUMWAY'S GIANT.—Of monstrous size, cream yellow, early, absolutely distinct, and with seeds more than twice as large as other sorts. A whole field of them will average 15 to 20 pounds each, and select specimens weigh more. Sweet and luscious with fine, melting, thick, salmon-colored fiesh. Never stringy. The flavor is pleasant, not high, nor rank. Per pkt. 5c, oz. 10c, ¼ 1b. 30c, 1b. \$1.00.

IMPROVED CANTALOUPE.—Large size, flesh of a light yellow color and delicious in flavor. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 50c.

Winter Pineapple.

MUSHROOMS.

The ease with which a crop of mushrooms can be grown to perfection in an ordinary house cellar, wood-shed or barn, and the astonishing success of so many who have taken up this new industry, both for profit and their own use, induces us to call especial attention to the subject. The great luxury of mushrooms can be enjoyed by all at a most trifling expenditure of money, time and labor. In market they are always wanted and sell readily at paying prices. There seems no limit to the demand, and an over-supply is seldom known. We recommend the English mushroom spawn as generally the better both for the market gardener and private planter.

MUSHROOM CULTIVATION.—Mushrooms can be grown in the cellar, barn, shed, or any dark room under a temperature of 50 to 60 degrees. If practicable divide your place in narrow beds three to five feet wide, prepare your ground by thoroughly mixing one part of common garden soil with two parts of fresh horse manure, free from straw or litter This well mixed compound should be filled in your beds 12 to 15 inches deep and pounded down as much as possible. Fermentation will set in at once and after the temperature of your soil has declined to about 85 or 90 degrees, the bed is ready for spawning.

your soil has declined to about 85 or 90 degrees, the bed is ready for spawning.

Attention from the first in the preparation of manure is one of the most essential points, then its condition when made into a bed, respecting the temperature at the time of planting the spawn. Make holes in your bed about ten inches apart, each to hold two or three pieces of spawn about the size of a walnut, then cover the same with two inches of light soil, pressing it soild all over the bed. In order to hold an even moisture in the soil protect your beds with three to four inches of straw, and if the surface should become a little dry, moisten this protecting straw carefully with luke-warm water. If the temperature is right mushrooms will begin to come up in about six to eight weeks, and the bed will continue bearing for about a month.

Price, per lb. not prepaid, 15c, 10 lbs. \$1.25, 25 lbs. \$2.50. If

Price, per lb. not prepaid, 15c, 10 lbs. \$1.25, 25 lbs. \$2.50. If by mail, add 10 cents per pound for postage.

September 10, 1895.—Last spring I purchased seed of your Four Giant onions and planted them on the same day beside seed purchased from a Nebraska firm. Now the onions from your seed will average in size from that of a teacup to that of a dinner saucer, while the others are small and will make a fine crop of scullions. I will plant only your seed next year.

J. CLAY FOX, Rock Co., Nebraska.

September 22, 1895.—I never saw purer seed nor had it do better than yours. The Duke Jones watermelons were grown on sod ground and not cultivated, but in spite of the dry season they made a splendid crop. I cut one this morning which weighed 53 lbs.

W. R. BEASLEY, White Rock, Okla.

WATERMELON.

One ounce is required for sixty hills.

Plant in hills eight feet apart and cultivate same as musk melon.

Thousands of melon growers annually depend on us for their seeds and are universally pleased, and claim that nowhere have they ever obtained seeds so pure and reliable. It pays to

pleased, and claim that nowhere have they ever obtained seeds so pure and reliable. It pays to have the best. Growers using a large quantity (not less than five dollars' worth) are entitled to market gardeners' prices and should send for special list.

FORDHOOK EARLY.—Was proved to be the largest early variety on the list, and we verily believe it to be the earliest of all. From seeds planted May 10th ripe melons were produced the last of July. The accompanying illustration, made from a photograph, well shows its shape. The rind is tough, making it valuable for shipping. Color a uniform medium green; seeds white; flesh bright red and very sweet. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

VICK'S EARLY.—Medium size, flesh bright pink, solid and sweet; said to be the earliest variety in cultivation. Per pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

cole's EARLY.—This new variety originated in Iowa, and is greatly liked by those who have tried it. Very early, hardy, vigorous, and a sure cropper; sweet, delicate flavor; flesh dark red. Per pkt. 5c, oz, 10c, ¼ 1b. 30c, 1b. \$1.00.

PEERLESS, OR ICE CREAM.—
(White seeded.) Of unquestionable quality, very early, medium size, thin rind, fiesh bright scarlet. We annually sell more seed of this than any other early melon on the list. Per pkt. 5c, oz. 10c, ¼ 1b 20c, lb. 50c.

TRUE DARK ICING, OR ICE RIND.

Very solid sort, thin rind, most delicious flavor. Per pkt. 5c, oz. 10c, 1/4 lb.

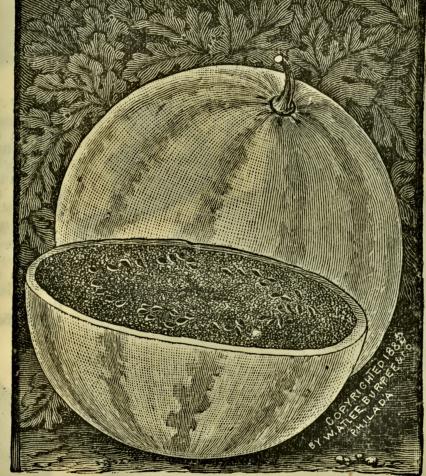

25c, lb. 75c.

BURPEE'S WHITE GEM.—This is found indeed a gem, both in its unique, handsome appearance and delicious quality. It is very productive, and sets probably more fruit to the acre than any other watermelon in cultivation. The melons are round, of good average size for family use, weighing fifteen to twenty pounds each, and of a beautiful cream white color when ripe. The skin is tough and the rind is only a scant half inch in thickness. The flesh is a rich, bright pink, crisp, melting, very juicy and deliciously sweet in 'flavor. Per pkt. 5c, oz. 10c, 12 lb. 30c, lb. \$1,00.

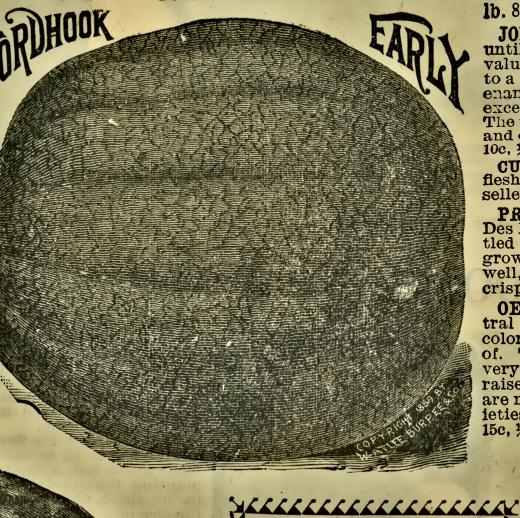

GTRIPED GYPSY, OR GEOR-GIA RATTLESNAKE.—A favorite melon in the south for shipping to northern markets. An early variety, large, oblong, skin green, mottled and striped, rind thin, flesh crimson and fine flavored. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 60c.

size, slightly oval; dark green outside, with blotches of fawn color when ripe. Flesh yellow as gold, sweet as sugar, and of unequaled flavor. Per pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. \$1.00.

MOUNTAIN SWEET.— Per pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 60c.

LISTED ON PAGE 3.

PHINNEY'S EARLY

PHINNEY'S EARLY.—The melons are of medium size, oblong in shape and very uniform, the skin being mottled, as shown in illustration; flesh red and sweet. It is hardy and vigorous in growth and very productive. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

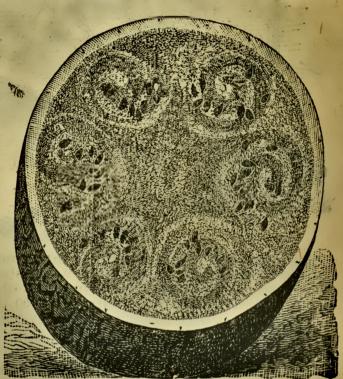

ICE KING.—Ripens about ten days earlier than Kolb's Gem, and is bound to take the place of that famous variety with those who grow melons for shipping purposes. Very productive, many of the vines maturing from six to eight large melons each. The flesh is of a scarlet color and fine flavor. Rind is thin and very tough. J. D. Corry, of Kansas, who is one of the most extensive melon growers in this country, writes us that the Ice King is the finest appearing melon he had out of twenty varieties, and that no melon can beat it in flavor. In fact, too much cannot be claimed for it. Don't fail to try this grand melon. Per pkt. 5c, oz. 10c, ½ 1b. 30c, 1b. 85c.

JOHNSON'S CHRISTMAS.—Have been kept until Christmas in perfect condition. Their valuable keeping and shipping qualities are due to a peculiar hard, tenacious coating or outside enameling of the skin, which also gives them an exceedingly handsome and fresh appearance. The flesh is of a beautiful rich scarlet, very solid and of a delicious sugary flavor. Per pkt. 5c, oz. 10c, ½ 1b. 25c, 1b. 75c.

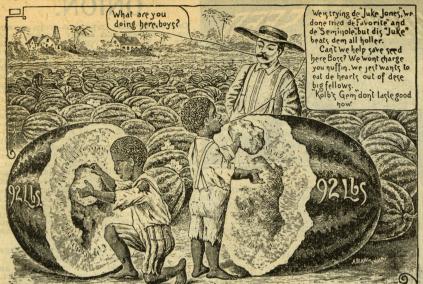

CUBAN QUEEN.—Large size and productive; flesh bright scarlet and of good flavor; a good seller. Per pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

PRIDE OF GEORGIA.—Very popular with Des Moines growers. It is of a dark green mottled color, nearly oval, ridged like an orange; grows partly upon its end, is firm, will ship well, attains a large size, and is very sweet and crisp. Per pkt. 5c, oz. 10c, ¼ lb. 30c, lb. 75c.

OEMLER'S TRIUMPH.—Originated in central Asia, of medium size, dark, glossy green color, and the sweetest of any variety we know of. The flesh is dark red, mottled with yellow; very early; excellent flavor. They are as easily raised as the Summer Crookneck squash, and are not affected by dry weather where other varieties fail. Seeds very small. Per pkt. 5c, oz. 15c, ½ lb. 50c, lb. \$1.50.

OEMLER'S TRIUMPH.

DIXIE.—Very popular with melon growers in some sections. It originated on the farm of a truck grower in North Carolina and is a cross between the Kolb's Gem and Mountain Sweet, surpassing the former in shipping qualities and fully equaling the latter in fine eating quality and flavor. It is from eight to ten days earlier than either, has a remarkably thin, tough rind, and will keep and ship well. Each vine matures seven to eight large melons. The vines are strong and rapid growers and have more laterals than other varieties. A peculiarity is that it roots at almost every joint. This valuable characteristic enables it to withstand the drouth and greatly increases its duration and yield. The flesh is bright scarlet, of fine quality almost down to the skin. The melons are of a dark green color and most beautifully striped; of oblong shape. Per pkt. 5c, oz. 10c. ¼ 10. 25c, 1b. 70c.

FANCY KOLB'S GEM.—Grown by one

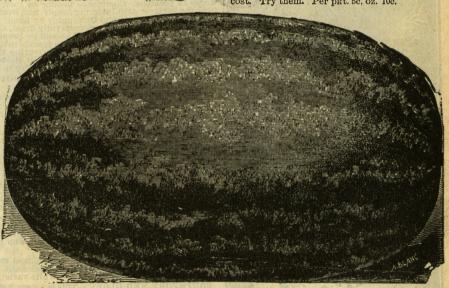

5c, oz. 10c, ¼ lb. 25c, lb. 70c.

FANCY KCLB'S GEM.—Grown by one of the best watermelon growers in the U. S. from carefully selected, pure stock, and this seed is taken from melons weighing not less than 40 lbs. each. Both ends of these melons are cut off and seed saved only from the middle part. Seed selected in this way always gives the best satisfaction, and one pound of it is worth more than ten pounds of unselected seed to the grower who caters to the best trade. Pkt 5c, oz. 15c, ½ lb. 45c, lb. \$1.25.

DUKE JONES.—Last year we introduced this grand new variety to our customers and it pleased everyone. The Duke Jones originated in the great melon growing region of the south and has created great interest among the growers who have had the privilege of seeing it. The shape is well shown by our engraving. It has a dark green rind slightly striped, flesh bright red, very juiey and delicious. It matures medium early, is very prolific and much larger than the Kolb's Gem. Is sure to be a favorite with melon growers. A carload of 800 melons averaging 43 pounds each were gathered from two thirds of an acre. A prominent grower writes that they produced ripe melons sixty-five days from planting. One of the largest fruit dealers in Cleveland, Ohio, says: "We had the pleasure of handling several carloads of the Duke Jones melon and they were the finest melons we ever had, making the best appearance and being the best eating melon." Don't fail to try it. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

KOLB'S GEM.—This variety, on account of its earliness and excellent shipping qualities, is largely grown for shipping purposes. They grow nearly round, and the color is a dark green with narrow stripes of lighter shade. The rind, though quite thin, is very tough. Flesh bright red and of good flavor. Pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c.

FANCY KOLB'S GEM.

One of the most important crops grown, both in market and family gardens, and there is no other vegetable where the quality of the seed exerts a greater influence upon the crop than in onions. There is more money in onions grown from seed than in almost any other crop. Good onion seed is of the utmost importance. Fully realizing this, we have for some years made a specialty of onion seed, and have all our crop raised under special contract subject to careful supervision. Our onion seed is all grown from choice, selected bulbs, critically examined before being set out for seed. In vitality it is very strong, being carefully tested. The crop of some varieties of onion seed is very short this year and prices are One of the most important crops grown tality it is very strong, being carefully tested. The crop of some varieties of onion seed is very short this year and prices are apt to advance in the wholesale market; still we shall not advance our retail price as long as the present supply lasts. Sowing

seed to produce large onions is the cheapest, easiest, best and most satisfactory way. Large onions can easily be grown the first year from the seed by obtaining our seed, which is all American grown, and new crop of 1895. It won't pay you to use the cheap, imported, or southern grown seeds, which produce a large proportion of scullions and onions that will not keep well. Poor seed, even as a gift, is the dearest the planter can use. We want you to try our seed, and have therefore put the price down to as low a rate as good, reliable seed can be sold for. In comparing our prices with others, remember that WE PAY THE POSTAGE.

SPECIAL PRICES.—It will pay market gardeners and onion growers who use large quantities of onion seed to write for special wholesale prices, stating quantity required.

Quantities of onion seed to write for special wholesale prices, stating quantity required.

CULTURE.—One ounce will sow about 100 feet of drill; 4 pounds will sow one acre. As early as the ground can be worked in the spring, sow the seed in drills fourteen inches apart, covering one half inch. They should be planted in rich, sandy soil, which is as free from weeds as possible. Commence hoeing as soon as the rows can be seen; skim the ground over the surface; avoid stirring deeply, and work the soil away from the bulbs. At second hoeing weed carefully and thoroughly by hand. When the tops die, pull and spread evenly over the ground; stir or turn until fully dried, then cut the tops one-half inch from the bulb. For pickles or sets, good ground should be prepared as above, and the seed should be sown very thickly in broad drills, about 40 pounds to the acre for sets, and 15 to 20 pounds for pickling. For sowing onion seed and cultivating the crop, it will pay you to purchase a good drill and hand cultivator. See description elsewhere. Lang's Hand Weeder (price 30 cents, postpaid) is the best hand weeder made. Try it.

ONIONS: HOW TO BAISE THEM PROFITABLY.—Being the practical details by

ONIONS: HOW TO RAISE THEM PROFITABLY.—Being the practical details by

seventeen practical onion growers. Price 20c.

YELLOW GLOBE DANVERS.—A very handsome, round or globe-shaped variety, of large size, with thin, yellow skin, white flesh, fine grained, mild, very firm and the best of keepers. It ripens early and sells readily at the highest prices in our markets. Per pkt. 5c, oz. 10c, ½ 35c, 1b. \$1.20.

LARGE RED WITHERSFIELD.—The standard sort throughout the west, as they are the most hardy, and immense crops can be raised when more tender varieties would fail. They grow to a large size, fine form; skin deep, purplish red; moderately fine grained and strong flavor. Very productive and an excellent keeper. Our seed of this variety is extra select and cannot be excelled. Our price is low, but should you want five pounds or more, ask for special rates. Per pkt. 5c, oz. 12c, ½ lb. 40c, lb. \$1.40.

EARLY RED WETHERSFIELD.—For many years one of the largest onion seed growers in the United States has been carefully selecting, each season, the most perfect, even-shaped onions which matured early and were of regular, uniform size. The result is an extra choice, early-maturing, solid and productive sort. Per pkt. 5c, oz. 15c. ½ lb. 45c, lb. \$1.50.

EXTRA EARLY PEARL.—The earliest and best of all the American varieties. It is of good size, of pearly white color, the outer skin having a most showy, waxy appearance; flesh of pure snow white, and flavor so mild that it can be eaten like an apple. It grows with wonderful rapidity. We are sure all who try it will be greatly pleased. Per pkt. 5c, with wonderful rapidity. oz. 20c, ¼ lb. 70c, lb. \$2.50.

LARGE WHITE GLOBE.—The handsomest market variety we have ever seen. Large size, oval form, very even, mild and pleasant flavor, good keeper, out-sells every other variety, and is undoubtedly the best white variety Per pkt. 5c, oz. 25c, ½ lb. 85c, lb. \$2.75.

SOUTHPORT RED GLOBE.—This is a very handsome variety and is deserving of general cultivation. It matures quite early (none of the perfectly globe-shaped onions are as early as the flat varieties), grows to a large size, skin deep red, flesh fine grained, mild and tender. Per pkt 5c, oz. 15c, ½ lb. 50c, lb. \$1.50.

NEW EXTRA EARLY BARLETTA.—This distinct new variety is the very earliest onion in cultivation. It is fully two weeks earlier than the Early White Queen, which heretofore has been the earliest variety in cultivation. At maturity the tops die down directly to the bulbs, leaving the neatest and handsomest little bulbs imaginable. They are of pure, paper white color; very mild and delicate in flavor; one inch to one and a half in diameter, and three-fourths of an inch in thickness. Both for table use and for pickling it is most valuable. Per pkt. 5c, oz. 20c. ½ 1b. 65c, lb. \$2.00.

WHITE PORTUGAL, Silver Skin.—Matures early, very mild flavor, medium size, and generally preferred for table use; not a good keeper. Per pkt. 5c, oz. 25c, ½ lb. 85c, lb. \$2.75.

PARIS WHITE PICKLING, or Small Silver Skin.—For pickling. This is of small size, silvery white, and used almost entirely for pickling on account of its small size, handsome appearance and mild flavor. Per pkt. 5c, oz. 15c, 1/4 lb. 55c, lb. \$1.75.

EXTRA EARLY RED.—Quite popular for early marketing. Per pkt. 5c, oz. 15c, ½ lb. 45c, lb. \$1.50.

ONION SETS.—See list of Vegetable Plants and Roots. If you want a large amount, write for prices.

It Pays to Have the Best.

I planted four pounds of your onion seed last year, and I think every seed grew. W. H. CROSSWAIT, Dexter, Iowa.

I bought my onion seed from you last spring and now have a crop of the finest onions in this country, Many of them weighing over one pound each. D. RICHARDSON, Lewis, Iowa.

The onion seed I bought of you did well, also all the other seeds purchased of you. They were better than my neighbors, who planted other seeds I expect to send to you for seed another year.

J. F. DUNAGAN, Tecumseh, Okla.

FREE FOR TRIAL

We have imported from the Can-We have imported from the Canary Islands a small quantity of a choice new variety of onion seed. The quantity is so limited that we do not offer it for sale but will gladly send you a packet of CANARY ISLAND ONION for trial if you request it when sending order for other seeds..

rational at a total and the same and the sam

MAMMOTH PRIZETAKER. (No. 1.)—An American improvement on Spanish King, and is admittedly the largest of all varieties, having been grown to the enormous weight of OVER SIX POUNDS, and is withal a handsome, fine-flavored sort. Of a clear, bright straw color aud uniform perfect globe shape. Produces enormous crops, one report being over 1,200 bushels, and they bring an extra price, being sold on the market as fancy onions. Keeps wonderfully well. Our seed is unexcelled, and is in great favor with our customers in all parts of the U. S. They ripen up hard and fine, and present the handsomest possible appearance in market, while the pure, white flesh is fine grained, mild, and delicate in flavor. Per pkt. 5c. oz. 20c, ¼ 1b, 65c, 1b. \$2.25.

GIANT VESUVIUS. (No. 4.)—This grand new mammoth variety which we offered for the first time two years ago, is a foreign sort. It is well shown by our illustration. In rich soil, under good cultivation, they grow to an immense size the first year. They are of a handsome globe shape, somewhat elongated, veritable beauties, and will attract attention anywhere. Color almost a blood red, flesh nearly white, quality most excellent. Much more tender and mild than the American sorts. Per pkt. 10c, oz. 30c, 1/4 lb. 85c, lb. \$2.50.

obtain an idea how large this really is, just weigh the largest onion you can obtain and compare weights, or weigh out five pounds and six ounces of common onions and imagine them all in one. Beautiful copper color; flesh pure white, fine grained and mild. Per pkt. 5c, oz. 20c, ¼ 1b. 65c, 1b. \$2.00.

MAMMOTH SILVER KING. (No. 3.)—Attractive form, flattened, but thick through, as shown in the illustration. Single bulbs often attain weights of from two and one-half to four pounds each. The skin is a beautiful silvery white; the flesh is snowy

the enormous weight of FIVE POUNDS AND SIX OUNCES, and nothwith-

standing their large size they retain their shape and fine quality. To

white, and of a particularly mild and pleasant flavor. So sweet and tender is the flesh that it can be eaten raw like an apple. Matures early and is of uniformly large size and perfect form, and will bring a large price in the market. Per pkt. 10c, oz. 25c, 1/4 lb. 85c, lb. \$2.75.

Sept. 23, '95.—The seeds received from you gave perfect satisfaction in every instance. The Washington Wakefield cabbage headed C. B. CHAPMAN, finely. Sandersonville, Ga.

THE FOUR GIANTS

ONE PACKET EACH OF

The Mammoth Prizetaker, Copper King, Giant Vesuvius, and Silver King.

FOR ONLY 20 CENTS. TRY THEM.

Be sure to include the FOUR GIANT **ONIONS** in your order this year, and try for that \$10 PRIZE which we offer seed this year, which must be delivered to us by the 15th of October.

The \$10.00 prize for 1895 was awarded to J. Clay Fox, of Rock Co., Neb., for an onion weighing one pound and nine ounces. Try for the prize this year, and you can perhaps raise a larger one and get the ten dollars. Give the Four Giants a trial

*CHAMPION OF ENGLAND.—One of the richest and best flavored peas grown. Per pkt. 5c, ½ pt. 10c, qt 35c. *YORKSHIRE HERO.-Per pkt. 5c. 1/2 pt.

WHITE MARROWFAT.—Per pkt. 5c, 1/2 pt. 10c, qt. 30c. *TELEPHONE.-Immensely productive, of the finest quality and excellent, sugary flavor; vines very strong; the pods are of large size, with six or seven large, delicious peas; height four feet. Per pkt. 5c, ½ pt.

*BLISS ABUNDANCE.--Height 20 inches, time of ripening, medium, remarkably strong, vigorous, branching habit, and unusually productive; pods of fair size, and well filled with peas of good quality. Per pkt. 5c, ½ pt. 15c, qt. 45c.

*BLISS EVERBEARING.—Height two feet; late to very late; hardy, vigorous, enormous cropper; pods and peas of large size and good quality. Per pkt 5c, ½ pt. 15c, qt. 50c.

*STRATAGEM,—Decidedly the best late variety for family or market use. Pods long and filled with seven to nine large peas of extra fine quality. Per pkt. 5c, ½

12c, qt. 40c.

pt. 15c, qt. 50c.

PEAS.

One quart will plant about 100 feet of drill.

Peas mature quickest in light, dry soil, not too rich. May be sown as early as the ground can be worked, and for a succession, every two weeks up to July, or what is better, select several kinds which will form a succession in maturing. Sow in drills two to four feet apart, according to varieties, not less than four inches deep for general crop, although the first earlies will come to maturity sooner if only covered one and one-half to two inches. Wrinkled sorts are marked *. They should be sown thicker in the row than the smooth varieties, as they are more lighle to tot.

as they are more liable to rot.

Prices include postage Pints at one-half the quart rates.

Pritesn cents perquart discount if sent by express. See special prices by the peck or bushel on page 29.

REED'S EARLY PRIZE.—A cross between Tom Thumb and the Advancer. Grows eighteen inches high, being slightly taller than Premium Gem, and, while equally early, it is decidedly a better cropper than either that or Tom Thumb. Pod large, heavy and well filled. Although equal to the wrinkled varieties in sweetness, and flavor, it can be planted earlier than these without danger of rotting. Its combination of earliness, dwarf growth, yield and quality, with the large size and good filling of the pod, insures its future. Per pkt. 5c, ½ pt. 15c, ot. 5c. 15c, qt. 50c.

*THE STANLEY.—This very handsome new variety is well shown by the accompanying illustration. It is a grand medium early wrinkled pea, with well filled pods, larger than the Stratagem, a tremendous cropper, with dwarf, stocky vine, which needs no bushing. It is very sweet and of delicious flavor; full grown pods often measure four inches in length by over two inches in circumference and mature very uniformly, so that nearly the entire crop can be taken at one picking. All should try it. Per pkt. 10c, ½ pt. 20c. qt 65c.

IOWA CHALLENGE.

10WA CHALLENGE.

10WA CHALLENGE,—An extra early variety of superior merit which is a favorite with Des Moines market gardeners. We can in all confidence say that after a trial of nearly all extra early varieties offered to the trade we have not found one possessing more merit, hence its name. For the market gardener it has no superior It is not only extremely early and prolitic, but it is of good flavor. All the good qualities of the extra early are most nearly brought to perfection in the Challenge. Vines, eighteen inches. Per pkt. 5c, ½ pt. 15c, qt. 45c.

CLEVELAND'S ALASKA—Height two

5c. ½ pt. 19c, qt. 49c.

CLEVELAND'S ALASKA.—Height two
fect, pods rather small, dark green color,
remarkably well filled; often seven to nine
peas; the earliest pea known, being two
days earlier than the Rural New Yorker,
and ninety per cent of the pods can be
gathered at the first picking. Per pkt. 5c,
kt. 19c. at. 40c. ½ pt. 12c, qt. 40c.

*PREMIUM GEM.—Height one foot; early and prolific; a type of and an improvement on, the McLean's Little Gem. Pods long and of a dark green color. The most popular sort for family use. Per pkt.

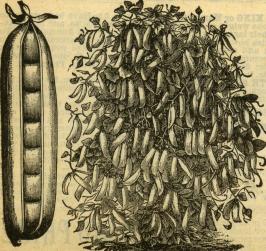

most popular sort for family use. Per pict. 5c, ½ pt. 12c, ct. 40c.

*BLISS' AMERICAN WONDER.—Early and prolific dwarf wrinkled pea. On good soil each vine will average twelve pods and each pod six peas. The vine grows from ight to ten inches high. Per pkt. 5c, ½ pt. 15c, qt. 50c.

RURAL NEW YORKER.—Very early and of most even growth and maturity: 80 to 90 per cent of the pods can be removed at one picking. Per pkt. 5c, ½ pt. 15c, qt. 40c.

*IMPROVED ADVANCER .- Per pkt 53, 1/2 pt. 15c, qt 45c. BLACK-EYED MARROWFAT .- Per pkt 5c, ½ pt. 10c, qt. 30c. DWARF SUGAR.—Edible pods; use like snap beans. Per pkt. 5c, ½ pt. 15c, qt. 50c.

NOTT'S EXCELSIOR.

*NOTT'S EXCELSIOR.—We are p.eased to offer this superb new variety, and are sure our customers will be delighted with it as an ideal family and market pea. It is fully assweet and delicious as the American Wonder, and grows one-half taller. Pods are larger and it is far more productive than the Premium Gem, and it is within a day or two as early as the first early smooth peas, having matured in forty-three days. Mr. George Buchanan writes: "I found these peas a very distinct, pure sort, with many marked excellencies over the American Wonder, Premium Gem, Advancer, etc. The peas were ready for table use within forty-three days from planting Quality very superior." Per pkt. 52, ½ pt. 23c, qt. 65c.

FIRST AND BEST.—It is an im-

FIRST AND BEST.—It is an improvement on the Philadelphia Extra Early. Pods good size and well filled with smooth peas of excellent flavor. Per pkt. 52, ½ pt. 12c, qt.

DWARF WHITE MARROW.— Per pkt. 5c, ½ pt 12c, qt. 35c.

FIELD PEAS.—See list of Miscellaneous Field Seeds.

PUMPKIN.

One pound will plant about 250 hilis.

Principally used for agricultural purposes, but there has been a great improvement in the varieties during the past few years by the introduction and hybridization of foreign varieties with our old sorts. Plant in hills eight feet apart in May, among potatoes, or corn, or in open field.

MAMMOTH CHILI. (See cut, No. 1.)—Really a squash, but it looks more like a pumpkin, and we list it here so as to have the mammoth pumpkins together. This is the largest of the squash family and attains the most astonishing weights. One specimen weighing 481 pounds was shown at the World's Fair having been grown in California, and from 100 to 200 pounds is a common weight with ordinary culture. Our seed has been selected from the large and perfect specimens only of our own growing. The flesh is a rich yellow, very thick and of excellent quality, highly nutritious. They are profitable to grow for stock feeding. They keep well throughout the winter. Per pkt. 5c, oz. 10c, 1/4 lb. 35c, lb. \$1.00.

RY THE COLLECTION OF Mammoth Pumpkins.

One packet each, Mammoth Chili, King of Mammoths, Mammoth Tours and Mammoth Etampes for **ONLY TWENTY CENTS!**

\$25 PRIZE! We send with each collection instructions for growing, and offer a cash prize of \$15.00 for the largest pumpkin or squash, and a prize of \$10.00 for the second largest one grown from our seeds. Frizes will be awarded October 15th.

KING OF MAMMOTHS. (No. 2.)—The largest variety of true pumpkins. The flesh and skin are of a bright golden yellow, fine grained and of good quality. The one from which our cut was made reached the enormous weight of 245 pounds. One customer writes us that he grew one weighing 158 pounds, and on the same vine had five other pumpkins from 90 to 104 pounds each in weight—over 640 pounds grown from one seed. Farmers and gardeners, just think of that kind of a crop. Will it not pay you to grow the King of Mammoths and exhibit them at your county fair? Our seed was saved from large select specimens of our own rowing. Per pkt. 10c, oz. 20c, 1/4 lb. 65c, lb. \$2.00.

MAMMOTH TOURS. (No. 3.)—Also called Mammoth Whale. Originated near Tours, France, where it is largely grown, both for feeding cattle and for table use. Grows to an immense size, sometimes three feet in length and to a weight of 100 to 200 lbs. Color outside an ashy grey, or pale green, showing an inclination to be striped, but most specimens are more blunt at blossom end than our cut shows. Flesh of a salmon color and fair quality. Seed of peculiar shape. Seeds have sometimes been sold at fairs at 10 to 25 cents each. Per pkt. 10c, oz.

20c, ¼ lb. 50c, lb. \$1.75.

MAMMOTH ETAMPES. (No. 4.)—A giant variety from France, where it is quite celebrated. Grown in this country to enormous size; bright, glossy red color, and a splendid variety to grow for exhibition. Per pkt. 5c, oz. 15c, 1/4 lbs.

the seed cavity being small; fine grained, dry and sweet, making pies as righ without eggs as others do with. Per pkt. 5c, oz. 10c, ½ 1b. 25c, lb. 75c.

CONNECTICUT FIELD.—The common field or cow pumpkin, grown principally for stock. Per oz. 5c, ½ lb. 10c, lb. by mail 30c. By express or freight, 10 lbs. \$1.50, 25 lbs. \$3.00. JAPANESE PIE.—Flesh very thick and of a rich salmon color, nearly solid,

WHITE CUSHAW.—Attractive and sells much better than the old green striped sort. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. 85c.

TENNESSEE SWEET POTATO.—Medium size, flesh thick, creamy white, fine grained and of excellent flavor. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

LARGE CHEESE.—A flat variety commonly called Sweet pumpkin throughout the west. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

YANKEE PIE.—This is the noted New England Pie or Small Sugar pumpkin. It is the same shape and color as the Connecticut Field, but smaller and year. It is the same shape and color as the Connecticut Field, but smaller and very sweet. One of the best varieties for table use. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 60c.

PRIZES FOR 1895 'I'he first prize was awarded to Ed. Smith, of Larimer county, Colorado, weight 171 pounds. The second prize was awarded to E. J. Duffield, of Dallas county, Iowa.

RADISH.

One ounce will sow about 100 feet of drill; eight to ten pounds will sow an acre in drills.

Radish seed should be sown in light, rich soil as early as the ground can be worked, and for a succession, at intervals of two weeks until mid-summer. Radishes must be grown quickly, and have plenty of room, or they will invariably be tough and pithy. Sow in drills one foot apart and thin to two or three inches apart as soon as the rough leaves appear. Most of our radish seed was grown for us in France, "the natural home of radishes," and we think it cannot be surpassed.

VICK'S EARLY SCARLET GLOBE.—A most excellent early radish for garden culture, and for hotbed forcing there is no variety so desirable as the Early Scarlet Globe. It is the earliest; its color is the handsomest; in fiavor it is the mildest. most crisp, juicy and tender. It is the market gardener's favorite as a forcing radish. It forms small top, and will stand a great amount of heat without becoming pithy. Its fine shape, well illustrated by the accompanying engraving, makes it sell for a higher price and more rapidly than any other shaped sort. Per pkt. 5c, oz. 10c, ½ 1b. 25c, 1b. 75c.

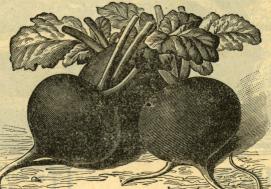

IMPROVED CHARTIER.—Decidedly distinct in appearance

IMPROVED CHARTIER.—Decidedly distinct in appearance from any radish in cultivation. Its form is well defined by our engraving, the color at the top being crimson, running into pink at about the middle, and from thence downward is a pure, waxy white. Per pkt. 5c, oz. 10c, ¼ 1b. 20c, lb. 60c.

IMPROVED CHARTIER.

NEW GOLDEN DRESDEN.—All who saw this charming variety at our trial grounds the past season were most favorably impressed with it. It was a little beauty, with golden brown skin, white flesh, crisp, juicy, and of finest flavor. One of the quickest growing sorts, and tops are so small as to admit of close planting. No matter whether grown in the garden or in hotbeds, you can depend on a remarkably perfect, early and uniform crop. Per pkt. 5c, oz. 10c, ½ 1b 35c. lb. \$1.00.

NON PLUS ULTRA.—An improvement on the Deep Scarlet Turnip. Remarkably fine in quality and of very quick growth, and ready to pull within twenty days after sowing. Perfectly globular little roots, of very bright color and excellent shape; certain to insure ready sale on the market. It is by far the best strain of early radishes for forcing. Beds are planted, the crop matured and sold, and the same bed made ready for a second planting all in thirty days. Per plt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

NEW GOLDEN DRESDEN.

early use. Pe 1b. 30c, 1b. 80c.

Ib. 30c, lb. 80c.

ROSY GEM.—This wonderful new radish is an improvement on the Scarlet Turnip White Tip, and has won golden opinions in all tections of the country. Their shape is perfectly globular, with rich, deep scarlet top, blending into pure white at the bottom, exceedingly tender, crisp and delicious, equally desirable for either the market or home garden, and should be planted by everybody. Per pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

If you have a small patch of ground no matter how small, there is no way in which you can get as much satisfaction out of it as by growing lettuce, radishes, etc. Their greatest merit consists in being FRESH AND CRISP.

8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 8 **8 8 8 8**

EARLY LONG SCARLET SHORT TOP.—Very popular with gardeners and for family use. Per pkt. 5c, oz. 10c, ½ 1b. 20c, lb. 50c

EARLY SCARLET TURNIP.—Per pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 50c.

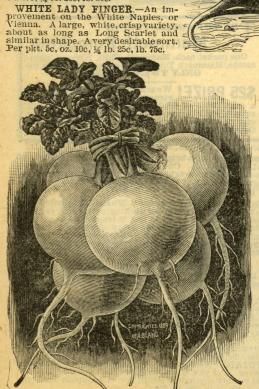

CALIFORNIA MAMMOTH WHITE.

—A winter variety, growing twelve inches long, white fleshed, firm and of excellent quality. It is the largest radish grown. Per pkt. 5c, oz. 10c, 1/4 lb. 30c, lb. 85c.

LONG BLACK SPANISH.—A popular winter sort. Per pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

CHINA ROSE WINTER.—One of the best winter varieties, a general favorite, bright rose colored, flesh white, firm, and of superior quality. Per pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

GIANT WHITE STUTGART.—Flesh and skin are both snowy white, very crisp. mild and of good flavor. Per pkt. 5c, oz. 10c, ½ lb. 25c, lb. 75c.

W00D'S EARLY FRAME.—About ten days earlier than Long Scarlet, which it very much resembles, although not quite so long. Per pkt. 5c, oz. 10c, ¼ lb. 20c, lb. 50c.

MODEL WHITE BOX.

WHITE STRASBURG.—The roots, as shown in illustration, are of handsome, oblong, tapering shape; both skin and flesh are of pure white. The flesh is firm, brittle and tender, and possesses the most desirable character of retaining the crispness even when the roots are old and large. It is excellent for summer use, as it withstands severe heat and grows very quickly. Per pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 75c.

quickly. Per pkt. 5c, oz. 10c, ½ 1b. 25c, lb. 75c.

10WA SEED CO.'S PERPETUAL WHITE SUMMER.—This variety, introduced by us. has given spiendid satisfaction to all who tried it. Their shape is well illustrated by the accompanying engraving. They are pure white, of uniform ly good quality, crisp and brittle, and they keep longer in a fit condition for the table than any variety we know of, hence their name, Perpetual White Summer. Can be sown any time of the year and will always produce good radishes fit for marketing refer than the Chartier, and keep in perfect shape for marketing roadsout four weeks, or longer for home use. Per pkt. 5c, oz, 10c, ½ 1b. 35c, 1b \$1.25.

MIXED RADISHES. -This is a mixture of over twenty choice varicties of early, medium and late radishes. You will certainly have rad-ishes all summer and ishes all summer and be surprised at the results, if you give it a good place in the garden. For several years we have sent out large quantities of this mixture, and our customers have been much pleased with it. Our illustration will give you some idea of the possibilities from a packet of this seed. Per pkt. 5c, oz. 10c, 1/2 lb. 30c, lb. \$1.00.

MIXED RADISHES.

WHITE STRASBURG.

GOLDEN GLOBE.—One of the best summer radishes, amber fiesh, and keeps long in good condition; extra fine quality and rapid growth. Per pkt. 5c, oz 10c, ½ lb. 25c, lb. 85c.

ALL SEASONS.—Introduced by us in 1890 and proved a valuable acquisition, being greatly liked by all who gave it a fair trial it was from China, and we sent it out after testing in California one year. In this State it does not prove to be early, but makes a most excellent summer and fall radish, and even keeps well for winter use. It is of handsome shape, stump rooted, and

PERP. WHITE SUMMER. stump rooted, and ivory white in color. Flesh, white, crisp, brittle, and of the best quality. Never pithy. Do not sow seed until after the first of June. When sown in July they do well. Per pkt. 5c, oz. 10c, ½ 1b. 30c, lb. \$1.00.

The Chartier radishes from your seed are simply superb. J. FULKERSON, Andover, Mo. I used your seeds last year and liked them very such. MRS. T. G. SMITH, Peru, Ia.

From seeds purchased of the Iowa Seed Co' last year I was enabled to win four prizes on vegetables at our county fair. Seeds are always satisfactory. HENRY WEST, Rhodes, Iowa.

One ounce will sow 200 feet of drill; five pounds to an acre.

Sow early in spring in good rich soil, which has been plowed deep, in drills fifteen inches apart, covering half an inch. Thin to five or six inches apart in rows. They are improved by

S. CO.'S IMPROVED TABLE GUERNSEY

ALL SEASONS RADISH.

Guernsey stock parsnip, which is not good for table use. The roots do not grow as long as the Hollow Crown, but are of greater diameter and more easily gathered. It is a very heavy cropper: the roots are smooth, with a deep hollow crown and small top. The flesh is fine grained and sweet, and of excellent quality. Cooks evenly all the way through to the center, which is as fine and soft and even in quality as outside portions. It is sure to please all who try it. Crop very short this year. Per pkt. 5c, oz. 15c, 4 lb. 40c, lb. \$1.00.

LONG SUGAR or Hollow Crown.—The standard for either table use or stock feeding Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c.

PEPPER.

One ounce will produce about 1,800 plants.

Sow seed in hotbed early in spring: transplant to open ground when the weather is favorable, in warm, mellow soil, in rows eighteen inches apart. Seeds germinate slowly, and require considerable heat.

MAMMOTH GOLDEN QUEEN.—Average a third larger than Ruby King. Eight to ten inches long, bright, waxy, golden yellow, and are very mild in flavor. Per pkt. 5c, oz. 25c, ¼ lb. 80c.

RUBY KING.—The peppers frequently attain to a very large size, 4½ to 6 inches long, by 3½ to 4 inches thick. When ripe they are of a beautiful bright ruby red color, and are always remarkably mild and pleasant to the taste. Each plant produces from six to twelve large handsome fruits. Per pkt. 5c, oz. 20c, ½ lb. 70c.

GELESTIAL.—When they are fully ripe they are of a delicate creamy yellow color, then suddenly change to an intense vivid scarlet. The brilliant contrast in colors makes a plant loaded with fruits an object of striking beauty and oddity. The peppers are of superior quality, of a clear, sharp flavor. Per pkt 5c. oz. 25c. ½ 1b. 85c.

RED CLUSTER. - Similar to the Chili, out smaller and more produc-

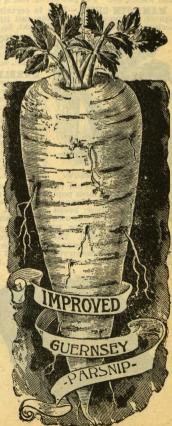

tive. Per pkt. 5c, oz. 20c, 1/4 lb. 65c.

RED CHILI.—Small, very hot. Used everywhere for pepper sauce. Per pkt. 5c, oz. 20c, ¼ 1b. 60c. CORAL GEM BOUQUET.—This new red-hot pepper is the finest of the small-sized varieties, and makes a very pretty ornamental plant for growing in pots.

LARGE BELL or Bull Nose.—An early standard sort.

Per pkt. 5c, oz. 20c, ½ lb. 65c.

SWEET MOUNTAIN or Mammoth. -- Similar to above, but milder. Per pkt. 5c, oz. 20c, ½ lb. 65c. RED CAYENNE. -- Per pkt. 5c, oz. 25c, ½ lb. 90c.

XON SQUASH

COPYRIGHT. 1893. BY M. B. FAXON CO.

WHITE BUSH SCOLLOPED.—Similar to the Golden Bush. Color creamy white. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 60c.

Per pkt. 5c, oz. 10c. ½ lb. 20c, lb. 60c.

WHITE CHESTNUT.—The shape of this very distinct new variety is well shown by our cut. The outside skin is creamy white while the flesh is lemon yellow, fine grained, sweet, and most excellent in quality, suggesting the flavor of a boiled chestnut. Size and form much like the Hubbard, fully equaling it in productiveness and keeping qualities. This squash is creating quite a furore in the eastern states, where gardeners pronounce it the very best squash they have ever grown. Per pkt. 5c, oz. 10c, ½ lb. 30c, lb. \$1.00.

EARLY PROLIFIC MARROW.—Very early and productive—the two most important features for the market gardener—while its attractive color—brilliant orange red—good cooking and keeping qualities, make it popular with the consumer. Per pkt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

MEXICAN BANANA — Originated by crossing imported varieties. It is sweet, rich, finest grained meat, good keeper, and the heaviest for the size of any ever grown.

The size is from two to three feet long, and it weighs from thirty to fifty pounds. Dark green color, magnificent bearers, for fall and winter use. Per pkt. 5c, oz. 10c, ½ lb. 35c, lb. \$1.20.

MAMMOTH CHILI.—This is certainly the largest variety of squash (or pumpkin, as some call it) grown. See more full description with pumpkins. Per pkt. 5c, oz. 10c, ½ 1b. 35c, 1b. \$1.00.

VEGETABLE MARROW.

AMERICAN TURBAN.—It is fine grained, very dry, sweet, and of delicious flavor. For fall and winter use. Per pkt. 5c, oz. 10c, 1/4 lb. 25c, lb. 80c.

MARBLEHEAD.—A splendid winter variety, shell very hard, of a light blue color; flesh equal to the Hubbard in quality. Per pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 60c.

VEGETABLE MARROW.—A favorite English sort. The fruit is variable in size, from nine to eighteen inches in length and from four to six inches in length and from four to six inches in diameter. Skin a greenish yellow, flesh white, soft and of rich flavor. Plant eight feet apart. Per pkt. 5c, oz. 15c, ½ 1b. 50c, lb. \$1.50.

HUBBARD. -This old variety has for years stood the test of all rivals, and is the most popular winter squash grown; hard, green shell; fiesh bright orange yellow, fine grained, very dry, sweet, and of a rich flavor; keeps in perfect condition throughout the winter. Seed is of our own growing and extra select. Per pkt. 5c, oz. 10c, ¼ 1b. 20c, 1b. 60c.

winter. Seed is of our own growing and extra select. Per pkt. 5c, 0z. 10c, ½ 10. 20c, 10. 00c.

SIBLEY, OR PIKE'S PEAK,—Originated in Iowa. Claimed to be a great improvement on the Hubbard. The form, correctly shown by the cut, is obviously entirely new, having the stem at the swell end. The shell is pale green in color, very hard and flinty, but at the same time so very thin and smooth as to occasion the least possible waste in baking. The flesh is solid and thick, and a vivid, brilliant orange color, dry, and has a rich, delicate flavor peculiarly its own; more productive and a better keeper than either the Hubbard or Marblehead, and we prefer it for our own table use. Per pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 50c.

I bought seed of the Short Stem Drumhead Cab-bage last year, and it did well and is true to name. Some heads weighed 12 pounds without stem. It's the seed I mean to plant another year. I have tried different seed houses, but find yours the best. H. M. CROUSE, Pearl City, Ill.

The cabbage grown from your seed last year were the largest grown in this community and the best in the Cairo market. You may expect my orders in the Current orders in the future.

BERT BARKER, East Prairie, Mo.

One ounce early varieties will plant about forty hills; one ounce late will plant twenty hills; four to six pounds to the acre.

Plant about the middle of spring in hills, the early sorts four to six feet apart, the late varieties eight to twelve. Thin to three plants in each hill. The soil cannot be too rich.

eight to twelve. Thin to three plants in each hill. The soil cannot be too rich.

THE FAXON,—(New.) The flesh is a deep orange yellow, cavity very small and seeds few; the special peculiarity, however, is that while uncooked it appears to have a shell like any squash, but when cooked there is practically none, the shell, or inedible part, being only about as thick as a sheet of writing paper. One of the best squashes we ever tasted, sweet and very dry, and for squash pies it must be tried to be appreciated. It matures early and can be used as a summer squash. It is a very late keeper, keeping in perfect condition to lapril or May. Of superior quality whether it is ripe or green. This is a very desirable feature, as many squashes (the Hubbard especially) must be thoroughly ripe before frost, or the crop is lost. Productive, of medium size and the best possible quality. The vines are somewhat longer than most other sorts and fruit varies in color, but these seem to be its only defects. Per pkt. 5c, oz. 15c, ½ 1b. 50c, lb. \$1.25.

GOLDEN BUSH,—It is thicker, larger, and superior in every way to the old varieties. Very arly. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 65c.

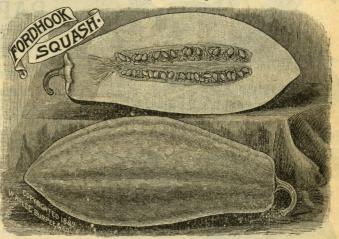

EARLY BUSH CROOKNECK.—Splendid summer sort, early, productive, very fine quality. With all the new varieties recently brought out, many claim that there is no summer squash superior to this. Per pkt. 5c, oz. 10c, 1/4 1b. 20c, 1b. 50c.

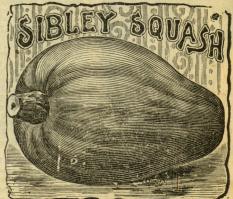

FORDHOOK.—The engraving herewith, which is accurately reproduced from a photograph, shows the shape of the squash and the solidity of a section. It is extremely handsome, of a bright yellow outside and straw yellow within. The flesh is dry and sweet and of the best quality. Placed in a cool, dry room, it keeps in perfect condition throughout the winter. The stem is thin and hard, and also the roots, consequently it is free from the attacks of the squash borer. Matures early and is everywhere a sure cropper and immensely productive. Another feature is that the green squashes can be used at any stage of their growth. Per pkt. 5c, oz. 10c, ½ 1b. 25c, 1b. 75c.

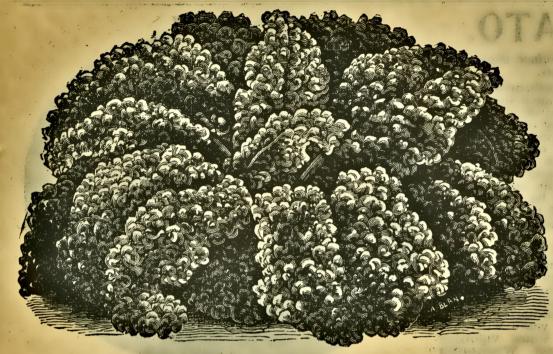

ESSEX HYBRID.—A most excellent variety. It is the earliest of the winter sorts, and can therefore be planted later in the season than most others. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb 60c

BOSTON MARROW.—Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 65c.

HUBBARD.

SPINACH.

One ounce will sow about 80 feet of drill; ten pounds to an acre.

This makes the finest "greens" of any plant in cultivation. For summer, sow early in spring in deep, rich soil in drills one foot apart, cover one inch. Sow at intervals of two weeks throughout the season. For very early spring use, sow the winter varieties first of September, and protect by covering with straw.

LONG STANDING.-- Far superior to all others: leaves thick, fleshy and crumpled. Slow in running to seed, hence its great value for spring sowing. The leaves are round, large, unusually thick, deeply curled, and of a fine dark-green color. Per pkt. 52, oz, 102, 112 202, lb. 45c

ROUND.—Main market sort. Equally good for summer or fall. Per pkt. 52, oz. 102, 1/4 lb. 20c, lb. 35c.

PRICKLEY or WINTER. - Per pkt 52. oz. 10c, 1/4 lb 20c.

VIROFLAY or SAVOY LEAVED.—Grows to an enormous size, and produces wonderful crops. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 40c.

CHINESE RED.—A new variety of spinach from China which is much larger than the common; has bright red leaves and is considered equal in quality. Per pkt. 5c, oz. 20c.

LONG STANDING SPINACH.

NEW ZEALAND.—Very useful to supply the place of the ordinary spinach during the hottest months of the year, or in dry, arid localities. A great acquisition, and the most valuable variety of all for either the market or family garden. One plant will cover a space of ground three or four feet square. Entirely different from all other sorts Per pkt. 52, oz. 102, 1/4 lb. 30c, lb. \$1 00.

SALSIFY—or Vegetable Oyster.

One ounce will sow about fifty feet of drill.

Why don't you grow salsify? We are certain if you grew it one year you would never be without it, and especially after having tried Mammoth Sandwich Island. Salsify is one of the most delicious and nutritious of vegetables, and should be more generally cultivated for use in winter, when the supply of really good vegetables is so limited. It has the true overtar flavor, and tables is so limited. It has the true oyster flavor, and makes a delicious and inexpensive substitute for them in soup, etc. Cultivate like parsnips.

MAMMOTH SANDWICH ISLAND.—This magnificent new variety averages fully double the size of the
Long White. The roots, notwithstanding their enormous size, are of very superior quality, and very delicious in flavor; it is such a decided improvement that we are sure all market gardeners who once try it will use it extensively. Per pkt 5c, oz. 15c, ½ 1b 50c, 1b \$1 50

A splendid novelty which we introduced in 1837. The vine on which they are borne is somewhat similar to the musk melon vine, and requires the same cultivation. The fruit is about the size of a large

peach, oval shaped, and of a bright orange-yellow col-or, somewhat russeted For sweet pickles, pies or preserving they are superb. Recipes for preparing them for the table will be sent with each order. In the west and northwest, where fruit is scarce, they are becoming popular, as they are easily cultivated, wonderfully prolific, and can be used in every way in which you would use a peach, except that they are not usually liked raw, although some consider although some consider them excellent simply them excellent sliced with a little sngar

know you will be pleased. Per pkt. 5c, oz. 15c, 1/2 lb. 50c, lb. \$1.50.

CHUFAS, or Earth Almond

resemble the cocoanut or almond, and are considered very nice, put on the table in a fruit dish with candies, as an after-dinner relish. as an after-dinner relish. Very prolific, a single one yielding from two to four hundred. The nuts grow underground, very near the surface, easily reached by pigs or poultry, and destroyed by them if they have free access. Plant in April, ten inches apart in two and one-half foot rows. Cover them lightly. If the seed is very dry, soak well before planting. Our illustration represents the manner of their resents the manner of their growth, and they vary from the size of a large pea to that of a hazelnut. The children will be pleased with theae. Per pkt. 52, oz. 10c, 1/4 lb. 25c, lb. 75c.

RHUBARB—or Pie-plant.

One ounce will produce about 100 plants.

Succeeds best in deep, rich soil. Sow in spring in drills; cover one inch. Thin plants to six inches apart. Transplant in autumn or spring to permanent beds, three feet apart each way.

VICTORIA or MAMMOTH.—The best and most popular variety er pkt. 5c, oz. 15c, 16 b 50c, 1b. \$1.65.

RHUBARB ROOTS. -- See vegetable plant list

One ounce will sow 150 feet of drill.

Sow in March, thinly in drills one foot apart, half an inch deep. Soak seed in warm water a few hours before sowing. For winter use protect in a glass frame or light cellar.

CHAMPION MOSS CURLED.—A very select stock, beautifully crimped and curled. Decidedly the best and most popular variety for general use. Quite decorative for garnishing. Per pkt 5c oz. 10c, 1/4 lb. 30c.

FERN LEAVED.—Exquisite in form, and admirably suited for table decoration. Excellent quality. Per pkt. 5c, oz. 10c, ½ lb. 35c.

TOBACCO

One ounce will sow about 25 feet square and produce plants for one acre.

This is a paying crop and will do well in this State. The following varieties have been thoroughly tested in this climate. Our seed of most of these was grown on the crown panicles of select plants Early in the spring burn a brush pile on the ground to be used for seed bed. Then thoroughly pulverize the soil, digging and mixing in ashes Sow seed very shallow, When plants are six inches high transplant into rows four feet apart. Cultivate thoroughly

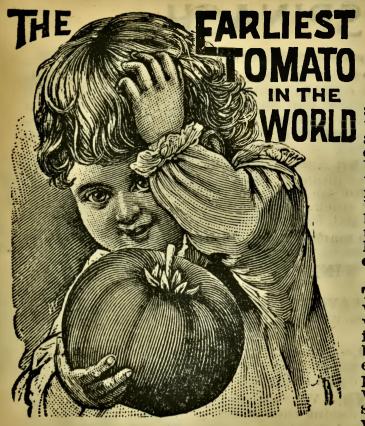

MAMMOTH MUSCATELLE — Originated in the private gardens of the shah of Persia. Very early, leaves long, small ribbed, and of finest possible texture Per pkt 10c, oz. 25c, 1/4 lb. 75c.

HESTER.—Ripens early and has greater adaptability over a wider range of soils and latitude than any other of the yellow varieties and may, on this score, be considered the surest. Per pkt. 102, oz. 25c, ½ lb 75c.

STERLING.—Per pkt. 5c, oz. 29c, ½ lb. 65c.
BIG HAVANA.—Heavy cropper, fine texture, delightful flavor, earliest cigar variety to mature and ripen. Pkt. 5c, oz. 20c, ½ lb. 65c.

CONNECTICUT SEED-LEAF.—Well adapted to this climate. Per pkt. 5c, oz. 29c, ½ lb. 65c.

TOMATO.

One ounce will produce about 2,500 plants.

Sow early in hotbeds or seed boxes and when plants have four leaves transplant to four or five inches apart. Give plenty of air and endeavor to secure a vigorous growth. When all danger of frost is past transplant to the open ground, four to six feet apart each way Well manured, light, sandy soil is hast, but, it must be remembered best, but it must be remembered that a surplus of manure stimulates leaf growth to the detriment of fruit.

BOND'S EARLY MINNESOTA. This handsome new variety which we now offer to our customers is, we verily believe, the earliest in ex-

ton, who grows about 100 varieties of tomatoes, has originated several of our best sorts, and who may be called the best posted man on in fact rather large and run so even and perfect in form, after the tomatoes in the United States, writes us: "Bond's Early Minnesota first few fruits, that they have the appearance of having all been is the best early tomato made in one mould.

They are smooth, of bright scarlet color, solid and of excellent quality. See more full description on second page of cover and don't fail to try it. Per pkt. 10c, oz. 25c, 14 lb. 75c.

OPTIMUS.—Vines medium sized, and pro-ductive, bearing fruit in clusters of five. Fruit medium size, oval, very smooth, exceedingly bright, rich, crimson-scarlet color, very free from cracks and rotting less than any of the seventy varieties which it has been compared. Per pkt. Ec, 07. 25c, 14

LIVINGSTON'S BEAUTY — Originated with Mr. A. W. Livingston. of Franklin county, Ohic, and is one of the best ever intro-duced. Its beauty, size, shape color, flavor, durability, and productiveness make it desirable to al! classes of to-mato growers, being cf a very glossy crimson with a slight tinge of purple. Per pkt. Ec, cz. 20c, 4 lb 60c.
TURNER'S HYBRID

OR MIKADO - Very

usually too rough for general use. Per pkt. Ec, oz 20c 1/4 lb 65c.

MATCHLESS.—Well worthy of its name for in beauty of coloring and

symmetry of form it is indeed without a peer. The vines are of strong, vigorous growth, well set with fruit. They are entirely free from core, of a very rich cardinal red color, and not liable to crack from wet weather, of largest size, and the size of the fruit is maintained throughout the season, the hearthy growth of the foliage continuing until killed by frost. Had we to confine ourselves to one variety it would be the Matchless, for certainly no other to-mato will produce extra large fruits so smooth, handsome and marketable as the

the vine will keep in marketable condition for two weeks. Solid, of fine quality and a long keeper. Per pkt. 5c, oz. 20c, 14 lb. 70c, IGNOTUM.—It is five days earlier than Dwarf Champion and superior to all other standard sorts. Very large, smooth, ex-traordinarily solid, seed cavities the smallest of any tomato; only averages one-half as many seeds as the ordinary sorts. Very productive and uniform, the last pickings being scarcely inferior to the best of the season. It is of a very deep red color, ripens perfectly up to the stem, and remarkably free from cracking and rotting. Per pkt. 5c. oz. 20c. 4 lb. 60c.

M ATCHLESS.

PONDEROSA. - Very large, and is highly commended in many lo-calities. Like all other mammoth sorts, however, there is a considerable proportion of misshapen fruits, and some with hard green spots around the stem. Our seed is pure. Per pkt. 52, oz. 392, 14 lb. 85c.

is the best early tomato I have yet tried." Per

pkt. 102, oz. 35c, 1/4 lb \$1.25, lb. \$4.00.

CRIMSON CUSHION.

-Very large, about

double the size of the Matchless, but rough like all other large

sorts. The poculiarity about it is its unusual solidity, more so than any other sort we know of. Seeds are few and

near the outside, leav-

ing the center solid pulp, which ripens ev-

enly throughout before

the outside appears

mens grown on our own

place, flavor excellent

Per 17kt. 193.

NEW PEACH.—This

peculiar variety, intro-duced by a Philadel-phia firm, is a decided curiosity. The tomatoes in color are a deep rose and golden amber, tlended in an indescribable manner, all covered with delicate bloom like the bloom or furz of fine peach, making it almost impossible to recognize the detached fruits as tomatoes. Do not fail to try it. Per

pkt. 5 c, oz. 30. 1/4 lb. \$1.00.

Matchless The skin is remarkably tough and solid, and ripe specimens picked from

IGNOTUM

YELLOW PLUM.—Good for preserving and pickling: plum shape, solid and smooth. Per pkt. 5c, oz. 30c, ½ lb. \$1.00.

FAVORITE.—Large, smooth, and very prolific. Per pkt. 5c, oz. 15c, ¼ lb. 50c.

RED CHERRY.—Perfectly round and smooth, about the size of a cherry, hand-some and fine for pickles or preserves Per pkt. 5c, oz. 30c, ¼ lb. \$1.00.

RED CURRANT.—Quite ornamental, resembling long bunches of currants. Per pkt 5c, oz. 30c, ¼ lb. \$1.00.

PERFECTION.—Somewhat larger than the Acme, ripens all over and through at the same time, is free from rot at the blossom end. We consider this one of the best tomatoes of its class. Per pkt. 5c, oz. 15c, ¼ lb. 50c.

CARDINAL.—A large grand tomato. The fruit is smooth, of a deep cardinal color, with flesh of the same rich hue, without a green core, very thick and solid, ripens evenly, has no green spots or ends, is a good keeper, and hence is a good shipper, matures at the same time as the Trophy, a vigorous grower and very productive. Per pkt. 5c, oz. 20c, ½ lb. 70c.

GOLDEN QUEEN.—We have tested many yellow tomatoes. of which the Golden Queen has proved decidedly the best. The tomatoes are of large size, handsome, round shape, very smooth, free from ridges. and ripen up evenly, mature early and are very productive. Per pkt. 5c, oz. 25c, ½ lb. 85c.

STRAWBERRY.—See Ground Cherry, page 30. Pkt. 5c.

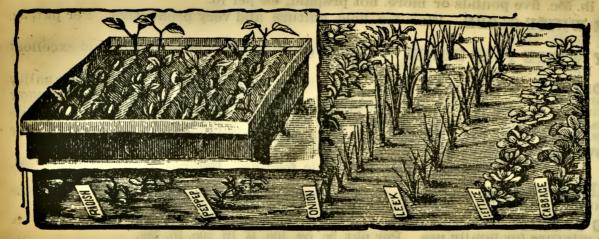

PURPLE HUSK.—See description on page 30, Pkt. 10c.

MIXED TOMATOES.—For the advantage of some of our customers who would like to try all kinds, we have prepared this mixture of all kinds named above and several others. Per pkt. 5c, oz. 30c.

SLICED TOMATOES.—Alternate slices of red and yellow tomatoes make one of the most ornamental dishes that can be put on a table. The Cardinal and Golden Queen are especially nice for this purpose. Try them this year.

DWARF CHAMPION.

SEED TESTING AND TRIALS.

TESTING SEEDS.

We make it a rule to carefully test all seeds as soon as received from the grower, or as soon as they are brought in from our seed farms. Frequent tests are also made during the spring season of any varieties which are liable to decrease in vitality, so as to be certain that everything is first class before it is sent out. We also carry on extensive trials on our grounds by which we are enabled to offer only those strains of seeds which come up to the standard of purity and excellence, and are of the highest vitality. These tests are very satisfactory to us and to our customers. Our method of testing attracts considerable attention in our store, as all the seeds in the tester are in sight and our customers can see any which fail to germinate as well as those which are of strong vitality. We know of no seed firm in America which is so careful and critical with their seed testing, and the result is that we very rarely have complaints as our CHOICE IOWA SEEDS are sure to please.

BEANS, CORN AND PEAS IN BULK. A A I U

These low prices are for purchasers of large lots, they to pay freight or express charges. One-half bushel will be sold at bushel rates and one-half peck at peck rates. Crops are short of some varieties of beans, peas and corn and prices are liable to advance later in the season. Better write for special quotations if you desire a large lot.

TURNIP. One ounce will sow 150 feet of drill; two pounds will sow one acre.

For early, sow in April in drills half an inch deep and twelve inches apart, and twelve inches apart, thin to six inches apart in the drill. For main crop sow broadcast during July and August and just before or during a showery time if possible. Often by sowing an early variety as late as September 1st, a good crop can be obtained. The Purple Top Milan is excellent for this purpose. The soil should be rich and mellow and kept free from weeds. from weeds.

EXTRA EARLY PURPLE TOP MILAN.—This splendid new turnip is one of the earliest sorts in cultivation. The bulb is very flat. of needium size, quite smooth, with a bright purple top; leaves few, short, and of light color, growing very compact and making an exceedingly small, strap leaved top. Per pkt. Sc, oz. 10c, ¼ lb. 25c, lb. 75c.

EARLY SNOWBALL—A perfect, globe-shape

EARLY SNOWBALL.—A perfect globe-shaped, white-skinned turnip. It is exceedingly productive. The flesh is fine grained, firm, and of very delicate flavor. It is one of the best keeping of the white fleshed sorts. Very early, and particularly adapted for family or market use. Pkt. 5c, oz. 10c, ½ 1b. 25c, lb. 75c.

GOLDEN BALL, OR ORANGE JELLY.—A very beautiful and bright yellow turnip of medium size and of universally sweet and delicious flavor. It is hardy and one of the best of keepers. Flesh extremely firm and solid. Always brings a good price in the market. Per pkt. 5c, oz. 10c, 1/4 lb. 20c, lb. 65c.

GOLDEN BALL OR ORANGE JELLY.

GOLDEN BALL EARLYSNOWBALL FTRAEAR NIMBLE DICK.—It is extra early and produces, handsome, fair sized turnips in a very few weeks from time seed is planted. The color is a clear, translucent white, flesh crisp and of excellent flavor. Per

pkt 5c, oz. 10c, 1/4 lb. 25c, lb. 85c.

EARLY WHITE EGG.—Very early and particularly desirable for the table: flesh firm and fine grained, sweet and sugary, and of snowy whiteness, egg-shaped. Per pkt. 5c, oz. 10c, ½ 1b. 25c, lb. 75c.

PURPLE TOP STRAP-LEAVED.—The standard for this part of the country. Superior for early or late planting. Round, flat, good sized, small top with but few leaves; flesh very fine grained; flavor good. Per pkt. 5c, oz. 10c. 14 lb. 20c. lb. 55c, 5 lbs or more, not prepaid, 40c per lb.

PURPLE TOP GLOBE.—Similar to above, except shape. This is the largest yielder of any turnip on the list, and very desirable for table use or stock. Per pkt. 5c, oz. 10c, ½ 1b. 20c, 1b. 55c, five pounds or more, not prepaid, 40c per lb.

LARGE WHITE GLOBE.—Fine for field culture and very productive. Per pkt. 5c, oz. 10c, ½ lb. 20c, lb. 50c.

EARLY WHITE FLAT DUTCH.—Of quick growth, juicy, mild flavor, and excellent uality. Per pkt 5c, oz. 10c, ½ 1b. 20c. 1b. 60c.

BREADSTONE.—While of the Ruta Baga type, they are of such extra fine quality they deserve to be classed with the best table turnips. They are of medium size, very quick growing, and the roots are smooth and white. The flesh is perfectly white, fine grained, and cooks in only fifteen minutes, remarkably tender and very sweet. Per pkt. 5c, oz. 10c, ¼ 1b. 25c, lb. 80c.

YELLOW ABERDEEN.—Excellent for cattle feeding. Per pkt. 5c, oz. 10c, ¼ lb. 20c,

SCARLET KASHMYR.—A handsome new variety which everyone should try. See description with novelties. Per pkt. 5c, oz. 15c, 1/4 lb. 40c, lb. \$1.25.

MIXED TURNIPS.—All the table varieties of turnips mixed in equal proportion. A desirable mixture for family use. Per pkt. 5c, oz. 10c, 1/4 lb 20c, lb. 75c.

RUTA

Ruta Bagas or swedes should be sown not later than June, in drills two feet apart, and thin out to eight inches in the row

MONARCH.—This grand, new and distinct form of the ruta baga, is, we believe, by far the best of all. The bulbs are of tankard shape, with very small neck, skin dark red above ground and yellow below, flesh rich yellow, fine grained and best quality. For earliness, quality and weight it is superior to any variety in cultivation, producing from two to seven tons per acre more than any other swede, whilst the large percentage of saccharine matter contained in the root makes it very palatable and nutritious to stock fed on it. Monarch swede is of handsome shape and distinct appearance. Only variety succeeding on our prairie soil. Per pitt. 5c, oz. 10c, ¼ lb. 25c, lb. 75c.

IMPROVED AMERICAN.—Very popular, and has for years been considered the leading yellow fleshed variety, very solid, fine quality, valuable for the table and for feeding stock. Very hardy and productive, excellent shape, with small neck and smooth skin, keeps well. Our strain 18 choice. Per pkt. 5c, oz. 10c, ½ 1b, 25c, lb, 60c.

WHITE SWEET GERMAN.—Large size, oval form and very solid, flesh pure white and sweet. This is the best keeping variety. Per pkt 5c, oz. 10c, 1/4 lb. 25c, lb. 65c.

CARTER'S IMPROVED HARDY SWEDE.—Large size, excellent quality, and an immense yielder. Per pkt 5c, oz. 10c, 1/4 1b. 20c, 1b. 50c.

VEGETABLE PLANTS AND ROOTS.

VEGETABLE PLANTS.

Well grown and lightly packed to carry long distances.

Well grown and lightly packed to carry long distances.

The fact that these plants are all grown under our personal direction from the choicest stocks of seeds from our store is sufficient recommendation as to the genuineness of the varieties. They can be shipped fresh, well packed at the beds, on a day's notice.

Plants quoted "by mail" are sent at our expense; "by express" at the purchaser's. By our system of packing they are sure to arrive in good condition when shipped to any part of the United States. No charge for either packing or boxes. Plants from hotbed or cold frame are ready during April and May; outdoor grown during June and until the middle of July. We sell 500 at the 1,000 rate.

CARRAGE PLANTS Fally United.

CABBAGE PLANTS.—Early Varieties.—Ready April 10th. Extra Early Express, Jersey Wakefield, All Seasons, Burpee's Allhead, and Henderson's Early Summer. By mail, 100, 75c; by express, 100, 50c:

CABBAGE PLANTS.—Late Varieties.—Ready June 1st. Surehead, Chase's Excelsior, Premium Flat Dutch, and Short Stem Drumhead. By mail, 100, 75c; by express, 100, 40c; 1,000, \$2.00.

CAULIFLOWER PLANTS.—Ready May 1st. Snowball and Erfurt. By mail, doz. 20c; 100, \$1.25; by express, 100, \$1.00; 1,000, \$7.00.

CELERY PLANTS.—Ready May 1st. Henderson's Half Dwarf, White Plume. Golden Self-Blanching, and Pink Aromatic. By mail, doz. 20c; 100, \$1.00; by express, 100, 60c; 1,000, \$4.00. After June 20, \$3.00 per 1,000.

EGG PLANTS.—Ready May 1st. New York Improved. By mail, doz. 25c; 100, \$1.25; by express. 100, \$1.00.

PEPPER PLANTS.—Ready May 1st. Ruby King, Large Bell, and Red Cayenne. By mail. doz. 25c; 100, \$1.00; by express, 100, 75c.

TOMATO PLANTS.—Ready May 1st. Strong, transplanted plants. Dwarf Champion, Acme, Beauty and Matchless. By mail, doz. 25c; 100, \$1.00; by express, 100, 75c; 1,000, \$5.00.

SWEET POTATO PLANTS.—Ready May 1st. We make a specialty of supplying first class sweet potato plants, and we take great pains to send out only such as are strong, vigorous, well rooted and hardy. We can furnish either the Yellow Nansemond, or Early Yellow Jersey. Prices vary with the season, but we will at all times make as low a price as we can. Write if you want a large lot. By mail, 100, 50c; by express, 100, 25c; 1,000, \$2.00.

HORSE RADISH SETS.

Plant at any time during spring, in rows two feet apart and about eighteen inches apart in the rows. By mail, doz. 35c; by express, 100 75c; 1,000, \$6.00.

ASPARAGUS ROOTS.

For directions for planting, etc., see Asparagus seeds.

CONOVER'S COLOSSAL.—One-year old roots. 100, 60c; 1,000, \$4.50. Two-year old roots, 100, 75c; 1,000, \$6.00.

PALMETTO.—Two years old, 100, \$1.00; 1,000, \$7.50.

COLUMBIAN MAMMOTH WHITE.—Two years old. Postpaid per doz. 25c; by freight or express, per 100, 81.00; per 1,000, 88.75.

At to be mailed, add 20c per 100 for one-year olds, and 40c per 100 for two.year olds.

RHUBARB ROOTS.

These may be planted early in spring or in fall, setting the roots three feet apart each way. It requires but little labor to plant, and when once planted in good rich soil, it will remain in bearing condition many years. By express, each, 10c; doz. 75c; 100, \$4.50. By mail, each, 15c; doz. \$1.25.

GARLIC.

A species of onion propagated by offsets; used for flavoring soups, stews and other dishes. Divide a bulb other disnes. Divide a build into small parts, and plant them in early spring in rows one foot apart, and from two to five inches between the plants in the rows. The crop matures in August, when it is harvested like the prion. onion

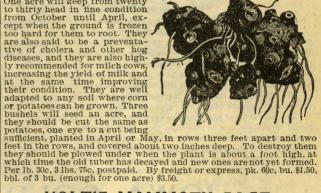

GARLIC SETS.—Per 1b. 40c, postpaid. By express, per 1b. 30c.

JERUSALEM ARTICHOKE.

The greatest hog food known.

The greatest hog food known.

This variety is sometimes used as a table vegetable when pickled, or as a salad, but their greatest value is for feeding stock. They are the best hog food known, and are attracting much attention on account of their great fattening properties, great productiveness (over one thousand bushels having been grown on one acre), and ease with which they can be grown. They need not be dug in the fall; the hogs should be turned in on them, and will help themselves by rooting for them. One acre will keep from twenty to thirty head in fine condition from October until April, except when the ground is frozen too hard for them to root. They are also said to be a preventa-

HOLT'S MAMMOTH SAGE.

No garden should be without a few plants of this most valuable herb. It is a perennial and keeps growing larger each year. The first season a single plant will frequently cover a space three feet in diameter and produce a large amount of leaves, which are several times larger than the common sage and of superior quality. This variety cannot be grown from seed. Price, 3 plants for 25c, 7 for 50c, 15 for \$1.00 postpaid.

Your seeds have given good satisfaction, especially your onion seed and Washington Wakefield cabbage, regardless of the dry weather. I intend to use your seeds another year.

J. M. McCALL, Pottawatomie Co., Oklahoma.

ONION SETS.

PERENNIAL OR WINTER.—Also called Egyptian and Tree onions. May be set out in spring, but are usually set in the fall. Highly valued by gardeners as they produce the earliest spring onions, and after once set out require no other care, but come up year after year without the slightest winter protection. Per pt. 15c, qt. 25c, pk. 60c, bu. \$1.50.

WHITE BOTTOM SETS.—The bottom onion sets grown from seed are the most popular of all and the finest and best for early use and large onions. The white are usually higher in price than the red or yellow, as they do not keep over winter so well. Per pt. 20c, qt. 35c, pk. \$1.20, bu.

YELLOW BOTTOM SETS.—Like above, except the color. Per pt. 15c, qt. 30c, pk. \$1.00, bu. \$3.25.

RED BOTTOM SETS.—Per pt. 15c, qt. 30c, pk. \$1.00, bu. 3.25.

RED TOP OR BUTTON SETS.—These are the old-fashioned sets still largely called for where the bottom sets are not known. Per pt. 20c, qt. 40c, pk. \$1.25, bu. \$4.25.

POTATO ONION SETS.—Valuable for early crop, as they mature quickly; mild and of sweet flavor. Per pt. 20c, qt. 35c, pk. \$1.10, bu. \$3.75.

SELECTED FARM SEEDS.

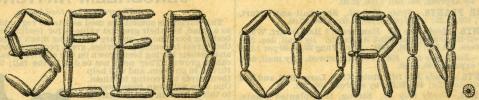

As the farm crop is more important to the general welfare of the country than any other, so the farm seed department should have the prominence in seed catalogues, but we regret to say that with most seedsmen it has very little attention. Realizing the vast importance of this branch of our business, we devote our careful attention to the growth and selection of the best farm seeds of all sorts. Our seed grain is grown especially for seed, in the section best suited to its development and perfect maturity, is all carefully selected, thoroughly cleaned, of the best quality, and we sell at reasonable prices.

We take pride in our large and increasing trade in this branch of our business. With our improved machinery for cleaning which is as perfect as any in the United States, we are enabled to clean seeds perfectly, far different from such as are commonly sold. The Nebraska Experiment Station tested clover seed from the leading seed firms of the country, and our seed stood the highest for purity of any west of Pennsylvania, and, with one exception, the highest of any in the United States.

PRICES named in this department are subject to any important market changes. The prices are net and not subject to premium or discount which is offered on other seeds. Clover and grass seeds are constantly varying in price, and we issue a price list daily during the busy season. Please write for prices, sending list of requirements, when in need. Orders sent us will be given benefit of lowest prices on day order is received. Will take pleasure in mailing samples and quoting inside prices at any time on large orders.

NOTICE.—While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty expressed or implied. Samples sent for testing if desired.

SHIPPING.—In this department everything that is quoted by the packet or pound is sent by mail postpaid; all large quantities, unless noted, are sent by express or freight, at the expense of the purchaser. Prices named include bags and delivering to depot here.

It costs less than twenty-five cents an acre to use our carefully selected and tested seed corn. Is it wise to risk doubtful corn when good seed is so cheap? The varieties of field corn we offer are the best now in use. They were grown especially for seed purposes, and well matured, cured, carefully sorted by our seed corn experts, and shelled with great care. The value of the corn crop in Iowa alone would be increased two million dollars by an average increase of one bushel per acre, and it has been demonstrated that the crops can be fully doubled by planting some of our improved varieties. We are in the center of the best corn growing country of the world, where the soil and climate are peculiarly adapted to its culture, and we have given this branch of our business the most careful attention, until now we can say without fear of contradiction, that for the season of 1896 we have the best supply of seed corn ever offered by any seed firm in the world.

We also have a large and increasing trade on seed corn from farmers in Missouri, Kansas and states further south, and therefore list some varieties which are of special value to them, but state plainly when any variety is too late for this latitude in an ordinary season.

The necessity of planting the very best varieties is plain, and it will not pay you to experiment with the many sorts which we have tried and found worthless, nor to purchase from unscrupulous dealers. We claim to have supplied more farmers with seed corn last year than any seed firm in the world ever did before. Some dealers, last year seeing the great success we had made in the seed corn trade, purchased common crib corn and sold it out untested and under fictitious names, and it made their customers a great amount of trouble. All our seed corn is very carefully tested, and none sent out that we are not certain will grow well under proper conditions. We do not warrant it, but we will mail samples for testing to prospective customers. If a large quantity is wanted, ask for prices. No extra charge for bags.

IOWA GOLD MINE CORN. THE BEST VARIETY OF YELLOW CORN IN THE WORLD!

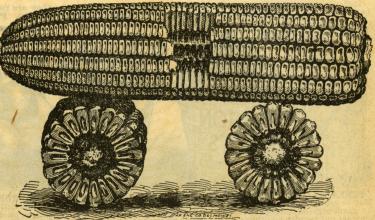

Everyone who has tried it is enthusiastic in the praise of this splendid new variety which we introduced in 1892. Iowa is not called a gold mining state, but m this grand new variety farmers of this country will find a veritable mine of wealth. It has everywhere received the most cordial endorsement as the best and most profitable variety ever grown. This variety originated as follows: Six years ago a special premium offer brought sample ears of corn from several hundred farmers and seed growers and from these we chose the one which was most decidedly the best, and have been selecting and improving it until it is about as near perfection as corn can be made. It is early, ripening only a few days later than Pride of the North; ears are of good size and symmetrical; color a bright golden yellow, as handsome as a twenty dollar gold coin just from the mint; grain is very deep, cob small, and therefore dries out very quickly as soon as ripe. Seventy pounds of ear corn makes sixty to sixty-two pounds of shelled corn, and in hauling to matket it weighs out if ive bushels more to the wagon load than common varieties in the same size wagon. We have shelled selected ears of this variety which produced sixty-four pounds of shelled corn and only six pounds of cobs to the bushels. This is an unparalled record. It cannot be equalled by any other corn in the world. Thousands of our customers say they consider it the ne plus ullra in corn; that it would be impossible to attain any nearer perfection. We can most confidently recommend it as the acme of perfection and stake our reputation on its pleasing everyone who tries it. It will grade No. 1 in any market. We shall not be satisfied until every farmer in the United States has seen this grand new variety.

One carload lot of four hundred bushels of Iowa Gold

One carload lot of four hundred bushels of Iowa Gold Mine corn was carefully weighed, and after shelling it was reweighed and there was just 456 bushels. Just think of it—a gain of 14 bushels to the 100!

Remember, if you want pure Iowa Gold Mine corn, you must purchase it direct from us, as we have not furnished any to any other dealer in Iowa this year. Don't be deceived. If you purchase from your local dealer, insist on seeing that our label is in every bag, plainly marked Iowa Seed Company. We most highly recommend it to our customers in all parts of Iowa and other states in the same latitude. It matures perfectly up to the extreme northern tier of counties in Iowa. It will pay you to change your seed, and don't fail to at least see a sample of Iowa Gold Mine before buying elsewhere. Notice our low prices this year. Per large package 5c, lb. 25c, 3 lbs. 60c, postpaid. By freight, pk. 50c, bu. \$1.25, 2 bu. or more at \$1.00 per bu.

ONE YEAR FREE! Anyone ordering one Silver Mine Corn, or two bushels or more of any other kind of corn is entitled to one year's subscription to the AMERICAN CORN JOURNAL, of Sibley, Illinois, were the subscription to the entitle of the subscription of the subscripti providing they ask for it when sending order.

IOWA GOLD MINE CORN. (From a photograph.)

... WITH A ...

Silver Mine

AND A

Gold Mine

On your farm your bank account will increase, no matter whether Congress adopts a gold or silver basis for our money.

SEPT. 24, 1895.—Your Iowa Silver Mine is as fine a corn as I ever saw grow. It has large, well shaped ears, and filled out clear to the end of coo. I planted the 10th of May and it was well matured by the 15th of August, so I think you will have no trouble in selling it in northern Iowa. You cannot recommend it any too highly to any one that wants a good white corn, Chas, W. Richards, Woodbury Co., Iowa.

Nov. 9, 1895.—Your Iowa Silver Mine Corn is a very promising variety—a strong, vigor-ous grower, with plenty of foliage and gener-ally two ears to the stalk. Color clear white, lernels in straight rows, small white cob. A distinct sort and very pure. Has proved to be a great resister of drouth, and is a corn that the farmers of Iowa can afford to tie to, F. B. Van Ornam, Cass Co., Iowa.

I am highly pleased with your Iowa Silver Mine Corn and wish I had ten acres of it instead of my little plot. It is the largest grained white cornI ever saw. E.P. Wright, Warren Co., Iowa.

Oct. 9, 1895.—I tested the Iowa Silver Mine Corn that you sent me, on my seed farm with thirty-four other tarm with threy-tour other varieties and was well pleas-ed with it. It made a strong, vigorous growth and a good yield of well matured corn. I believe it to be particularly adapted to this climate and cheerfully recommend it. Singleton, Keokuk Co., Ia.

The Iowa Gold Mine Corn yielded three times as much as any other variety. Think it is the best corn I have ever seen. C. H. Shearer, McHenry Co., Ill.

Have just harvested the Iowa Goid Mine and it is a grand corn. Our farmer is enthusiastic over it. The type and color are perfect. J. H. Beagley, Ford Co., Ill.

The Iowa Gold Mine Corn is the best I ever saw and it is well adapted to this climate. S. F. Reynolds, Dane Co., Wis.

The Iowe Gold Mine Corn comes the nearest being all corn and no cob of any variety I ever grew. H. F. Jacobs, Calhoun Co., Iowa.

The largest seed corn grower in the United States says: The Iowa Gold Mine Field Corn bought of you turned out nicely. We are very much pleased with this corn. It grows rank and strong and beat out the drouth and word water over Corn. It grows rank and strong and beat out the drouth and made a good crop. C. S. Clark, Huron Co., Ohio.

What the People Say.

READ ALL OF THESE.

Oct. 5, 1895.—We find the Iowa Silver Mine to be the only really pure white corn, the deepest grain, smallest cob and largest percentage of perfect ears of any corn I have ever tested, and I have grown about all the named varieties. You have in the Iowa Silver Mine a variety that combines more good qualities than any other, either white or yellow. It reproduces itself exactly, thus showing that the type and habits are thoroughly fixed and uniform. Has more inherent good qualities than any other corn. Being a thoroughbred corn it has great flexibility of constitution and thus is adapted to any soil or climate. Your customers will find it a veritable "Silver Mine" if developed with a plow and cultivator instead of a pick and shovel. J. H. Beagley, originator of Pride of America, Conqueror and other prominent varieties of corn and editor of the American Corn Journal.

SEPT. 19, 1895.—The Iowa Silver Mine was planted May 1, cut down by frost May 20, first silk July 6. On July 16 all silked, two to three to each stalk. July 26 hot winds hurt it badly. August 24 husks began turning yellow. September 3 ripe and gathered. Conditions unfavorable, but it has done extremely well. It is quite early for a cora of its size and I must say that I think it is a good corn. Drouth in this locality very severe and other varieties of corn only about one-third of an average crop. J. L. Perkins, Harrison Co., Iowa.

OCT. 20, 1895.—Your Iowa Silver Mine Corn proved a success with me. I planted it the first day of May and by the 25th of July had roasting ears and the frost would not have injured it by the 25th of August. It makes a strong growth and I am much pleased with the shape and size of ear. J. W. McCleary, Polk Co., Ia.

May not be settled without mistakes, but you will make no mistake if you plant

Iowa · Silver · Mine CORN.

SEPT. 24, 1895.—Your White Corn (Iowa Silver Mine) did splendidly for me. It was planted May 4 and matured the fore part of August. It is better even than the Iowa Gold Mine. The ears are large and very solid. I tested four other new varieties this year, but this took the lead. S. S. Wolfe, Jewell Co, Warner. Kansas.

SEPT. 27, 1895.—I planted the sample of your new Iowa Silver Mine Corn in my garden and pronounce it the earliest white corn I have ever seen. Ears of good size and in many instances producing two ears to the stalk. It is seldom one sees anything bred up to such perfection as this new corn. Again thanking you for the sample, I remain W. O. Ruddick, Lee Co., Iowa.

OCT. 12, 1895.—Your Iowa Silver Mine Corn gives promise of being a very profitable variety. It has a well filled,

medium sized ear with small cob and very deep grain, similar to the Iowa Gold Mine, only having the advantage only having the advantage in color being a pure white which commands an advanced price on the market. Powall Bros., Cedar Co., Ia.

SEPT. 18, 1895.—The sample of Iowa Silver Mine Corn was planted May 25 and is now ripe, which shows it to be early enough even for delayed planting. It is of really a control of the cont layed planting. It is of good size, very deep grained with small cob and pure white. Wm. Hester, Dallas Co., Iowa.

The Iowa Gold Mine Corn this year yielded more and is far ahead of any variety ever be-fore tried in this locality, and I believe it is the best suited to this country of any variety. R. Eckhardt, Weld Co., Col.

I bought some Iowa Gold Mine Corn of you and it is the best corn I ever used in my life. Ernest Bolko, Monroe Co., N. Y.

The Iowa Gold Mine is the best grained corn I ever saw. I sold all that I had to my neighbors for seed and could have sold more. F. E. Bell, Van Buren Co., Iowa.

The Iowa Gold Mine Corn proved very satisfactory. It eared better than any other variety I have ever seen. The ears are better filled with deep grains of golden yellow corn, and I can say that it is more than it is claimed to be. D. A. Rose, Washington Co., Iowa.

The Iowa Gold Mine Corn is a grand variety of the control of the

iety, and we were well pleased with it. Ballantyne, Hamilton Co., Iowa.

OCT. 20, 1895.—Your Iowa Silver Mine Corn

writes: The Iowa Gold Mine is ahead of anything for the latitude of Northern Iowa as a yielder, is rich in fattening substance, and one that will sell for the highest price upon any market in the land. Will ripen well in southern Minnesota and will outshell to a bushel of ears any corn we ever knew, often shelling as much as 64 lbs. of shelled corn from

The Iowa Gold Mine has done splendidly here in northwestern Iowa, and is now (Sept. 1) out of danger of frost. It is a yellow dent variety with large well formed ears, much larger and finer than our native corn in this part of the state. P. R. Bailey, O'Brien Co., Iowa.

The Iowa Gold Mine Corn I got of you has done fine. Has been in ear two weeks ahead of other field corn. H. G. Blackhall, Rice Co., Kas.

NOT 16 SILVER TO 1 GOLD.

\$500.00 Gold FOR \$1.00 Silver!

\$1.00 buys sufficient Seed Corn to plant one acre, entitling you to compete for the prizes.

The Iowa Gold Mine Corn I purchased of you last spring is the best yielder I ever planted. O. E. Hughes, Butler Co., Iowa. I had three varieties of field corn this year and for beauty, size of ear and yield the Iowa Gold Mine beats them all. W. W. Campbell, Buchanan Co., Iowa.

FINALLY,

To sum up all the returns, the Iowa Silver Mine is undoubtedly the best white corn, and the Iowa Gold Mine is the best yellow corn in existence. The largest yielders of shelled corn to the acre corn in existence. The largest yielders of shelled corn to the acre and the most profitable to the farmer, either for selling or feeding. Our crops were good this year and we have made prices low to induce every farmer in the country to try them.

PRICES OF IOWA SILVER MINE CORN,—(Postpaid.)—Large sample 10c, lb. 25c, 3 lbs, 60c, sample ear 25c, 7 lbs, for \$1.00.

If Shipped by Freight.—One-half pk. 65c, pk. \$1,00, ½ bu. \$1.75, bu. \$3.00, 2 bu. or more @ \$2.50.

PLANT SEVERAL VARIETIES. TRY FOR PRIZES THIS YEAR.

LENOCHER'S HOMESTEAD.—(See cut No. 4.) Well known in Iowa from its having won the *lowa Homestead's* prize of \$100.00 as the largest producer in the state. In 1891 this variety yielded 345 bushels on three acres with ordinary culture. It was also awarded a diploma at the World's Fair. This variety originated with Mr. G. F. Lenocher, one of the most practical farmers and corn growers in the state. Color dark red with lighter colored cap; grain deep and hackled. Ear somewhat above the average in size; cob small and dries out rapidly, so that it has never been caught by frost. We believe it to be a safe corn to plant in any part of Iowa. It shells readily and the grain is so soft that it makes an excellent corn for feeding, although its color is objectionable for marketing. Our seed was grown for us this year by the originator and has been carefully selected by him for seed purposes. Per pk. 50c, bu. \$1.50,2 bu. or more @ \$1.25.

EARLY MASTODON.—(See cut No. 3.) Very popular in some sec-

Fer pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.25.

EARLY MASTODON.—(See cut No. 3.) Very popular in some sections of the country owing to its large size and record of enormous yields. In the celebrated American Agriculturist corn contest in 1899 the Early Mastodon outyielded every other yellow corn in America, Mr. Alfred Rose, of New York state, raising 213 bushels of shelled corn to the acre. It is hardy, of strong, rank growth, ears of good size. Matures in 120 days. Better plant a few acres of this and try for the prize. Per pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.25.

prize: Per pk. 50c, bu. \$1.50, 2 bu. or more @ \$1.25.

EARLY CONQUEROR.—(See cut No. 5.) A handsome new variety first introduced last year. Ears average from 9 to 11 inches in length. The grain, which is of a rich golden redish color, is of extraordinary width, averaging about one-half inch across. It seems to possess the peculiar characteristic of growing right along and making a crop during weather and under conditions that ruin other varieties. Excellent for fodder and silage, as it yields an immense amount of fodder as compared with any other early maturing sort. It is especially valuable for hog raisers because of its early earing habit. Matures in 90 days. Per pk. 65c, bu. \$2.00, 2 bu. or more @ \$1.75.

able for hog raisers because of its early earling habit. Matures in 90 days. Per pk. 65c, bu. \$2.00, 2 bu. or more @ \$1.75.

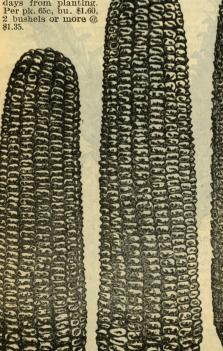

PRIDE OF THE NORTH.—(See cut No. 1.) This variety has been grown and improved in the extreme northern part of Iowa. The ears are 8 to 10 inches long with small cob and kernel; seventy pounds of ears will make sixty pounds of shelled corn: color bright orange, and very uniform. Will ripen in ninety days and matures in this latitude when planted in June. Per pk. 50c, bu. \$1.40, 2 bu. or more @ \$1.20.

NEW WHITE GAP YELLOW DENT.—(See cut No. 2.) This new corn introduced last season for the first time by a professional corn grower has more genuine merit than the Leaming corn, for it grows larger ears. is a better sheller, about a week earlier, and on poor, thin soil will outyield the Leaming by at least 30 per cent. The top ends of the grains are white, the inside yellow. Some corn growers pronounce it a perfect field corn, as to yield, size to ears, color, size of cob and growth of fodder. It is quite highly recommended by many who have given it a trial. Per pk. 60c, bu. \$1.75, 2 bu. or more @ \$1.60.

GOLDEN BEAUTY.—A large and broad grained yellow corn, with from ten to fourteen straight rows of bright golden yellow grains, filled out completely to the extreme end of the cob. The stalks take strong hold in the ground, grow vigorously to a height of 8 to 9 feet.

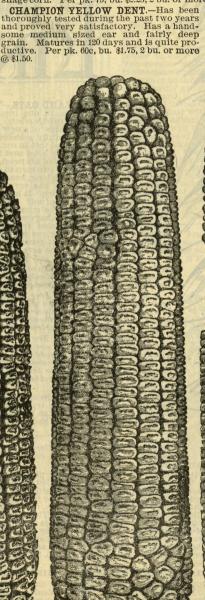

Matures in 110 to 120 days from planting. Per pk. 65c, bu. \$1.60.

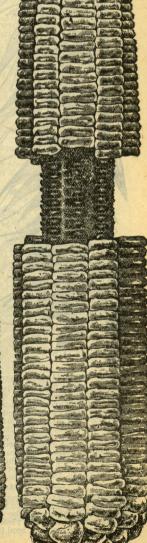

days from planting. Per pk. 65c, bu. \$1.60, bushels or more @

MAMMOTH WHITE GOURD SEED.—A favorite in some parts of the south where known and an immense yielder. In the great corn contest of the American Agriculturist in 1889 this corn carried off the first prize, yielding 248 bushels in the ear, or 255 bushels shelled, being, we believe, the largest yield of corn ever recorded. Corn was of good quality and large sized ears. We do not recommend this corn for northern farmers as it is late, but it should succeed in all parts of Missouri, Kansas and the south. Per pk. 85c, bu. \$2.50, 2 bu. or more @ \$2.25. MORTGAGE LIFTER.—A widely advertised corn, which, it is claimed, will yield an average crop of 80 to 140 bushels every year. Ears are of medium size, yellow dent, grain deep, on a small cob. This variety of corn is new, but is quite highly thought of in some sections. Better try it. Per pk. 60c, bu. \$1.75, 2 bu. or more @ \$1,50. CUBAN GIANT ENSILAGE.—Has been thoroughly tested beside all the large white grain Ensilage varieties and it has proved to be a perfect fodder or ensilage corn. Grains pure white, very large, broad and long, showy and of strong vitality. Yields fodder in great quantities and of finest flavor. Best milk producer of all the field ensilage corns, being almost as sweet and tender as Sugar corn. Per pk. 75c, bu. \$2.00, 2 bu. or more @ \$1.75.

BLOUNT'S WHITE PROLIFIC.—A large growing corn, usually requiring about 130 days to mature. Very productive, usually producing three to eight ears to the stalk, but the ears are not of large size. It is also a most excellent ensilage corn having been known to produce seventy tons of fodder to the acre, sometimes sold as Mammoth Ensilage corn. Per pk. 75, bu. \$2.25, 2 bu. or more @ \$2.00.

PRIDE OF NORTH.

WHITE CAP YELLOW DENT.

EARLY MASTODON.

LENOCHER'S HOMESTEAD.

EARLY CONQUEROR.

will produce a very much larger crop than any other variety. It weighs 60 to 65 lbs. to the measured bushel, while ordinary barley weighs only 48 lbs. The hulls of the common barley form quite a proportion of the total weight, but there is no waste in the Ideal—it is hulless. It is a great improvement on the old hulless barley which had a black grain, as the Ideal is white. The straw is very stiff and strong, amply sufficient to stand the weight of the heavy heads. It is the handsomest, most productive and best variety we know of and we are sure it will prove satisfactory. Per pkt. 5c, lb. 35c, 3 lbs. 75c, postpaid. By freight, per pk. 75c, bu. \$2.50.

-CHANGE YOUR SEED OATS THIS YEAR.-

It will pay you to sell your common oats and sow these improved varieties this year while the seed is so cheap. In our field this year the New Zealand oats yielded about 102 bushels to the acre, and the Lincoln 90 bushels while neighboring fields of other varieties under similar contents yielded only 40 to 50 bushels. The increased yield on a few acres will cover entire cost of seed for your farm.

EAHLY MASTODOM.

PRINCE OF HOMOR. PHIC HOLLIGY TAS INTH

IDEAL BARLEY.

EBNOCHIE'S HOMEGERAN.

LENTILS

EGYPTIAN LENTILS.—Largely used in Oriental countries and is one of their principal articles of diet. It was from these that the dish of pottage was made for which Esau sold his birthright to Jacob in Bible times, and many will be interested in them for that reason. They are in growth similar to peas and may be used in any way that you would use shell beans, and they also make an excellent soup. Sow and cultivate same as garden peas and thresh out in the fall. All should try them. Pkt. 5c, oz. 10c, ½ 1b. 30c, 1b. 75c. By express. 5 lbs. or more @ 30c per lb.

AMBER SUGAR CANE.—This popular variety has very nearly taken the place of other sorts. It is the earliest and makes the finest quality of amber syrup, and also makes good sugar. Succeeds well both north and south. From 100 to 280 gallons of syrup, or from 700 to 1.500 pounds of sugar can be made from an acre of this cane. Our seed is carefully selected and of superior value. Per lb. 25c, 3 lbs. 60c, 10 lbs. or more by express, or freight, 5c per lb., 100 lbs. 250. value. Per 100 lbs \$3.00.

FODDER CANE. - When sown broadcast this makes one of the most valuable crops for feeding green, and we are tempted to call it the most valuable for-age crop in existence. Every dairy farmer should put in a few acres. Sow 40 pounds per acre. 10 pounds or more at 4c per pound, 100 pounds \$2.00.

MANSHURY BARLEY.—Is one of the best six-rowed sorts grown, with kernels plumper and fuller than the best Scotch barley, while for malting it is the very best known. It is early in ripening, which helps it to fill well, thus it is always plump. It has a strong, upright straw, and yields from fifty to seventy bushels per acre. The heads of this barley are very long, and contain from seventy-five to one hundred great, plump, heavy kernels of grain. Professor Henry, of the Wisconsin Agricultural College, in its report, says: "The Manshury still heads the list in productiveness." Per lb. 25c, 3 lbs. 60c, pk. 40c, bu. 81.25, 2 bu. or more @ \$1.00.

SPRING RYE.—This grain is often planted by the farmers especially for the paper makers, who prefer it to any other. The straw is shorter and stiffer than the winter variety and is always easily secured, while the grain, although smaller, is of equal value. Per lb. 25c. 3 lbs. 60c, pk, 50c, bu. \$1.25, 2 bu. or more \$1.10.

WINTER RYE.—Our seed is choice and sure to satisfy. Per pk. 40c, bu. \$1.00, 2 bu. or more @ 80c.

SEED FLAX.—It pays to own your own flax seed, instead of raising it on contract. It pays to raise flax; in many cases a single crop will pay for the farm on which it was raised. We have a vice supply of seed flax this year. Prices are subject to change during the season; present price is per pk. 65c, bu. \$1.75.

RAFFIR CORN.—An excellent fodder plant, yielding two crops of fodder during a season. Grows four to five feet high, upright stalk, with numerous large leaves, greatly relished by cattle and horses. The seed crop is also heavy, sometimes yielding sixty bushels to the acre. It does better sown in drills three feet apart, using six to eight pounds of seed per acre. Per lb. 25c, 3 lbs. 60c By freight, 10 lbs. 75c, 25 lbs. 81.50, 100 lbs. \$4.50

DURRA OR SORGHUM VULGARE.—Valuable forage plant, growing to ten feet in height and yielding an abundance of gray green foliage. Per lb. 25c. By freight 10 lbs or more @ 6c per lb.

LAPARESE RUCKWHEAT — About a week earlier than the Silver Hull.

JAPANESE BUCKWHEAT.—About a week earlier than the Silver Hull, and yields almost as much again. The flour made from it is equal in quality to that of any other buckwheat, while it is much more productive than any other, and succeeds well far north. As the straw is heavier and it branches more, it does not need to be sown as thickly as the other kinds. Per lb. 25c, 3 lbs. 60c. By freight, 10 lbs. 40c, 100 lbs. \$2.50, equals \$1.30 per bushel bushel

EUROPEAN SILVER HULL BUCKWHEAT.—The grain is of a beautiful light silver gray color, husk is thinner which saves from 15 to 20 per cent waste in the process of manufacturing into flour Per lb. 25c. By freight, 10 lbs. 40c, 100 lbs. \$2.50, equals \$1.30 per bushel.

COMMON BUCKWHEAT.—By freight, 10 lbs. 35c, 100 lbs. \$2.00; equals \$1 04 per bushel.

CHINESE TEA.—We are sure that many of our customers will be grad to grow it as a curiosity, if nothing else. The plant is of a shrubby nature, with beautiful shiny foliage and fragrant blossoms, requiring the same treatment as any tender shrub. Is hardy in any of the southern states, and has been grown successfully as a crop in North Carolina. Can be grown as a house plant in the north and kept in pots through the winter. Per pkt. 10c.

ALPINE STRAWBERRIES.— Have peculiar rich flavor, super-ior to our native sorts. Perfectly hardy and easily grown from seed. Per pkt. 10c.

COTTON.—Grown as a curiosity in the north, and if started early in the house plants will be loaded with cotton bolls in autumn. Pkt.

Your Choice Iowa Seeds are hard to beat. Wish you could see our field of Iowa Gold Mine Corn. M. M. NISSLY, Dallas Co., Iowa.

MANSHURY BARLEY.

AMBER CANE.

80JA BEAN.—(Coffee Berry.)—During recent years this variety has been largely sold under the name of German Coffee Berry at extravagently high prices, but we Berry at extravagently high prices, but we prefer to offer it under its correct name. The berries ripen in about four months from time of planting and produce a crop of twenty to thirty bushels to the acre and are as easily grown as other beans. When roasted and ground it closely resembles coffee and tastes quite similar. Some mix half and half with coffee when using and claim it is superior. Its great value to the farmer lays in the fact that when ground it makes one of the most valuable crops for feeding stock and adds greatly to the milk production. Claimed also to be much superior to clover for fertilizing the soil and for pasturing, or feeding the green fodder, perior to clover for fertilizing the soil and for pasturing, or feeding the green fodder, of which it frequently yields from eight to ten tons per acre. Sow broadcast ½ bushel to the acre, or it may be planted in drills three feet apart and one foot between plants. Per pkt. 5c. ½ lb. 15, lb, 40c, postpaid. Pk.\$1.00, bu. \$3.50.

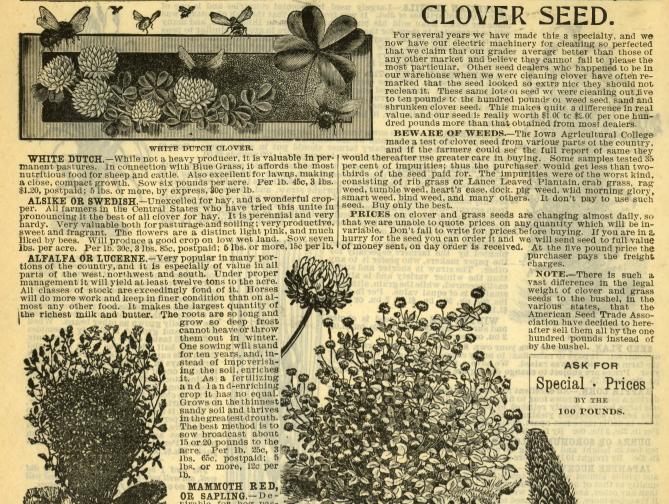

The seed I bought of you last spring did well, am well satisited with the results and will send to no other place for seed in the future. WM. R. HEGGS, Wirt, Iowa.

SOJA BEANS, OR COFFEE BERRY.

KAFFIR CORN

MAMMOTH RED, MAMMOTH RED,
OR SAPLING.—DeSirable for hog pasture and to plow under
as a fertilizer. Too
large for hay unless
on very poor soil. Sow
15 pounds per acre.
Per lb. 25c, 3 lbs. 60c,
postpaid; 5 lbs. or
more, 12c per lb.

more, 12c per 1b.

CRIMSON CLOVER.—Also called Scarlet Italian or Giant Incarnate. This is an annual variety in common use in Italy and the south of France for feeding green. The yield in fodder is immense, and after cutting, it at once commences to grow again, and continues until severe cold, freezing weather. In warm climates four or five cuttings are made during the season. It grows about one foot high, roots nearly black, leaves long, blossoms long, pointed, and of a very deep red or carmine color. Makes good hay. Sow in April or May fifteen to twenty pounds of seed per acre. It may be sown in the corn at the time of last cultivation in July. Where the weather is not too severe, it will live and continue to grow all winter, furnishing winter pasture or a crop of hay before corn planting time in the spring. It can then be turned under, and will add greatly to the fertility of the soil. Thus a hay crop and a corn crop may be grown on the same ground in one year, and still the soil will be improved. It may be sown every year in corn, wheat, oats or potatoes, and two crops obtained. The only objection to it is that sometimes it winter-kills in this latitude. Be sure to try it this year. Per lb. 25c, 3 lbs. 65c, postpaid; 5 lbs. or more by express, loc per lb.

HONEY OR SWEET CLOVER.—Very much liked by the

HONEY OR SWEET CLOVER.—Very much liked by the bees, and a small patch of it would be nice in any yard or garden on account of its delightful fragrance. Per pkt. 10c, lb. 50c, postpaid; 5 lbs. or more, 35c per lb.

MEDIUM RED OR JUNE.—This is the common red clover, used more largely than any other for hay and pasture. Sow fifteen pounds per acre. Per lb. 25c, 3 lbs. 60c, postpaid; by express, 5 lbs. or more, 10c per lb.

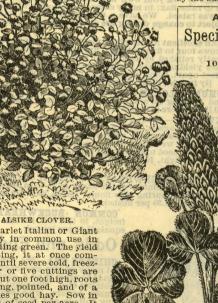

COLLECTION OF CLOVERS.

One ounce each of the above seven kinds of clover for 30c, postpaid. One pound each of seven kinds by express, \$1.00.

CLOVER SEED.

For several years we have made this a specialty, and we now have our electric machinery for cleaning so perfected that we claim that our grades average better than those of any other market and believe they cannot fail to please the most particular. Other seed dealers who happened to be in our warehouse when we were cleaning clover have often remarked that the seed looked so extra nice they should not reclean it. These same lots of seed we were cleaning out five to ten pounds to the hundred pounds of weed seed, sand and shrunken clover seed. This makes quite a difference in real value, and our seed is really worth \$1.00 to \$2.00 per one hundred pounds more than that obtained from most dealers.

BEWARE OF WEEDS.—The Lowa Agricultural College

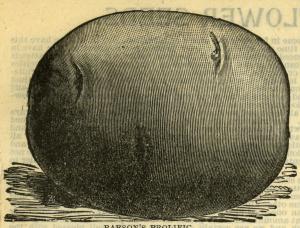

CRIMSON CLOVER.

ALFALFA CLOVER.

PARSON'S PROLIFIC.

VAN ORNAM'S EARLIEST.—This magnificent noveity, introduced by us, originated with Van Ornam Bros., of Cass county, Iowa, the originators of Burpee's Extra Early and several other standard varieties, and they call this the best of all. Smooth, of excellent shape, and resembles the Early Rose in color before ripe, but turning to a creamy white. Size is large to very large, with few small ones. Skin thick and tough, resisting scabs and worms much better than other early varieties. In table qualities one of the very best. Yields an immense crop during dry seasons. Has ripened its whole crops one to three weeks earlier than the Early Rose or Beauty of Hebron. Per pk. 65c, bu. \$1.75, bbl. \$4.50.

BONANZA.—This magnificent variety, which we introduced in 1887, is a medium late, and has become one of the leading varieties for main crop. The tubers are large, oblong, somewhat flattened, skin smooth, flesh firm, white and fine grained. Productive and of superior quality. They sell on the Des Moines market at more than other varieties for table use. Per pk. 50c, bu. \$1.25, bl. \$3.00. bbl. \$3,00.

EARLY BEAUTY OF HEBRON.—A standard early ort. Per pk. 75c, bu. \$1.25, bbl. \$3.00.

WORLD'S FAIR.—A new potato of great value for general use. It is a first quality, strong grower, very prolific, main crop variety. Tubers are smooth, eyes so nearly even with the surface as to be almost imperceptible, perfectly symmetrical in form and outline; skin yellowish white, well covered with netting; flesh pure white, inegrained and mealy. Vines grow very thick and strong; tubers grow very compact in the hill and near the surface. Per pk. 75c, bu. \$2.00.

the hill and near the surface. Per pk. 75c, bu. \$2.00.

HYBRIDIZED POTATO SEED.—We have a quantity of very choice potato seed from the flower ball (the true seed) which we are pleased to offer our customers this year. It is from such seed that all the choice new varieties of potatoes are originated, and there is much interest in growing them. Sow in fairly rich soil and give them good cultivation. The second year they develop their characteristics. If desirous of originating new varieties, don't fail to try our Hybridized Potato Seed. Per pkt. 15c, 4 pkts. for 50c, postpaid.

POUND COLLECTION. One pound each of any ten varieties for \$1.00. Three pounds each of any ten varieties you may select from our list for \$2.50. These are very desirable collections and we have made them cheap so as to enable you to test all the best kinds at a nominal expense. a nominal expense.

PARSON'S PROLIFIC.—Introduced by us in 1882. D. W. Faulkner, the largest grower of potatoes, and by some called the "Potato King of Iowa," calls the Parson's Prolific by far the best main crop potato in cultivation for Iowa growers. His shipments amounted to over one hundred carloads last year, and they are being sold in many places for choicest Colorado grown stock. They are a very nice, smooth, white potato, slightly russeted and with eyes almost even with the surface. They run unusually even in size, there being but few small ones and no overgrown large potatoes. It is the potato for main crop, and it will pay you to plant some of them this year. Per pk. 40c, bu. \$1.00, bol \$2.50.

ALEXANDER'S PROLIFIC.—We still recommend this as one of the best of our entire list. Very productive, skin white, well covered with rough netting, eyes few and lie even with the surface; flesh pure white with the finest flavor; fine grained, dry and floury. Being long, large and white, it brings the highest market price. Per pk. 50c, bu. \$1.25, bbl. \$3.00.

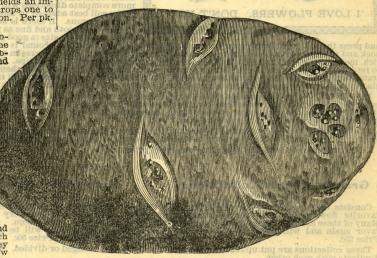

FREEMAN.—The tuber is oval in shape and russet in color; flesh very white, both raw and when cooked; very fine grain and very best flavor. The greatest merits of the variety are its extreme earliness and long keeping qualities. From the time they are as large as hen's eggs until new potatoes come in the next year they burst open when boiled with their jackets on, appearing snow white and floury. Has matured in 39 days from time of planting. A good yielder. Per pk. 50c, bu. \$1.50, bbl. \$3.50.

CHAMPION OF AMERICA.—A potato of large size and fine quality.

CHAMPION OF AMERICA.—A potato of large size and fine quality, which has a record of having yielded immense crops in some localities, and the tubers are so large that they sell rapidly on the market at good prices:

A fine potato which we can recommend with confidence. Per pk. 60c, bu. \$1.50, bbl. \$3.50.

RURAL NEW YORKER No. 2.—This originated on the experimental grounds of the Rural New Yorker, where more than five hundred varieties have been tested practically during the past twelve years, and it proves the largest yielder of any. Large and unusually smooth, with few and shallow eyes; skin is white, as is the flesh, which is of superior quality. Medium late and best drouth resister. Per pk. 50c, bu. \$1.25, bbl. \$3.00.

VAN ORNAM'S EARLIEST.

PECK COLLECTION. One peck each, Extra Early Ohio, Peachblow and Parson's Prolific for only \$2.00. Purchasers of this collection have two excellent early and the two best late varieties, or we will furnish one peck each of any four varieties for \$2.00. It will pay you to include this collection in your order.

SEED SWEET POTATOES.

For twenty years past our firm has been known as headquarters in central Iowa for choice seed sweet potatoes. Our stock is grown, stored and handled especially for seed purposes and cannot fail to please all. We have large quantities grown on sandy soil near this city, but our main supply is grown for us by the best grower on Muscatine Island, as we consider them better for general use. They are carefully packed in barrels at Muscatine and shipped the same day in special carload lots, arriving here the next morning, and are immediately reshipped to our customers. If desired, we will ship them in barrel lots direct to purchasers from Muscatine at lowest Muscatine prices on day of shipment. So perfect is our manner of packing that there is rarely a complaint, although they are usually considered very perishable, by reason of changes in the weather or rough handling but we cannot guarantee safe delivery. Write for prices on large lots.

CONCAVE AND CURVED SEED POTATO

EARLY YELLOW JERSEY—In Potato and the weather of the wight shore to the property of the property o

bbl. \$3.00.

YELLOW NANSEMOND.—The old standby; by some growers considered equal to the ersey. Per pk. 60c, bu. \$1.40, bbl. \$3.00.

RED JERSEY, RED NANSEMOND. WHITE SOUTHERN QUEEN.—We can supply choice seed stock of these varieties, if ordered by April 5th, at 75 cents per peck, \$2.00 per bushel, \$4.50 per barrel

FLOWER SEEDS.

Our floral beauties come in for their full share of attention, and in fact we have this year given them more time and space than ever before on our grounds. We have in our employ an experienced specialist in this line, who, under our supervision, attends to growing whatever can be grown to advantage in this country, tests all novelties offered in this country or Europe, and is constantly striving, by selection and hybridization, to improve the leading varieties, and make our choice Iowa flower seeds just what we are striving for—the best in the world All who truly love the beautiful, and prize all things new and valuable in the floral kingdom, will be interested in the following pages, and also in looking over the flower plant and bulb lists. Our flower seeds are all fresh and we know they are unsurpassed. Quality is always the first consideration. Our mixtures are mainly made up by ourselves from named varieties, or from growing a large number of the best named varieties together, and will yield a better assortment than is commonly found. This year we list all the varieties alphabetically together. Annuals, blennials, perennials, climbers and everlastings but mention in the description what class they belong to if they are not annuals. The ornamental grasses are listed separately. This will make it easier to find any sort named.

find any sort named.

OUR PRICES.—The cost of raising the various sorts of flower seeds varies greatly from such as mignonette, which we can grow a hundred pounds of at but comparatively only a few dollars expense, up to double petunia, which costs us over one hundred dollars per ounce, and some other kinds which are still more expensive. There are but few who care for more than one good sized bed of any sort, therefore we have filled our packets with a sufficient amount and made prices as *ow as possible, some being only two or three cents each, and we are certain customers will be well pleased with the countries they consider the constitution of the constitut quantity they contain.

DISCOUNTS.—In spite of our very low prices by the packet we still offer flower seeds in packets only to the amount of \$1.25 for \$1.00. This discount does not apply to collections of seeds nor to seeds by weight or measure.

I LOVE FLOWERS. DON'T YOU?

The soil best adapted to most flowers is light, rich loam, containing enough sand to make it porous. If there is some clay with it the colors will be brighter. Make the surface as smooth and fine as possible, sow seed in rows, covering each sort of seed in proportion to its size (a good general rule being to cover twice the diameter of the seed) and press the soil down firmly over it. Do not plant any seeds when the ground is wet. Many varieties, such as passy, verbena, daisy, holly-hock and the fine greenhouse plant seeds, should be sown early in shallow boxes in the house, in soil consisting of equal parts of fine sand and rich, mellow loam, well mixed together and sifted to remove all gravel and lumps. Sow as before directed Covering the box with glass helps to retain the moisture and keeps the temperature even. Be careful not to keep them too wet, and as soon as they are large enough to handle transplant into boxes from one to two inches apart, where they are to remain until time to transplant to permanent beds. We will always be glad to answer any questions from our customers relative to the cultivation of any kind of plants.

NOVELITIES.—Our list contains all of the most desirable novelties, but instead of separating them we have placed them in alphabetical

NOVELTIES.—Our list contains all of the most desirable novelties, but instead of separating them we have placed them in alphabetical order with the others, and we believe our customers will find it more convenient for them in ordering. We have this year carefully revised all the descriptions, changing some of them after comparing with the flowers in the field, and we believe no more correct or complete list of desirable sorts can be found in any catalogue.

A NICE LAWN is easily obtained by sowing our Central Park or Evergreen lawn grass seed. It is vastly cheaper than sodding, and you are not bothered with weeds, which are in the sod. See price in grass seed department.

All flower seeds are sent free by mail on receipt of price.

Grandmother's Collection.

(Col. No. 7.)

Consists of 10 packets of the old-fashioned favorite flowers, our selection of varieties.

Many of these are now beginning to come into favor again and will please young and old.

Gem Collection.

(Col. No. 8.)

Consists of 10 packets of the latest flower novelties. Our selection, but very desirable and everybody will want them grand collection and you will be pleasantly surprised at the result. Price 50c.

Children's Collection.

(Col. No. 9.)

Of course the children will want a garden and we desire to encourage them and so offer 6 packets of easily grown flower seeds blooming the first year, our selection of sorts for only 15c.

These collections are put up ready for mailing and cannot be changed or divided. We will furnish all three collections for 85c. They do not duplicate with each other.

ABRONIA.

Trailing habit similar to verbenas, bearing clusters of sweet-scented flowers. Effective for bedding in masses, and very de-sirable for rock work or hanging baskets. In beds sometimes one plant covers a yard square and is full of bloom. Best colors mixed. Pkt. 3c.

ABUTILON.

A handsome greenhouse plant. Fine mixed. Pkt. 25c.

ADLUMIA.
(Mountain Fringe). A beautiful hardy perennial vine, with fernlike follage of a pale green color, with pretty flesh-colored blossoms. It is also called Alleghany Vine. Pkt. 10c

ACROCLINIUM.

Elegant summer flowering annuals, forming plants about one foot high, bearing quantities of large double flowers of white, rose, etc., I to 2 inches across. Splendid everlastings for winter bouquets. Mixed colors. Pkt. 3c.

AGERATUM.

MEXICANUM.—Very desirable for bouquets: produces a great many blue flowers, and blooms a long time: largely use l by florists; start seed early. Pkt. 4c.

ALBIFLORUM.—Like above, only white. Pkt. 5c.

ADONIS.

ESTIVALIS.—Brilliant scarlet.
Blossoms throughout the season.
Foliage is graceful and feathery.
Height one foot. Pkt. 3c.

AGROSTEMMA.

A very hardy plant introduced from Russia, suitable for border plants

COELI ROSA. - Perfectly hardy plants, producing pretty, pink-like blossoms on long slender stems, Very useful for cutting for bouquets, and pretty in masses in beds. Also known as Rose of Heaven. About 1½ feet hig. Deep rose color. Pkt 38 rose color. Pkt. 3c.

ALBA.—White; fine for cemery. Pkt. 5c.

and free comments. The shape of this new variety differs from all others, resembling closely the large-flowered Japanese chrysanthemums. The flowers are from 3½ to 4½ inches in diameter, perfectly double, many handsome colors mixed. Per pkt. 10c.

HARLEQUIN.—A new dwarf pyramidal strain of great beauty, with oddly spotted and striped very double flowers of red and blue, the same plant often having a great variety of flowers on it. Every one will be pleased with it, and it will always attract great attention. Per pkt 10c.

valuata.—This is a magnificent sort, 20 inches high, vigorous in growth, pyramidal in habit, very free blooming; flowers double to center; very large. Adapted for either garden or window culture. Very brilliant colors, mixed. Pkt. 10c.

DWARF GERMAN.-Mixed colors. Pkt. 10c.

PYRAMIDAL BOUQUET.—Very fine, mixed colors; each plant forms a bouquet. Pkt. 10c.

HEDGE HOG, OR NEEDLE.—Very peculiar, long quilled petals, handsome and sure to attract attention. Pkt 10c.

NEW WASHINGTON.—The largest aster in cultivation, flowers often measuring four or five inches across: perfectly double, fine form, and of many exquisite colors. Plant is pyramidal and very free blooming; mixed colors. Pkt 102.

ROYAL MIXsorts; none 2d grade. Pkt. 10c.

ONE PACKET ..EACH..

OF THE

7 GRAND SORTS NAMED ABOVE FOR

50 Cts.

ED.—A very choice selection of all the best sorts; none 2d

The numerous forms of the aster, and the now great variety of rich colors of its perfectly double flowers make it a leading favorite. For a late summer and fall display it has no equal. Give the aster a deep, rich soil, with plenty of mulching, and it will surprise even its friends with its profusion of richly-colored perfect flowers. Plant early as

with its profusion of richly-colored periect nowers. Frank early appossible.

NEW DIAMOND.—(See cut, No. 1.) The flowers are extremely beautiful, 2 to 2½ inches a cross, and the plants grow 18 to 23 inches high. All the stems and branches are terminated by perfect flowers, the entire plant appearing a mass of bloom. The colors range from pure white to blackish purple, and dark, rich crimson. Pkt. 15c.

NEW TRIUMPH.—(No. 2.) The most beautiful and most perfect of all dwarf asters. Each plant forms an elegant bouquet of itself. The individual flowers measure from 2½ to 3 inches across. All petals beautifully in-curved; color is peculiarly rich and brilliant. When beginning to bloom it is a pure scarlet, but when in full bloom it changes to a magnificent satiny deep scarlet. Pkt. 10c.

SNOWBALL.—(No. 3.) A beautiful and distinct variety, originating

8NOWBALL.—(No.3.) A beautiful and distinct variety originating from the "Mignon," introduced some years ago. The flowers are semi-spherical, as shown in our engraving; of refined and faultless form: pure white, beautifully imbricated and very freely produced, as many as 39 flowers being frequently borne on a single plant. The cut blooms will remain longer in good condition than most other varieties. We dapted for pot culture. This is a valuable acquisition to the aster family, being a novelty of decided merit. Pkt. 15c

PERFECTION.—(No. 4.) Truffant's Improved Pæony Flowered. A favorite class; thrifty, upright growers; flowers large (4 inches across) and almost perfectly round, with incurved petals; height 18 inches to 2 feet. Our mixture contains many exquisite colors. Pkt 5c.

CROWN.—(No 5.) The center of each flower is white, surrounded by a broad margin of color, such as crimson, rose, violet, etc.; flowers large and freely produced. Height 18 inches to 2 feet. Mixed colors. Pkt 10c.

ALYSSUM.

SWEET.—Has pretty little white flowers, useful for making up in all kinds of small bouquets. Its fragrance while sufficiently pronounced, is very delicate. Makes a pretty border and is one of the best plants for a basket or pot Pkt 3c

LITTLE GEM.—The plants are very dwarf and remarkably uniform in growth; grows only 3 or 4 inches bigh, and each plant spreads so as to completely cover a circular space 12 to 20 inches in diameter. The plants begin to flower while quite young and soon become one mass of white, remaining in full bloom from spring to fall Deliciously fragrant. More than four hundred clusters of flowers in full bloom have been counted on a single plant Pkt 5c.

LITTLE GEM SWEET ALYSSUM.

AMARANTHUS.

Prized for variety of handsome foliage. whether grown in conservatory or garden. The colors will be more brilliant if planted in moderately rich soil. Should not be planted in the north before May.

TRICOLOR.—Leaves yellow, red and green; well known as "Joseph's Coat." Very showy in beds alone. Hardyannual; two feet high. Pkt. 3c.

STANLEY.—One of the finest of this showy class of annuals, which produces numerous stalks covered with long, thick panicles of crimson flowers. It commences to bloom shortly after sowing and continues until late in the fall. Height 15 inches.

CAUDATUS.—(Love Lies Bleeding.) Produces long, drooping chains of brilliant colored flowers.. Pkt. 3c.

CRUENTUS .- (Prince's Feather.) Pkt. 3c.

AMARANTHUS SALICIFOLIUS.—(Fountain Plant.) Handsome form, beautiful fol-lage; very desirable for centers of beds, borders or pot culture. Pkt 7c. MIXED VARIETIES .- Pkt. 5c.

AMPELOPSIS.

VEITCHII.—(Boston Ivy.) A good wall plant, clinging to the smoothest surface. Perennial and perfectly hardy. Pkt. 10c.

AMOBIUM.

ALATUM GRANDIFLORUM.—Very hardy, everlasting, with pretty, double, white flowers. Useful for touquets. Pkt. 4c.

ANAGALLIS.

Low growing plants with remarkably bright, handsome flowers; mixed varieties. Pkt. 10c.

ANTIRRHINUM. (Snapdragon.)

One of the most beautiful and useful bor-One of the most beautiful and useful border plants, blooming profusely the first season from seed, until after frost. The roots may be carried through the winter with protection, and well repay for the trouble by the abundance of bloom through the entire summer. Our mixtures contain all the new and choice colors, including the beautifully striped, variegated and margined gined.
TALL VARIETIES MIXED.—Pkt. 5c.

ANTIRRHINUM. TOM THUMB.—A collection of the most beautiful, very dwarf varieties; mixed colors. Pkt. 7c.

AOUILEGIA. (Columbine.)

Too much praise cannot be given to these elegant, free-flowering, and deservedly popular hardy plants, blooming profusely through the spring into early summer. Hardy perennial.

MIXED VARIETIES.—Pkt. 5c.
WHITE.—Blooms on Decoration Day.
Very desirable for cemetery. Per pkt. 10c.

ARABIS.

ALPINA.—Among the earliest blooming plants, and very useful for rock work edgings, carpet bedding, etc. Flower pure white. Plant 9 inches high and a hardy perennial. Pkt. 10c.

ARGEMONE. (Prickly Poppy.)

Free blooming; flowers somewhat resemble the poppy. The foliage is large, pretty in form, and of a pleasant light green color. Mixed colors. Pkt. 3c.

CAMELIA-FLOWERED BALSAM,

ARABIS

ASPERULA.

AZUREA SETOSA. -A hardy, dwarf growing, little annual producing an abund-ance of small, light blue, sweet-scented flowers. Fine for bouquets. Pkt. 5c.

BALSAM.

Of the most beauti-Of the most beauti-ful of our annuals, and under the old names. Lady Slipper and Touch-Me-Not, has always been pop-ular, but by the care and attention given it in the lest few years. in the last few years, it has been greatly improved. The flowers are most brillianters are most of manifest or ly colored, very large and double as the rose; very striking in their rich coloring, ranging from pure much darker. Pkt. 5c.

white to rich dark crimson.

CAMELIA-FLOWERED, MIXED.—Very double, resembling the camelia in form, of unusual size, perfect shape, and our mixture contains all the best colors. You will a be greatly pleased with it. Pkt. 10c.

MAIDEN'S BLUSH.—A new variety of double balsam, which is of a very delicate and handsome blush color. Pkt. 3c.

DOUBLE WHITE.—Very desirable, and largely used by florists. Pkt. 8c.

PEERLESS MIXED.—This acme of perfection is made up from the best foreign and American strains, and their beauty is truly marvelous; flowers double as a camelia and of all known colors, and plants are loaded with hundreds of flowers. Pkt. 10c.

ALL VARIETIES MIXED .- Pkt. 5c.

BEGONIA.

SINGLE TUBEROUS-ROOTED. — Finest new single varieties mixed; flowers very large. Pkt. 15c.

DOUBLE MIXED TUBEROUS-ROOTED.

VERNON.—Comes absolutely true from seed. The plants grow rapidly and thrive amazingly under our hot summer sun. Per pkt. 15c.

REX.—Ornamental leaved varieties. Extra fine mixed. Pkt. 15c.

MIXED VARIETIES.—Many excellent flowering varieties. Pkt. 15c.

FOLIAGE BEETS.

One of the most effective foliage plants in existence, its leaves producing a wealth of tropical beauty. Its metalic, lustrous and glistening leaves equal any of the most expensive exotics and conservatory plants. Mixed colors. Pkt. 5c.

BRACHYCOME.

Also called "Swan River Daisy." Very pretty low growing plants, fine for bonders, rustic work or pot culture, covered during summer with a profusion of cineraria-like flowers. Half-hardy annual. Mixed blue and white. Pkt. 5c.

BROWALLIA.

ELATA.—Produces very delicate and handsome flowers in great abundance. Mixed. Pkt. 10c.

BALOON VINE.

A very pretty and rapid growing climber, succeeding best in a warm situation. It produces a very curious inflated capsule from which it derives its name, Pkt. 5c.

BRYONOPSIS.

A pretty climber, with ivy-like foliage and beautifully marked green fruit, which changes to bright scarlet marbled white. Half hardy annual. 15 feet. Pkt. 5c.

CALLIOPSIS.

Many of our most showy flowers are slighted because they are common and grow anywhere without trouble or care, almost like weeds. One of these is the calliopsis. Were it a new thing just introduced, it would be considered a novelty of rare overleans. excellence.

BRYONOPSIS MIXED COLORS.—Produces flowers in nearly every shade of yellow, orange, crimson, red and brown. Pkt. 5c.

GOLDEN WAVE.— Plant very bushy and compact, reaching 2 feet in height, and covered from July to October with hundreds of beautiwith hundreds of beauti-ful golden blossoms, two inches in diameter, with small dark centers. It is indeed a wave of gold. Pkt.8c.

CALENDULA.

Belongs to the well known marigold family.

OFFICINALIS LE PROUST.—Very double, nankeen colored. Fine Pkt. 5c.

METEOR.—A new variety; very fine for pot culture, bearing large light yellow flowers, striped with bright orange. Pkt. 5c.

GOLDEN WAVE CALLIOPSIS.

ORIOLE CALENDULA.

ORIOLE.—The extra large double flowers are indescribably rich and glowing in tone, of an intensely bright golden yellow, wonderfully free flowering. Pkt. 10c.

FINE MIXED.-Pkt. 3c.

CAMPANULA.

SPECULUM.— (Venus' Looking Glass.) Handsome for masses; hardy, free bloomers. Double mixed. Pkt. 5c.

CUP AND SAUCER.—A beautiful variety. The bell is nearly four inches in diameter, presenting the form of a saucer, hence its name. The plant is of strong growth, quite as hardy and floriferons.

as narry and floriferous as the old blue variety, and is very elegant and handsome when in flower

the blossoms literally hiding the plant. Perennial. Pkt. 10c. MACROSTYLA.—A very curious shaped, handsome large violet flower; remarkably fine. Pkt. 10c.

CANDYTUFT.

Universally known and cultivated and considered indispensible for cutting. All the varieties look best in beds or masses; hardy, easy to cultivate, and bloom profusely. Hardy annuals, I foot high.

SNOW QUEEN.—A new variety from southern Europe, grows rapidly, blooms speculum Campanula. early and remaining in full flower for about three months. The Snow Queen grows very regularly—each plant being almost an exact counterpart of every other. Valuable for ribbon beds or borders. Pkt. 8c.

CORONARIA. (Tom Thumb). Dwarf. Pkt. DUNNET'S CRIM-SON.—A Splendid bright crimson. Pkt.

BEST MIXED. — A mixture of all varieties. Pkt. 3c, oz. 40c.

CALEMPELIS.

scabra.—A hand-some vine producing bright orange flowers in great abundance. Pkt. 5c.

CACTUS. FINE MIXED VA-RIETIES.-Pkt. 15c.

CANARY BIRD FLOWER.

One of the most beautiful of climbers, with delicate, finely cut foliage and curious bright yellow flowers resembling the canary bird in shape and color. Pkt. 10c

CANNA.

Fine foliage plants of a highly decorative character; their handsome leaves combined with their varied and richly colored flowers have an extremely fine effect. They are easily raised from seeds which should be soaked in hot water for several hours.

MIXED VARIETIES.—Pkt. 5c, oz. 10c.
CROZY'S
MIXED.—Very
large flowering
snow QUEEN CANDYTUFT.
mixed. Pkt. 10c.

CANTERBURY BELLS.

One of the best known and most popular iennials Produces an abundance of richbiennials ly colored bloom.

SINGLE MIXED COLORS.—Pkt. 5c. DOUBLE MIXED COLORS.—Pkt. 5c.

CELOSIA. (Cockscomb.)

One of the most beautiful flowers that can be grown in the open ground. Produce large, ornamental comb-like heads. For summer beds we know of nothing that will produce as showy and brilliant effects. Can be preserved for winter bouquets by cutting off the heads before they are ripe, and drains in the bayes. CANARY BIRD FLOWER. and drying in the house.

CANTERBURY BELLS

GLASGOW PRIZE.—A very fine semi-dwarf var-iety, with large, brilliant crimson comb and very handsome dark foliage. Specimens grown on our place for seed measured 10 to 12 inches in diameter. Start seeds early. Pkt. 10c.

JAPONICA.—A very bright crimson variety, large and finely cut.

PYRAMIDALIS PLU-MOSA.—A very handsome feathered sort. The en-tire plant is of perfect pyramidal form if given room for development. Flowers are of all shades of scarlet, crimson, yellow and pink. The stalks and leaves are also beautifully veined. Pkt. 7c.

ALL VARIETIES

MIXED.—Pkt. 5c.

CENTROSEMA.

GRANDIFLORA.—Absolutely new to cultivation but one of the very best in actual merit. It is a hardy perennial vine of rare and exquisite beauty, which blooms early in June from seed sown in April, and bears in the greatest profusion inverted pea-shaped flowers from 1½ to 2½ inches in diameter, and ranging in color from a rosy violet to a reddish purple, with a broad feathered white marking through the center. It will bloom until frost, and if potted will flower freely in the house. One of the most attractive features is the way in which the flowers look up at you in the face. Every imaginative person sees faces in the Pansy, and this is even more suggestive in Centrosema. Therefore "Look at Me," is not a bad name for it. Pkt. 15c. 15c.

CACALIA.

PYRAMIDALIS PLUMOSA. COCCINEA.—A handsome free flowering little plant owing to the peculiar form of the flower, it is sometimes called Tassel Flower or Flora's Paint Brush. Scarlet. Pkt. 5c.

HYBRIDA.—Very handsome greenhouse plants; fine mixed. Pkt. 20c.

MARITIMA. - Silver-leaved.

CATCHFLY.

A very pretty and showy little plant, Mixed colors. Pkt.

CLEOME.

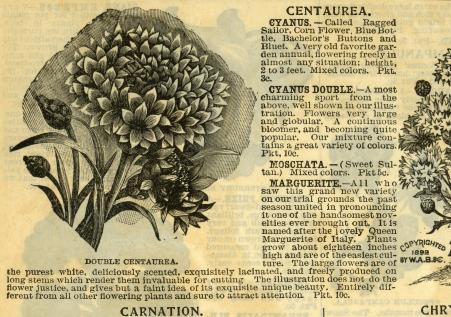

PUNGENS.—(The Giant Spider Plant.) Growing vigorously four or five feet high, flower. bloomer and of a bright rose color. It is also one of the very best honey producing plants.

CLIANTHUS.

DAMPEIRI.—A beautiful shrubbery climber, grown mostly under glass, but does well out of doors in summer time. Flowers brilliant scarlet, growing in clusters. Pkt.

GRANDIFLORA CENTROSEMA.

CENTAUREA.

CYANUS. — Called Ragged Sailor, Corn Flower, Blue Bottle, Bachelor's Buttons and Bluet. A very old favorite garden annual, flowering freely in almost any situation; height, 2 to 3 feet. Mixed colors. Pkt.

CYANUS DOUBLE.—A most charming sport from the above, well shown in our illusabove, well shown in our illustration. Flowers very large and globular. A continuous bloomer, and becoming quite popular. Our mixture contains a great variety of colors. Pkt, 10c.

MOSCHATA. - (Sweet Sultan.) Mixed colors. Pkt 5c.

MARGUERITE CENTAUREA.

CARNATION.

The finest of the dianthus or pink family; very fragrant Our seed is unsurpassed.

MARGUERITE.—A decided novelty. The plants are of healthy and vigorous growth, and the flowers are produced in the greatest profusion. They run through quite a variety of colors, white, scarlet, carmine, rose, striped, purple, violet, salmon, etc. Seed sown under glass in March and transplanted to the open ground in May will commence flowering in August and will give an endless supply of their beautiful blossoms for a long time. The flowers are exceedingly brilliant in color, and the calyx does not burst. About 80 per cent of the plants will come full double. Pkt. 10c.

DOUBLE EXTRA MIXED,-Pkt. 15c. SELFS MIXED.—The one color sorts Pkt 10c.

PERPETUAL, OR TREE.-Pkt. 25c.

COLEUS.

One of the most popular foliage plants. It is very decorative in the flower border, and easily grown from seed, which frequently produces new and distinct varieties. Half hardy perennial. Pkt. 15c.

COCKSCOMB. (See Celosia.)

COBOEA SCANDENS.

One of the most magnificent climbers, prized for its rapid growth (often twenty to thirty feet) and an abundance of beautiful blue flowers. The seed should be planted edgewise in moist earth—a pot or box is best—and water sparingly till plants are two or three inches high. Pkt. 10c.

CHRYSANTHEMUM.

One of the prettiest annuals grown. The colors have the appearance of being laid on with a brush, and for this reason they are frequently called "painted daisies." and are indeed charming. Sow seed early in open ground and and they will bloom profusely all summer.

open ground and and they will bloom profusely at summer.

NEW DOUBLE ANNUAL.—A valuable and most unique novelty. They are extremely variable and it is impossible to describe the beautiful forms which have been produced, as conveyed by our engraving. A great variety of colors, markings and pencilings. Although mostly very double, there will be an occasional semi-double, or even single, but these are almost equally charming.

Pkt. 10c.

INDICUM POMPON.—Double mixed. This is the most popular greenhouse variety. Very showy and desirable for fall and early winter blooming. Plants potted in the fall make a continuous bouquet for many weeks. Pkt. 10c.

MIXED VARIETIES.—Includes all the est. Pkt. 5c.

A very desirable hardy annual for bedding purposes; growing freely and bloom-ing profusely in any common garden soil. Fine mixed. Double and single. Pkt 3c.

COSMOS.

CLARKIA.

A magnificent race of plants growing about 4 feet high, and in fall literally covered with graceful flowers resembling single dahlias, but better for cutting. About 2 inches in diameter; rose, purple, flesh color, and pure white. As a cut flower for vases or personal wear, its grace and beauty is unequaled. Easily raised from seed; if sown early, blooms the first season. All colors mixed. Pkt. 10c.

MARGUERITE CARNATIONS

CUPHEA.

PLATYCENTRA.—(Cigar Plant.) Greenhouse plant, also makes a handsome border. Flowers of bright searlet, tipped with black and white. Pkt. 15c.

PURPUREA.—Fine mixed. Pkt. 5c.

DOLICHOS.

LABLAB.—(Hyacinth Bean)—An excellent climber for fences and exposed places; mixed. Pkt. 5c.

DELPHINUM.

CHINENSIS.—(Perennial Larkspur). Well known and very desirable border plants, producing their flowers on long spikes. It is one of the best pernnials grown. Will bloom first year if sown early out of doors. Eight beautiful colors mixed Pkt.

DIGITALIS.

Fox Glove. Showy for back grounds and borders, and are beautiful when planted among shrubs. They thrive in any ordinary garden soil. Fine mixed colors, Pkt. 3c.

The Ladies Say.

We have used your seed several years and find no others equal to them. Your seed has come to stay.

MARY BOYER, Walton, Ky.

Seeds received in good shape. Thanks for extras, JENNIE MILLER, Atchison, Kan.

NEW DOUBLE ANNUAL CHRYSANTHEMUM.

Brilliant Collection OF FLORAL NOVELTIES FOR 1806.

One Packet each of these Six Novelties, amounting to 75 cents, for only 35 cents.

Giant Flowered Morning Glories.

With the many new flowers which have been brought out during the past few years and the cons ant search by seedsmen for novelties, it is really strange that this old fave "te has so long been neglected. A specialist has, however, been at work a carefully improve it, and now we offer this mixture of choice, new, large flowering varieties. This includes the renowned "Heavenly Blue," a charming steel blue without any shadings whatever, the striped, blotched and marbled varieties with ground of white, blue of all shades, crimson, rose, blood red, violet, etc. It also contains a small percentage of the new yellow flowering and the "Imperial Japanese."

The plants are of vigorous, rapid growth, attaining a height of twenty to thirty feet and quickly forming a dense screen for porches, arbors, etc. Everyone should try them. Per pkt. 10c, 3 for 25c, ½ oz, 40c.

International Mixed Pansies.

In almost every country in the world there are pansy specialists, notably those of Scotland, Belgium, France, Germany and Switzerland. Each have their idea of perfection. This mixture consists of a grand assortment from the world's leading growers, and we have gone to great pains to secure them for our customers. Here will be found the beautiful German pansies, with their rich, soft, velvety colors; the lovely striped and mottled pansies from Belgium, which contrast so strongly with all others; the face pansies of Engiand, in which one can almost see the human face, because of their peculiar spottings; the self colors of Switzerland, which are attractive because of their pure coloring; the fancy show pansies of Scotland, of bright contrasting colors and rare spotting, flakeling, feathering and edging; the mammoth pansies of France, which have been grown to the enormous size of four inches in diameter, and are decidedly showy; and also the many choice American strains, which are mainly made up by selecting and crossing the foreign sorts. If you like pansies you must have the International Mixture. Per pitt. 25c, 3 pkts. for 50c, 7 for \$1.00.

Perfected Mixed Sweet Peas.

Each year Sweet Peas are becoming more popular, and there is good reason to believe that it is the coming flower of the future. The improvements made during the past few years are greater than in any other flower in the entire list, until we have them now to about as near perfection as they can well be brought. We have therefore named this superb strain the Perfected Mixed, and we are sure our customers will be more than pleased with them. They are of the most graceful form, charming color. exquisite fragrance and simple loveliness. The mixture contains all the most choice new varieties, as well as some of the best of the old favorites. One secret in successful Sweet Pea culture is to plant early and deep, not less than four inches. Don't fail to try them this year. Per pkt. 5c, oz. 10c, ½ 1b, 25c, 1b. 85c.

GOLDEN GLOW COCKSCOMB.

American Banner Larkspur.

GIANT FLOWERED MORNING GLORY.

Our colored illustration does not do justice to this, the handsomest flower in the entire catalogue, and in fact it is impossible for art to portray it in any satisfactory manner. The accompanying illustration presents a single stem, showing how loaded the plants are with flowers. The name American Banner, was given it because it is the only flower we know of which combines the national colors, red, white and blue, in each flower. Plants grow to a height of about two feet, of good, regular shape, with delicate, fern-like foliage, a vigorous grower, and is not injured by dry weather. The plants are fairly loaded with long spikes of double striped and blotched flowers, having the various shades of pink, carmine, dark blue, purple and white, delicately and beautifully blended, sometimes four or five shades on a single floret. The flowers are produced in the greatest profusion, making it one of the finest annuals in cultivation. The flowers can be dried by hanging them with the head everlasting. It is really the most extraordinary novelty ever offered to the flower lovers of the country. Per pkt. 10c, 3 pkts for 25c.

Golden Glow Cockscomb.

Thousands of persons last summer visited the place where we have our flower seeds and bulbs grown and many were attracted to this charming novelty which was all aglow with its golden beauty. Plants are about eighteen inches high and produce handsome flowers six to ten inches in diameter and of a most bright, rich golden yellow color, different and more velvety than the yellow in any other flower that we know of. Sometimes the plant has only one large flower, and sometimes quite a number of smaller ones. Every flower lover should try it. Per pkt. 10c.

Kainbow Coleus.

Many flower lovers are in the habit of devoting their entire space in the flower garden to plants which produce flowers, entirely neglecting the fancy foliage plants which are such an attraction in the parks of all large cities. To induce more of our customers to try this elegant class of plants we have had our lithographer truly portray a specimen leaf in its natural colors on the accompanying colored plate. This is a greatly improved variety with wonderfully large leaves, which are curled, serrated, fringed and laciniated in a most beautiful manner. There is an almost endless variety of colors and shades which are variegated and marbled in a regally rich and brilliant manner. Some of the leaves are 8 to 12 inches long by nearly as broad. We are sure our customers will be greatly pleased with them. They produce very little seed and therefore the seed will always be expensive, but our packets contain a liberal amount and after the plants are started they are easily propagated by cuttings. Per pkt. 15c, 4 pkts. for 15c.

STRIPED CONVOLVILUS.

and rose. Pkt. 5c.

CONVOLVULUS.

Popularly known as Morning

IMPROVED CLIMBING,—(Major)
—Everybody knows the common morning glory, but many of the choice new varieties contained in this mixture are indeed rare. It will be found to include the marbled and striped sorts, varieties with marbled and laciniated foliage, the marbled and laciniated foliage, the ivy-leaved kinds—in short—the largest variety of morning glories ever offered in one package. Flowers of large size, and plants climb to a height of twenty to forty feet in one season from seed, producing thousands of flowers. Pkt. 7c, oz. 30c.

MAJOR STRIPED.-Large, handsome flowers of great beauty. On a white ground they are variously striped and blotched with red, blue

BLACK.—A new color, and surely none could be so odd and unique as black, the rarest color among flowers. It does not differ from the ordinary morning glory in any other respect. The flowers are of large size and freely produced. Pkt. 10c.

MAJOR MIXED.—Ordinary mixture. Pkt. 2c, oz. 10c.

mixture. Pkt. 2c, oz. 10c.

MINOR.—(Dwarf Morning Glory)—These beautiful bush morning glories grow only about one foot high; the flowers are freely borne, and, if pleasant, remain open all day. The plant spreads with much regularity in all directions, and a bed of them is a beautiful object throughout the summer. Mixed colors. Pkt. 5c.

CYPRESS VINE.

A beautiful rapid climber, with delicate, dark green feathery foliage, and an abundance of bright, star-shaped scarlet and white blossoms, which in the bright sun-shine present a mass of beauty.

NEW IVY-LEAVED.—Entirely distinct from all other varieties, distinct from all other varieties. The

CYPRESS VINE,

ivy-like leaves make a dense screen from which the pretty fiery orange-scarlet flowers stand out in countless numbers. It is quick growing and sure to please all who try it. Pkt. 10c.

SCARLET.-Very bright. Pkt.

WHITE.—Pretty in contrast with scarlet. Pkt. 5c.

MIXED COLORS. -Pkt. 5c.

CYCLAMEN.

PERSICUM.—One of the hand somest of greenhouse plants.

Foliage is handsomely marked and the flowers beautiful. Seed about the court under glass in should be sown under glass in well rotted compost and sand. Tuberous rooted, blooming sec-ond year. Best strain. Mixed colors. Pkt. | 5c.

DAISY.

Popular perennials, blooming the first year from seed; very handsome for borders or pots; best double mixed. Pkt. 8c.

NEW GIANT SNOWBALL.

A most charming variety of this handsome little flower. It has

handsoms little flor unusually large, double flowers on very long stems, making it very valuable for cut-ting. Color, a pure snow white. Don't fall to give this little beauty a fair trial, and it will be sure to please you. Pkt. 15c.

DIAMOND FLOWER.

A very pretty little plant cover-ed with numerous small shining flowers. Pkt. 10c.

GIANT SNOWBALL DAISY.

DATURA.

A large, strong growing plant, with trumpet-shaped flowers, and bearing blooms of large size.

CORNUCOPIA.—A magnificent novelty of striking beauty. The plant is of robust habit, about three feet high. The stems, of dark purplish marcon, shine as if varnished. The flowers average eight inches long by five inches across the mouth, are formed five inches across the mouth, are formed of two to three flowers growing one within the other, the interiors being glistening French white, contrasting beautifully with the mottled royal purple exteriors. The flowers are delightfully fragrant. Seeds started early in the house will produce plants that will flower from early summer until frost. Often from 200 to 300 flowers are borne in assesson. For specimens in the garden, this novelty is extremely beautiful. Pkt 10c.

NIGHTINGALE,—A very profuse large flowering sort of pure satiny white, very handsome flowers four or five inches in diameter and 8 to 10 inches long. Pkt 10c.

DOUBLE VARIETIES MIXED,—Pkt. 5c.

DOUBLE VARIETIES MIXED.—Pkt. 50.

DIANTHUS.

The dianthus, or Chinese pink, has long been a great garden favorite. It is, in fact, one of our most useful plants, furnishing abundance of gay and pretty flowers until frozen in with the earth and covered by drifting snows. They live over winter and bloom as well the second year as the first. They are quite as pretty for pot plants in the house as carnations. Indeed, their variety of color is more varied and pretty, while they are freer bloomers. Plants from seed grow and bloom very quickly. We know we are doing our customers a kindness by urging them to plant the dianthus for both garden and pots.

MOUBLING DAYS

MOURNING PINK.—A magnificent new variety, with very double large flowers of a very dark mahogany, almost black, each petal edged with a clear cut margin of pure white. Pkt. 10c.

HEDDEWIGI.—Finest selected single mixed. One of the most showy of the pink family. Pkt. 5c.

HEDDEWICE

DOUBLE DIADEM PINK.—Superb large double flower. Hieroglyphically marked, like the original Chinese pinks, in the middle down to the base of each petal; magnificent in color and variety.

CHINENSIS.-(Double Chinese Pink)-Finest double mixed. Pkt. 3c. LACINIATUS.—Double fringed, best mixed. Pkt. 7c. IMPERIALIS.—Double imperial pink. Pkt. 5c. MIXED VARIETIES AND COLORS.—Pkt. 5c

BARBATUS.—(Sweet William)—An old favorite; hardy perennials; single mixed. Pkt. 50.

CROWN OF PERFECTION.—The latest introduction and the handsomest of all. Very large and handsome flowers. Pkt. 10c.

The dahlia is well known, but few are aware that if the seed is sown early in the spring they will bloom the first year. The seed which we have to offer is of the finest strain, and produces magnificent, very double flowers of large size and richest shades. Pkt. 10c.

SINGLE MIXED, -Pkt. 7c.

NEW TOM THUMB.—A radical departure in the way of dahlias and is really beautiful. The perfect little plants, only twelve to fifteen inches high, are of a bushy habit of growth, and they come into flower very early. Scarcely three months after sowing the seed the plants will be fully desowing the seed the plants will be fully to reloped and covered with showy, pretty flowers, which are produced in constant EUPHORBIA VARIEGATA. profusion and great variety the whole summer through. The range of color is something unusual; in many

of the flowers the ground is white, with regular zones of magenta, crimson, purple, etc., while in others the ground is yellow or light rose, with charming contrasting variegations. The effect is vivid and striking, yet the blooms may be classed as most refined in their ef-fect. See cut. Pkt. 10c.

EDELWEISS.

EUPHORBIA.

VARIEGATA.—(Snow on the Mountain)—A large, robust-growing, hardy annual, with very ornamental green foliage striped with white. Pkt. 5c.

oliage striped with white. Pkt. 5c.

HETEROPHYLLA.—This novelty is an annual of the easiest culture, forming bushy plants three to four feet high, gwith glossy green fiddle-shaped leaves, which form at the ends of the branches into large whorls or bracts, among which small green flowers appear in summer, and immediately after the leaves commence to color up. The smaller bracts among the flowers are brilliant orange scarlet.large surround-with darker.

ing leaves soon become blazed with darker, fiery scarlet, so that only a tip of green is left. As these colored bracts almost cover the plant, the effect is indescribably grand.

EDELWEISS.

The flowers are pure white star-shaped, and of a downy texture. This is the true edelweiss of the Alps. well known and so much prized by tourists in Switzerland. Pkt. 15c

ESCHSCHOLTZIA.

California poppies. Showy summer flower plants: large saucer-shaped flowers of striking brilliancy in the sunlight. They flower profusely throughout the season.

SINGLE,-Mixed colors. Pkt. 5c.

DOUBLE MIXED.—We believe the double form of this flower will prove very satisfac-tory to all flower lovers. Pkt. 10c.

FREESIA

REFRACTA ALBA.—Bears peculiar clusters of white flowers of the most delicious fraers of the most delicious fra-grance, which lasts a long time, even after being cut. Start seeds early, bulbs dry off in summer. Start them growing in the house in October and you will be pleased with them. Eas-ily grown. Pkt 10c.

FERNS.

GLOBE AMARANTH.

"Bachelor's Buttons," and the "amaranth" of the poets. They are annuals, forming bushy plants about two feet high, and bearing sometimes several hundred flowers of purple, white, striped, etc. Very ornamental as summerblooming plants, and for erlastings indispensible. Mixed colors. Pkt. 5c.

like satan.

GODETIA.

Handsome and showy annuals about one foot high, of dwarf, compact growth bearing freely large flowers three to four inches across, of exquisite colors and shades that glisten in the sunlight libs search

LADY SATIN ROSE,—The flowers, produced in remarkable abundance, are of a brilliant deep rose pink, the surface shining like satin Pkt. 8c.

MIXED VARIETIES,—All colors. Pkt. 5c.

HELIANTHUS. (Sunflower.)

Pkt. 5c.

GRASS PINKS.

The hardy and pretty clove-scented flowers which our grandmothers loved. Their fragrance is quickly noticed by any one passing by the yard where they are grown, before seeing the flowers. There has been quite a call for these among our customers, and for several years we have tried to obtain seed of this old garden favorite and have at last succeeded in obtaining a fine crop of seed. The flowers range from pure white to a dark pink, most of them, however, being a clear, delicate pink color. A hardy perennia' very desirable for borders. Per pkt. 5c.

GLOXINIA.

Greenhouse plants, producing richly colored and brilliant flowers. Finest strains of new hybrids; mixed. Pkt. 25c.

GOLDEN ROD.

Although considered an objectionau.e weed on our western prairies, there is no denying the beauty of this flower, and it has been adopted by New York as the state flower. Greatly admired everywhere; easily grown from seed. Pkt. 5c.

NEW JAPANESE VARIEGATED HUMULUS.

HUMULUS. (Hop.)

NEW JAPANESE VARIEGATED.—We recommend this extremely handsome and distinct climbing vine as very valuable for trellis and high places. Where an attractive, ornamental climber is desired, that will stand rough usage, we have nothing better. The leaves are strikingly variegated and marked; the first color is bright, deep green, distinctly marked and blotched with silvery white tinged with yellow; now and then a leaf will be almost snowy white, and another one not far away almost green. A superb, strong grower, twenty to thirty feet in a few weeks' time; not injured by heat or insects. Pkt. 10c,

HELIOTROPE.

A great favorite with all lovers of flowers for their beauty and fragrance; well suited for beds or borders, where they will bloom in summer, and may then be carefully potted and cut back for winter blooming. All should try raising these from the seed and obtain a nice variety. Pkt. 10c.

HOLLYHOCK.

DOUBLE PURE WHITE.—Large, clear, pure white flowers about three inches in diameter They are as handsome as camelias in cut flower work, and are highly valued by florists. Pkt. 10c.

HOLLYHOCK. HELICHRYSUM.

HIBISCUS.

This is probably the most valuable of all ever-lastings. Its large flowers are perfectly dou-ble and of the most brilliant colors. Cut the flowers when they first begin to expand and dry.with stems straight. MONSTROSUM.—Mixed colors. Pkt. 5c. A branching plant of the easiest culture, with rather pretty foliage, and large exceedingly showy blossoms. Hardy annual, 2ft. high. AFRICANUS.—Cream colored blossoms, purple in the center. Pkt. 3c. CRIMSON EYE.—A robust grower, with dark red stems and foliage. Flowers of immense size, often measuring 20 inches in circumference, pure white, with a large spot of deep velvety crimson in the center. Blooms first year from seed sown in open ground. Succeeds well anywhere. Pkt. 10c.

HELICHRYSUM.

CHATER'S SUPERB MIXED.— An unequaled mixture of seventeen prize varieties, including all colors and shades known. Pkt. 15c.

FINE MIXED.—Contains a good variety. Pkt. 5c.

PEERLESS MIXED.—A splendid as sortment of fifteen of the best varieties grown together on our grounds. Includes some which are both curious and desirable. Pkt. 5c.

GLOBOSUS FISTULOSUS.—Double, the best of the tall varieties. Pkt. 5c.

NANUS.—A true double dwarf, quite pretty. Pkt. 5c.

pretty. Pkt. 5c.

MAMMOTH RUSSIAN,—Largest of all

HYACINTHUS.

CANDICANS.—Throws up flower stalks three to four feet high with beautiful white, drooping flowers; fine for mixing in beds of gladiolus; blooms second year.

IPOMOEA.

A large class of plants to which belong many of our best and most popular climbers. They are very rapid and luxuriant growers, and especially adapted to warm, sunny situations in the garden, for covering porches, trellises etc.

white, moon-like flowers from five to six inches in diameter. It has a rich jessamine-like

LEARI.—The Blue Moon Flower. This distinct and charming novelty is valuable on account of being in beautiful and striking contrast with the true White Moon Flower described above; habit of growth and flowering the same. The color is exquisite, clear, satiny blue, with well-defined crimson bars; very distinct. We recommend planting the Blue Moon Flower with the White one, as the effect will be novel and attractive. Pkt. 102.

BONA NOX.— Large purplish flowers, blooming at night, often called Good Night or Evening Glory; a rapid grower and free bloomer. Pkt. 5c.

HEAVENLY BLUE.—A cross between Leari ipomæa and Mina lobata. The foliage is very large, heart-shaped, thick and light green; flowers four and a half to five inches across, in large, airy clusters, and of that indescribably heavenly blue so rarely seen in flowers. The throat is yellow inside, spreading softly into the blue. Pkt. 20c.

ICE PLANT.

A handsome and curious plant for hanging baskets, rock work and vases. The leaves and stems appear as though covered with ice crystals. The whole plant is peculiarly brilliant in the sunshine. The flower is white. Pkt. 5c.

IRIS.

SIBERICA.—Easily grown from seed. Pkt. 5c,

LANTANA.

Greenhouse perennial; makes a fine bedding or pot plant; easily grown from seed. Best mixed colors. Pkt. 15c.

MOONFLOWER

LARKSPUR.

An old and well known hardy annual. The flowers are borne in compact spikes and are showy and destrable for any situation. Sow early in open ground.

AMERICAN BANNER.—The handsomest flower in the entire catalogue. The name, American Banner, was given it because it is the only flower we know of which combines the national colors, red, white and blue, in each flower. Plants grow to a height of about two feet and are fairly loaded with long spikes of double striped and blotched flowers. Pkt 10c.

DWARF GERMAN ROCKET.—Mixed colors. Pkt. 5c.

TALL GERMAN ROCKET.—Mixed col-

ICE PLANT.

LATHYRUS.

LATIFOLIUS,—(Perennial Peas.) Handsome free-flowering plants, growing five to ten feet high, dying down to the ground every winter, and starting up again in the spring. Fine mixed. Pkt. 5c.

LOBELIA.

Handsome trailing plants, profuse bloomers; elegant for baskets, vases and borders. All sorts mixed. Pkt. 6c.

LUPINUS.

Commonly called Sun Dials. Flowers of very bright colors, produced in spikes. A fine plant for bedding. Mixed varieties. Pkt. 5c.

LYCHNIS.

HAAGEANA HY-BRIDA.—Very desira-ble hardy perennials, blooming the first year if sown early. Fine mixed, white, pink and scarlet. Pkt. 8c.

LINUM.

Flowering Flax. One

of the most showy annuals in cultivation for flower beds and masses; brilliant crimson scarlet flowers one inch across, borne in wonderful profusion. Height one foot. Pkt. 5c.

MATRICARIA.

CAPENSIS.—(Double Feverfew)—This may be called everybody's favorite. A splendid bedding plant and one of the best to pot for winter flowers; pure white. Pkt. 5c.

GOLDEN .- See Pyretherum.

EXIMA NANA FL. PL.—Small, compact, perfectly round plants about four inches high. Covered from July until winter with double white flowers, borne on long slender stems. Pkt. 7c.

MAURANDIA.

Delicate climbers for windows or conservatories, or for open ground in summer. Admirable to hang from vases, to coverstumps and low trellises, flowering freely; height 6 to 10 feet. Mixed colors. Pkt. 10c.

MIMULUS.

Monkey Flower. Very showy and free flowering. The hardy kinds are well suited for outdoor culture. Any common soil suits. Mixed varieties. Pkt. 10c.

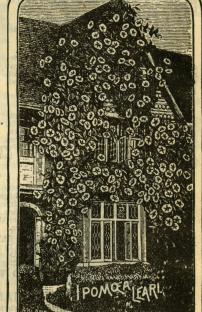

MOSCHATUS.—The well known musk plant, quite pretty and has a strong musk fragrance. Pkt. 10c.

LOBELIA.

ROCKET LARKSPUR.

FOUNTAIN PLANT.

This handsome pyramidal or fountain-shaped plant is a variety of amaranthus which deserves a place in every garden. It is easily grown by starting the seeds early in the house, or sowing them in the open ground in May. It droops most gracefully, and the leaves are brilliantly banded and tipped with orange, carmine, purple. crimson and gold, forming bright colored plumes. Height three to six feet. Pkt. 7c.

MIGNONETTE.

The delicious fragrance of the Mignonette makes it indispensable for bouquets and cutting. It is best to sow seed early in the garden, and they will commence blooming the first of June.

ELMWOOD GIANT.—A special selection of a famous grower, whose mignonette spikes have always excited the wonder and envy of his competitors. The plants are of a robust pyramidal habit; fine, healthy growers. They throw up very large spikes of a reddish-tinted, deliciously fragrant flowers. Unsurpassed for pot and bench culture. Pkt, 10c.

MILES' WHITE SPIRAL.—Grows two or three jet high, perfectly erect, spikes of bloom often measure twelve inches long. It is very showy in growth, and the grand spikes of bloom can be seen for a long distance, and attracts the attention of everybody.

Pkt. 5c.

MACHET.—An entirely new and distinct sort of great merit. It is of dwarf and vigorous growth, and throws up numerous stout flower stalks, terminated by massive spikes of deliciously scented red flowers Pkt.

GABRIELE.—A handsome new variety, the tallest of any. Strong, robust habit, bearing large spikes of red flowers. Very distinct. Pkt. 8c.

GOLDEN QUEEN,—A very distinct new variety, with bright golden flowers Pkt. 3c.

SWEET SCENTED.—The old favorite. Pkt. 2c, oz. 20c.

(Banana Palm.)

One of the grandest and most picturesque of the banana fam-

picturesque of the banana family. As a solitary plant or in groups on the lawn, it has a majestic tropical effect. The leaves are very long and broad, of a beautiful green with crimson midrib in striking contrast. An occasional application of liquid manure and frequent watering are necessary. The rapidity of its growth is astonishing. Packet of 5 seeds 20c.

Perennials. Bloom first year from seed. Pretty plants, with neat little star shaped flowers.

ALPESTRIS. - Mixed colors. Pkt. 5c. PALUSTRIS.—True forget-me-not, blue. Pkt. 10c,

VICTORIA.—A novelty, and the best variety for pot culture Dwarf, globular habit; beautiful sky-blue flowers with double center. Pkt. 10c.

NICOTIANA.

AFFINIS.—Of all the varieties of tobacco which are grown for their sweet
seented flowers this is the best. The plant
is literally covered with large, white, star
shaped flowers, which, after being cut, will remain perfect for a week.
A few plants will perfume the whole yard or garden. Pkt. 8c.

NIGELLA

(Love in Mist)

Hardyan nuals, ab about in height, finely cut leaves and hand-someflowers. Blooms early A very pretty flower, and one all our customers should try It is sure to please. The flowers are double and of al shades of blue, white

MILES' WHITE SPIRAL.

FOUNTAIN PLANT.

MARIGOLD.

These annuals are old favorites in our gardens, but have been greatly improved recently in size and doubleness of flowers. They are very effective for groups and masses.

AFRICAN.-Double mixed, largest. Pkt

DWARF FRENCH.—Double mixed, best

MARTYNIA.

Fine summer blooming garden plants, with gloxinia-like flowers of many handsome colors, followed by curiously horned fruits. Sometimes called Devil's Claws. When young these seed pods are very nice for pickling. Pkt, 5c.

MIRABILIS.

The Marvel of Peru, or Four-o'clock, is as easily grown as a weed, and yet is one of the most brilliant and showy of annuals. Planted in beds or masses, their compact growth, rich glossy leaves, together with their profusion and diversity of bloom, presents a gorgeous sight during the

NEW TOM THUMB MIXED.—Very handsome, compact, dwarf, bushy plants, with elegant, golden-variegated foliage; numerous brilliant flowers, pure yellow, deep red, and striped and blotched.

TOM THUMB MIRABILIS.

NICOTIANA.

COLLECTION

One packet each of the 8 named varieties for 35c

000000000

IMPERIAL NASTURTIUMS MIXED.

NASTURTIUMS.

These may well be classed among our most showy and handsome aunuals. They are of very easy culture, and make a continuous show of bloom. Excellent for corsage bouquets. The following are the best varieties, which all should try:

CLOTH OF GOLD.—Foliage is a clear bright yellow. The plant is of dwarf, compact habit, flowers scarlet. Pkt 7c, oz. 30c.

LADY BIRD.—Of dwarf. neat compact habit of growth. Flowers rich golden yellow, each petal barred with a bright vein of bright ruby crimson. Pkt. 7c, oz. 30c.

EMPRESS OF INDIA.—Of dwarf, bushy habit, the leaves of a dark, purplish blue color, making a suitable background for the brilliant crimson-scarlet flowers. Its profusion of bloom and dazzling richness of color are remarkable. Pkt. 5c, oz. 25c.

AURORA.—A magnificent variety of new color. The plant forms a perfect globe, and is literally covered with flowers, completely hiding the foliage when in full bloom. The flower is of deep chrome yellow, the two lower petals blotched with purplish carmine and marked with bright carmine veining. Pkt 5c, oz. 30c.

CHAMELEON.—The flowers of this new Tom Thumb nasturtium are in color crimson, bronze and gold, bordered and flamed, changing in hue almost daily, hence named "Chameleon." Pkt. 7c, oz, 35c

CRYSTAL PALACE GEM.— Dwarf; sulphur color, spotted with maroon; very handsome. Pkt. 5c, oz, 20c.

PEARL.—A most charming dwarf white varietyy. Pkt. 5c, oz. 30c.

KING THEODORE. — The darkest color known in nasturtiums — deep scarlet-maroon. Pkt. 5c, oz. 25c.

IMPERIAL MIXED-Includes about twenty of the dwarf var-ieties, selected from both American and foreign growers; this when planted in beds, produces a mass of colors. Pkt. 5c, oz. 25c.

DWARF VARIETIES MIX-ED.—Pkt. 3c, oz. 15c.

CLIMBING NASTURTIUMS.

KING OF THE BLACKS.—A very handsome climbing var-iety, with flowers of a very rich dark brown, almost black. Pkt, 5c, oz. 30c.

EMPRESS OF INDIA.

NAPOLEON III.—A beautiful climbing variety, with golden yellow flowers striped with rosy scarlet. Pkt. 5c, oz. 30c

GEANT DES BATAILLES.—A climber with brilliant flowers. Pkt.

TALL VARIETIES MIXED.—Pkt. 3c, oz 15c.

OENOTHERA. (Evening Primrose.)

An interesting half-hardy annual, opening its flowers toward evening with a snap that is sure to attract attention, especially of the children. Mixed colors. Pkt. 8c.

OXALIS.

Handsome basket plant, summer or winter; fine for rockeries. Pkt.

Notice the Gem Bulb Collection on page 87.

PETUNIAS.

Surely there is no garden complete without a bed of elegant petunias. They commence flowering early, and continue a mass of bloom throughout the whole season until killed by frost: easily cultivated, requiring rich soil and a sunny situation. Of late years the single striped, mottled and double varieties have been greatly improved, and the above cut gives but a faint idea of their great variety and beauty. The double varieties require more care and should be storted in the house. started in the house.

GRANDIFLORA MIXED.—Very large, elegant flowers; a great improvement and fully twice the size of the old sorts, with the most beautiful shades of crimson, white, rose, marcon. etc., blotched, striped, veined, bordered, marked and fringed. Pkt. 15c.

DOUBLE INIMITABLE.—A splendid mixture. Our seed is Benary's best, and will produce a large percentage of fine double-flowering plants. Pkt. 25c.

SINGLE FRINGED.—A choice mixture of the handsome fringed sorts. Pkt. 15c.

NANA COMPACTA MULTIFLORA.—
Forms dense little bushes five to eight inches high, studded with regularly striped flowers. Very effective, either in masses or in pots. Pkt. 10c.

GIANT FANCY FLOWERING. — A grand new strain and the most beautiful of all. Flowers of immense size and of a great variety of markings and venings of the most charming colors. If you like beautiful petunias, don't fall to include this in your order. Pkt. 20c.

FINE MIXED.—The best of the older sorts, carefully mixed. Contains some extra fine striped and blotched varieties.

PERILLA

PERILLA.

NANKINENSIS.—Has a broad, serrated leaf, of purplish mulberry color, and eighteen inches or more in height. Very desirable for the center of a bed of ornamental-leaved plants, and also for a low screen or hedge. Pkt. 8c.

PORTULACA.

GRANDIFLORA SINGLE MIXED.—This old favorite is brightest in the hot, dry weather when other flowers are drooping. They are of almost every conceivable shade of color, and will make one of the brightest spots in the garden.

Large flowered. A splendid mixture. Pkt 4c.

DOUBLE MIXED.—Very handsome, double as a rose, and contains a color and shading nuknown in the single. Our

ing unknown in the single. Our ning unknown in the single, our seed is extra choice and will produce sixty to seventy-five per cent of flowers as double as the most perfect rose. Pkt. 10c

DOUBLE PORTULACA.

PRIMULA.

SINENSIS.—(Chinese Primrose.) — Well known and popular winter Splendid mixed colors. Pkt. 25c. bloomers.

BEST DOUBLE MIXED.—Pkt. 50e. FIMBRIATA MIXED,—Fringed. Pkt.

ELATIOR. - (Polyanthus) - Pkt. 10c.

PANSIES.

These little beauties need no extended description, as it would be hard to find even a child in the land whose heart has not been gladdened by their bright faces. Pansies like by their bright faces. Pansies like a moist, rather shady location and rich soil. Should be watered freely in dry weather. Seed started in February or March will produce early spring flowers. The largest flowers are always produced on plants which come into bloom in the autumn. Pansies are a specialty with us, and we use the greatest care in growing, selecting and importing the best strains of these universal favorites. All should try our new varieties.

THE PEACOGE This fine page

THE PEACOCK.—This fine new variety has been named the Peacock because the upper petals of the flower most nearly resemble, in color, the peculiar shade seen only in the feather of the peacock, a beautiful ultra-marine blue. The petals are edged with a thin white line, within which it is a purplish crimson, passing into a rich central blotch of deep blue, shading to black. The Gardeners' Magazine, (London, Eng.), says: "The coloring is truly delicious." Pkt. 10c.

vautier's mammoth Pansy.—This strain of enormous pansies has been raised and perfected for twenty years by Chas. H. Vautier, one of our most experienced growers. In size and perfect form they rival anything heretofore introduced. The flowers measure two and a half to four inches across, of most perfect form, circular in shape; the plants being bushy and compact, and flowering profusely. The colors are rich and varied, embracing all the fancy spotted and striped and self-colors. Don't fail to include this in your order. Pkt. 20c.

FIRE KING.—This novelty comes almost absolutely true, scarcely a plant bearing flower at variance from the type, which is very distinct and striking. The three lower petals each have a large blotch of deep brown-red or magenta margined with yellow, while the upper petals are of a bright red, of a really flery shade, warranting the name of Fire King. Pkt. 10c.

CASSIER'S GIANT ODIER.—The flowers, of immense size, are of the popular Odier type, being all three-spotted or five-spotted on backgrounds of very rich colors. The flowers of the Cassier's are of good substance and fine form, while the plants are of neat, compact growth. Pkt. 20c.

GIANT TRIMARDEAU.—An altogether distinct and beautiful class of pansy, the flowers of which are of very large size; some have measured four inches in diameter. Each flower is marked with three large blotches or spots, and stands well above the foliage. Choice mixed colors. Pkt. 15c.

LORD BEACONSFIELD,—New, large flowers of deep purple violet, shading off in the petals to a white hue. Pkt. 10c.

GIANT BUGNOT.—This is one of the finest strains of pansies in existence. The flowers are of enormous size, perfectly round, of great substance and of the most varied and attractive markings and colors; each petal bears a blotch that runs out in delicate veins to the edge of the petal. Pkt. 20c.

CHOICE GERMAN MIXED,—Magnificent large velvety flowers of richest hues and colors. Pkt. 10c.

GOUDEN YELLOW,—Best of the yellow varieties. Desirable as a ontrast. Pkt. 5c.

FAUST .- (King of the Blacks.) Jet black. Pkt. 5c.

EMPEROR WILLIAM.—Ultra-marine blue. Pkt. 5c.

ODIER OR BLOTCHED.—This superb large variety of pansies has been much improved. Pkt. 10c.

BRONZE-COLORED.-Handsome. Pkt. 5c.

AZURE-BLUE.—Very fine shade of sky-blue. Pkt. QUADRICOLOR.—New and distinct; fine. Pkt. 8c. CHOICE LARGE FLOWERING MIXED .- Very fine. Pkt. 10c.

FINE MIXED.—Choice varieties. Oz. \$2.00, Pkt. 5c.

FINE MIXED.—Choice variet
INTERNATIONAL MIXED.
—This mixture consists of a
grand assortment from the
world's leading growers. All
colors and markings. Pkt. 25c.

10WA BEAUTY.—Of all varieties of panies ever introduced this is certainly the finest. It contains a great number of varieties, all of which
are beautifully marked striped
or blotched with the handsomest and most delicately blended colors. Flowers are of rich,
velvety substance and perfect
shape. Pkt. 20c.

VIOLET-SCENTED PANSY.

shape. Pkt. 20c.

VIOLET-SCENTED PANSY.

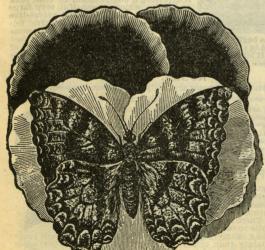

—This new type is a cross between the pansy and the violet, combining the ideal properties of each. Flowers are much larger than the violet, more like pansies, but with the delicious fragrance of the formlike pansies, but with the de-licious fragrance of the form-er. Range of color runs through white, buff, canary and azure-blue, and the coloring of each is exceedingly delicate and charming. Admirers of the pansy and violet will be de-lighted with it. Pkt. 25c.

PEACOC GOLDEN TRIMARDEAU.—Has the large size of the Giant Trimardeau, but is of a rich golden yellow. Remarkably handsome and showy variety. Pkt. 20c.

MAMMOTH BUTTERFLY.—A strain of pansy which for variety and beauty has never been excelled. Of matchless forms, colors and markings, with flowers half as large again as ordinary pansies. They will both astonish and delight "pansy fanciers." There is a great variety of colors and peculiar markings, reminding one of the varied hues of the butterfly. Pkt. 15c.

CLANT BUCKNOT, This is one of the finance of the fact the right of the strains and peculiar markings. SNOW QUEEN.—Flowers of a delicate, pure, satiny white, handsome and attractive. Makes a fine showing in beds or for cut flower work, and beautiful for cemetery use. Pkt. 10c.

MAMMOTH BUTTERFLY.

Pansy Collection.—One pkt. each of the 23 varieties for \$2.00.

POPPIES.

This grand old flower is fast gaining the universal popularity which it justly merits. Having for years been crowded out of our gardens by the swarms of new comers, and torgotten, it has, nevertheless, kept pace with the march of improvement, and now comes around and surprises us with its new forms, new sizes, new colors, and the dear old flower which our grandmothers loved so much, again occupies one of the first places in our gardens, and we are proud of it; and well we may be, for through June and July it stands without an equal, the showiest of all annuals.

BRILLIANT,—It is a superior variety of strong, robust growth, from two to three feet high. The flowers have the petals fringed and present a variety of bright colors; these are pure white with a pink tinge, scarlet, rose, purple and other shades. The ends of the petals or fringes are of a deeper tint than the rest, and are so bright as to be almost dazzling to the eye. Unsurpassed for cutppy. Pkt. 10c. od size, forming an entirely new a language and entirely new and acquisition.

GIANT NANKEEN YELLOW.—A superb new poppy. It is a vigor-BRILLIANT.-It is a superior

adds greatly to their featity; golor scatted. The occording to their featity; golor scatted. The occording grower, the perfect paeony-shaped flowers—truly giant—are borne in constant succession for a long season, on erect, strong stalks, two and a half to three feet. Nankeen Yellow stands out as a grand novelty the nearest approach to yellow in this class of poppies. Pkt. 10c.

DOUBLE CARNATION.—A splendid assortment of the best double carnation-flowered sorts. Will make an attractive flowered sorts. bed. Pkt. 5c.

FRENCH RANUNCULUS FLOWER-ED.—Many colors, mixed. Very hand-some. Pkt. 3c.

ALL VARIETIES MIXED .-- Pkt. 5c.

ONE PACKET EACH OF THE THIRTEEN

VARIETIES POPPIES! OF

FOR ONLY

65 CENTS.

PASSION FLOWER.

PASSION FLOWER.

MAMMOTH.—One of the most desirable of all climbing plants. Sow seed early, and if well cared for and seasons are favorable, vines will send out magnificent blossoms the first year, three or four inches in diameter. Its color is odd, comprising a combination of blue, pink and white, which is beautiful, very large and showy, of a feathery and velvet-like appearance, very rich and attractive; foliage is a dark green, with handsome thigh, followed in the fall by a beautiful golden fruit about the size of a hen's egg. If left in the open ground in winter it must have some protection. See illustration with flower plants. Pkt. 10c.

ROSES.

It is not generally known that roses are easily grown from the seed.

MONTHLY TEA. - Double mixed colors. Blooms the second year. Pkt. 10c.

FAIRY.—The roses are only about an inch across, usually very double, but occasionally semi-double, and seldom single; they are borne in large clusters and are of many colors. What is most remarkable these Fairy roses grow only ten inches high and commence blooming in a few weeks after the seed is sown, and continue year after year in uninterrupted profusion from May until frost. Pkt. 15e

CROWN OF PERFECTION PINKS.

A great improvement in the garden pinks. The flowers are immense, averaging six inches in circumference, are densely double and are produced in perfect succession during the whole summer and autumn in such numbers as fairly to crowd each other for room. There is a wonderful diversity of colors, from purest satiny white to red shades so deep and intensely brilliant that the eye can scarcely penetrate their velvety depths; soft pinks and flesh tints more dainty than brush could lay; and a large proportion of flowers hieroglyphically marked with various hues, the delicate tints and deep tones mingling in exquisite contrast. They succeed with everybody and every where. Where bedded in quantities the effect is gorgeous. Pkt. 8c.

l'ansy Collection - One pkt. each of

BRILLIANT POPPY.

ting, as they keep much longer than the ordinary poppy. Pkt. 10c.

ROSY MORN.—Flowers extremely double and of good size, forming perfect balls of a unique and beautiful shade of rose—an entirely new and distinct color in poppies. We consider this quite an acquisition. It is of the easiest possible culture, belonging to the annual pæonyflowered section, and merely requires to be sown where the plants are to flower. Pkt. 10c.

to flower. Pkt. 10c.

THE SHIRLEY.—These exquisitely handsome new popples have been exhibited in London and made quite a sensation in England. In color they run from the purest white through the most delicate shades of rose and pink and carmine to deepest crimson. Pkt. 5c.

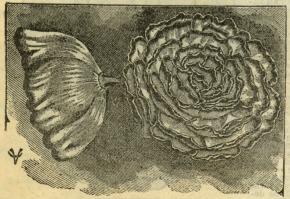

THE MIKADO.—Edges of petals are cut and fringed. Color is pure white at the back, whilst the fringed edges are a brilliant crimson. Pkt. 10c.

DANEBROG.—(Danish Flag)—The peculiar forms and shades of color blend and again contrast in such a manner that the appearance of the whole is most striking and lovely. A large silvery-white blotch at the base of each petal, forming a white cross on scarlet ground. Pkt. 6c.

FAIRY BLUSH.—The immense globular flowers are perfectly double and measure from ten to thirteen inches in circumference. The petals are elegantly fringed and pure white, except at the tips, where they are distinctly colored with rosy cream. Pkt. 10c.

AMERICAN FLAG.—The new plant is a remarkably strong grower, well branched, flowers extra large, very double, snow-white with each petal bordered with scarlet; the foliage is a beautiful bluish green, which combination of colors suggested the name. The terminal point has a wider band than the sides, making it extremely showy, distinct from all others. Pkt. 10c.

PAPAVER UMBROSUM.—Flowers rich, glowing vermilion, with a deep, shining black spot on each petal. Pkt. 5c.

AMERICAN FLAG POPPY.

the 25 varieties for

FIREBALL.—(Cut No. 1.) Brilliant, dazzling scarlet; very handsome dwarf compact growing. Pkt. 10c.

STRAITA.-(No. 2.) Bright, rich scarlet, sharply striped with white.

STELLATA CARMINEA.—(No. 3.) Very handsome carmine flowers, rith pure white, star-like eye. Pkt. 7c.
GRANDIFLORA ALBA.—(No 4.)—Pure white, very large. Pkt. 5c.

DOUBLE PEARL PHLOX

CUSPIDATA OR STAR.—(No. 5.) The growth is more dwarf and compact than the common. The pointed center teeth of the petals (five in number) are long and project like little spines, one-quarter to one-third-inch long. Thus the flowers appear to have a splendid, regular star-like form whose beauty is improved by the broad, white margins, which border the edges of the petals. Pkt. 15c.

SUNRISE. -(No. 6.) Beautiful, rosy salmon, shaded carmine. Pkt. 10c

FRINGED MIXED.—(No. 7.) Very handsome. The flowers are of the most velvety colors and handsomely fringed. Pkt. 10c,

JUBILEE.—(No. 8.) A decided novelty, being an entirely new color in Phlox. a bright yellow; of strong, bushy erect habit, each plant presenting a mass of dazzling flowers, each of which is nearly the size of a twenty dollar gold coin and of perfect form. Per pkt. 10c.

RADOWITZIL—(No. 9.) Handsome flowers of rose, crimson, violet, etc., striped with white Pkt. 10c.

NANA COMPACTA MIXED.-Dwarf, compact growing class; very fine for borders and

NANA GOMPACTA MIXED.—Dwarf, compact growing class; very line for borders and ribbons. Pkt. 8c.

BLACK BROWN.—The darkest color in phloxes. Pkt. 10c.

DOUBLE PEARL.—A grand novelty introduced by us in 1888. By constant selection each year we have improved it so that almost every plant produces handsome, double, pure white flowers. It is very pretty and will prove a splendid acquisition for bouquet work, and suitable for buttonhole bouquets, etc. Very pretty for borders and bedding. Pkt. 10c.

GRANDIFLORA MIXED.—This special large flowering strain has been selected with great care for many years until we now have an ideal flower, of immense size and for beauty of colors they are unsurpassed. They produce a great profusion of large trusses of flowers, and if cut freely will continue a mass of bloom until severe freezing weather. The colors range from the purest white to nearly black, including all shades of pink, red, violet crimson, purple, yellow, blue, scarlet and brown, striped and blended in an indescribable manner. Some of the flowers are very nearly as large as a silver half dollar. Pltt. 10c.

MIXED VARLETIES.—A mixture of the common varieties. Will make a nice bed but flowers are smaller than the Grandiflora. Pkt. 5c.

flowers are smaller than the Grandiflora. Pkt. 5c.

PHLOX COLLECTION.—One packet each of the above varieties, making a grand as-

PERENNIAL MIXED.—Splendid hardy plants which bloom continuously after the econd year. Pkt. 5c. second year.

GOLDEN GEM.—Beautiful for edgings or ribbon beds. Double flowering. Pkt. 5c. ROSEUM.—Plant from which the Persian insect powder is made. Pkt. 8c.

RICINUS.

Castor oil plant. lawn planted singly; also fine for

RICINUS.

Stately foliage plants. Make a very handsome appearance on the ly; also fine for clumps or ornamental hedges. Keeps out moles.

CAMBOGIENSIS.—This most beautiful plant grows to a height of eight feet, and of most stately, majestic tropical appearance. Large palm-like leaves of darkest reddish maroon, covered with a bright bronzy lustre, while the main stalk and leaf stems are ebony black. Leaves have large red veins which add to the beauty. The fruit is fiery red. It is unexcelled as a decorative plant for lawn or garden. More ornamental than many plants which would cost several dollars each at the greenhouse. Seed will always be scarce and high. Seeds are large and each seed will produce a strong plant. Pkt. of 6 seeds, loc.

GIGANTEUS_Largest of all, 12 feet high, steel blue stalk and large green leaves often 30 inches across. Pkt. 10c.

SANGUINEUS_TRICOLOR.—Blood red stalk; very attractive. Pkt. 7c.

active. Pkt. 7c.

GIBSONI.—Dark purple stem and leaves, dwarf. Pkt. 5c.

COMMON.—Pkt. 3c, oz 10c.

ALL VARIETIES MIXED.—Pkt. 4c.

RHODANTHE.

MACULATA.—One of the prettiest everlastings grown, has bright, rosy crimson flowers. Well shown by our engraving. Care is necessary in starting the seed, but when once well grown, produce an abundance of flowers Pkt. 10c.

CAMBOGIENSIS RICINUS.

RHODANTHE.

SWEET PEAS

SALVIA.

SPLENDENS.—One of the most brilliant of flowers; it thrives in any light, rich soil; often called Flowering Sage, Free bloomers. A brilliant scarlet. Very fine.

MIXED VARIETIES.—All plors. Pkt. 5c.

SCABIOSA.

(Mourning Bride.) One of the best of free-flowering hardy annuals of very handsome colors. Best double dwarf Pkt. 4c. mixed.

SPRAGUAEA.

UMBELLATA.— Is really a very attractive little flower, desirable for bouquets. Flowers in dense umbels, on leafless stems, six inches or more in length; blossoms are pink and nearly everlasting. Sow seed under glass or in a sheltered place. Pkt. 10c.

SENSITIVE PLANT.

A very pretty and curious plant, the leaves closing when touched. The seeds start slow, and it is best to start them in boxes, cover shallow and see that they do not dry out; it makes a good house plant for winter, and always pleases the children. Pkt. 5c.

SEDUM.

Well suited for baskets and rockeries; blooms freely; many varieties mixed. Pkt. 5c.

SCARLET RUNNER BEAN.

A handsome climber with flowers and pods of dark scarlet, and suitable for wearing as corsage bouquets. It is quite ornamental as well as being of much value as a vegetable, the beans being equal to the Lima in flavor. Pkt. 5c.

SMILAX.

SENSITIVE PLANT. Much used for winter decorations; the seeds start slowly and should be planted in loose, rich soil and kept moist and warm. Pkt. 8c.

SALPIGLOSSIS.

den and lemon yel-low, white, dark pur-ple, black, brilliant scarlet, etc., with all the shades between beautifully veined and mottled; blooms all summer and till severe frost. Pkt. 10c

SWEET PEAS.

May well be called America's favorite, as it is such a popular and easily grown flower that rich and poor alike can enjoy its fragrance and beauty. They are hardy, free from insects, and disease, and if cut freely, as soon as they begin to fade, will continue to bloom throughout the season. One ounce will sow a row thirty feet long and make a lovely hedge. One secret in successful sweet pea culture is to plant early and deep, not less than four inches.

ALBA MAGNIFICA .- One of the clearest of the whites. Strong grower and fine bloomer. Pkt. 5c. oz. 10c, ¼ lb. 30c.

BLANCHE FERRY.—Resembles the Painted lady, but the flower is much larger, of better and more decided shades, and blooms more freely. Very fragrant and unsurpassed for corsage bouquets. Pkt. 5c, oz. 10c. 1/4 lb. 30c.

PAINTED LADY.—Very pretty, delicate pink and white. Pkt. 5c, oz.

QUEEN OF THE ISLES.—Large flowers, handsomely striped with both blue and red on a white ground; very fine. Pkt. 5c, oz. 15c.

DUCHESS OF EDINBURGH.-Very beautiful; standard light scarlet, splashed with crimson. edge white, wings tipped rose. Pkt. 5c, oz. 10c.

QUEEN OF ENGLAND. - Pure white. Pkt. 5c, oz. 10c.

BLACK.—Very dark brownish pur-ple. The nearest approach to black. Pkt. 5c, oz. 15c.

SENATOR.—Chocolate and creamy hite. handsome. Pkt. 5c, oz. 10c. white.

BOREATTON.—A very fine dark variety, with immense, bold, attractive flowers, borne in great profusion. Color, red, mahogany and maroon. Very beautiful. Pkt. 5c, oz. 15c. INVINCIBLE SCARLET,-Large and brilliant scarlet. Pkt. 5c, oz. 10c

INVINCIBLE SCARLET,—Large and brilliant scarlet. Pkt. 5c, oz. 10c

MRS. GLADSTONE.—Flowers large of perfect form and of most delicate and beautiful blush pink. One of the most elegant and beautiful flowers in the list. Pkt. 5c, oz. 10c.

PRIMKOSE.—Pale primrose yellow. One of the most beautiful; blooms a long time and is exquisitely fragrant. Pkt. 5c, oz. 15c.

SPLENDOR.—Well named and one of the grandest on the list. Most brilliant crimson rose: a dazzling color; often double. Pkt. 5c, oz. 10c.

EMILY HENDERSON.—A beautiful absolutely pure white; flowers are extra large, and stand up boldly without reflex or curl; plants robust, compact and branching, producing such an abundance of flowers that the plants appear as if covered with snow. From one plant, specially cultivated, has been cut in one season the seemlngly incredible number of 1,035 sprays of bloom. Very early, and continues a veritable "cut-and-come-again" to the end of autumn. Pkt. 5c, oz. 15c, ¼ lb. 40c.

IMPERIAL BLUE.—Color ultramarine blue, claret and purple; one of the handsomest. Pkt. 5c, oz. 20c.

PURPLE PRINCE.—Maroon standards, shaded with bronze and purple wings. Pkt. 5c, oz. 10c.

BUTTERFLY.—White, laced with lavender blue. Pkt. 5c, oz. 15c. CARDINAL.—Intense cardinal crimson, large and fine. Pkt. 5c, oz. 10c.

ORANGE PRINCE.—Pink and orange, flushed with scarlet; distinct and handsome. Pkt. 5c, oz. 20c.

COUNTESS OF RADNOR.—One of the handsomest. Standard rich lavender mauve, wings lighter. Pkt. 5c, oz. 15c.

BLUSHING BEAUTY.—Exquisitely soft fleshy rose color: beautiful clusters on long stems. Pkt. 5c. oz. 15c.

VENUS.—Salmon buff, delicately

VENUS.—Salmon buff, delicately shaded rosy pink: a charming flower. Pkt. 5c, oz. 15c.

PERFECTED MIXED.—Graceful form, charming color, exquisite fragrance, and simple leveliness. This mixture contains all of the most choice new varieties and some of the old favorites. Pkt. 5c, oz. 16c Mth. 5c lb. 86c.

10c, ¼ lb. 25c, lb, 85c.
ECKFORD'S NEW HYBRIDS.—
A strain of mixed sweet peas comprising many beautiful new varieties of bright colors, flowers unusually large. Pkt. 5c, oz. 15c.
FINE MIXED.—A good assortment. Pkt. 2c, oz. 5c. ½ lb. 15c, lb. 50c.

COLLECTION -One packet each of above 25 varieties for 85c.

STOCKS.

LARGE FLOWERING PERPET-UAL WHITE.—Of strong growth, fine branching habit, and, if sown early, will bloom from May until November. Flowers very large and pure white, and the more often they are cut the better they like it. De-liciously fragrant. Pkt. 10c.

LARGE FLOWERING DWARF GERMAN.—Fine mixed. Pkt. 5c.

WILD CUCUMBER.

A well known vine common in many sections, and the quickest climber known for covering verandas, old trees and houses, trellises, etc.. never suffering from the heat, but retaining its fresh and lively green color; never infested with insects, and very profuse in bloom. It will sow itself and come up every year in the same place. Pkt. 10c

SUNFLOWER. (See Helianthus.)

SWEET WILLIAM.

Hardy plants about one foot high, of extreme richness and variety of color, and also deli-ciously sweet-scented; for clumps or borders no plant can surpass this old favorite. or borders

SINGLE VARIETIES MIXED.-Pkt. 5c. DOUBLE VARIETIES MIXED.-Pkt. 10c.

TORENIA.

FOURNIERI.— Beautiful free flowering, s, vases, and in moist situations out of doors. trailing plants, well suited for baskets A very handsome plant, well worthy of a trial. Pkt. 10c.

THUNBERGIA.

WILD CUCUMBER.

Rapid growing, free blooming climbers. Well suited for house culture, baskets or vases; mixed. Pkt. 5c.

TROPAEOLUM.

One of the most desirable of the annual climbers: easily grown in any common garden soil; produces an abundance of flowers of handsome shades of various bright colors. Many varieties mixed.

Pkt. 5c.
PEREGRINUM,—(Canary Bird Flower.)
Curious bright yellow flowers, resembling
canary birds. Pkt. 10c.

STEVIA.

SERRATA.—Produce an abundance of pretty white flowers early in fall. Pkt. 5c.

STATICE.

SINNATA HYBRIDA.—Produce their small flowers in panicles; will hold their color when dry, and are very valuable to work up with the everlastings; hardy and of easy culture; fine mixed. Pkt. 4c.

VINCA.

Handsome bushy plants producing freely, round, single flowers one and one-half inches across, suitable for pot culture and sunny flower beds; tender perennial, one and one-half foot. Mixed colors. Pkt. 5c.

WISTARIA.

One of the most popular hardy vines climbing to a height of fifty feet or more. It is a perennial and easily grown from seed. Pkt. 10c.

VIOLA.

WISTARIA.

ODORATA,—The well known sweet eviolet All colors mixed. Seeds start very slowly. Pkt. 10c.

WHITLAVIA.

Delicate and pretty but perfectly hardy olants, with drooping clusters of belishaped flowers. They thrive in cool, moist situations; free bloomers, and for partially shaded places they are very desirable.

GRANDIFLORA.—Mixed colors, 5c.

XERANTHEMUM.

Free flowering and easily grown, making a handsome bed.

DOUBLE WHITE. -Pkt. 5c. ALL KINDS MIXED.-Pkt. 5c.

WHITLAVIA.

The verbena is deservedly a universal favorite, unrivaled in the splendor of its dazzling brilliancy of flower. A constant bloomer, and if grown from seed has a sweet fragrance. Treat as tender annuals. Plant seed in boxes or under glass in March, and transplant when a few inches high. In this way the verbena can be grown from seed as early as any annual, and will produce much stronger plants than cuttings. Seed sown in the open ground will flower in August.

HENDERSONS NEW MAMMOTH,—When well grown every flower truss measures over nine inches in circumference, while the single florets are as large as a twenty-five cent piece; more vigorous in growth than the ordinary verbena. Contains a great assortment of colors, the above illustration showing a flower of dark scarlet with a pure white eye. Pkt. 15c.

BLACK.—Nearly

BLACK. — Nearly a coal black with a white eye. Pkt. 10c.

white eye. Pkt. 10c.
CANDIDISSIMA.
—Large trusses of
pure white flowers;
beautiful Pkt. 10c.
DEFIANCE.—A
true scarlet; extra
fine. Pkt. 10c.
YELLOW.—Splendid novelty which it
will pay every flower lover to try. Pkt.
10c.

EXTRA CHOICE MIXED,—From the finest German collection of named sorts. Pkt. 10c.

FINE MIXED.—Contains a nice variety of colors. Pkt. 5c.

WAHLENBERGIA.

(XED.—(Also called Platycodon.) Of wonderful beauty and attracts much attention on our seed farm. It is a perennial plant blooming the first year from seed, which should be sown early in open ground. They bloom very profusely and continuously all summer, if flowers are removed as soon as they begin to fade. The flowers are of large size, being 2½ to 3 inchesin diameter, and the various shades of light blue, lavender and white. Plants increase in size from year to year and are sure to please. Our seed is saved from the best flowers. Pkt. 10c.

WALLFLOWER.
Greatly prized for their exquisite fragrance. They grow in long, brilliantly colored spikes of flowers. There are many varieties. Plants removed to pots in autumn will produce an abundance of delightfully fragrant flowers.

DOUBLE VARIETIES MIXED.-Pkt 12c.
SINGLE VARIETIES MIXED.—Pkt 5c.

WALLFLOWER.

Strong growing, hardy and elegant plants, rivaling the dahlia in size and doubleness, while the colors are bright and varied, ranging from pure white to deep, purplish crimson. Splendid for hedges, beds or borders.

PIGMY OR LILLIPUT.—This strain is the acme of beauty and perfection in zinnias. Plants small and of bushy growth, each one bearing scores of beautiful little blossoms of the most perfect shape and brilliant colors, from pure white to very dark orange, purple, crimson and vermilion. These charming little zinnias are gems indeed, and should be in every garden. Mixed colors. Pkt. 10c.

CURLED AND CRESTED.—A most unique and charming new variety with petals oddly curled and crested in fantastic contortions and graceful forms. Flowers large double, and the peculiar shape of petal relieves the flower from stiffness. Many colors Pkt. 10c.

FINEST MIXED DOUBLE,-Tall sorts. Pkt. 5c.

FINEST MIXED DOUBLE DWARF.-Pkt. 5c

NEW ZEBRA.—Beautifully and brilliantly striped with rich colors. There are always some plants which do not produce striped flowers, Very handsome. All colors mixed. Pkt. 10c.

Complete Garden Collection.

(Col. No. 4.)

Consists of 40 packets Flower Seeds, our selection of varieties, but all good and some choice sorts. All different, easily grown and sure to please. Price \$1.00.

ORNAMENTAL GRASSES.

These should be cut just as they come into bloom, and dried in the shade. Very useful for working up with the everlastings into winter ornaments; they lend a grace and beauty not obtainable without them.

AGROSTIS, Nebulosa.-Pkt. 5c.

Pulchella.-Pkt. 3c. BRIZA, Maxima. -(Quaking Grass)
Pkt. 3c.

Gracillis.-Pkt. 5c.

BROMUS, Brizaformus,-Pkt. 3c.

COIX, -(Job's Tears)-Pkt. 5c.

ERAGROSTIS, Elegans. — (Love rass)—Pkt. 3c.

ERIANTHUS, Ravenæ,-Pkt. 5c. EULALIA, Japonica.-Pkt. 8c.

HORDIUM, Jubatum.—(Squirrel's Tail) — Pkt. 5c.

LAGURUS, Ovatus.—(Hare's Tail)

STIPA, Pennata.—(Feather Grass)

ZEA, Japonica. - (Striped Japanese Maize) — Pkt. 5c.

Sweet Pea Collection.

One packet each of the 17 varieties listed in this catalogue, on page 57, making the best assortment obtainable. Price 75 cents.

SPECIAL MIXTURES OF FLOWER SEEDS.

Many persons derive pleasure from watching the growth of a varied bed of flowers, entirely out of the usual trim garden style, while others desire a much more extended collection than their means will permit. To both of these classes the following special mixtures will appeal:

INTERNATIONAL NOVELTIES MIXED.—Each year we make a grand test of floral novelties, obtaining seed therefor from all parts of the world, and our trial fields exhibit a truly magnificent display of flowers never before grown here. A few of the new varieties did not do well with us, but they may prove valuable in other climates or on different soils, but by far the larger number are valuable acquisitions, and we would like to have all our customers try them. We have saved seed of most of the varieties, but instead of listing them in our catagous esparately at ten cents to twenty-five ents per packet, we have decided to mix them all together and offer our customers this grand assortment at the low price of focper, but, 3 plus, 25c.

WILD GARDEN MIXTURE.—Over 400 kinds of such flower seeds as are suitable to be planted together; altogether forming a mass of bright colored flowers and beautiful foliage which is sure to interest and please, or the possibilities in growing flowers of the possibilities in growing flowers which is sure to interest and please of the possibilities in growing flowers in this large.

FLOWERS FOR BOUQUETS.— This mixture embraces seeds of annuals producing flowers suitable for cutting and for bouquets, nearly all of them having long stems. Planted in a section of the garden, this will furnish a constant supply of cut flowers. Pkt. 10c.

LOW-GROWING ANNUALS.—This mixture contains seeds of a great variety of low-growing annuals, few of which exceed four to six inches in height, and which, sown in beds or borders, present the appearance of Turkish rugs, carpeting the ground in their wide range of colorings and forms. Pkt. 10c.

MIXTURE OF FRAGRANT ANNUALS.—Carefully made up from seeds of fragrant flowers only. A bed of these will give rich perfume throughout the day and evening, while some of them are also suitable for cutting. Pkt. loc.

MIXTURE OF CLIMBERS.—This is a liberally filled packet of seed of many beautiful annual climbers, suitable for growing together. Pkt. 10c.

MIXED BIENNIALS AND PERENNIALS.—About fifty varieties. Every garden should contain a good assortment, and it will be easily obtained in this way. Pkt. 10c.

MIXED EVERLASTINGS.—A grand assortment of all sorts of ever-lasting flowers, suitable for bouquets, etc. Pkt. 10c.

MIXED GRASSES.—A mixture of the ornamental grasses suitable to grow in masses. Makes a striking as well as useful collection. Valuable for making up into winter bouquets. Pkt. 5c.

All of the above mixtures are carefully prepared from choice, fresh seeds, and cannot fail to give satisfaction. The packets are liberally filled, and in no other manner can so many seeds be obtained at such light cost.

Good Fruit.

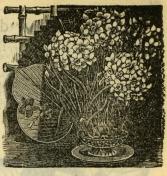

You can doubtless make room for a few fruit plants in your garden, and secure a supply of fresh fruit in season. We pay the postage on these: COLLECTION NO. 25. Twelve Grape Vines, consisting of two each of the Brighton, Agawam, Golden Pocklington, Worden, Concord and Niezero. ton, Wo for \$1.00. Worden, Concord and Niagara

OCLECTION No. 29. 40 Strawberries, 10 each of Warfield, Parker Earle, Bu-bach, and Haverland for \$1.00. COLLECTION No. 30. 2 Grape Vines, 2 Currants, 5 Raspberries, 5 Blackber-ries and 2 Gooseberries for \$1.00.

CHINESE SACRED LILY.

to be the largest growers of bulbs in the west and we have a assortment as can be found anywhere.

NTS.—Your selection of bulbs to the amount of \$1.20 at catas will be sent postpaid for \$1.00. \$2.50 for \$2.00.

KIRKI.—This magnificent bulb, frequently as large as a 1, produces flowers of the greatest beauty. Its leaves are 1 and radiate in the form of a rosette. Usually two flower h two or more feet tall, and of dark purplish color, are sent ame time, each bearing a large umbel, consisting of a dozen or more large lily-like flowers of the greatest beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe down the center of the outside of each, showing through faintly on the inside. A plant which will create a sensation anywhere when in bloom. Fine, extra large bulbs (such as have sometimes been sold at from \$3.00 to \$5.00 each) each \$1.00, 3 for \$2.50, postpaid; smaller bulbs 50c, each CHINESE SACRED LILY.—Very handsome. The flower is white, with a yellow tinted cup; a truss from three to seven, borne on a stem—sometimes single and double on the same stalk. It is very easily grown in water. The bulbs are very large, with from three to six various sized offsets, and nearly every offset bears a flower stalk. Usually grown in a bowl of water. We can furnish them until the last of March, when the supply is usually exhausted, and we do not have more until fall. Ea h 20c.

CINNAMON VINE.—This beautiful

until fall. Ea h 20c.

CINNAMON VINE. — This beautiful climber possesses the rare quality of emitting from its flowers the delightful odor of cinnamon, and is very appropriately called the Cinnamon Vine. Perfectly hardy, the stem dying down every autumn, but growing again so rapidly as to completely cover any trellis or arbor very early in the season. It is propagated from small bubblets, which will make from ten to twenty feet of vine, and with its beautiful heart-shaped leaves, bright green, peculiar foliage and clusters of delicate white flowers sending forth a delicious cinnamon odor, render it one of the most desirable climbers in cultivation. We can furnish the large tubers by mail, postpaid, for 10c, 3 for 25c; bulblets, 4 for 10c, doz. 25c.

The bulbs received in last order from yow are very fine. Accept thanks. J. Q. McPHERRIN, Oakland, Iowa.

TUBEROUS ROOTED BEGONIAS.

These flowers grow six inches in diameter, are borne upright on stiff stems, and outrival in colors the most brilliant or dazzling geranium. We have had many of these flowers grown in an ordinary way that measured four and one-half inches in diameter. They are of the richest colors, embracing every shade of white, rose, pink, red, scarlet, crimson, maroon, lake, yellow and orange, and combine the richest shades. Tuberous begonias are well adapted to house culture, and make splendid beds on the lawn. The bulbs can be taken up and kept in a dry warm place through the winter as easily as a potato.

Extra Choice Single Varieties Mixed.—Grand assortment. Each 15c, doz. \$1.50.

Extra Choice Double Varieties Mixed.—All the best sorts. Each 25c, doz, \$2.50.

brown, about two inches in diame-ter. The blossoms

ter. The blossoms are followed by seed clusters exactly like a blackberry in size, shape and color. If plucked when they turn black, they retain their glossy color and appearance all winter, and are very nice for winter bouquets. Each 10c, 3 for 25c.

ter bouquets. Each 10c, 3 for 25c.

CANNA.-These very handsome tropical-looking plants are unri-valed for fine effects on the lawn, their large

stringed, springed, sontted and markings. Vasily different from the old stringed, springed and the consequence of the consequen

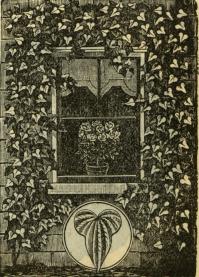

NEW CROZY CANNAS. glossy, green new CROZY CANNAS. leaves, tinted with red, purple of bronze, and their showy spikes of flowers of various shades of red and yellow, produce an effect seldom equaled.

Madam Crozy.—One of the grandest of all sorts. The immense flower head, of the deepest vermillion red, gold bordered, is double the diameter of a gladiolus spike, closely filled with flowers, and these flower spikes or heads follow each other so rapidly that the plant is always in bloom. Spikes contain 12 to 25 flowers in full bloom at one time, 3 to 6 spikes in bloom at one time. Each 20c. 6 for \$1.00.

Mixed French.—We have a grand assortment of all the best new varieties of French or Crozy cannas, which we can furnish at 20c each, or 6 for \$1.00, postpaid.

Mixed Bronze-Leaved.—The older sorts used mainly for foliage beds or groups on the lawn. They are tall growing, attractive, bronze red folage; the flower is small. Each 10c, doz. \$1.10.

Mixed Green Leaved.—Like above only leaves are green. Each 10c, doz. \$1.10.

CINNAMON VINE.

described west and the west of the contract of

CRINUM KIRKL

IRIS. (Fleur-de-Lis.)

One of the most satisfactory of flowers for garden culture, as they are hardy and require very little care after once set out, and will produce a mass of flowers year after year.

PUMILA.—Dwarf, early flowering, light blue, purple and yellow mixed. Splendid for edgings. Doz. 30c; 100, \$2.00.

SIBERICA.—A lovely iris, producing tall spikes of elegant bloom early in the spring. There are two varieties, one pure white and the other deep blue, making a fine contrast. Each 10c, 3 for 25c.

KÆMPFERI IRIS

KEMPFERI.—Marvels of teauty and statliness. Think of a plant sending up to the height of three feet a dozen flower spikes, each spike bearing two to four blossoms eight or ten inches across, and of the most delicate and beautiful colors, markings and combinations. Think of a bed of all colors—white, indigo, violet, lavender, mauve, sky blue, royal purple, blush, yellow, etc. Your imagination can conceive of nothing grander, and they are even more grand and beautiful than your imagination can portuay. Such are these new Kæmpferi iris, the king of hardy perennial plants. Once planted in your garden they are a joy for a lifetime, blooming profusely in June and July. Either double or single, mixed. Each 15c, 2 for 25c, doz. 81.25.

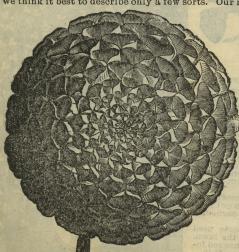

GERMAN.—The true "Fleur-de-Lis," the national flower of France; perfectly hardy, grow and bloom luxuriantly anywhere, particularly in moist situations. Plants well established produce from 50 to 100 spikes of bloom, deliciously fragrant and fine for cutting. In beauty, flowers rival the finest orchids. Colors ranging through richest yellows, intense purples, delicate blues soft mauves, claret reds, whites, primroses, and bronzes of every shade. Mixed colors. Each 10c, 3 for 25c.

MIXED VARIETIES.—Splendid assortment of various varieties. Each 10c, doz. \$1.00.

Well known and universally admired spring flowering plants, equally well adapted to winter flowering in parlor or conservatory. Flowers bell-shaped, freely produced and powerfully fragrant. To grow in open ground, select a partly shaded, rather moist situation and they are charming when grown in large patches, as their handsome green leaves and lovely sprays of flowers make a beautiful effect together. When once planted and established the crowns increase in number and the larger ones flower each year without attention. These dormant roots can be potted at any time; put six pips in a 4-inch pot, place in a cool situation until wanted for blooming, then bring out to light and warmth, give plenty of water. Each 5c, 3 for 12c, doz. 40c.

DAHLIAS.

When well grown the Dahlia is one of the most handsome flowers in the whole list, and especially those of the newer varieties, such as we offer. They are of sturdy growth and covered with hundreds of flowers. The secret of success in growing them lies in having a good, deep, mellow soil, deeply spaded and thoroughly enriched with well-rotted manure. During hot, dry weather we always give them an abundance of water, on the plant as well as at the roots. Sprinkling the foliage daily tends to a vigorous, healthy growth. Always put a strong stake by each plant and tie the plant. They well repay a little care and each plant will be a specimen to be proud of. Don't fail to try a few. There is such an endess variety that we think it best to describe only a few sorts. Our mixture contains

DOUBLE DAHLIA. Double Mixed Varieties—Contains a good proportion of the best scarlet, yellow and white varieties, besides the many other shades which are most popular. Each, 15c; doz. \$1.50.

Fancy Double Mixed—The handsome tipped, striped, spotted and variegated sorts in a splendid mixture Each, 25c; doz. \$2.25.

White Dove—Flowers are extra fine double, pure white, petals beautifully toothed, stems very long; height 3½ feet. The cut-flowers of this variety are more sought for by florists than any other, and it is the best of all the whites. Each 30c; doz. \$3.00.

Mixed Cactus—A good assortment of colors of this popular class. Each, 20c; doz. \$2.00.

Fancy Single Mixed—The single dahlias are rapidly growing in favor, on account of their freedom of bloom and handsome colors and markings. Vastly different from the old single sorts; nice for table or corsage bouquets. Each, 15c; doz. \$1.50.

SINGLE DAHLIA

These are a specialty with us, and our fields devoted them make a most magnificent sight each year, appearin at a distance a mass of bright colors. We grow the larges number and the largest variety to be found in this part the country. It is the most desirable of all bulbs, an claimed by many who are well acquainted with their varie beauty to be the flower of flowers. Our bulbs will produce immense spikes of bloom. Gladiolus are of very easy culture, and to have a constant succession of flowers the bulbs should be planted at intervals from the middle of April until the first of July. We have greatly reduced our price this year to induce all to try our superb varieties.

ROYAL OUEEN —We do not besitate to call this by far

April until the first of July. Price this year to induce all to try our superb varieties.

ROYAL QUEEN.—We do not hesitate to call this by far the finest and largest flowering variety of gladiolus ever introduced. The bulb, or corm, is usually very large, producing a strong, stiff flower stalk about three feet high.

The flower spike is very long and well filled out on all sides. The flower stalk about three feet high.

MEYERBEER.—Rose scarl decided the standard of a delicate velvety texture. It is not affected by the heat and blooms freely. The flowers measure four inches in diameter when in cup form, or six inches spread and are held upright on the spike. If you want something extra fine don't fail to try the Royal Queen.

Each 20c, 3 for 50c.

BRENCHLEYENSIS.—Deep vermillion scarlet. Each 10c, 3 for 25c.

BRENCHLEYENSIS.—Deep vermillion scarlet. Each 5c, 3 for 10c.

GERES.—Large, strong spikes of bloom well laden with flowers of a beautiful blush white, marbled and striped with rose and carmine; one of the handsomest varieties grown. Each 5c, 3 for 12c.

CHILDSI.—An entirely new class in gladiolus and most decidedly different from all others. They comprise a large variety of colors, markings and blendings, some of them being very handsomely varieties.

EUGENE SCRIBE.—Light pink, glazed with carmine; flowers very large and perfect. One of the most beautiful of the gladioli, and cannot be praised too highly; all should try it. Each 10c, 3 for 20c.

ISAAC BUCHANAN.—Best of yellow varieties. Each 10c, 3 for 20c.

ISAAC BUCHANAN.—Best of yellow varieties. Each 10c, 3 for 20c.

NORMA.—The best white variety; large, straight, nice spikes, filled with large open flowers. Each 10c, 3 for 25c.

NORMA.—Dark yellow, mottled with purple. Each 5c, 3 for 12c.

OPHIR.—Dark yellow, mottled with purple. Each 5c, 3 for 12c.

PRINCESS OF WALES.—White, blazed with carmine and rose, stained with deep carmine. Each 10c, 3 for 25c.

LEMOINE'S HYBRID GLADIOLUS.

MEYERBEER.-Rose scarlet, amaranth red blotch. Each 10c, 3 for

SALMON PINK.—A handsome new variety of pure salmon pink color Attractive. Each 10c, 3 for 25c. CHOICEST MIXTURE,—Made up mainly from best named varieties. Each 5c. doz. 50c.

FINE MIXED.—Contains a nice assortment. Each 3c, doz. 25c. By operss. \$1.50 per 100.

CHOICE YELLOW VARIETIES.—Each 6c, doz. 60c.

LIGHT AND WHITE VARIETIES MIXED,—Each 5c, doz. 50c. RED VARIETIES MIXED.—Each 5c, doz. 40c.

PINK, STRIPED AND VARIEGATED VARIETIES. -- Each 5c, doz. 50c. SEEDLINGS.—A splendid assortment grown from the best hybrid mixed seed. There are sure to be a number of choice new varieties among these. Each &c, doz 50.

COLLECTION OF GLADIOLI.—Six choice named varieties, our selection of sorts, but all labeled, containing an assortment of colors. Also one packet of gladiolus seed of our own growing, carefully hybridized so as to produce new varieties; will bloom second year—all for 25c postpaid.

GLADIOLUS SEED.—One of the most interesting branches of Gladiolus culture is the growing of bulbs from seed. No skill or special care is required, and in the course of two or three years flowering bulbs will be secured. It is not only very interesting, but there is almost sure to be found new sorts that are the results of hybridization, and which could not be secured in any other way. Our seed is from the finest flowers, embracing hundreds of markings and colors. Pkt. 8c.

LEMOINE'S HYBRID GLADIOLUS.

originated on our grounds. rest purple known in gladio-

lus. Each 10c, 3 for 25c.

LEMOINI.—Fine, good sized flowers, closely set on the spike, which is about one foot long; upper petals of a creamy white color, tinted salmon red, the lower ones spotted with deep purplish crimson, bordered with bright yellow. Each 5c, doz. 50c.

MARIE LEMOINE.—Long spike of fine, well expanded flowers; upper divisions of a pale creamy color, flushed salmon lilac, the lower divisions spotted purplish violet, deep yellow border. Each 5c, doz. 50c.

MIXED LEMOINI.—Many charming sorts. Each 5c, doz. 50c.

FREESIA.

EFRACTA ALBA.—Small bulbs bearing peculiar clusters of ite flowers of the most delicious fragrance, which last a long 10, even after being cut. It grows well and blooms freely in an inary sitting room if placed near a window and not kept too. It appears to best advantage when four or five bulbs are set a six-inch pot in light, rich soil. Each 3c. doz. 20c.

DIELETRA. (Bleeding Heart.)

Vell known, hardy and pretty spring bloomers with graceful oping sprays of flowers. Strong plants. Each 20c, 3 for 50c.

CYCLAMEN.

IGANTEUM.—One of the finest plants in cultivation for winter bring. Young bulbs, if well grown, will sometimes have as 1y as 100 flowers open or ready to open at one time. The colors y from the purest white to the brightest crimson and purple, e of the flowers being beautifully spotted; foliage charmingly legated green and gray, the under part of the leaves being htred. Easily grown and will bloom three or four months in ession during the dullest part of the year. Each 25c.

JILIES.

No class of plants capable of being cultivated out of doors possess so many charms; rich and varied in color, stately and handsome in habit, profuse in variety, and of delicious fragrance, they stand prominently out from all other hardy plants. They hrive best in dry, rich soil, where water will not stand in winter. After planting they require very little care and should not be disturbed for several years, as established plants bloom more freely than if taken up annually.

free blooming, bearing five to twenty blossoms, Plant early and leave un-disturbed. Each 10c, 3 for 25c.

disturbed. Each 10c, 3 for 25c.

AURATUM, OR JAPANESE GOLD
BANDED LILY,—This is justly entitled
to the name often given it—The Queen
of Lilies—and it is decidedly the most
beautiful of all lilies. The immense
flowers are deliciously fragrant, The
large white petals are thickly spotted
with chocolate crimson, and have a
bright golden yellow band through the
center of each. This magnificent lily
succeeds well everywhere. Each 20c, 3
for 50c.

SPECIOSUM ALRUM—Large.

SPECIOSUM ALBUM.—Large, pure white flowers of great substance, beautifully recurved. For garden or pot culture. Each 20c, 3 for 50c.

ZEPHRYANTHES.

SPECIOSUM ROSEUM.—Pure white ground, stained and spotted rose, similar to Speciosum Album, except in color; very beautiful. Each 15c, 3 for 40c.

ELEGANS. OR THUNBERGI-ANUM.—Early; flowers cup-shaped, borne upright, and of a great variety of colors. They are very effective planted either in lines or clumps, and include many showy sorts. Each 15c, 3 for 40c.

HARRISII.—(The Bermuda Easter Lily.) Immense, pure white trumpets with a very delicate pervading fragrance; remarkable for its earliness and extreme profusion of bloom They are the finest lilies for house culture and are largely in use for winter forcing. Each 20c, 3 for 50c.

LEMON LILY.—One of the handsomest flowers for garden culture. It is not a true lily as the bulb is of different shape, but the flower is very much like the Lilium Speciesum in form and about 3 inches in diameter. The color is entirely different from all other sorts, being a clear lemon yellow of very bright They have also a most delightful lemon to floom produced, each flower stem bearing 7 to 20 flowers. It is sure to bloom the first season and is the Sower for everyone. Each 25c, 3 for 60c.

LITTLE GEM CALLA.—This beautiful little

LITTLE GEM CALLA.—This beautiful little floral gem originated in the Guernsey Islands, and is in appearance a true miniature specimen of the old Calla, rarely growing over 10 to 12 inches high and commences to bloom when 6 to 8 inches. This is highly regarded in some places but has not proved a good bloomer at our place. Each 25c, 3 for 60c.

our place. Each 25c, 3 for 60c.

MAMMOTH WHITE CALLA.—The largest flowering variety and most majestic. It is of perfect form with large tropical appearing leaves of bright green color, and yielding throughout the season a profusion of superb white flowers. Monster bulbs, each 25c, 3 for 60c. Medium size, each 15c, 3 for 40c.

SPOTTED CALLA.—Leaves are deep green, with numerous white spots, which give the plant a magnificent appearance. They grow freely in any soil. Can be planted out in the spring like a gladiolus, and blooms well during the summer. The flowers are pure white with a black center, and are very beautiful. Each 15c, 3 for 40c. Each 15c, 3 for 40c.

ZEPHYRANTHES,—Popularly known as "Zephyr Flowers" and "Flowers of the West Wind." They are among our most beautiful dwarf bulbous plants, very effective for planting out in masses in May, flowering with great profusion during the summer. Very suitable for pot culture; 6 to 12 bulbs clustered in a 6-inch pot in fall will give a fine display during winter; pink and white. Each 10c, 3 for 25c.

LILIUM HARRISIT.

SPOTTED CALLA

ALBINO TUBEROSE. OXALIS.

JOHNSONII.—Of strong, vigorous growth, bearing from three to six brilliant red flowers on each stem. The petals are striped with white, rendering the flower very attractive. Very fragrant. Each 50c. TUBEROSE.

AMARYLLIS. ATAMASCO.—The flowers are upright with broad petals, either pink or white. Each 10c.

EXCELSIOR PEARL.—A greatly improved variety, characterized by its short, robust stem and long spike filled with beautiful, large, perfectly double flowers of most delicious fragrance. Spikes frequently bear 30 to 50 flowers, remaining in bloom for a long time. They are always wax-like, pure white, and are unsurpassed for buttonhole bouquets. Don't fail to include a few in your order. Choice bulbs, postpaid, each 5c, doz. 40c.

ALBINO.—This splendid novelty is very popular. It is a single pure white variety, well shown by our illustration, and the flowers are very fragrant. The spike is very large and evenly filled; flowers 30 days earlier than the old single variety, throwing from two to five flower stems from a single bulb, and these again are often branched, but its great merit above all other tuberoses is that it is entirely free from the brown tint common to the old sort on the back of the petals, the tube and expanded sepals being of the purest waxy white, making it one of the most valuable plants ever introduced for cut flowers. Each 10c, 3 for 25c, doz. 85c.

YUCCA FILAMENTOSA. (Adam's Needle.)

YUCCA FILAMENTOSA. (Adam's reeme.)

A tropical looking plant, with long narrow leaves that remain green the entire year. This beautiful and interesting plant should be in every collection. So hardy that it is almost an evergreen. It grows in clumps and throws up a flower stalk from three to four feet in height, from which hang from one to two hundred creamy white, bell-shaped flowers. It remains in bloom along time. Strong kes a most ke plants, each 15c.

PEARL TUBEROSE.

SPIDER LILY.

That this fine southern bulb has not become more popular before is only due to its former high price. Now that it can be obtained so cheaply, thousands are being sold. Strong bulbs, such as we offer, will send up many spikes, crowded with dozens of the most fragrant white flowers imaginable, which will expand daily for many weeks. A single spike cut off and placed in water when the first flowers begin to open will keep on blooming for two weeks and often longer, filling a room with their delightful fragrance. In mild localities the bulb is hardy. Each 20c, 3 for 50c.

DESIRABLE CANNAS.
CHARLES HENDERSON.—The richest deep crimson of any canna on our place, and a sort which charms everyone. Heads large, compact and symmetrical. Each 25c.

FLORENCE VAUGHAN.—A most striking and beautiful yellow canna, spotted with bright red. Each 25c.

ROBUSTA.—A tall variety with immense leaves of dark bronze color. Very tropical. Each 15c.

There are many varieties of this charming little plant which are used both for hanging baskets and outdoor bedding.

DOUBLE YELLOW.—This handsome new variety is well shown in our engraving and makes a most attractive plant for hanging baskets, vases etc. Bulbs are very small and several should be planted together, and will then make a grand showing. Each 8c, doz. 75c.

Each 8e, doz. 75c.

DEIPH ALBA.—Nothing so valuable for edging the borders of walks or flower beds as the beautiful summer oxalis. Bulbs, when planted three inches apart, produce an unbroken row of elegant foliage and pure white flowers, and as they bloom very quickly after planting, they furnish a neat and attractive border the whole season. Doz. 10c, 100, 40c.

DEIPH ROSEA.—Somewhat larger flowers and foliage than above. Leaves greatly resemble four-leaved clover; flowers rose color. Doz. 10c, 100, 50c.

LASIANDRIA.—Leaves more finely cut than the Deipii, and flowers rosy pink. Doz. 10c, 100, 60c.

PAEONIES.

These are very beautiful, showy and easily cultivated plants, blooming from the beginning of May to the end of July. They should have a place in every garden. A selection will give a continuous bloom for three months. We offer the best sorts varying from pure white, straw color, salmon, and flesh color to lilac and rose. Each 25c, 12 for \$2.50.

Winter Blooming Bulbs.

Some of the most beautiful and fragrant of all the flowers grown belong to this class, and when potbelong to this class, and when potted in the house, they come in bloom just at the time when flowers are most wanted and most difficult to obtain. Our bulbs, which are grown by one of the best bulb growers in Holland, arrive in this country about September 15, and we tisually have a good assortment of them for about two months. The best way is to order during spring or summer, then your order will be filled as soon as bulbs are received. We name as bulbs are received. We name only a few kinds here. You should send for fall catalogue, which contains a full descriptive list.

HYACINTHS.—Either double or single mixed. Each 7c, doz, 65c.

TULIPS.—Double or single mixed. Each 5c, doz. 30c.

NARCISSUS OR DAFFODILS,—Mixed varieties. Each 5c, doz. 50c. CROCUS .- Mixed colors. Doz. 10c. SCILLA SIBERICA. - Each 4c,

8NOWDROPS.—Single—extra fine bulbs, 20c per doz. Double—extra fine bulbs, 30c per doz.

WINTER BLOOMING BULBS.

SPIDER LILY.

ASPARAGUS TENNISIMUS.

FLOWER PLANTS.

We are now making a specialty of this branch of our business, and are devoting a large space to the growing of flower plants exclusively for the mail trade, as they require special culture for this purpose, and must be hardy as well as strong, vigorous and healthy. Plants that have been pushed ahead and had a mushroom growth, such as is common in hothouses, are of but little value for mailing. Our system of packing is so very complete that plants arrive in almost as perfect a condition after traveling many hundreds of miles as they were when packed. At prices named we send the plants postpaid. When plants are ordered to be sent by express, we not only send larger plants, but also put in enough extrast to cover the express charges, and, where it is possible to do so, we would advise our customers to have their plants shipped in this way. When ordering in this department, please mark on order sheet about the date you would like the plants sent, otherwise we ship as quickly as possible, or when weather permits.

SIZE OF PLANT ORDERS,—While we wish to be as accommodating as possible, we must decline to fill any plant order amounting to less than fifty cents. By our careful system of packing it is impossible for us to pack an order at a cest of much less than twenty-five cents, no matter if the order is only for a single plant; consequently it will readily be seen from this that all orders for less than fifty cents would have to be filled at a loss. Plant orders amounting to less than fifty cents are not desired, and will not be filled unless ten cents extra is sent to cover our extra cost of package and postage. Above applies to plant orders only. No matter how small a seed order, if only for a single packet, we are always glad to fill it. No discount on special collections

DISCOUNTS.—Plants amounting to \$1.10 for \$1.00, \$2.25 for \$2.00, \$3.50 for \$3.00, \$6.00 for \$5.00.

ORDERS FOR PLANTS MUST AMOUNT TO AT LEAST 50 CENTS.

ASPARAGUS.

TENNISIMUS.—Beautiful species of climbing habit. Remarkable for the delicate appearance of its foliage. The sprays are beautiful used with cut flowers and in the arrangement of bouquets. Each 15c.

PLUMOSUS.—One of the handsomest of our foliage plants. The leaves are a bright green, gracefully arched, and as finely woven as the finest silken mesh. Each 25c.

CHRYSANTHEMUMS.

CHRYSANTHEMUMS.

These are now, and deservedly, the most fashions flowers. Their easy culture and freedom from in commend them to the most inexperienced cultivato the varied and gorgeous colors and fantastic shapes of the varieties make them the fashionable flower of:

JESSICA.—A most beautiful, clear, pure white, wo long petals. A large flower of splendid shape. Plan orous grower: carry and profuse bloomer. Each 15c.

LOUIS BCHMER.—The splendid new Pink Ostric Chrysanthemum. Grand flowers, splendid globula petals broad and lasting and thickly covered with downy hairs so much admired, and from which the Ostrich Plume is derived; color deep, rich pink; sine. Plant s rong and vigorous. Each 15c.

KIOTA.—Soft, clear, incurving yellow; full in the 6 to? inches in diameter, and nearly as deep. Each 1 CONSTELLATION.—Nearest to a true pink yet into Good sized flowers with straight petals. Each 15c.

FUGENE DAILLEDOUZE.—Large, full, double, bright yellow, of great substance. Each 15c.

JOANNA.—One of the very finest bronze to date. large, beautiful, half globular form, with incurved, petals of solid build; carries flowers erect on stiff sten deep green foliage, well up to flower; late. Each 20c MRS. A. J. DREXEL.—A splendid crimson; sha spherical; petalslong, arranged like rays. Each 15c.

THE BARD.—Extremely double, reflexed variety dium size. Color a rich crimson, with outer edges of tinged with gold. Vigorous grower. Each 15c.

TVORY.—Flower a perfect ball of purest white, ver and of immense size, some being 6 in. in diameter.

BEGONIAS.

Each year these are becoming more popular, and we offer several most desirable varieties this season, which we are sure our customers will be pleased with.

will be pleased with.

VERNON,—Of unusual value for bedding, as it will stand the hot summer sun. Comes into flower in June and con inues to make a most striking effect in beds or borders throughout the entire summer. The flowers are of a brilliant, deep red color; the foliage is very abundant, stiff and glossy, and of a fine, green color, spotted and margined with bronze purple. It thrives everywhere and is equally good as a winter bloomer. It makes fine, stocky plants, which are covered all winter attful crimson flowers, and so easily cared for everyone it. See cut. Each 15c.

3 ROOTED.—Don't fail to try them. See description in bulb department. Single-flowered, 15c each; per doz. \$1.50. Double, 25c each; per

each; per doz. \$2.50.

LOUIS ERDODY,—This is an interesting and curiously handsome new variety which retains the general character of the Rex family as to growth, but is so distinct in form and peculiar leaf formation that it stands out unique and striking in all its individual beauty. Having a good stock, we are able to place this novelty within the reach of all. See cut. Each 35c.

METALICA.—This elegant variety has very large, glossy leaves, shaded with green, crimson and olive, with a peculiar metalic lustre over all; flowers a clear pink, shaded white; a grand pot plant. Each 10c.

RUBRA.--One of the finest, a conbloomer; color scarlet rose. Each 10c.

REX.—A magnificent class of house plants, remarkable for the variety and beautiful markings of the foliage. It is well adapted to vases and baskets in shaded situations. A fine large assortment. Each 25c.

ARGENTEA GUTTATA.—It has purple bronze leaves, oblong in shape, with very markings, and is in every way a most beautiful begonia. It produces lite flowers in bunches on ends of growth stems. Splendid for house culture.

SEMPER FLORENS GIGANTEA ROSEA.—A superb variety, strong upright, owth; fine, large flowers of clear, cardinal red, and the bud only exceeded in auty by the open flower. Each 25c.

SERTHA McGREGOR.—A new Rex variety; f nine by six inches, long-pointed and with p notches. A free, strong grower, producing age in abundance. The center of the leaf is all, dark, and palm shaped the body of leaf ng solid silver, outlined with bronze. Exmely elegant. Each 25c.

CICINIFOLIA.-The leaf is very large-will avge a foot or more in diameter—and is shaped a ricinus. Color a rich green, with reddish rkings. In bloom it is magnificent; the panish lifted high and spray-like, quite clear of the age. One of the best for winter blooming.

ACHANIA.

[ALVAVISCUS.—A vigorous growing plant re-ibling abutilons in habit and growth. Flowers lliant scarlet. Each 10c.

ACHILLEA.

LBA. (The Pearl.)—A new variety originating france. The flowers are large, forming a beautil plant from eighteen inches to two feet in this completely covered with pure white vers from July until frost; hardy. Each 10c.

LOUIS ERDODY BEGONIA.

LOUIS BOEHMER CHRYSANTHEMUM.

CARNATIONS.-1, Silver Spray. 2, American Flag.

MANETTA.

BICOLOR.—Possesses many real points of merit. Its remarkably continuous and profuse blooming qualities, the ease with which it can be grown, its attractive appearance, its adaptability for both pot culture and bedding, will all tend to make it indispensible for bay windows, vases, baskets, etc. It also succeeds well when bedded out, as it grows rapidly and blooms freely all summer. It is especially adapted to winter blooming in the house. A constant bloomer. Color vivid crimson scarlet, tipped with golden yellow. Each 10c; extra large plants 25c.

FUCHSIAS.

These, when in full bloom, are the most graceful of all cultivated plants.

MRS. E. G. HILL.—The most perfect and beautiful double white fuchsia ever raised. The short tube and sepals are a bright, rich, reddish crimson color, corolla extra large, full and double; flower of the largest size; is of robust, upright growth, compact and very symmetrical. Each 15c.

BLACK PRINCE.—Tube and sepals bright waxy carmine, sepals large and broad with pale green tips; large, open, pale pink corolla. They are easily grown in tree form. Each 10c.

PHENOMENAL.—Very large flowered sort; sepals bright scarlet with rich violet purple corolla, very double, flaked with red. Each 10c.

STORM KING.—Of enormous size. The sepals are glowing scarlet crimson, while the large double corolla is of delicate waxy whiteness, elegantly penciled with deep, bright crimson. Each 15c.

EARL OF BEACONSFIELD, -Three inches long, deep carmine. Each 10c-SPECIOSA.—Sepals blush, corolla carmine. Each 10c.

SNOW FAIRY.—Sepals crimson; double, pure white corolla. Each 10c.

NIGHT-BLOOMING CEREUS.

This gorgeous cactus, which usually opens at seven o'clock, evenings, attains its greatest beauty and perfection at twelve, bears abundant blossoms, measuring twelve inches in diameter, and of delicious fragrance. The sort we offer is very free blooming, requiring little care. Color, creamy white.

COLEUS.

The coleus is the best and cheapest ornamental leaved plant we have for prnamental bedding. A few dozen of these plants will make a beautiful bed. There is such an endless variety in their colors and markings that with a little taste in planting varieties, the most gratifying results can be obtained at a trifling cost. Each 10c, doz. 75c.

CARNATIONS.

Fragrant flowers are always sought after, and the rich, spicy odor of the carnation, positively delicious, combined with various colors and handsome form, leaves but little to be desired. They are very easily grown and bloom freely either as bedding plants in summer, or in the greenhouse or window garden in winter.

SILVER SPRAY.—This is a grand, pure white, early and free-flowering carnation of healthy, vigorous growth; makes fine bushy plants, and bears an abundance of flowers on long stems; never bursts; petals, finely fringed and very fragrant; an excellent variety, and best of all for general use. Each 15c.

AMERICAN FLAG.—An immense, strong, vigorous grower and profuse bloomer. Very fragrant. The color is distinct from any other variety, being distinctly and regularly striped vivid scarlet and pure white, giving it a most novel and striking effect. Each 15c.

GOV. RUSSELL.—A pure white with a large flower on a long, stiff stem, and does not burst its calyx. It is beautifully shaped, and does finely as a pot plant.

PRESIDENT GARFIELD.—Deep red, fine large flowers of great substance. A very good variety. Each 10c.

LIZZIE McGOWAN.—Color pure paper white; petals crisp and lasting; very large and regular formed flowers almost like roses; a strong grower and very free flowering. Valuable all the year round. Each 10c.

TIDAL WAVE.—Flowers very large and perfect in form; color bright rosy pink, changing to a beautiful soft pink with salmon shading when flowers are fully expanded. Excellent variety for pot culture. Each 10c.

GOLD FINCH.—A beautiful, new, golden yellow carnation, with not a particle of stripe or foreign color; full and double; free, vigorous and healthy grower and continuous bloomer. Produces a great number of flowers. Each 15c.

DAYBREAK.—Color is exquisite, a charming shade of flesh pink. Daybreak became so popular among flower lovers that the blooms readily sold for more than any other variety in the market the past season. The growth of the plant is vigorous and healthy, and the flowers possess the carnation fragrance in a marked degree. Each 15c.

IVY LEAVED GERANIUMS.

CHARLES TURNER.—Handsomest of any Ivy geranium. The flowers are very double, full and perfect in form; color rich, deep pink. The plant is a strong grower, producing flowers at every joint. See illustration. All should try it. Each 15c.

Tation. All should try it. Each ibc.

JEAN DE ARCH.—Very large and finest white in existence. Each ibc.

P. CROZY.—A grand hybrid between the Zonales and Iyies, having the foliage of the former, but very heavy in texture, and while the forms of truss and florets are found only among the Ivies, the color is soft, bright scarlet with veinings of maroon. Habit of plant very dwarf and compact, and one of the mos prolific flowering sorts in existence. Each ibc.

Ten other choice varieties. Each 10c.

DOUBLE GERANIUMS.

BRUANTI.—The finest double bedding geranium in cultivation. The leafage is round, nicely zoned, having great texture and substance. The color of the flower is light vermillion red; trusses exceptionally large and borne in immense spherical balls often eight inches in diameter. Each 15c.

S. A. NUTT.—A very fine, dark, deep, rich, velvety maroon; an excellent bedder and a perfect pot plant. Each 10c.

MRS, E. G. HILL, -- A most distinct and pleasing shade of salmon with light shading at the center. Each 10c.

BLANCHE MOULAS.—A grand bedding variety of much merit. The flowers are large, salmon, beautifully bordered with white. A geranium of rare beauty. Each 10c.

MARVEL.—Very large, dark, velvety scarlet. A glowing color. Each 10c.

LEON SAY.—Large bold trusses of dark vermillion-red. Darkest of any geranium. Fine for bedding. Each 10c.

GOLD FINDER.—A rich, golden, orange scarlet, its large trusses opening freely, the habit being as free and robust as that of any other variety. Yellowest of all geraniums. Each 10c.

GLORIE DE FRANCE.—A grand variety; flowers large and double; center distinct, dark salmon with large border of rosy white. Each

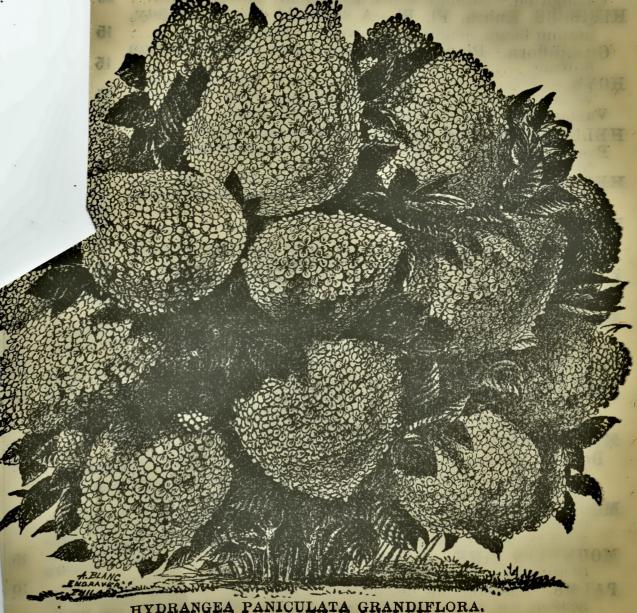

HARRIET THORPE.—Delicate blush, shaded with pearl pink; trusses large and well shaped. Each 10c.

> ASA GRAY.—Orange salmon. Each 10c. BISHOP WOOD.—Scarlet, shading to vermillion. Each 10c.

> LA FAVORITE.—This is the best double white geranium ever introduced; a strong grower and profuse bloomer; trusses very large; flowers beautifully formed and of the purest snowy white; plant is of close, compact habit, and remarkably free flowering. Each 15c.

HYDRANGEA.

PANICULATA GRANDIFLORA.—Tens of thousands of these noble summer and autumn flowering shrubs have been sold the past few years and the demand is still good. Absolutely hardy grown in any soil, and bloom the same year they are set out. They flower abundantly, bearing hundreds of immense panicles of bloom, white at first and turning to rose in autumn. To make a fine specimen, the soil should be as carefully prepared as for any shrub. An annual shortening as for any shrub. An annual shortening of the branches tends to increase the size of the flowers. Each 15c.

ı		15
	VIOLET, Swanley White.—A truly superb variety which origin-	
	ated in Italy. It is the best double pure white variety, bears a	
	profusion of large, snowy sweet-scented blossoms; it is not un-	1
	common for a plant to have as many as 50 flowers open at once	15
	VERBENA—One of the most popular of all plants for bedding; we	0.1
	have all varieties, including all the new kinds; doz. 75c	10

NURSERY DEPARTMENT.

Nothing is more healthful than fruit, and nothing more easily grown. Most of our customers can spare room for a small bed of strawberries, a few rows of raspberries, blackberries, currants or grapes, and what is more delicious than a dish of fresh fruit from your own garden, instead of depending upon fruit which has stood in the hot sun all day in a market stall. There is really no comparison in flavor. It is wonderful the amount of fruit which can be

PARAGON.

APPLES.

We grow over one hundred sorts, yet are not always able to supply all kinds called for. But if selections are partly left to us we can always fill the place of any sort we may be out of with others equally as good and ripening at the same season; the same is true of other fruits. Below we give a partial list of our best known varieties, of which we have a large stock.

Which we have a large stock.

YELLOW TRANSPARENT.—The earliest and best; skin clear white, changing to pale yellow when fully ripe; flesh white, tender, juicy, sprightly, sub-acid; good early bearer.

RED ASTRACHAN.—Medium size, beautiful deep crimson, striped yellow, hardy and good quality.

DUCHESS.—Of good size, yellow, streaked with red, juicy, rich sub-acid, a favorite everywhere.

COLE'S QUINCE.—Large size, greenish yellow, very best quality.

Bears well when quite young.

BENONI.—Medium size, deep red color, rich flavor.

BENONI.—Medium size, deep red color, rich flavor.

AUTUMN SORTS.

WEALTHY.—A perfect iron-clad. Fruit of large size, of fine appearance and quality, rich, sub-acid and delicious. An early and profuse bearer and quick seller on the market; keeps well.

LONGFIELD.—One of the best of the Russian varieties, an early and abundant bearer and the fruit is of most excellent, rich, sprightly sub-acid quality, from October to February. Medium size, yellow with a decided blush on one side.

SNOW OR FAMEUSE.—Very popular, medium size, fine quality, UTIER'S RED.—Medium to large, and one of our best autumn sorts.

HAAS OR GROS POMIER (meaning big apple).—A large handsome, red striped fall apple, juicy and very productive. Hardy.

WINTER SORTS.

WINTER SORTS.

RAWLE'S JANET (Jennetin).—Medium size, greenish yellow, striped with red, rich, crisp and juicy; a long keeper

WALBRIDGE.—Medium size, very good quality; one of our hardiest and best keeping sorts. Handsomely striped red.

WILLOW TWIG.—Medium to large, good quality; popular.

SHERIFF.—A small round apple of good quality; very hardy.

GRIMES' GOLDEN.—Medium to large, golden yellow and fiesh a still deeper golden, sub-acid, rich, spicy, aromatic; one of our very best and most profitable market sorts; there is nothing superior in quality.

ROMAN STEM.—Medium size, brown russeted, very good quality; desirable for home use.

TALMAN SWEET.—Medium size, yellow and red, rich and sweet.

grown in a space thirty or forty feet square, and it costs but little for plants sufficient to fill it. And then you certainly have room enough for a few fruit trees. It takes no more room or trouble to grow an apple or cherry tree than it does a shade tree and you will have both shade

and fruit.

Our stock of all kinds has made a very fair growth the past season, and is in splendid condition, thoroughly acclimated, hardy, strong, well grown, properly labeled, and all will be pleased who order from us. All stock is carefully packed and shipped by express or freight at expense of purchaser unless stated by mailbut the present special rates of express and freight charges are very low. Don't buy of tree peddlers, but send your order to us and be sure of getting what you want.

TIME OF SHIPMENT.—For south of Iowa-line we begin shipments March 20th; for Iowa-and other states of the same latitude, about April 10th. For north, about April 20th. Send your order early so that we can select stock for you and have no delay.

DISCOUNTS.—On orders amounting to \$5.00 or over you may select stock to the amount of 10 per cent extra. Five of any sort at the ten rate, six at the dozen rate, and fifty at the hundred rate. If you want a large amount, send as your list and we will make special prices where ever possible.

NOTICE.—Orders for nursery stock are al-ways shipped direct from the nursery and they must amount to at least 50 cents.

PAGE'S IDEAL.—This grand new variety which we now offer for the first time originated in Central Iowa and was named by the introducer in honor of Chas. N. Page, the manager of the Iowa Seed Co. It is a seedling and has proved to be an immense bearer of choice winter apples are medium to large in size, of a greenish yellow color with one side handsomely suffused or blushed with red. In quality it is one of the best producing an abundant crop of fine shaped choice specimen fruits. Season December to March. Each 50c; doz. \$4.90.

PARAGON.—A seedling from Tennessee. The original tree is over fifty years old, still vigorous and bearing, though mutilated by storms. Young trees show the same remarkable vigor of growth, bearing very young and are very productive. Fruit large, roundish, somewhat fiatened; color dark red, slightly streaked; flesh firm, yellow, crisp, aromatic, sub-acid and juicy. A very late keeper, rich and of excellent quality. Is thought to be a cross between Wine-sap and Limber-twig, combining the good qualities of each. The large size and showy appearance of this apple attracted much admiration at the World's Fair. Each 50c, doz. \$4.00.

PEWAUKEE.—Medium size, bright yellow, splashed and striped ad, sub-acid, with rich, aromatic flavor. IOWA BLUSH.—Hardy and desirable for the north; small and good

quality. WOLF RIVER. — The famous prize apple from Wisconsin which took three first prizes at the New Orleans Exposition. Very hardy. a strong grower and a profuse bearer of large, beautiful fruit of excellent quality. Color light yellow, shaded with crimson and red; very showy. Has been grown to the weight of twenty-seven ounces. JONATHAN.—Popular everywhere; medium size, handsome, deep red color; juicy, rich, and always brings an extra price; trees scarce this year.

this year.

this year.

BEN DAVIS.—Large striped apple; handsome and bears well.

McMAHON.—Large, beautiful, glossy white, with delicate crimsome cheek, juicy, lively, tart flavor; good for cooking or desert.

FLORA BELLFLOWER.—Fine, large, yellow fruit of good quality.

PRICE'S SWEET.—A large, late keeping greenish yellow apple of flat shape; tree very hardy, claimed by many to be of superior quality to Tallman Sweet.

CHISMAN.—An Iowa apple which has been fruited for twelve years and proved perfectly hardy; large size, color yellow with a blush cheek; an early bearer, very productive; long keeper, tender, juicy, sub-acid and delicious; in use all winter.

PRICES.—For any of the above, except Page's Ideal and Paragon, 4 to 6 feet, each, 20c; doz. \$2.00.

RUSSIAN APPLES.

May be relied on as strictly genuine, as the stock was procured directly from the Iowa Agricultural College. We will make our patrons, who wish it, a selection of different sorts at the same price. Titus, Autonovka, Borsdorf, Grandmother, Bohemian Girl, Switzer, Longfield, Good Pleasant, and twenty-five other varieties; 4 to 6 fleet. each 30c; doz. \$2.25.

CRAB APPLES.

HYSLOP.—Large, deep crimson; one of the most beautiful of crabs: very popular; keeps well. RED SIBERIAN.—Small, yellow and scarlet, handsome, tree erect, full grower and early bearer. TRAMS—CENDENT.—Large, yellow, mostly covered with red; tree very vigarous and productive; popular and desirable; September and October. WHINLEY'S NO. 20.—One of the largest of crabs, glossy, green, splashed carmine, firm, juicy, pleasant, great bearer; excellent for cider. SOULARD.—A very large native crab; originally found on the Illinois river; any of above, 4 to 6 feet, each 25c; doz., \$2.25.

PEACHES.

The following varieties of peaches are all hardy, and succeed well as far north as central Iowa, and there is a growing demand for them. CROSBY.—A handsome new variety of medium size, rich orange yellow with blush: freestone, pit small, flesh yellow, juley and sweet. Tree low, spreading; willowy habit of growth; perfectly hardy in a peach country. Each 50c, 6x, 85.00.

TONG PA.—A large freestone Chinese white peach. Perfectly hardy.

ELBERTA.—Large size, beautiful color, yellow and red, delicious quality, a vigorous grower, one of the most productive on all soils: a good shipper.

ductive on all soils: a good shipper.

BOKARA NO. 3.—The most hardy of all varieties. Has stood 28° below zero near Des Moines and borne a crop every year. Fruit grown on our place was shown at World's Fair, and measured seven inches in circumference, and were in good condition after having been picked for a month. It is a freestone variety, flesh of good quality, skin tough, yellow, with red cheek. Each 50c, doz. \$5.

CHAMPION.—Hardy, and should head every list for Iowa growers. Large size, handsome. Iuscious fruit; skin creamy handsome. Iuscious fruit; skin creamy thandsome. Inscious fruit; skin creamy thandsome.

CHERRIES.

THE WRAGG.—Sturdy grower and immense bearer of large, handsome, dark colored fruit. The original trees of the Wragg cherry are still growing in Dallas county, lowa, and are thirty years old, still bearing fair crops of fruit. It is undoubtedly the most profitable late cherry introduced for Minnesota, Wisconsin and the northwest. It is a large, dark colored fruit and should not be picked until fully ripe. By covering our trees with netting to protect from birds, we have had fresh fruit on till the first week in September for the past three years. It is highly recommended by the State Horticultural Society. Four to six feet, each 50c, doz. \$5.00.

EARLY RICHMOND.—The best early, medium size, dark red, juicy

and sprightly acid.

ENGLISH MORELLO.—Blackish red. rich, acid, quite productive.

MONTMORENCY.—Large, bright red, acid.

DYE HOUSE.—Medium. rich, juicy and of good quality when fully ripe; very productive; little earlier than Richmond; hardy.

PRICES.—Above 4 varieties, strong trees, 4 to 6 ft., each 40c, doz. \$4.00.

RUSSIAN CHERRIES.—From the long list of Russian cherries we have only selected those that were best adapted to our soil and climate. The following list we recommend are those that we have thoroughly tested: Russian Ostheim Lutovka. Orel 24, Bessarabian, Bruseler, Braune, Griote_De Nord, 4 to 5 feet, each 60c, doz. \$5.00.

PLUMS.

Iowa is the home of the best plums for the northwest. The varieties we offer have been thoroughly tested, and we only grow those that experience has shown us to be the best.

that experience has shown us to be the best.

ABUNDANCE.—This is unlike any other plum. It is exceedingly hardy. Its propensity for early bearing is such that it loads in the nursery row, bending the limb with the weight of the great ropes of fruit until they sometimes break, and this is the case every year. Many who have grown it claim that the curculio has no effect upon it, the eggs failing to hatch and produce the destructive grub. Sometimes even little one-year-old saplings, only two feet high, are white with bloom and set heavily with large fine plums. The fruit is large, showy and beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom. Flesh light yellow, exceedingly juicy and tender, and of a delicious sweetness. Each 50c, doz. \$5.00.

STODDART.—The largest and finest native

STODDART.—The largest and finest native plum known. Although a new variety, it has been tested in northeastern Iowa for about ten years, and for large size, hardiness of tree, good quality and abundant bearing, we think it has no competitor. Many specimens measure 6½ inches and upward. It is the most profitable native plum known. Each 75c.

DE SOTO.—Medium size, good quality, has proved profitable wherever planted.

WOLF.—Large, dark red, good quality. Extra fine for cooking and canning by reason of its being a freestone. It is a vigorous grower, entirely hardy, and an abundant annual

HAWKEYE.—Very large, dark red, hand-some, rich and good. Hardy and productive. WEAVER.—An old, well known and favorite

WYANT.—This fine new native plum is considered by Prof. Budd as one of the best.

FOREST GARDEN.—Large, of good quality, and the best very early variety.

ROLLINGSTONE.—Not so large as some, but of the very highest quality, and covered with such a deep bloom that it looks to be a "blue"

Any of the above, except Abundance and Stoddart, 4 to 6 feet, each 40c, doz. \$1.00.

PEARS.

KOONCE,—Medium to large; yellow with blush, very handsome, early and of delictous quality. Tree vigorous, good grower and productive.

BESSEMIANKA.—Famous seedless pear of Russia. Medium size, russeted, very sweet, tender, juicy, delicious. Hardy.

KIEFFER'S HYBRID.—It is a fair dessert fruit and one of the very best for canning and preserving. Its large size and handsome appearance always causes it to sell well on the market. Its freedom from blight, early bearing, productiveness, vigorous growth and handsome appearance indicate it has come to stay. Season October and November.

IDAHO.—Large and hand-some, core small, skin golden yellow, with russety spots; flesh melting, juicy, with a sprightly, vinous, delicious flavor. Season, September and October.

FLEMISH BEAUTY.-Large juicy, rich flavored. September and October.

BARTLETT.—Very popular, large clear yellow; rich, juicy, high flavored, great bearer.

Any of the above, 3 to 5 feet, each 40c, doz. \$4.00.

I BUSHEL FROM A 4 YEARS OLD KIEFFER PEAR TREE.
